The treaty or understanding, whichever it may be, is likely to be mutually satisfactory. Russia obtains recognized control of its outlet to the sea; England gains the right to build and operate railways in the most thickly-settled portion of the Empire. The compromise is particularly interesting as marking again Lord Salisbury's diplomatic methods. His purpose has obviously been, from the first, the assurance of international peace through peaceful methods. But the policy's distinctive character has been the exchange of a commercial quid pro quo. Not to go any further back, the diplomatic moves between the Salisbury Government and Germany will readily occur to mind. The Kaiser's hasty telegram to President Kruger in February of 1896 certainly appeared to place the two European States in an attitude of hostility regarding Eastern and Southern Africa. This dispute has been entirely smoothed over by a harmonious adjustment of commercial privileges, and within three or four months it has become the fashion to speak of Germany as a public ally of England. While it is true that France last autumn was forced out of its territorial pretensions in Africa by a show of superior force, it is highly probable that the rumors of concessions to France, in the way of public recognition of its suzerainty in other parts of North Africa, had good foundation. Certainly it would be hard on any other basis to explain the fact that on the very heels of the apparent humiliation of France in the Nile Valley came intimations of a friendly adjustment of that other Anglo-French bone of contention, the shore privileges of Western Newfoundland. Within a month or two of these commercial overtures to France comes the news of the Anglo-Russian understanding.

History will probably credit Lord Salisbury with having in these negotiations grasped the spirit of present-day diplomacy more positively than any other statesman. If he is to enjoy a conspicuous place in the gallery of European diplomatists, this will undoubtedly be his claim to it. The prestige of a foreign minister, and his place in history, always depend on his capacity for comprehending the real position and impulses of governments, and shaping his own policy so as to fit them. Walpole's title to eminence in diplomacy rests largely on this achievement. He understood, as contemporary continental statesmen did not, that Europe was exhausted with war, and needed a period of peace in which to repair its resources; and his means to attain this end was the steadfast maintenance of English neutrality in such a way as to preserve the balance of power in Europe, and an exchange of commercial rights and privileges with other States, wherever possible, as the basis of a treaty. Bismarck, seeking the same general end a century later, conceived the purpose of accomplishing it by erecting so formidable systems of offense and defense that nations would shrink from war. Salisbury has borrowed something from the arts of both statesmen; on the one hand carrying to its extreme the system of a sea armament, and on the other recognizing that in an epoch when nations were seeking for colonial expansion, the surest guaranty of peace, for the time at any rate, lay in a formal and equitable division of colonial dominion or prerogative. It may be recalled, in the same connection, that while Lord Salisbury was apparently forced into the international movement to occupy the Chinese coast, he was in reality the author of the African partition treaties.

How far diplomacy conducted on this two-fold basis can have permanent results, is the question which the Twentieth Century must solve. We have hitherto pointed out the intrinsic and inevitable weakness of the plan of a constantly increasing armament. Such increase cannot in the nature of things go on forever, and yet, being strictly competitive in principle, no nation can ever check the increase until all its rivals halt simultaneously. The world will learn more of the outlook in this regard when the forthcoming peace conference of the Czar begins its deliberations.

But there is also an element of great doubt in the expedient of diplomacy through formal territorial partition. In past epochs of the world's history, such agreements have frequently been used as a basis on which to found assurances of international peace, but rarely proving to be a permanent bond of friendship. The English and French occupation of North America, in its colonial days, is distinctly a case in point—the claims of the rival Powers being constantly readjusted, but never with permanent results. Much the same may be said of the French and English occupation of India a century or more ago. Indeed, the most striking of all illustrations of the weakness of partition treaties as a permanent guaranty of peace has been witnessed within the present decade. The African treaties of July 1 1890, which were hailed by Europe as a final solution of the whole disputed question, had hardly been signed and sealed five years, when Germany and England were fairly at sword's points, and had been less than nine years in effect when war between France and England was imminently threatened over this very question of territorial rights in Africa. It would be rash to predict that the more recent and even less definite settlement of claims on the coast of Asia could be more certain of permanence than this. The truth is, that each successive territorial agreement of the kind means simply that the contracting parties thereby compromise their differences on a single point. They make no pledges as to future differences on other matters, and the pledges would probably be valueless if they did.

The probability is that the hope for peace and civilized progress in the next century lies quite as much in a resolute sentiment for peace among nations able to enforce their will as in anything else. In one form or another the system of international arbitration courts, it appears to us, is bound to come into general use among the nations; but it is also quite possible that the array of nations ready to join, directly or indirectly, in punishing wanton breaches of international peace, may become so formidable as to prevent any such demonstrations, unless under the most serious circumstances.

Some notion of this kind, we are confident, has crossed the minds of the Continental Powers in connection with our own nation's recent good understanding with Great Britain. It may be that the still more recent Anglo-Russian agreement will help in the same direction; for whatever may be said of Russian bureaucracy and Russian diplomacy, there is little doubt that the Czar is personally a man of advanced ideas, and that he is individually pledged in behalf of peace. A very considerable section of contemporary British statesmen have held for years the opinion that Russia and England were natural allies. They have argued that England possesses the capital the use of which

Russia needs, and that Russia possesses the annual grains surplus which English consumers need; two facts which the Russian Minister set forth as fundamental in his recent assent to the Chinese settlement. The two States, therefore, are neither industrial nor commercial rivals, which in these days is a matter of very great importance in diplomacy. We shall not undertake to reason out this interesting view of the situation. It is at least a hopeful sign, however, when Russia, by openly acknowledging an agreement with Great Britain in the interest of peace, gives some earnest of sincerity in the recent imperial professions.

### COMMERCIAL EDUCATION.\*

Rev. Henry A. Stinson, D.D.

It has been announced that the Chamber of Commerce of New York has decided to aid Columbia University in inaugurating higher commercial education to the extent of furnishing salaries for three professors. This with the aid of professors now in the employ of the university will permit the opening of commercial classes in the near future. The enterprise has exceptional importance as the inauguration of a movement destined to have far-reaching results. Conflicting theories already exist as to what is a practical commercial education, and a deep-rooted prejudice is to be overcome against the value of any theoretical education for business as compared with the ancient method of learning a business by growing up in it. It is of no small consequence to the country at large that we should know what has already been accomplished in other lands, and what foreign experience has taught, both as to methods and as to attainable results. Lest any should think that because we are now living in times of prosperity, there is no special need of attention to commercial education, testimony that comes to us from France is significant. A French author of the highest authority, Léautey, in his "Ecoles de Commerce," says:

If the lesson of our military experience had demonstrated and borne in upon the public mind the insufficiency of our general education, the lessons of our economic experience are not yet sufficiently impressed in order to show the insufficiency of our commercial instruction. The recovery of business came, moreover, very soon, thus quieting our spirits—ending itself by misleading public opinion on the subject entirely. One doubted no longer of the commercial prosperity of the country. Why should we instruct our youth in commerce when commerce was going on so well without it? This recovery of business coming so quickly, we repeated the financial follies of the Empire, which was then like a vertigo, which took possession of the nation corrupted with the ambition of becoming rich rapidly without labor. To-day things have changed. We are paying for these follies. The lesson has been terrible. We now have time to reflect. And as we see on either side the economic progress of neighboring nations, we should recognize that our commercial education lags far in the rear. Everything, then, points to the approaching success of the schools of commerce.

The earliest commercial school of which there is record was founded in Hamburg by private enterprise in 1768. It had a brief life, but left an honorable record of meritorious work. The next step was taken by the Ancient Merchants' Guild of Leipzig, which in 1831 established the Commercial Institute, which has for a long time been the model for similar institutions in Germany. The Merchants' Guild of Gotha had a school for apprentices in commercial houses as early as 1818, but Leipzig was the first to train would-be merchants by appropriate theoretical studies. It had

\* For a previous article on this subject see the issue of April 8, page 644.

at last report no less than seven hundred pupils. To-day there are in Germany fifty-five high commercial schools, with six thousand pupils. In Austria there are thirteen, with three thousand pupils; in France seven; with many schools of lower grade. In establishing their school in 1849 the Commercial Council of Prague issued an address to the merchants of Bohemia, in which they said:

We have been obliged up to the present to seek systematic training for our sons in foreign countries, at the cost of much money and great anxiety. In the future we shall find this at home. We all recognize, moreover, how greatly such a theoretical course would aid our young people when they go into practical life, and how much more useful they are to us when they have enjoyed the training of such an institution. We send, therefore, an earnest invitation to all members of the commercial and manufacturing classes of Bohemia to assist in the establishment of these useful institutions, and by co-operative effort to leave this honorable memorial to our posterity. The purpose of this institution was thus defined in an address issued by the same body in 1856. It says: Commercial institutions belong in the same category with technical institutions in so far as they have the common purpose of promoting the material development of our welfare, but they are distinguished from them by the fundamental principles underlying their foundation. In the case of the former it is the method of natural-science training by which the technical training is accomplished; in the case of the latter, on the contrary, the thread which runs through the curriculum, co-ordinating and uniting its various parts, is not higher mathematics, is not natural science, but is that thorough general culture which embraces the complex of social knowledge and experience relating to the knowledge of the earth, relating to the economic nature of its inhabitants and of one's native country. The justification of these schools is to be found in the necessity of the higher scientific training of the merchant. This appears more and more imperative every day, as this alone qualifies him to work with such foresight and certainty as is rendered necessary by the advance of our social relations.

The movement began in Austria in 1857 with an association composed of five hundred and sixty merchants of Vienna, and a subscription fund of five hundred and thirty-three thousand florins. In thirty years this school reported having had seventeen thousand students, and having graduated more than five thousand. Its graduates are in great demand in commercial houses. Its current expenses are entirely covered by tuition fees, and it has the largest attendance of any commercial school of similar grade. It early instituted the custom of traveling scholarships, with which it sends out its young men who have had a certain practical experience, to make careful study of foreign centers of trade. At the present time there are forty of these scholarships, and the possessors of them are to be found in all important trade centers with which Austria has connection. This school at first aimed to train especially for banking, but the demand was so great that it enlarged its courses and included special training, for railroad, postal and telegraph service, and for insurance. Even this did not meet the requirements of the situation, and it was finally reorganized into a school to give the higher commercial training an acquaintance with which may be fairly demanded of every merchant, while at the same time turning out its students directly into private life furnished with complete theoretical training. The course covers three years, and embraces three modern languages, commercial geography, including knowledge of the products, population, history, trade, means of communication and so on of different lands; mathematics, including commercial arithmetic, with computation in the currencies of all countries, and the various methods in use in accounts of every form; physics, chemistry, commercial law, the laws of international commerce and of transportation, political economy, and much actual practice in business methods.

As early as 1820 two merchants started the Special School for Commerce in Paris. In 1830 it became the Superior School of Commerce, and in 1869 was taken up by the Chamber of Commerce of that city. It has been very successful, and has been widely influential, not only in France but in other countries. It has a staff of some seventy men and an annual outlay of two hundred and thirty thousand francs. Not content with this, the Paris Chamber organized in 1881 the School of Higher Commercial Studies, designed especially for training the sons of merchants. It has a large and beautiful site, with splendid buildings, on the Boulevard Malesherbes. Its course covers three years, and has a faculty of forty-four instructors. It receives foreigners on the same terms as natives, and while it has enlarged its curriculum to embrace pupils who have had only secondary instruction, it aims to do its special work for college graduates. Its curriculum shows French thoroughness, and covers a vast variety of subjects, its aim being to supply the widest theoretical training, together with exact and definite instruction in methods in actual use.

The course of instruction which a high commercial school should pursue has received much attention. Pupils are to be taught to become good employes, good buyers, good sellers, good cashiers, good accountants; but the art of buying and selling and the art of recording these operations do not constitute the whole science of commerce, nor would they insure the success of any enterprise. The art of organizing, administering and directing is fundamental and must be based on economic science. The programmes of the higher schools are intended to embrace courses upon the various kinds of industrial and commercial classification, determining the capital necessary for various enterprises, the establishment of business, the study of the laws of commerce, of raw materials, of markets, of workmanship, of general costs, of commercial and industrial organization and administration, of the importance of accounting and methods of control, the exact determination of the selling price, the keeping of inventories, the conduct of business, material and moral conditions necessary to success, of credit, of corporations, of methods of liquidation, of the duties of the employe, of the agent, of the manager, and of commercial and industrial economy. Added to these are advanced courses, laid out with the same minuteness and care, in mathematics, industrial and commercial geography, transportation, tariffs, commercial and industrial technology, raw and manufactured products, commercial law, history, political economy, foreign languages, and the art of public address.

The effect which such training produces is already recorded in the success of the young German merchants. The director of the Leipzig school in a recent report makes the following statement:

The extraordinary ability of the young German merchant, who is coming to be recognized in foreign countries (though in many cases with great unwillingness and with considerable envy) is no result of routine work. It is the consequence of careful and thorough training of our young people. Our mercantile classes should therefore derive new courage from this fact. They should rather make many steps forward than a single one backward. They should be careful not to save time and money at the wrong place. A nation whose commercial relations are extending throughout all continents, whose mercantile and naval marine is well equipped for the very best service, whose banner waves over many colonies, needs merchants of insight, financiers of wisdom, and inventive and enterprising organizers.

Two incidental facts have been brought out in the development of these foreign schools. One is that it is unwise for boys to go from elementary schools first into business, with the expectation of returning then to the commercial school for a period of further education. It is much easier for a young man to take up certain subjects and adapt himself readily to steady work in scientific and practical branches when he joins the technical instruction directly to that of his earlier school life, than when he is interrupted by experience in a business house. The years of study should be completed first. Progress is more rapid and development is surer when he goes finally into actual business completely equipped and having established thoroughly scientific and intellectual habits. Experience has also shown that an attempt to develop commercial courses side by side with other courses in the same institution (as is now being attempted in some directions in our own country) has not been successful. Such courses interfere with the healthy development of the other courses for which our commercial institutions are established, and in turn they are themselves uniformly neglected in the administration. If therefore we are to do anything in this line in our own land, it seems clear that it must be done in institutions founded for the purpose or as distinct departments of the universities. Annexed courses to schools of lower grade will not accomplish the purpose.

As to the cost of this education, it can be said that it has been proved possible in European countries for the schools to be self-supporting after the creation of the plant. With the State of New York paying in 1898 \$150 for the support of each convict in her prisons and \$185 31 for each lunatic in her asylums, while her high-school students cost only \$4 45 each, it would seem that there ought not to be much hesitation over the possible expense of any kind of education that is now needed.

Lest any should think that because of our exceptional material or geographic advantages, and the peculiar business ability of our people, we are not under the necessity of considering these things, it is well to repeat the words with which Prof. E. J. James, of the Chicago University, to whose report to the Government we are indebted for most of our data, comments upon England's relations to the same subject. He says: "The genius of the people, so eminently commercial, the physical condition of the country, and the many other circumstances which have combined to put England at the very head of the commerce of the nations, have also seemed at first to dispense with the necessity of giving time and labor to systematic school preparation for such occupations. On the other hand, the many unfavorable circumstances which have combined to prevent the growth of commerce and industry in Germany, France and Austria, have brought these nations to the recognition of the fact that thorough education along these lines was the only hope of their being able to compete with England at all. The result has been what might have been expected. Owing to the superior education and training of her youth, Germany has been steadily diminishing the disadvantages of her position, and English merchants are now awaking to the fact not only that German trade is increasing more rapidly than English, but that even the trade of England herself is passing into the hands of German merchants who have settled in London."

## THE NEED FOR A RAPID TRANSIT ROAD.

We have received the following interesting letter from Mr. Stuyvesant Fish concerning the need for, and the advantages to be derived from, a rapid transit road in New York City. The communication was a private one, not intended for publication, but in view of the attention which the subject is attracting we have obtained Mr. Fish's consent to our printing it. We leave out the introductory portion of the letter which was personal to ourselves.

NEW YORK, May 5, 1899.

William B. Dana, Editor CHRONICLE.

DEAR SIR—

\* \* \* \* \*  
The CHRONICLE, April 29, p. 798, says that the elevated and surface railroads of the boroughs of Manhattan and the Bronx carried, in 1898, of paying passengers, 504,162,146. For this, at 5 cents a passenger, they received \$25,208,107, being at the rate of \$69,063 per day.

While correct as showing earning capacity, this overstates the payments by the citizens of Manhattan and the Bronx for transit over those lines, because the fares collected are, in a large measure, paid by non-residents, and their payments here vastly exceed our payments in neighboring cities.

As shown below, I believe the population of Manhattan and the Bronx exceeds 2,250,000.

I am told and believe that a "noon-day" census of Manhattan and the Bronx, recently taken, showed a population at that hour of 3,000,000.

You can doubtless, from the reports of the elevated and of the surface lines, work the thing out more accurately, but to illustrate, I submit the following:

TABLE.

Showing the average annual charge per capita on the people of Manhattan and Bronx for transit therein, and the annual saving per capita which would be effected by a reduction of the fare from five (5) cents to four (4) cents.

	Average charge per capita per annum.	Saving by a reduction to 4c. fare.
Gross payments of fares as reported by CHRONICLE per capita per annum on the basis of a resident population of 2,250,000	\$11 20	\$2 24
Same on the basis of a "noon-day" population of 3,000,000	8 40	1 68

Assuming the correctness of the CHRONICLE'S figures, with a population of only 2,250,000, and on the untenable position that residents pay all the fares, transit, such as we have, costs us, on an average, per capita, only \$11 20 per annum, or a little over 3 cents a day, and a reduction of fares to four cents would bring to each of us \$2 24 in a year.

While on the basis of the "noon-day" population, (and we must admit that strangers pay rather more than their full share of fares) the cost is \$8 40, and the saving would be \$1 68 in a year, or less than half a cent a day. It would cost us a month of added discomfort and delay to save fourteen (14) cents.

Whichever set of figures may prove to be correct, it is to my mind perfectly plain that the very slight saving in time of say 15 minutes per day (7½ minutes each way) would be worth vastly more than any reduction in fares, or any increase in taxes. On the other hand, the arrangement recently made between the Manhattan Co. and the Third Avenue Co. seems, from the point of view of the public, to be worse than nothing. To be sure there is a reduction of fare, but this is accomplished by further burdening the main lines of the Manhattan and the Third Avenue, which are already blocked by their existing traffic.

Can't you take this matter up thoroughly and ventilate it in the CHRONICLE, by working out the value of the time lost by the people of New York by slow transit, including therein not only those who travel, but those whose time is wasted by delays of servants, agents, messengers and others coming to and going from them? My thought is that of 2,250,000 of our resident population, the time of less than 250,000 has no commercial value. I would place in this class only those who are bed-ridden or under restraint, and small children not going to school. The time of children going to school is of a very decided value; so also that of men of mature years who direct affairs and do the thinking, of the women who keep our homes, etc.

Apply, now, to the time of 2,000,000 of people the value established by law for common labor on public works, \$2 for

a day of eight hours. One-quarter of an hour is the thirty-second part of eight hours. The labor of these 2,000,000 being worth at least \$4,000,000 a day, a quarter of an hour saved therein daily would exceed \$125,000, which in turn vastly exceeds the gross revenue of all the elevated and of all the surface railroads put together.

My contention and firm belief is that a reduction of fare below five cents can lead to nothing but more over-crowding and worse service, and that a saving in time is worth more even to the poorest person.

The following very conservative estimate of population above and below 40th Street is submitted as the best attempt I can now make at guessing the amount of time wasted by our abominably slow means of transit:

POPULATION OF THE CITY OF NEW YORK AS THEN CONSTITUTED.

	1890.	1895.	Increase in 5 years.	Per cent of increase in 5 years.
South of 40th Street....	807,447	916,604	109,157	13.52
North of 40th Street....	707,854	934,456	226,602	32.01
Whole city.....	1,515,301	1,951,060	335,759	22.16

This did not, at either date, include the eastern part of what is now the Borough of the Bronx, but only Manhattan Island and the 23d and 24th wards. It is, therefore, well within bounds to apply similar percentages of increase in estimating the population in those parts of Manhattan and the Bronx above and below 40th Street for 1900 as follows:

As there were south of 40th Street, in 1895, 916,604 residents, there will be there living, in 1900, 13.52% more, or 1,034,628. And as there were north of 40th Street, in 1895, 934,456 residents, there will be there living, in 1900, 32.01% more, or 1,233,575.

This gives a population for Manhattan and the Bronx, in 1900, exceeding 2,268,103, of whom five-ninths will live north of 40th Street—that is to say, from four to fifteen miles from the Battery.

While it will not do to assume that their average journey to or from business is as great as the mean of those distances, 9 miles each way, or 18 in all, it will be perfectly safe to put it at 5 miles each way. That is to say, that the average bread-winner living above 40th Street, whose vocation takes him or her from home at all, travels 10 miles on each working day in surface or elevated railroads. As the former carry about two-thirds and the latter about one-third of all who are moved in public conveyances, we have the following:

Two-thirds of those moving travel at 6 miles per hour for ten miles and use 1 hour and 40 minutes, and one third go the 10 miles in 1 hour. Average time, say, 1 hour and 26 minutes. Rate per hour about 7 miles, or, say, one mile in 8½ minutes.

A measured mile can be, and has often been, fairly walked "heel and toe," in less time.

The CHRONICLE could do a good service, both to the public and to capital, by thoroughly working up this subject of the value of time wasted.

What we need, and can well afford to pay for, is rapid transit of the rapidest kind. Of what use is it to be whirled all the way from Buffalo to New York on the Empire State Express at 53½ miles an hour, if, after we get to 42nd Street, we must waste half an hour in going three miles.

Very sincerely yours,

STUYVESANT FISH.

### RAILROAD GROSS EARNINGS FOR APRIL.

Our compilation of the gross earnings of United States railroads for the month of April, which we present further below, affords perhaps the best indication we have yet had of the activity of general trade and the prosperity of the carrying interest. The increase in the aggregate is on the whole quite moderate, reaching only \$1,818,638, or 4.23 per cent, and quite a number of roads have suffered decreases, 36 out of the 125 roads contributing returns being so distinguished. In contrast with the very striking gains in amount and percentage recorded in many of the months of last year, this may seem to those who do not look below the surface like a very indif-

ferent exhibit. As a matter of fact, when the circumstances of the comparison and the conditions prevailing are considered, it must be regarded as a decidedly favorable and a highly encouraging showing.

When the gains were running so large last year, the explanation was found mainly in the extraordinary expansion in the grain traffic of the roads. But during April of the present year there was no increase at all in the grain movement, rather a distinct falling off. Taking wheat, corn, oats, barley and rye together, the receipts at the Western primary markets for the four weeks ending April 29 aggregated only 28,658,187 bushels the present year, against 35,386,228 bushels in the same four weeks of last year. Here then there was a loss to the Western carriers of about 6½ million bushels in this movement. At the same time the special advantage of an exceptionally high price, which proved such a stimulating circumstance to the farming industry a year ago, did not exist the present year. There was likewise a contraction in the live stock movement in the West and no very material increase in the cotton movement in the South, as against an expansion in both particulars in 1898. Thus Chicago reports deliveries of only 576,698 hogs in April 1899, against 679,311 hogs in April 1898, while the deliveries of all kinds of live stock aggregated only 18,497 car-loads, against 20,037 car-loads.

It must be remembered, furthermore, that the month had one less business day than did the same month of 1898. This arises from the fact that there were five Sundays in April 1899 against only four in April 1898, with the result of giving but 25 working days against 26. Besides this, navigation on the Great Lakes opened last year in April, whereas the present year it was delayed until the 1st of May. This delay was a matter of considerable importance to all the great trunk lines running from Lake Erie and Lake Ontario to tide-water. Had navigation been open these lines would have received a large grain tonnage from the lakes for transportation to the seaboard. The decrease of \$119,003 in the earnings of the New York Central is said to be due entirely to that circumstance. It deserves to be noted, too, that in the case of the Pacific trans-Continental roads, more particularly those close to the northern border of the United States, like the Northern Pacific, the Great Northern, etc., there was a falling off likewise in the traffic destined for Alaska. In 1898, at this time, the Klondike excitement was at its height. The Oregon Navigation alone reports a decrease in the earnings from Alaskan business of \$19,493; the same road also reports a loss in grain earnings in the sum of about \$100,000, the grain traffic having fallen off in the North-Pacific Coast territory as well as east of the Mississippi. The weather, also, in some cases, continued a drawback. In Colorado the snow blockade on the Colorado Midland was not raised until April 14.

Finally, the fact should not be overlooked that the comparison is with conspicuously good returns of earnings a year ago. Our statement for April 1898 showed almost six million dollars increase (\$5,967,869), or about 16 per cent, and only 17 out of 130 roads then reporting failed to share in the improvement. The increase of \$1,818,638 now shown comes on top of this increase, and also on top of increases in all other years (treating the roads as a whole) back to 1894.

Bearing all these matters in mind, the conclusion seems warranted that this further improvement in earnings reflects very distinctly a great growth in the volume of general and miscellaneous freight, which in turn reflects an active state of trade. Obviously except for the extra traffic derived in this way the loss from the smaller grain and live-stock movements and from the other adverse influences enumerated could not have been overcome. In the following we show the April totals for a series of years past:

	Mileage.		Earnings.		Increase or Decrease.
	Year Given.	Year Preceding.	Year Given.	Year Preceding.	
<b>April.</b>	<b>Miles.</b>	<b>Miles.</b>	<b>\$</b>	<b>\$</b>	<b>\$</b>
1895 (125 roads).....	99,460	99,355	36,598,635	35,259,821	Inc. 1,338,814
1896 (131 roads).....	95,829	95,084	37,240,278	36,124,401	Inc. 1,227,876

The loss in the grain movement extended to all the cereals, except wheat, and even in the case of wheat the exception is referable almost entirely to the heavy movement at Minneapolis, nearly all the other primary markets reporting diminished receipts. The increase at Minneapolis was over two million bushels, bringing the total deliveries of wheat at all the Western points up to 9,744,384 bushels in the four weeks this year, against only 8,863,511 bushels in the corresponding four weeks last year; of corn the receipts were 8,918,758 bushels against 12,660,989 bushels; of oats 8,481,438 against 11,907,233 bushels; of barley 1,089,569 bushels against 1,375,859; of rye 424,038 against 578,636 bushels, and of flour 875,207 bbls. against 905,939 bbls. Here are the details in our usual form.

RECEIPTS OF FLOUR AND GRAIN FOR FOUR WEEKS ENDING APRIL 29 AND SINCE JANUARY 1.

	Flour, (bbls.)	Wheat, (bush.)	Corn, (bush.)	Oats, (bush.)	Barley, (bush.)	Rye, (bush.)

It will be observed that, as is usually the case, the bulk of the falling off is found at Chicago. This fact

is very vividly disclosed when we consider the movement at that point by itself. Here is a table giving the Chicago figures for the full month, those in the above table being for an even four weeks. It will be observed that as compared with the amount of grain brought in in April last year, Chicago suffered a decrease of over five million bushels.

RECEIPTS AT CHICAGO DURING APRIL AND SINCE JANUARY 1.

	April.			Since January 1.		
	1899.	1898.	1897.	1899.	1898.	1897.

With reference to the cotton movement in the South the differences in favor of the present year, as already stated, were very slight. Thus the gross shipments overland were 97,693 bales in April 1899, against 92,560 bales in April 1898, and the receipts at the Southern ports 264,214 bales, against 262,429 bales. At several of the Southern ports the receipts fell below those of last year, as will be seen by the following:

RECEIPTS OF COTTON AT SOUTHERN PORTS IN APRIL AND FROM JANUARY 1 TO APRIL 30, IN 1899, 1898 AND 1897.

Notwithstanding the many drawbacks and adverse conditions set out above, quite a number of roads are able to report gains for considerable amounts, which thus furnishes additional testimony to the activity of general trade and the growth in merchandise traffic. The Southern Railway reports \$150,953 increase, the Louisville & Nashville \$136,708, the Canadian Pacific \$209,538, the Milwaukee & St. Paul \$330,856, the Denver & Rio Grande \$115,500, &c. There are less than half a dozen roads whose losses exceed \$30,000, and the reasons for these are nearly all explained in what has already been said.

PRINCIPAL CHANGES IN GROSS EARNINGS IN APRIL.

Increases.		Decreases.

Cin. N. O. & Tex. Paco.....	41,834	Total (representing 5 roads).....	\$429,794

When arranged in groups, the Southern and North-western groups make on the whole the best comparisons. The Southern roads must have been helped considerably by the great development of the iron industry in that part of the country. The trunk lines show a loss in large part because of the lateness of Lake navigation, as already explained, and some of

the other roads in the Middle and Middle Western sections were adversely affected in the same way.

## EARNINGS OF SOUTHERN GROUP.

\* For three weeks only in April.

† Chesapeake Ohio & Southwest and Ohio Valley roads are included for both years. Results on the Yazoo Branch (140 miles) are included for 1898 only.

‡ Totals for month of April are for railroad only.

## ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S.

The public sales of New York City bank stocks this week reach 492 shares; add to that total 10 shares of the Kings County Bank of Brooklyn and 10 shares of the Franklin Trust Co. of the same city and we have an aggregate for New York and Brooklyn of 512 shares. Of this total 225 shares were sold at auction and 287 shares on the Stock Exchange, the sales on the Exchange having been unusually large this week. No special significance attaches to any of the transactions other than the 5 shares at auction of the National City Bank, which brought 2015 this week, against a similar sale of 5 shares at 1805 last week and a sale of 10 shares in March at 1692, or a gain in the interval since March of 413 points.

\* Sale at the Stock Exchange. † Of this, 11 shares sold at Stock Exchange at 530. ‡ Of this, 10 shares sold at Stock Exchange at 370.

A meeting of the stockholders of the National Bank of North America will be held June 14 for the purpose of taking action upon a proposition to increase the capital stock of the bank from \$700,000 to \$1,000,000. It is proposed to declare for this purpose a dividend of \$30 per share out of the surplus and other profits of the bank, which, when added to the present capital, will make the desired increase in the par of the stock from \$70 to \$100 per share, there being no increase in the number of shares. After the division has been made, the capital will be \$1,000,000 and the surplus will be \$500,000. The business of the institution is reported to have been quite profitable during the past two years and the managers therefore feel disposed to take this means to restore the par of the stock to the original figure of \$100 from which it was reduced to \$70 several years ago.

The establishment by the First National Bank of Chicago of a bank pension fund for the benefit of its employees has attracted the attention of some of the New York bank officers, who are studying its features with a view to its possible adoption by individual banks in this city. The plan of the Chicago bank is said to be modeled on the plans in use in England and Canada. The basic idea of the scheme is for the bank to set aside a liberal sum as a guaranty of the adequacy of the fund for the present, and to undertake to make up any deficit in the future. The fund is to be invested by and be under the entire control of the bank. Participation by the

present employees of the institution is optional, but if any decline to join the association the bank will not consider itself under obligation to make any provision for the widows or orphans of those not participating. Hereafter employees entering the service of the bank must pass a medical examination and be subjected to the obligations connected with the fund and will have a part in its benefits. Each participant will be required to contribute 3 per cent per annum of his salary, payable in monthly instalments. No pension will be paid unless the employee shall have completed fifteen years or more of service in the bank and shall have attained the age of sixty years, though the bank may exercise discretion in this matter. On reaching the above age the employee is at liberty to retire, and if he does, and has served fifteen years, he will be entitled to a pension; should he not voluntarily retire the bank may require him to do so. At the age of sixty-five he must retire unless the bank desires to retain his services and he consents to remain. Should he become incapacitated by ill health before reaching the age of sixty he shall be permitted to retire, receiving the benefits of the fund. He must, however, annually furnish a physician's certificate of his health, and if his health shall be re-established he shall be liable, if called upon, to re-enter the service of the bank. In case of voluntary resignation or dismissal all payments made by the employee to the fund shall be returned, without interest, less any amount in which he shall be indebted to the bank. In case of the death of any participant who has not been fifteen years in the service of the bank and who leaves a widow or children, the bank may direct that his payments to the pension fund shall be returned to his legal representatives with interest computed half-yearly at the rate of 4 per cent per annum. Those who enter the service of the bank under the age of eighteen years will neither contribute to nor participate in the fund until reaching that age, when they will be required to contribute. Employees whose term of service has been under twenty-five years will not be entitled to a pension for a longer period than their term of service. For example, if such term has been sixteen years they will be entitled to pension for that term of years only. Those so entitled whose term of service has been for twenty-five years or more will be pensioned for life. Provision is made for limiting the duration of the pension of the widow or the children, payment to the former ceasing on her re-marriage, and payment to the children terminating as each attains the age of eighteen years, or marries prior thereto. In the event of a pensioned employee taking other employment without consent of the bank, his pension will be forfeited. The interest of any employee in the fund beyond what he himself has contributed to it, without interest, may be forfeited on account of unwarranted losses for which he is responsible. The pension is to be on the basis of one-fiftieth of the salary at the date of superannuation for each year of service, but it can in no case exceed thirty-five-fiftieths of the salary, with specific limitations in the larger salaries. The two hundred and fifty employees of the First National Bank of Chicago have agreed to the plan, which went into effect on the last instant.

—Payment of the \$10,590,542 indebtedness of the Assistant Treasurer at the New York Clearing House on Tuesday and of the \$5,543,832 indebtedness on Friday of last week was made without the transfer of one dollar of gold coin, or the use of gold certificates, though \$10,000,000 and \$5,000,000 of these two amounts respectively were on account of the Philippine indemnity. It will doubtless be interesting to note how these payments were made. The medium of adjustment of the balances of the Assistant Treasurer at the Clearing House has recently been what is known as "yellow tickets," or receipts for gold, negotiable only through the Clearing House, and issued by the Assistant Treasurer in amounts convenient for use by the banks and the Clearing House. These "tickets" pass from bank to bank or from banks to the Sub-Treasury as occasion may require. For example, a "ticket" for \$50,000, paid, among others, to the Clearing House in settlement of a debit balance by the Assistant Treasurer, may be received at the Clearing House by a bank in partial settlement of its creditor balance, and the next day the same "ticket" may be paid into the Clearing House by the aforesaid bank in adjustment of a debit balance, and another bank receiving the "ticket," on that or on a subsequent day, may deposit it at the Sub-Treasury in the Customs fund against which it

intends to draw checks for the account of its customers who desire to pay duties. In each of the transactions referred to the "ticket" would be recognized as representing \$50,000 in gold, just the same as a gold certificate would be recognized, and on its return to the Sub-Treasury in the manner above indicated it would be promptly canceled and never reissued. The employment of the "ticket" is to obviate the necessity of bodily transferring through all these stages the actual gold coin; hence it saves the cost and the risk which otherwise would be incurred in the transfer of the metal. The "tickets" are issued by all Sub-Treasury offices throughout the country, as receipts for gold either actually deposited or indirectly received. By indirect receipt is meant the theoretical deposit of gold at a Sub-Treasury.

The "yellow tickets" with which payment of the Philippine indemnity was made were of denominations ranging from \$100,000 to \$500,000. These, with other "tickets," making up round amounts of the Assistant Treasurer's indebtedness at the Clearing House were, at the request of the Manager of the Clearing House, paid to him at the Sub-Treasury and they were subsequently paid by the said Manager to the National City Bank in settlement of that institution's credit balance resulting from the collection of the indemnity warrants. Gradually these tickets are being returned to the Sub-Treasury and canceled, and eventually all will be so disposed of. Their particular function, the payment of the indemnity, was discharged, however, when they were received at the New York Clearing House in settlement of the indebtedness of the Assistant Treasurer and when they were accepted by the National City Bank as representatives of the actual gold coin. At the moment of writing it is not positively known when the warrant for the remaining \$5,000,000 of the Philippine indemnity will be presented at the National City Bank for collection. But no doubt the collection will be made through the Clearing House and in the same manner as were the other warrants.

—On Wednesday Mr. James W. Alexander, who has been Vice-President since the organization, was chosen President of the Equitable Life Assurance Society to succeed the late Henry B. Hyde. Mr. James H. Hyde, a son of the deceased, was elected Vice-President, Mr. Gage E. Tarbell Second Vice-President and George T. Wilson Third Vice-President. The directors adopted resolutions expressing sorrow at the loss of the founder of the Society and appreciation of his labors in the promotion of its success.

—The New York Realty Bond Exchange and Trust Company is a new corporation organized for conducting a general banking and trust business, for aiding in making real estate negotiable and useful for collateral, and to guarantee payment of principal and interest on mortgages. The company will also finance building loans and conduct an exchange for the purpose of dealing in securities. The old Real Estate Exchange building, 59 to 65 Liberty Street, has been bought by the company for \$580,000. The directors of the new corporation are F. P. Olcott, Hugh J. Grant, Anthony N. Brady, James Stillman, Henry O. Havemeyer, John D. Crimmins, James N. Jarvie, James H. Post, Frederick Southack, Alwyn Ball, Jr., Michael Coleman and Henry Morganthau. The capital is \$1,000,000 and the surplus is \$500,000.

—The Comptroller of the Currency has, on the application of the banks of Indianapolis, Indiana, designated that city as a reserve city. Portland, Oregon, was the last previous appointment, having been so designated in January 1899. Indianapolis consequently makes twenty-five reserve cities, which are required to carry 15 per cent of reserve to deposits. Washington dispatches report that the Comptroller of the Currency has recently instituted a system of examination by bank examiners of the lines of credit carried by large borrowers at each bank. The loans by a single firm from several banks are consolidated and carefully studied, resulting frequently in an intimation from the Comptroller's office to the banks to reduce their lines of credit to a particular firm or corporation. Another reformatory measure is the system of double examinations in all the chief cities instead of the single annual examination heretofore in vogue. Still another is the simultaneous examination of national and State institutions which are in the same building or closely connected. In nearly every case where the Comptroller has corresponded with State officials with a view to the institution of this reform, assurances of co-operation have been received.

# Monetary & Commercial English News

[From our own correspondent.]

LONDON, Saturday, April 29.

The rise in copper shares, which has been so marked a feature of the stock markets for some time, has made rapid progress this week, Rio Tinto shares still leading. There is no doubt that the movement is chiefly due to American buying. But in Rio Tinto shares the advance is largely explained by the position of copper, the belief that the price of copper will continue high for a considerable time to come, and the extraordinary richness of the mine itself. The price this week has been as high as 48½. The old ordinary share was some time ago divided into two shares—a preference and an ordinary. And if we include the preference of £6 the price of an old share would now be 54½. The highest quotation at the time of the Secretan ring was between 25 and 28. The highest price ever touched by Rio Tinto shares in the past was during the great boom in Paris, which broke down with the *Unionne General* smash at the end of 1881. At that time the old Rio Tinto shares went to 32. Of course, it is true that Rio Tintos have been a favorite investment in France for a great many years, and that the mine itself is wonderfully rich and has a life of at least 80 years. But still a quotation of 54½ seems to be altogether excessive.

There has during the week likewise been very considerable activity in the market for Western Australian shares. They have been neglected for some time. But the water supply provided by the Government is now so good and the prospects of the mines have been so improved that attention has again turned to them.

There has also been a decided recovery in South African shares, and especially in Rhodesian shares. Mr. Rhodes is understood to have at last arranged with the Government for a guaranty for that portion of his great projected line connecting Alexandria with Cape Town which is already built—a distance of about 600 miles. Originally Mr. Rhodes wished to get a guaranty for the line to be built from Bulawayo to Tanganyika, that is, from the capital of Rhodesia to the Great Lakes. It is believed that the Colonial Office was in favor of the guaranty, though of course nothing can be known for certain on that point. But the Chancellor of the Exchequer resisted on the ground that if ever a railway through an unsettled wilderness does pay, it cannot be expected to pay for many years yet, and that it would not be right for the Government to throw away the public money for such a purpose. Then Mr. Rhodes suggested that if the Government would guarantee that portion of the line which is already built and which is earning the full interest on its bonded debt, the guaranty would enable him to borrow at so very low a rate of interest that he would be in a position to raise the money for building the remainder of the line. It is understood that the Government has agreed to this. In the meantime the principal Rhodesian mining companies and several great capitalists in London have combined together, and it is understood that Mr. Rhodes has obtained about 1¼ millions sterling, which will enable him to push forward his railway at once. He is to meet the shareholders of the Chartered Company at a special meeting next Tuesday, when no doubt he will explain all his plans to them.

In regard to Transvaal shares there is not so much doing, although it is believed that the negotiations have been resumed between the Transvaal Government and the leaders of the mining industry. There is a good deal of unrest in the Transvaal. There is evidently, indeed, a revival of the bad feeling between the Boers and the Uitlanders. And especially it is understood that President Kruger is annoyed because his request to be allowed to attend the Peace Conference has been refused. The Dutch Government wished to invite both the Transvaal and the Orange Free State. But the British Government objected on the ground that, while both States are entitled to absolute control of their own internal affairs, they are represented abroad by the British Government. President Kruger, it is understood, bitterly resents this, and hence there is some uneasiness. But the market refuses to believe that a quarrel will ensue. Still, as the week draws to a close markets have given way somewhat. On Monday next the Stock Exchange will be closed, and to-day very few members are in attendance.

In other departments very little has been doing. In the American department professional operators buy and sell, but the great public holds aloof; and indeed it does the same respecting all the other markets. There is not much activity in British securities. International securities are almost entirely neglected, and even colonial securities are not in much demand.

Money has been in fairly good demand during the week. The fortnightly Stock Exchange settlement began on Monday morning and ended on Thursday evening. And yesterday and to-day are the two last working days of the month, when there is always a certain movement of money. Moreover, a good deal of money has been locked up by the applications for new companies, more particularly in the case of the Egyptian Government irrigation certificates. Some time ago the Egyptian Government entered into a contract with Messrs. Aird for the construction of two great dams on the Nile for the purpose of irrigating Egypt, the Government to repay in thirty years the money laid out. The Messrs. Aird sold the instalments due from the Government to a com-

pany, and the company offered at the end of last week £430,000 of the certificates, which are thus secured upon Egyptian Government payments. In making applications deposits of 10 per cent had to be sent in. And as the applications amounted altogether to 11¼ millions sterling, it will be seen that over £1,100,000 has been locked up on account of this one operation during the week. The probability appears to be that the market will become easier next week, and that it will continue easy, or at all events moderately easy, during May. Trade, it is true, is wonderfully good and is still expanding. But there is not much speculation in trade; nor outside of copper and the gold markets is there very much speculation upon the Stock Exchange.

In France business is quite inactive. Indeed renewed apprehensions, excited by the continuance of the Dreyfus scandal, are raising a fear that next year's exhibition may be seriously injured. A couple of months ago there were signs of improvement in trade. But these have ceased and from almost all parts of France now come reports that matters are nearly as bad as they were last year. Money then will continue cheap in France.

In Germany liquidation is still going on, and apparently no gold is required for the present for the United States; while it is exceedingly improbable that the Indian Government will begin to take gold before the Currency Commission reports.

Upon the whole, therefore, it looks as if the market will remain fairly easy for a month or two yet. There is no demand for any other country, and the Bank of England is gradually receiving the metal, though not in very large amounts.

Meantime the India Council has checked the fall in its drafts which seemed about to set in, by the great reduction in the amount it offers for sale. This week it offered for tender only 30 lacs. The applications exceeded 283 lacs, and the whole amount offered was sold at about 1s. 4d. per rupee for bills and 1s. 4 1/2d. per rupee for telegraphic transfers. A very small amount was subsequently sold by private contract.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

## Commercial and Miscellaneous News

IMPORTS AND EXPORTS FOR THE WEEK.—The following are the imports at New York for the week ending for dry goods May 4 and for the week ending for general merchandise May 5; also totals since the beginning of the first week in January.

### FOREIGN IMPORTS AT NEW YORK.

For week.	1899.	1898.	1897.	1896.
Dry Goods.....	\$1,805,755	\$1,304,379	\$5,304,371	\$1,744,529
Gen'l mer'dise.....	8,794,563	6,491,108	13,041,648	9,000,187
Total.....	\$10,600,323	\$7,795,487	\$18,382,019	\$9,744,016
Since Jan. 1.				
Dry Goods.....	\$40,717,994	\$38,979,139	\$52,477,760	\$49,308,664
Gen'l mer'dise.....	149,644,740	122,455,530	144,533,152	127,118,293
Total 18 weeks.....	\$190,362,734	\$161,434,669	\$197,010,912	\$176,426,957

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending May 8 and from January 1 to date:

## EXPORTS FROM NEW YORK FOR THE WEEK.

	1899.	1898.	1897.	1896.
For the week.....	\$9,042,900	\$6,576,973	\$4,533,473	\$6,265,079
Prev. reported.....	158,443,192	161,879,335	128,778,551	128,488,250
Total 18 weeks.....	\$167,486,072	\$168,756,208	\$137,311,924	\$134,753,359

The following table shows the exports and imports of specie at the port of New York for the week ending May 6 and since January 1, 1899, and for the corresponding periods in 1898 and 1897.

## EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

Gold.	Exports.		Imports.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	.....	.....	.....	\$2,991,977

WALL STREET, FRIDAY, MAY 12, 1899.—5 P. M.

**The Money Market and Financial Situation.**—There was some recovery on Wednesday and Thursday from the heavy decline in stocks which had taken place. The bear movement, which continued up to the close on Tuesday, was unusually successful, finding, as it did, a considerable amount of stocks held on light margins, and the extensive liquidation may result in a healthier condition of the market. The low quotations made on Tuesday attracted some good buying on Wednesday morning, and there was evidence of a change in tone, but later a good deal of irregularity has developed, and the market closes in rather an unsatisfactory condition. Notwithstanding wide fluctuations in the stock market, in which high-grade issues participated, the market for railway bonds has continued generally steady and the tendency of Government issues has been upward.

There is reported to have been considerable buying of stocks for foreign account. However this may be, the foreign exchange market is decidedly easier, bankers' bills having been in liberal supply, and rates have declined. Evidence of extensive business operations in all parts of the country, to which attention has been frequently called of late, continue in force, and the price paid this week for a Stock Exchange membership, the highest in the history of the Exchange, indicates a belief that business in that department is to continue good. The money markets at home and abroad are becoming easier as the season advances. Financial operations this week point to a favorable statement by the local banks to-morrow.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 2½ to 6 per cent. To-day's rates on call were 3½ to 4 per cent. Prime commercial paper quoted 3¼ to 4½ per cent.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £20,422, and the percentage of reserve to liabilities was 39.50, against 38.80 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows an increase of 3,750,000 francs in gold and a decrease of 150,000 francs in silver.

The New York City Clearing-House banks in their statement of May 6 showed a decrease in the reserve held of \$2,165,200, and a surplus over the required reserve of \$19,351,950, against \$25,524,675 the previous week.

	1899 May 6	Difference from Prev. week.	1898 May 7	1897 May 8.
Capital	\$58,022,700		\$59,022,700	\$59,772,700
Surplus	77,783,790		74,450,400	73,953,800
Loans & discounts	776,702,800	Inc. 1,666,1400	571,088,200	504,920,160

Surplus reserve	19,351,950	Dec. 6,172,725	43,916,475	44,095,975

**Foreign Exchange.**—The market for foreign exchange has been weak and rates steadily declined on more liberal offerings of bankers' bills and a limited demand.

To-day's actual rates of exchange were as follows: Bankers' sixty days' sterling, 4 84¼ @ 4 85; demand, 4 86¼ @ 4 87; cables, 4 87½ @ 4 87¾; prime commercial, sixty days, 4 84¼ @ 4 84½; documentary commercial, sixty days, 4 83½ @ 4 84½; grain for payment, 4 84¼ @ 4 84½; cotton for payment, 4 83½ @ 4 83¾; cotton for acceptance, 4 84¼ @ 4 84½.

Posted rates of leading bankers follow:

	May 12.	Sixty days.	Demand.
Prime bankers' sterling bills on London	4 85½ @ 4 86		4 87½ @ 4 88
Prime commercial	4 84¼ @ 4 84½		
Documentary commercial	4 83½ @ 4 83¾		
Paris bankers' (francs)	5 19½ @ 5 20	5 17½ @ 5 18½	
Amsterdam (guilders) bankers	40 @ 40½	40½ @ 40¾	
Frankfort or Bremen (reichmarks) bankers	94½ @ 94¾		95¼ @ 95½

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling 75c. per \$1,000 premium; Charleston buying par, selling ½ premium; New Orleans, bank, \$1 00 premium; commercial, \$1 25 discount; Chicago, 10c. per \$1,000 premium; St. Louis, par.

**United States Bonds.**—Sales of Government bonds at the Board include \$1,000 4s. coup., 1895, at 129¼; \$17,300 4s. coup., 1907, at 112¾ to 113¼; \$3,000 4s. reg., 1907, at 112½; \$1,000 5s. coup., at 112½; \$132,200 3s. coup., at 108½ to 108¾; \$5,800 ditto (small bonds) at 107½ to 108, and \$13,000 3s. reg., at 109¼ to 108¾. The following are the daily closing quotations: for yearly range see seventh page following.

	Interest Periods.	May 6	May 8	May 9	May 10	May 11	May 12

\*This is the price bid at the morning board; no sale was made.

**State and Railroad Bonds.**—Sales of State bonds at the Board include \$118,000 Virginia fund, debt 2-8s of 1891 at 8.4

The market for railway bonds has been relatively steady and unusually free from special features. The volume of business in this department continued small, averaging about \$2,850,000 par value per day. There was a tendency to weakness in sympathy with the stock market, but net changes, where they have occurred in the active list, are generally limited to small fractions, and in a number of cases an advance is noted. Transactions were confined very largely to the low-grade issues which are frequently conspicuous for activity, including Atchison, Baltimore & Ohio when issued, Chesapeake & Ohio, Colorado Southern when issued, Hocking Valley, Missouri Kansas & Texas, Northern Pacific, Reading, St. Louis Southwestern, Standard Rope & Twine, Texas & Pacific, Union Pacific, Wabash and Wisconsin Central bonds.

**Stock and Bond Sales.**—The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since January 1.

Sales	Week ending May 12.	Jan. 1 to May 12.
N. Y. Stock Exch.	1899.	1898.
Government bonds	\$176,800	\$56,500
State bonds	118,000	80,000
R.R. & misc. bonds	18,958,000	17,849,800
Total	\$17,252,800	\$17,495,800
Stocks—No. shares	4,793,258	4,793,258
Par value	\$470,179,800	\$470,179,800
Bond shares, par val	\$18,675	\$18,675
Total	\$470,198,475	\$470,198,475

We add the following daily record of the transactions:

Week ending	Shares.	Par value.	Railroad, etc. Bonds.	State Bonds.	U. S. Bonds.
May 12, 1899.	\$451,012	\$44,897,200	\$1,842,500		\$2,200
Saturday.....	1,009,520	\$9,847,500	2,785,500	\$10,000	\$1,200

Thursday..	88,430	16,660	48,000	27,911	27,911	27,911
Friday ....	27,231	22,659	140,191	14,839	47,237	198,000
Total....	294,029	109,310	862,098	161,667	257,068	763,985

NOTE.—The total of sales on the Boston Exchange for the week ending May 5, omitted last week on account of non-receipt of our telegram for Friday, were as follows: Listed shares, 235,896; unlisted shares, 70,356; bonds, \$571,490

**Railroad and Miscellaneous Stocks.**—The decline in stocks which was a conspicuous feature of the market last week continued with increasing force until the close on Tuesday, when the lowest quotations were made which have recently been recorded. Transactions were on a much larger scale than of late, amounting to about 1,000,000 shares per day during the early part of the week. The liquidating movement was general and a large list of active stocks, including many of the most substantial issues, had declined an average of 10 points. The fluctuations were exceptionally wide in a number of cases, including the local traction shares and some of the industrial stocks, new and old. Extreme cases in point are Metropolitan Street Railway, Third Avenue, New York Air Brake and American Sugar Refining, which showed a loss of 36½, 28, 33 and 27½ points, respectively, within two weeks. While the railway list was less yielding, New York Central declined 11½ points, North West 11 points, Atchison preferred 9½ points, Delaware & Hudson 8½ points, St. Paul 8½ points and Great Northern preferred 6½ points in the same period. The market toned up on Wednesday; substantial recovery has been made in all departments, and the volume of business is about at the recent average. To-day's market was highly irregular, American sugar covering a range of 10½ points in its fluctuations.

**STOCKS—HIGHEST AND LOWEST SALE PRICES.**

\* These are bid and asked prices; no sales on this day. † Less than 100 shares. ‡ Ex div. and rights. § Before payment of assmt. ¶ All assessments paid.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every **TEAM** railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

ROADS.	Latest Gross Earnings.				Jan. 1 to Latest Date.

**Net Earnings Monthly to Latest Dates.**—The table following shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of April 22, 1899. The next will appear in the issue of May 20, 1899.

a Net earnings here given are after deducting taxes.

b Net earnings here given are before deducting taxes.

c Deducting other expenditures for repairs, replacements and general expenses, net income applicable to interest on bonds in March was \$169,360, against \$101,725 last year, and from January 1 to March 31 \$410,538, against \$284,185. This is the result in Mexican dollars treated (according to the company's method of keeping its accounts) as equivalent to 80 cents in United States money—that is, depreciation beyond 20 per cent has already been allowed for.

\* Decrease due to snow blockade all the month; no through trains west of Leadville.

**Interest Charges and Surplus.**—The following roads, in addition to their gross and net earnings given in the foregoing, also report charges for interest, &c., with the surplus or deficit above or below those charges

	Int'l. rentals, &c.		Bal. of Net Earns.

## STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

### STREET RAILWAYS AND TRACTION COMPANIES.

Includes Lake Shore Traction and City & Suburban for both years.  
These figures include results on Bridge Division.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of April 23, 1899. The next will appear in the issue of May 20, 1899.

Roads.	Gross Earnings.		Net Earnings.	
	1899.	1898.	1899.	1898.

## ANNUAL REPORTS.

**Annual Reports.**—The following is an index to all annual reports of steam railroads, street railways and miscellaneous companies which have been published since the last edition of the INVESTORS' AND STREET RAILWAY SUPPLEMENTS.

This index does not include reports in to-day's CHRONICLE.

RAILROADS AND MISC. CO'S—		RAILROADS & MIS. CO'S.—(Con.)	
Volume 68—	Page.	Volume 68—	Page.
American Tobacco	809	Michigan Central	809
Erie Telegraph & Telephone	809	STREET RAILWAYS

Lake Shore & Mich. Southern	828	Twin City (Minneapolis, Minn.)	
Mexican Central	828	Rapid Transit	522

### New York Chicago & St. Louis Railroad. (Report for the year ending Dec. 31, 1898.)

The report says in substance:

**General Results.**—The gross earnings for the year were \$6,391,421, being an increase of \$576,204 over those of the preceding year. The operating expenses, including taxes and rental of terminals, for the year were \$5,449,528, being an increase of \$628,204; the result being a decrease in net earnings of \$52,000, or 5.23 per cent. This unfavorable outcome reflects the prevalence of abnormally low rates and more than usually keen competition in the classes of business upon which this company is obliged to rely for its earnings. There has, however, been a great improvement in the matter of rates since the period covered by this report, and the present conditions and future prospects for business are now much more encouraging. All expenditures during the year for additions to the property have been included in expenses, no charges having been made against construction or equipment.

**Physical Condition.**—As to the physical condition, the following is given:

The length of bridges on Dec. 31, 1898, was: Iron, 3 miles, 4,117 feet; wooden, 4 miles, 2,565 feet; increase for the year in length of iron bridges, 2,161 feet; decrease in length of wooden bridges, 2,252 feet. The decrease in length of wooden bridges is principally caused by the substitution of steel structures for wooden trestles. During the year 49-16 miles of track were ballasted with gravel, 10-02 with cinders and 39 with other material; 205,572 cross ties were renewed, and 7,242 tons of new 65-pound steel rails (68½ miles) were laid, with new joint fastenings.

The condition of the engine and car equipment has been well maintained. There were expended in repairs to engines \$168,065, and in repairs to freight cars \$244,453. No additions were made to the equipment in 1898. The amount expended during the year for hire of freight cars, in excess of the amount received from other railroads for use of this company's freight equipment, was \$338,141.

**Tonnage.**—Of the 3,816,636 tons carried in 1898, leading items were as follows: Wheat, 1.46 per cent; corn, 6.29; oats, 5.43; lumber, 7.44; anthracite, 9.64; bituminous coal, 2.74; pig and bloom iron, 7.49; flour, 5.83.

**Statistics.**—The statement of operations, earnings and charges has been compiled for the CHRONICLE as follows:

OPERATIONS AND FISCAL RESULTS.

## Chicago &amp; West Michigan Railway.

(Report for the year ending Dec. 31, 1898.)

The report affords the following:

The freight earnings show an increase of 25.49 per cent and the passenger earnings of 13.69 per cent. The increase in net earnings enabled the company to pay in full the coupon due Dec. 1, 1898, of the Chicago & West Michigan 5 per cent bonds, and the coupon of the Chicago & North Michigan 5 per cent bonds due May 1, 1899, will also be paid in full. The results for the year are a fair criterion of the earning capacity of the road under fairly favorable circumstances and the outlook is encouraging.

The increase in earnings rendered possible the making of needed improvements, and the property as a whole is in better condition than at any time during the past, so that the cost of maintenance for the future should be normal.

The lease of a portion of the Muskegon Division to the Detroit Toledo & Milwaukee Railroad Co., mentioned in last year's report, was canceled, and the operation of the line was resumed by your company on April 1, 1899.

The Grand Rapids Kalamazoo & Southeastern R.R., extending from Rapid City to Stratford, in Muskegon County, 32.96 miles, was leased on Jan. 20, 1898, for a term of ten years. The operation of this road for the year has proved remunerative.

Statistics.—Earnings, expenses, charges, etc., have been compiled for the CHRONICLE as follows:

	1898.	1897.	1896.	1895.

## Detroit Grand Rapids &amp; Western Railroad.

(Report for the year ending Dec. 31, 1898.)

The report says in substance:

The gross earnings increased 16.86 per cent and the net earnings 11.42 per cent. In nearly all classes of freight handled there was a considerable increase of tonnage. On Jan. 5 the car ferry line between Muskegon, Mich., and Milwaukee, Wis., was put in operation. During the year there were transported across the lake 50,753 tons of east-bound and 39,289 tons of west-bound freight. The revenue accruing to your company from this tonnage was \$71,054. The line is now fairly well established and it is confidently expected that more satisfactory results will be shown for the ensuing year.

The bonded debt has been increased by the issue and sale of \$366,000 first consols for the purchase of 250 box cars and of the car ferry-hoat Muskegon.

The motive power is for the most part of old types, nor is the freight car equipment adequate. It will therefore be necessary to make additions from time to time.

Of the 871,519 tons carried in 1898, lumber and other forest products furnished 29.32 per cent.

## OPERATIONS, EARNINGS, EXPENSES AND CHARGES.

## United Gas Improvement.

(Report for year ending Dec. 31, 1898.)

The report for the fiscal year ended Dec. 31, 1898, read at the annual meeting May 1, showed total net earnings of \$1,864,129, an increase of \$439,830 over 1897. President Dolan, in his statement to the stockholders, according to the "Philadelphia Financial News," said in substance:

**Equitable Illuminating Gas Light Co. of Philadelphia.**—"During the thirteen months ending Dec. 31, 1898, there was expended on the Philadelphia gas works in improvements and betterments, \$3,112,829. There were laid approximately 110 miles of mains to Chestnut Hill and Manayunk and throughout the city. The company laid 12,112 services for new consumers and 14,698 services for old consumers, set 23,032 meters for new consumers and 58,968 for old consumers, about 290 new street lamps, 8,904 gas ranges, 6 gas engines, and increased the sales of gas 266,106,620 cubic feet."

**New Office.**—"The land for the new office building cost \$270,000 and the building and the equipping of it about \$525,000. The office is expected to be fully in use about June 1."

**Properties Controlled—New Acquisitions.**—"The report in 1898 detailed at great length the growth and condition of the company's properties. This growth has continued, and on Dec. 1, 1898, there was consummated a lease of the Newark Consolidated Gas Co. to the Essex & Hudson Gas Co., of the stock of which, \$3,252,500 at par, being a majority, is owned by our company. This covers the gas lighting of the city of Newark, the Oranges, Montclair, Harrison, East Newark, and the township of Kearney, in Hudson Co., N. J."

"Following the consolidation of the Newark gas properties, we purchased the two gas companies at Paterson, N. J. (which were leased to your company under contracts having only a few more years to run), and the Edison Electric Illuminating Co. of Paterson. These three companies we consolidated with the Passaic Lighting Co. into a new company known as the Paterson & Passaic Gas & Electric Co. of the stock of which \$3,100,000 at par, being a majority, is owned by the United Gas Improvement Co."

"We now have under way a consolidation of the electric light companies of Hoboken and Elizabeth, N. J., with the People's Light & Power Co., which controls the electric light plants in Newark, the Oranges, Montclair, Jersey City, Bergen Point and intermediate towns. The stockholders of those various companies have assented to the terms of the consolidation, which will result in the ownership by the U. G. I. Co. of a majority of the stock of the consolidated company, which will be known as the United Electric Co. of New Jersey."

"The Welsbach Light Co. has done a very much larger business during 1898 than during any previous year of its existence, but the increase in the business has not as yet increased the profits to the figures of 1897, made from much smaller sales at considerably higher prices."

**Earnings.**—The net earnings make the following comparison:

	1898.	1897.	1896.
Net earnings.....	\$1,864,130	\$1,424,300	\$1,282,158
Dividends, 8 per cent.....	978,910	911,572	881,960
Balance for the year.....	\$885,220	\$512,728	\$400,298

[a The increase in the capital stock from \$11,500,000 to \$15,000,000 was not authorized by the stockholders till May 2, 1899, and the new stock was not full paid till April 15, 1899.—Ed.]—V. 68, p. 121.

## GENERAL INVESTMENT NEWS.

**Reorganizations, Etc.—Latest Data as to Defaults, Reorganization Plans, Payment of Overdue Coupons, Etc.**—All facts of this nature appearing since the publication of the last issues of the INVESTORS' and the STREET RAILWAY SUPPLEMENTS may be readily found by means of the following index: This index does not include matter in to-day's CHRONICLE.

**Amalgamated Copper Co.—Allotment.**—The subscriptions for the company's stock were so largely in excess of the amount offered that the allotment to each subscriber will not exceed 20 per cent of the amount applied for.—V. 68, p. 870.

**American Alkali Co.—Incorporated.**—This company, referred to last week, was incorporated at Trenton, N. J., on May 4. The authorized capital stock is \$30,000,000, of which \$6,000,000 is to be preferred 8 per cent cumulative. The prospectus says:

This company has acquired the patent rights of Messrs. Hermite & Dubosc and John G. A. Rhodin for the United States or America. The patent of Hermite & Dubosc is the basic patent for the electrolytic production of caustic soda and bleaching powder in this country. John G. A. Rhodin's invention is by far the most efficient and economical apparatus yet invented. It is intended to build works either at Niagara Falls or Sault Ste. Marie. Extremely favorable rates for power and delivery of raw material will enable the company to produce alkali and bleaching powder at a cost far below any other manufacturer in the world. Buildings, machinery, &c., can be completed in about six months.

The quantity of caustic soda and bleaching powder required yearly for paper making, soap making, oil refining, cotton finishing, bleaching, and disinfecting, laundry and cleaning purposes, &c., in this country, amounts to about 300,000 tons of the former and 250,000 tons of the latter, and the demand is constantly increasing. Many other products are also manufactured under our patents. We propose to manufacture, with the first installation of our plant, 170,000 tons of caustic soda and 93,000 tons of bleaching powder. We can undoubtedly export and sell at large profits.

Mr. W. W. Gibbs, of Philadelphia, is interested in the company. The first instalment of \$10 per share on subscriptions to the stock of the American Alkali Co. is payable at the office of the company on or before June 1.—V. 68, p. 821.

**American Brick Co.—Stock Increased to \$15,000,000.**—This company, organized several weeks ago to consolidate brick concerns along the Hudson River, on Wednesday filed a certificate with the Secretary of State at Trenton, N. J., increasing its capital stock from \$10,000,000 to \$15,000,000 of which \$7,500,000 to be 7 per cent preferred. Oakleigh Thorne, the promoter, is quoted as saying that options on two or three large additional concerns will probably be acquired before the end of next week. At present the constituent companies are for the most part located along the Hudson River in the vicinity of Newburg, but ultimately, it is thought, the Haverstraw and Hackensack brick yards may be included.—V. 68, p. 471.

**American Carbide Lamp Co.—Incorporated.**—This company, with offices in Philadelphia, was incorporated in West Virginia April 26 to produce calcium carbide and other products. Capital, \$3,000,000. Incorporators: M. A. Shipley, D. J. M. Stokes, E. M. Parkhurst, C. P. Haskins, A. B. Davis, all of Philadelphia.

**American Hide & Leather Co.—Properties Acquired.—Incorporated.**—This company was incorporated last week in New Jersey with authorized capital stock of \$70,000,000 (of which \$30,000,000 is 7 per cent cumulative preferred stock) as a consolidation of the upper-leather companies. Of the authorized issue \$5,000,000 each of common and preferred will remain in the treasury. The company, it is stated, will have \$5,000,000 of cash as working capital. The preferred stock is preferred both as to dividends and assets. The constituent properties, which are to be taken over June 1, are as follows:

W. N. Elendrath & Co., Wm. Hecker Leather Co., White Bros. & Co., Buwell, Hubbard & Co., Middlesex Leather Co., Alley Bros. & Co., Lambson Leather Co., Wm. Tidd & Co., Hall, Knight & Co., Stephen Dow & Co., Bernard & Friedman, J. P. Crane & Co., Watauga Tanning Co., M. Robson Leather Co., C. T. Rossett's Leather Co., James Skinner Leather Co., J. S. Barnett & Bros., Webster & Co., Fred. Ruppberg Leather Co., Grey, Clark & Engel, Walker-Oakley Co., H. C. Moffatt, E. C. Coille & Co., E. Cummings & Co., J. B. Weed & Co., R. Sahn Leather Co., C. Moench & Sons, B. F. Thompson & Co. and some others.

The company controls about 85 per cent of the total upper-leather output of the country.—V. 68, p. 522.

**American Tobacco Co.—Listed.**—The New York Stock Exchange has listed the \$12,500,000 additional common stock making total amount listed \$54,500,000. The additional issue is made to acquire the entire capital stock of the Union Tobacco Co., viz.: Common stock, \$12,000,000; pref. stock, \$9,600,000. The Union Co. has no bonded debt, and among its assets "shall be \$3,000,000 in cash and at least 157,273 shares of the capital stock out of the total issue of 160,000 shares of the par value of \$25 per share, of Blackwell's Durham Tobacco Co., and all other assets, tools, machinery, tobacco, stocks in other companies owned by said Union Tobacco Co., on Feb. 21, 1899." The Blackwell's Durham Tobacco Co. is a corporation organized under the laws of North Carolina, Jan. 11, 1897, to manufacture smoking tobaccos. Its authorized capital is \$4,000,000; the company has no bonded debt, and has paid dividends on its capital stock at the rate of 6 per cent per annum to Jan. 18, 1898, and 2 per cent to the date of purchase by the said Union Tobacco Co.—V. 68, p. 870.

**Birmingham (Ala.) Water Works Co.—Control Sold.**—The Birmingham "News" says that a majority of the company's \$500,000 capital stock has been sold at 88 cents on the dollar to the American Water Works & Guarantee Co. of Pittsburgh, Pa. The minority stockholders can obtain the same price until May 27 by depositing their holdings with the Hanover National Bank in New York or the First National Bank in Birmingham. The purchaser also assumes, it is stated, the two sets of 6 per cent bonds aggregating \$639,600.—V. 68, p. 124.

**Boston & Albany.—Quarterly.**—Earnings for the quarter and the nine months ending Mar. 31 were:

3 mos. end- ing Mar. 31	Gross earnings.	Net earnings.	Interest, taxes, &c.	Dividends paid.	Balance, sur. or d. f.
1899.....	2,139,540	677,820	126,765	500,000	sur. 51,055
1898.....	2,123,080	801,212	133,667	500,000	sur. 167,545

—V. 68, p. 772.

**Carnegie Steel Co.—Official Statement.**—Before leaving for Pittsburg on Saturday Henry C. Frick, who is to be President of the company that has bought out Mr. Carnegie, said: "At present no other than Carnegie companies, except the Henry C. Frick Coke Co., are included in the new company, and there is no indication that others will be. The Carnegie Steel Co. (Limited) absorbed long ago the Edgar Thomson Steel Works, the Duquesne Steel Works, the Upper and Lower Union mills and the Keystone Bridge Works. It controls the Pittsburg Bessemer & Lake Erie R.R. and the Oliver Mining Co. of Minnesota and has for an ally the H. C. Frick Coke Co. The new company will thus own the fuel and ore fields to feed the mills which will turn out its products. It has not been definitely determined yet whether Mr. Carnegie will be paid cash for his interests or part cash and part bonds. The capital of the Carnegie Steel Co., recently incorporated in Trenton, and which will be the name of the new company, will soon be increased from \$2,000 to an amount not stated."

**Property to be Acquired.**—The "Iron Trade Review" gives the following as an official list of the properties to be transferred to the Carnegie Steel Co., viz.:

**BLAST FURNACES, STEEL PLANTS, ETC.**—(1) Edgar Thomson Works Bessemer, Pa., including Edgar Thomson Blast Furnaces, Edgar Thomson Foundry, Edgar Thomson Steel Works; (2) Duquesne Works, Duquesne, Pa., including Duquesne Blast Furnaces, Duquesne Steel Works; (3) Homestead Steel Works, Munhall, Pa., including Bessemer steel department, open-hearth steel department, rolling mills, armor plate department; (4) Carrie Blast Furnaces, Rankin, Pa.; the Lucy Blast Furnaces, Pittsburg; (5) Upper Union Mills, Pittsburg; (6) Lower Union Mills, Pittsburg; (7) Lorimer Coke Works, Lorimer, Pa.; (8) Youngloughy Coke Works, Douglas, Pa.

**RAILROADS, WATER COMPANIES, ETC.**—All the capital stock of the Carnegie Natural Gas Co., the Youngloughy Water Co., the Trollet Water Co., the Union R.R. Co., the Slack Water Railway Co. and the Youngloughy Northern Railway Co.

One-half of the capital stock of the Pittsburg Bessemer & Lake Erie R.R. Co.

**COAL AND COKE.**—All the coal and coke property of the H. C. Frick Coke Co. in Fayette and Westmoreland counties, Pa., including 40,000 acres of unmined coal, 20,000 acres of surface lands, 11,000 coke ovens, 2,500 railroad cars, 2,500 dwellings.

**DOCK COMPANIES.**—All the capital stock of the Pittsburg & Conneaut Dock Co., 43.6 per cent of the capital stock of the Pennsylvania & Lake Erie Dock Co., one-fourth of the capital stock of the New York Pennsylvania & Ohio Dock Co.

**IRON ORE AND LAND COMPANIES.**—Five-sixths of the capital stock of the Oliver Mining Co., which owns all the stock of the Metropolitan Iron & Land Co., all the stock of the Pioneer Iron Co., 89.3 per cent of the stock of the Lake Superior Iron Co. and 94 per cent of the stock of the Security Land & Exploration Co.; one-half of the capital stock of the Pewabic Co., three-fourths of the capital stock of the Pittsburg Lime Co., Limited.

For 1898 the Carnegie Steel Company's pig iron production is stated as 17 per cent of the output of the country and its Bessemer steel production as 22 per cent of that of the country. The total output of finished material for 1899 is estimated at 2,500,000 tons.—V. 68, p. 870.

**Central R.R. of New Jersey.—Quarterly.**—Earnings for the quarter ending March 31 were:

3 mos. end- Mar. 31	Gross earnings.	Net earnings.	Other income.	Interest, taxes, &c.	Balance, surplus.
1899.....	\$3,207,756	\$1,144,777	\$152,331	\$1,172,045	\$223,003
1898.....	2,824,633	919,442	237,798	1,103,002	81,148

—V. 68, p. 822.

**Listed.**—The \$4,503,800 additional stock has been ordered to be placed on the list of the New York Stock Exchange on and after June 26, 1899, as and when official notice of issuance thereof shall be received, making total amount of stock listed \$27,047,800.—V. 68, p. 822.

**Cleveland Akron & Columbus R.R.—Reported Negotiations.**—It is reported that negotiations are pending by which this property will within a few weeks pass into the control of the Pennsylvania Railroad Co. The report cannot be officially confirmed.—V. 67, p. 735.

**Chicago & Alton R.R.—Deposits Till May 20.**—The time for stockholders to deposit their holdings with the purchasing syndicate has been extended to May 20, after which date no stock will be received. More than 96 per cent of the common and more than 97 per cent of the preferred stock, it is stated, have already been deposited.—V. 68, p. 670.

**Chicago Packing & Provision Co.—No Dividend.**—The company, it is stated, has decided to pass the May dividend on the preferred stock, as it has not been earned in the past six months.—V. 67, p. 1306.

**Colorado Fuel & Iron Co.—Listed.**—The New York Stock Exchange has listed \$282,000 additional general mortgage 5 per cent gold bonds of 1943, making total amount listed to date, \$2,303,000. These additional bonds have been issued

against the following expenditures: Colorado Fuel Company's bonds paid and canceled, \$120,000; sinking fund Colorado Coal & Iron Company's mortgage, \$162,589; total, \$282,589.

**Earnings.**—The net earnings for the month of March, 1899, were \$92,894, and for the nine months ending March 31, 1899, as follows:

9 mos.	Net earn'gs.	Int. & taxes.	Sink. fund.	Bal. surp.
1898-99.....	\$790,937	\$327,465	\$35,000	\$428,472
-V. 67, p. 527.				

**Columbia Automobile Co. of New York**—Columbia Electric Vehicle Co.—*Fope Manufacturing Co. People Interested.*—The Columbia Automobile Co. was incorporated a few weeks ago in New Jersey with \$3,000,000 of authorized capital stock, its officers being Colonel Albert A. Pope, President; George H. Day, Vice-President; Harold H. Eames, Secretary and Treasurer. The Columbia Electric Vehicle Co., with \$5,000,000 of authorized capital stock and practically the same incorporators as the Columbia Automobile Co., was incorporated in New Jersey on May 4. Below, under the caption "Illinois Electric Vehicle Co.," it is stated that "a contractual alliance" has been made by the Electric Vehicle Co. with the Pope Manufacturing Co. for the manufacture of automobiles. Apparently one or both of these new companies is the outcome of the alliance so mentioned. A Hartford paper says: Already the motor carriage business of the Pope Company is booming and the works are running 22 hours a day.

**Consolidated Gum Co.—Officers.**—The proposed officers and directors are stated as follows:

President W. J. White, Cleveland; Vice-President, Dr. Beeman Cleveland; Secretary, Jonathan P. Primley, Chicago; Treasurer, Thos. Adams, Jr., Brooklyn. Directors—W. J. White, George H. Worthington, Jonathan P. Primley, T. J. Jefferson, Charles R. Flint, Thomas Adams, Jr., and Stephen T. Britten.

**Continental Tobacco Co.—Amount of Stock Paid In.**—The company has filed at Trenton, N. J., a certificate of payment of \$12,700,000 additional preferred and \$17,700,000 additional common stock, making the total capital stock issued to date \$92,600,700, including \$43,845,000 of preferred. The authorized stock was recently increased from \$37,500,000 each to \$50,000,000 each of common and preferred.—V. 68, p. 771.

**Crescent City RR.—New Orleans City RR.—Sold.**—The Crescent City RR. has been sold at foreclosure sale to the representatives of the reorganization committee for \$3,000,000, being the par value of the bonds of 1893, of which all except \$80,000 (in the hands of unknown persons) have assented to the plan. Of the \$2,000,000 stock all has come in except 107 shares, which cannot be located. The property, in accordance with the plan, will be transferred to the new corporation, the New Orleans City RR. Co.—V. 68, p. 824.

**Delaware & Hudson Co.—Sinking Fund.**—At the annual meeting on Tuesday the stockholders adopted the ordinance providing for the establishment of a sinking fund of not less than five cents per ton of coal sold. This will amount to \$175,000 or \$200,000 per year as a minimum charge before dividends, and will be used whenever possible in retiring the company's securities. David Willcox was elected to the board to succeed James A. Roosevelt, deceased.—V. 68, p. 871.

**Detroit Street Railways.—Negotiations with City Reported Off.**—A press dispatch says that negotiations for the purchase of the street railways of Detroit by the city have struck an obstacle. It is understood that the street-railway interests decline to reduce their price of \$17,100,000 in 4 per cent bonds, while the Commissioners feel that \$15,500,000 is the maximum the city should pay.—V. 68, p. 670.

**Diamond State Steel Co.—New Enterprise.**—This new company will acquire, under lease, the works of the Diamond State Iron Co., at Wilmington, Del., a regular-dividend-paying company. The \$3,000,000 capital stock of the new company was offered privately in Philadelphia last week and largely over-subscribed. The shares are \$10 each and 50 per cent is called on subscription, giving the company \$1,500,000 cash. The main business is to be the manufacture of open-hearth basic steel.

**Domestic Sewing Machine Co.—Incorporated.**—This company filed articles of incorporation at Newark, N. J., on April 28. The capital stock is fixed at \$755,000 in \$100 shares, of which \$1,000 is paid up. Incorporators: Andrew Kirkpatrick and Edward Spaeth of Newark and Harris Fahnestock of New York City.—V. 68, p. 670.

**Edison Electric Illuminating Company of Brockton, Mass.—Bonds Called.**—The first mortgage 6 per cent bonds have been called and will be paid on Nov. 1, 1899, at the New England Trust Co., Boston.

**Electric Storage Battery Co.—Basic Patent Upheld.**—At Boston on May 4 Judge Colt, in the United States Circuit Court, granted an injunction to restrain the Hatch Storage Battery Co. from infringing the "Brush patent" owned by the Electric Storage Battery Co. The Judge said this patent had been so many times sustained that a written opinion was unnecessary.—V. 68, p. 871.

**Empire Steel & Iron Co.—Properties Acquired.**—The company has acquired the following properties:

By purchase, the property of the Greensboro Furnace Co., Greensboro, N. C., the Henry Clay Furnace of Reading, Pa., the Topton Furnace in the Schuylkill Valley, the Victoria Furnace on the Chesapeake & Ohio RR. in Virginia, and the Huddleston ore property in

the Potts Valley, Va. By lease, the Valentine furnace property at Bellefonte, Pa. The company has also acquired four-fifths ownership of the stock and second mortgage bonds of the Crane Iron Works of Cataanqua. The Victoria property is said to be the largest furnace in Virginia and the Crane Iron Works the second largest furnace property in Eastern Pennsylvania.

**Officers.**—President, L. Peckitt, Cataanqua, Pa.; Vice-President, Walter Kennedy, Pittsburg, Pa.; General Manager, W. L. Sims, New York; Secretary, Glen Wright, New York. Executive Committee—Archer Brown, E. R. Chapman and W. L. Sims. The directors include the above and W. E. Scarritt, E. K. Sommerwell and F. M. Jeffery. New York office, 71 Broadway.—V. 68, p. 671.

**Erie RR.—Quarterly.**—Earnings for the quarter and the nine months ending March 31 were:

3 mos. end- ing Mar. 31	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance. def.
1899.....	\$6,684,352	\$1,430,002	\$39,759	\$2,239,245	def. \$769,485
1898.....	6,547,948	1,479,190	28,812	2,104,562	def. 596,560
9 months—					
1898-9.....	\$22,484,110	\$6,011,257	\$101,512	\$6,617,149	sur. \$95,620
1897-8.....	23,326,224	6,763,716	101,024	6,276,095	sur. 588,645
-V. 68, p. 379.					

**Federal Sewer Pipe Co.—Incorporated.**—This company was duly incorporated in Delaware on Thursday to consolidate the companies shown in the prospectus as published in the CHRONICLE of April 8, page 671.

**Fifth Avenue Stage Line—Third Avenue RR.—Control Sold.**—Vice-President Henry Hart of the Third Avenue RR. Co. has sold his controlling interest in the \$50,000 stock of the Fifth Avenue Stage Co., but the names of the new owners are not made public.—V. 67, p. 1309; V. 68, p. 872.

**Fitchburg RR.—Quarterly.**—Earnings for the quarter and the nine months ending March 31 were:

3 mos. end- Mar. 31.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Surplus.
1899.....	\$1,771,930	\$432,950	\$16,943	\$324,840	\$65,053
1898.....	1,641,065	441,843	17,938	396,350	63,422
9 months—					
1898-9.....	\$5,700,917	\$1,767,835	\$56,908	\$1,151,237	\$673,506
1897-8.....	5,576,466	1,808,152	55,966	1,175,498	688,620

Dividends on preferred (4 per cent per annum) are paid semi-annually, calling for about \$151,000 quarterly.—V. 68, p. 330.

**Fort Wayne Electric Works of Schenectady.—Incorporated.**—This company has been incorporated by persons identified with the General Electric Co., presumably as successor of the Fort Wayne Electric Corporation, to manufacture and sell electrical and other apparatus; capital, \$500,000.

**General Carriage Co.—Incorporated.**—This company was incorporated at Trenton, N. J., May 6, with authorized capital stock of \$20,000,000, \$4,000 being paid as incorporation fee. Incorporators—Peter H. Evans, James U. Clarke, Richard C. Ellis, E. Frederick Gentner and Robert I. McKinstry. The company will be allied with a company of the same title organized under the laws of New York State, with authority to "purchase, construct and maintain a system of hacks, coaches or vehicles drawn or propelled by horse or other power through any public road, street or highway in any city of the first class." The latter corporation can charge not to exceed 75 cents an hour for each person in the time service, not to exceed 25 cents a mile or fraction thereof for each person for the mileage service, and not to exceed 25 cents a person upon the circuit service. L. D. Baldwin, of Baldwin & Slater, 100 Broadway, attorney for the company, says: "The company proposes to establish a cheap cab service, such as now exists in London and Paris." The company has acquired from the New York Autotruck Co. all the rights of that company to carry passengers in New York City with vehicles using compressed air. Frederick B. Esler is President of the General Carriage Co. The capital stock of the New York corporation is \$1,000,000, with right to increase the same.

**Havana Commercial Co.—Officers.**—The company has elected the following officers: H. B. Hollins, President; Francisco Garcia, Vice-President and Resident Director, and Ford Huntington, Secretary and Treasurer. The business consists in the manufacture and export of Havana cigars and cigarettes and Cuban leaf tobacco, and includes the following well known cigar factories and brands:

Pedro Murlas, Manuel Garcia, La Flor de Ynolan, La Africana, Antiquedad, La Vencedora, La Carolina, El Siboney (cigarettes), Rosa Aromatica, Villar y Villar, Flor de Cuba and Flor de Murlas.

In addition, it is stated, the company will acquire the business of Francisco Garcia, Bro. & Co., who are extensively interested in the Cuban tobacco trade. The capitalization, etc., will be found in V. 68, p. 428, 473.

**Hendersonville & Brevard RR.—Transsylvania RR.—Successor Company.**—The Hendersonville & Brevard RR. was recently sold for \$54,450 cash to the Toxaway Co. The Transsylvania RR. Co. has now been incorporated in North Carolina to own the road, which extends from Hendersonville, N. C., west 21-6 miles to Brevard, and possibly to extend it about 12 miles southwest to Easteloe.

**Herring-Hall-Marvin Co.—Instalment of Assessment Called.**—"A very large majority of the preferred stock or voting trust certificates representing the same, and of the common stock or voting trust certificates representing the same, having been deposited under the provisions of the plan of Jan. 16, 1899, and a very large majority in interest of the creditors having become parties to said plan," notice is given that an instalment of \$3 per share on the preferred stock and of \$1 per share on the common stock is called for

payment, and will be payable at the Continental Trust Co., 30 Broad St., New York, on or before May 29.—V. 68, p. 823.

**Hocking Valley Railway.**—*Directors.*—The directors are: Messrs. C. H. Coster and George S. Bowdoin, of J. P. Morgan & Co.; Thomas F. Ryan, C. B. Alexander and R. M. Galloway, all of New York; N. Mousarrat, President, and P. W. Huntington, Columbus, and Myron T. Herriek of Cleveland.—V. 68, p. 823.

**Hudson River Gas & Electric Co.**—*Bonds Offered.*—Wilson & Stephens offer at 103½ and interest the unsold balance of this company's \$350,000 first mortgage refunding gold 5s, due May 1, 1929; State Trust Co. trustee.—V. 68, p. 824.

**Indianapolis Street Ry.**—*Indianapolis & Broad Ripple Rapid Transit Co.*—*Consummation of Deal with City.*—The stockholders of the Citizens' Street RR. Co. on May 3 ratified the sale of the company's property and franchises to the Indianapolis Street Railway Co., and on May 4 the latter company formally filed documents surrendering to the city the franchises of both the Citizens' and the City Co., as also certain other property. The Board of Public Works thereupon passed a resolution accepting the transfer. The agreement with the city, as already outlined, is therefore operative (see V. 68, p. 723).

*Controlled.*—The Indianapolis & Broad Ripple Rapid Transit Co., it is announced, is now owned by interests friendly to the Indianapolis Street Ry., but its separate organization, it is understood, will be maintained for a time at least. W. H. Schmidt of Indianapolis has been elected President of the Rapid Transit Co. and W. F. Milholland Secretary, while H. M. Bates and George S. Philler of Philadelphia are members of the board.—V. 68, p. 723, 871.

**Illinois Electric Vehicle Transportation Co.**—*Electric Vehicle Co.*—*Electric Storage Battery Co.*—*Siemens & Halske Electric Co.*—*Incorporated.*—The Illinois Electric Vehicle Transportation Co. was incorporated at Trenton, N. J., on May 5, with a capital stock of \$25,000,000 (all common), to control the automobile business in Illinois. Incorporators: James E. Hayes, of Camden, and Augustus Treadwell and Arthur Phillips, of New York.

The Chicago Electric Vehicle Co., said to be an independent corporation, was also incorporated, with a capital stock of \$1,000,000, by Orson D. Fox, Smith C. Shedrick, John Trier, Gustav Lukas, M. M. Chesroun and J. W. Creekmurall, all of Chicago, and David Harvey, Jr., of Asbury Park, N. J.

*Purchase.*—*Relation of Companies.*—Attorney Levy Mayer, General Counsel of the Storage Battery syndicate, on May 5, in Chicago, gave out the following statement:

"The Electric Vehicle Co. yesterday completed the purchase of the Siemens & Halske Elec. Co. of America, whose plant is located in this city. The Siemens company bought and enlarged the old Grant locomotive works a few years ago. The plant covers seven acres and has facilities for the employment of 2,000 men. Isaac L. Rice, who is the President of the Electric Storage Battery Co. and of the Electric Vehicle Co. was elected President of the Siemens company.

"To-day there was completed the Illinois Electric Vehicle Transportation Co., which was organized and is controlled by the Electric Vehicle Co., which is the parent company. The Illinois company will go into operation at once. Samuel Insull will become its President. It, as well as the other electric vehicle companies in the West, will be supplied with electric equipment to be manufactured at the Siemens & Halske works. The board of directors of the Illinois Company will be composed of some of the most representative men of Chicago. The company will at once enter upon the business of operating electric transportation and delivery wagons of all kinds.

"The Electric Vehicle Co. has made a contractual alliance with the Pope Manufacturing Co., of Hartford, to manufacture automobiles. [See Columbia Automobile Co. preceding.] Back of all these electric vehicle companies is the Electric Storage Battery Co., which owns the underlying storage battery patents. That company will supply the vehicle and transportation companies with storage batteries. The electric vehicle interests have recently purchased the substantial control of the solid-rubber tire patents and industry of the United States. The chief owners of the electric vehicle and storage battery enterprises are William C. Whitney, P. A. B. Widener, W. L. Elkins, Martin Maloney, Isaac L. Rice, Thomas Dolan, Anthony N. Brady, Thomas F. Ryan, and others.—V. 68, p. 822, 871."

**International Automobile & Vehicle Tire Co.**—*Subscription.*—This company was incorporated recently under the laws of New Jersey, with capital stock consisting of \$1,500,000 7 per cent non-cumulative preferred stock and \$1,500,000 common stock. The company's prospectus says:

The business of the company is the manufacture of rubber tires for automobiles and all other kinds of vehicles, and kindred business. The company has purchased the Newton Rubber Works, of Newton Upper Falls, Mass.; the rubber tire business of L. C. Chasé & Co., of Boston, Mass., and the American Tire Co., of New York. Embraced in these purchases are patents covering the only practical pneumatic tires for heavy vehicles, as well as the sectional tire, and the well-known "Aper" and Chasé "Tough Tread" tires. These patents practically give this company the control of the tire business for automobiles and other vehicles. The company has a contract to supply all the rubber tires to be used by the International Power Co. on their automobiles in this country and in Europe, and has in contemplation extensive plans for further development in Europe.

*Officers.*—Edward E. McCall, President (Counsel New York Life Insurance Co.); Richard Croker, Jr., Vice-President (of the Autotruck Company); A. H. Alden, Treasurer (Treasurer New York Commercial Co.).

Offers for subscription to 10,000 shares of the preferred stock of the par value of \$100 each were received by Brown,

Bruns & Co., 7 Wall Street, New York City, and by John W. Belches & Co., 40 State St., Boston, Mass. For 100 shares of preferred stock the person subscribing will be entitled to seventy-five shares of common stock. Registrars of stock, American Exchange National Bank, 115 Broadway, New York.—V. 68, p. 772.

**Kern Incandescent Light Co.**—*New Enterprise.*—This company was incorporated at Trenton, N. J., on Monday, to manufacture a patent gas burner which, it is claimed, produces a steady white light with perfect combustion, thereby effecting an important saving. The authorized capital stock is \$12,000,000, of which \$1,000,000 is 7 per cent cumulative preferred. The company owns the American patents obtained by Orman Kern. The company will have offices at 100 Broadway.

**Kingston & Pembroke Ry.**—*Listed.*—The New York Stock Exchange has listed the company's \$3,204,400 common stock and \$1,000,000 first preferred 5 per cent non-cumulative stock.—V. 68, p. 130.

**Lewis Motor Vehicle Co.**—*Gasoline Motor.*—This company, which was recently incorporated in New Jersey with \$5,000,000 of authorized capital stock, of which \$500,000 is preferred and in the treasury, is the owner of twenty patents issued to George G. Lewis, of Chicago, for gasoline engines and gearing appliances for the purpose of controlling, under all conditions, motor vehicles. Sample wagons are being constructed, and it is the purpose to organize auxiliary companies throughout the United States, who will manufacture vehicles on a royalty to the parent company. The promoters claim that this motor vehicle excels all others; that it can be propelled 100 miles by the use of 5¼ gallons of gasoline at a cost not exceeding 60 cents; and can be made to run from 5¼ miles to 18 miles an hour without odor or heat. Walter E. Graham is President, Room 533 Drexel Building, Philadelphia.

**Long Island RR. Co.**—*Rapid Transit in New York City.*—*East River Tunnel Bill a Law.*—*Rapid Transit Bill Disapproved.*—Gov. Roosevelt on Thursday signed Senator Marshall's bill, which makes it possible for the Long Island RR. Co. to obtain a fifty-year franchise for its proposed tunnel road from Brooklyn to Manhattan. The measure amends Section 73, Chapter 378 of the city charter as follows:

The Municipal Assembly is hereby authorized, in its discretion, to grant a franchise or right to any railroad corporation to use any of said streets, avenues, parkways or highways in the city of New York for the construction and operation of a tunnel railroad underneath the surface thereof for the period of fifty years, and any such grant may at the option of the city provide for giving to the grantee the right, on a fair re-valuation or re-valuations, to renewals not exceeding in the aggregate twenty five years, provided, however, that such grant shall only be made after an agreement has been entered into by such a tunnel corporation to pay to the City of New York 3 per cent, or so much thereof as may be, of the net profits derived from the use of any tunnel which it shall construct, after there shall have first been retained by such company from such net profits a sum equal to 5 per cent upon the sum expended to construct such tunnel."

Mayor Van Wyck on Thursday sent back to Albany without his approval, and thereby killed, the amendments to the Rapid Transit law (see V. 68, p. 825). He was led to disapprove the amendments, it is said, because he considered that the Marshall Tunnel bill would permit all to be done that the amendments to the Rapid Transit Act sought; in other words, if it is desired that private capital shall build, a fifty-year franchise can be granted by the Municipal Assembly. So far as the Rapid Transit Commission is concerned, its scope for action is limited as heretofore to construction with city money. The Commissioners gave out the following:

The Mayor's veto puts an end to the discussion of any appeal by us to private capital in behalf of rapid transit. A rapid transit railroad must now be built by the city or not at all. The existing law is abundantly sufficient for that purpose. The routes and plans have been formally approved by all the municipal authorities and by the Supreme Court. But one thing is now necessary, and that is the co-operation of the executive authorities of the city—that is to say, the Mayor and other members of the Board of Estimate and the Corporation Council. The contract for construction in form for public advertising was submitted to the Corporation Council thirteen months ago. The law requires his formal approval. The board cannot move until he shall act. The new assessment will create a debt-incurring capacity of the city sufficient for rapid transit. If the Board of Estimate will promptly pledge to rapid transit so much as is necessary and the Corporation Council will return the form of contract with his approval, this board can instantly proceed. Otherwise this board is absolutely without further practical powers.

**Mortgage Authorized.**—The Long Island stockholders on May 6 duly authorized the proposed mortgage for \$45,000,000 to secure bonds to bear not exceeding 4 per cent interest and to mature in 1949. The purposes for which the new bonds may be sold were stated in an official circular, which was cited in the CHRONICLE of April 1, page 618.—V. 68, p. 871, 872.

**Lynn & Boston RR.**—*Lowell Lawrence & Haverhill Street Ry.*—*Pending Consolidation.*—The latest report regarding the consolidation of street railways that is pending in Eastern Massachusetts is that the roads to be included aggregate nearly 700 miles of track and embrace the lines centering at Brockton, the Lowell Lawrence & Haverhill, the Boston & Quincy, the Lynn & Boston, most of the roads centering in Salem, the Newport & Fall River, owned by the Newport Street Railway Co., the Globe Street Railway of Fall River and the Taunton Street Ry. The consolidation, it is said, will be on a capitalization of \$22,000,000, one-half of which will be common and the other half preferred 4 per cent cumulative. Tucker, Anthony & Co. and E. Rollins Morse & Bro. have the consolidation in charge.—V. 68, p. 672, 673.

**Metropolitan Street Ry. of New York.—Air Power Cars in Use.**—The company began to operate one of the compressed air cars on the Twenty-third Street line on April 26, and has since then had several of them in use on that line, familiarizing the motor men with their management. The experiments with the new cars are said thus far to have been successful. The Twenty-eighth and Twenty-ninth Street line is being laid with 100-pound rails, and it is expected shortly to begin operating that line and also the line connecting West Twenty-third Street with East Thirty-fourth Street with the new cars. Nearly all of the cross-town lines and also the Seventh Avenue, it is said, may before long be similarly operated. The air power cars, it is understood, were regularly installed on the night service of the Twenty-third Street line on Thursday night.—V. 68, p. 774.

**Michigan Peninsular Car Co.—Payment of Bonds.**—The \$2,000,000 first mortgage 6s of 1892 have always been looked upon as not subject to call. The company, however, having sold its property, claims the right to retire them by virtue of a clause which appears in connection with the provisions in case of default, and which states that "upon any sale of the property and franchises" the principal of all the bonds shall become due. Notice is given that the bonds will be paid at 105 and interest on or before June 1, at the Guaranty Trust Co., interest ceasing June 1.—V. 68, p. 331.

**Mississippi Valley Telephone Co.—Mortgage.**—The company has made a mortgage to the St. Louis Trust Co. as trustee to secure \$500,000 of \$1,000 5 per cent bonds.

**Municipal Traction Co. of Denver, Col.—Opposition Company.**—This company has been incorporated with an authorized capital stock of \$1,000,000, to build a street car system in Denver in opposition to the consolidated company.

**Nashville & Decatur RR.—Louisville & Nashville RR.—New Lease.**—A press despatch yesterday afternoon from Nashville said: "Committees from the stockholders of the two roads have agreed upon the terms for a new lease of the Nashville & Decatur by the Louisville & Nashville. The lease is to be for ninety-nine years, and stockholders of the leased road will receive 7½ per cent annually on their holdings. The new lease goes into effect July 1, 1900. The capital stock of the Nashville & Decatur is now approximately \$2,500,000, with \$2,000,000 of 7 per cent bonds, which will soon be retired, the stock being issued in their stead." The stock of the Nashville & Decatur is now receiving 6 per cent per annum.—V. 68, p. 774.

**National Car Equipment Co.—Incorporated.**—This company, with an authorized capital stock of \$10,000,000, was incorporated in California on May 6 "to obtain control of patents, now in possession of a local corporation, for preventing the flattening of car wheels and for regulating the pressure of air brakes." Incorporators: John Dolber, Henry F. Allen, John A. Hooper, Rudolph Spreckels, Richard W. Gorrill, Joseph H. Thompson and W. H. Chickering.

**National Electric Co.—New Philadelphia Company.**—This company, with \$25,000,000 of authorized capital stock [in shares of \$50 each, all common], was incorporated at Trenton, N. J., on May 1 to make and supply coke, gas, oil, electricity, heat, compressed air, liquefied air or any power now known or which may hereafter be discovered. The operations of the company, it is said, will be confined mainly to the neighborhood of Philadelphia.

Of the 500,000 shares, it is stated, there has been issued 200,000, of which 50,000 (\$10 paid) have been sold to the public at \$10 50 per share. The directors include:

Thomas M. Thompson, ex-Director of Public Works; Dr. John V. Shoemaker, Clarence Wolf, of H. F. Bachman & Co. and Wolf Bros.; Winthrop Smith, of Winthrop Smith & Co., and Isaac Sweigard, General Superintendent of the Reading Railroad Company.

The Cheltenham and Overbrook Electric Lighting Companies, operating in the northern part of Philadelphia, it is understood, will be turned over to the company. Negotiations for the Chester electric light plant and other properties are reported pending. William H. Harry, is mentioned as a leading spirit. H. F. Bachman & Co. and Winthrop Smith & Co., of Philadelphia, are the bankers interested in the enterprise.

**National Steel Co.—Coking Property Purchased.**—At Pittsburg on May 8 the Continental Coke Co., representing the National Steel Co., closed a deal for the purchase of 717 acres of coking property, known as the Thompson tract, in the Connellsville district, at \$1,100 an acre, or \$788,700 in all. Recently the company bought a contiguous tract of 1,132 acres from the H. C. Erick Co. A contract for 600 new ovens, to cost \$150,000, it is stated, will be awarded in a few days. The coal is described as of good quality and nine feet thick.—V. 68, p. 672.

**New York Gas & Electric Light, Heat & Power Co.—Acquisition.**—The United Electric Light & Power Co., controlled by the Westinghouse interests, and the only electric light company in the city not already owned by the New York Gas & Electric Light, Heat & Power Co., is stated to have been acquired by or in the interest of the last-named company. The reported sale of the U. E. L. & P. Co. to the Consolidated Gas Co. is officially denied.

**Officers.**—The directors and officers are:

**Directors.**—Anthony N. Brady, Thomas E. Murray, J. N. Wallace, Daniel F. Shea, C. M. Flint, Thomas J. Reagan and J. F. Yawger.  
**Officers.**—President, Anthony N. Brady; Secretary, Frank D. Allen; Treasurer, Henry J. Hemmens; General Manager, Thomas E. Murray.

The office will be in the Edison Building, in Duane Street.—V. 68, p. 824.

**New York New Haven & Hartford.—Quarterly.—Earnings for the quarter and the nine months ending March 31 were:**

3 mos end- Mar 31.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1899.....	\$8,267,511	\$2,445,074	\$87,858	\$1,948,305	\$584,627
1898.....	6,771,029	1,809,397	62,546	1,508,569	363,374
9 mos.—					
1898-9.....	\$28,422,615	\$9,732,923	\$608,991	\$5,835,248	\$4,506,666
1897-8.....	22,704,997	7,493,567	186,916	4,627,936	3,052,547

**Earnings of New England R.R., Shebang Litchfield & Northern and three Sound line properties are included in 1898-9.**—V. 68, p. 474.

**New York Ontario & Western Ry.—Quarterly.—Earnings for the quarter and the nine months ending March 31 were:**

3 months end- Mar 31.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1899.....	\$1,024,574	\$354,708	\$54,525	\$246,002	\$163,231

1897-8.....	3,037,802	1,008,075	65,435	684,059	387,451

—V. 68, p. 474.

**North Chicago Street RR.—West Chicago Street RR.—Pending Negotiations.**—The negotiations for the control of these properties by an Eastern syndicate are said to be progressing satisfactorily. The Chicago Consolidated Traction Co. also is likely to be acquired, but the Chicago City Railway will probably be omitted, owing to the high price asked for control. The elevated roads, are not embraced in the present merger, but may be taken over at a later day. Mr. W. L. Elkins of Philadelphia was quoted on Thursday as saying that the Consolidated Company will be known as the Chicago Traction Co., and will be authorized to issue about \$30,000,000 of stock (common and preferred), part of which will be issued at once in order to unite the West Chicago, North Chicago and Chicago Consolidated Traction companies.—V. 68, p. 725.

**Oxford Lake Line of Anniston, Ala.—Foreclosure.**—On May 6 the Southern Banking & Loan Co. of Atlanta filed a bill to foreclose the first mortgage of 1892 for \$175,000. Howard W. Sexton, the President and General Manager, was made receiver. No interest, it is said, has ever been paid on the bonds. The suit is preliminary to reorganization.

**Pacific Coast Biscuit Co.—Bonds.—Properties Merged.**—This company, in addition to its \$2,500,000 common and \$1,500,000 of 7 per cent cumulative preferred stock, will create \$1,500,000 of 6 per cent 20-year gold bonds. Bonds and preferred stock to the amount of \$250,000 each will be retained in the treasury for building plants and for betterments. The company, it is said, will have \$350,000 of working capital. It is thought that the company has a working agreement with the National Biscuit Co., one agreeing not to operate east and the other not to operate west of the Rocky Mountains. The Pacific Coast Co. merges the following:

American Biscuit Co., San Francisco; Portland Cracker Co., Portland, Ore.; Washington Cracker Co., Portland; South California Cracker Co., Los Angeles, Cal.; Standard Biscuit Co., San Francisco; Oregon Cracker Co., Portland, and Seattle Cracker & Candy Co., Seattle, Wash.

The consolidated company practically controls the Pacific Coast trade in biscuits, crackers and cakes. Prospectus says:

A. W. Kinnear, auditor and accountant of Chicago, certifies that the present earnings of the constituent companies amount to \$255,000, and are sufficient to provide for the payment of 6 per cent interest on the proposed issue of bonds, for a sinking fund of \$25,000, which it is intended to establish for their retirement; for the payment of 7 per cent dividends on the preferred stock, and to leave a substantial balance applicable to the payment of dividends on the common stock, which would be increased to over \$400,000 by the increased earnings and economies under consolidation. The bonds run for twenty years, with the privilege to the corporation of being retired, any or all, by lot, at any time after ten years, at 105 and interest. Beginning 3 years from the date of organization, a sinking fund of \$25,000 per annum will be set aside from the net earnings after payment of interest on the bonds and dividends on the preferred stock. No dividends, however, shall be declared on the common stock in any year until an amount equal to the above annual payment to the sinking fund is first set aside.—V. 68, p. 872.

**Pittsburg Bessemer & Lake Erie RR.—New Stock and Bonds for Funding.**—The stockholders on May 5 authorized the proposed issue of \$3,000,000 six per cent cumulative preferred stock, to be sold to stockholders at par, and also of a like amount of 5 per cent debenture gold bonds, of which \$1,500,000 to be sold and the remainder held in the treasury. The securities will discharge the company's entire floating debt, incurred for improvements, etc.

**Condition of Property.**—The "Pittsburg Commercial Gazette" on May 6 said:

The company has been making great and costly improvements to the road, and the new securities are issued to wipe out the debt so caused. Nothing extensive is now planned in the way of improvement. New docks are being constructed at Conneaut, and the new Homestead docks being built by the Union Railroad will be an improvement of importance to the Pittsburg Bessemer & Lake Erie RR. The latter road is in excellent condition. The company operates a total of 227 miles of track. The entire line is laid with 100-pound steel rails, maximum grades are 30 feet to the mile and 80 per cent of the line is straight track. Fifty-one locomotives are in use and 2,706 cars, most of the freight cars being steel hoppers of immense capacity. The managers anticipate a heavy ore movement this season. A cargo was reported due at Conneaut yesterday from the head of the lakes. This is much earlier than was promised some time ago, although it is later than last year. At the Conneaut docks two shifts will be organized, so that the unloading of ore will go on continuously.—V. 68, p. 525.

**Pittsburg Co.—Bonds Called.**—All the outstanding bonds secured by mortgage bearing date Jan. 1, 1892, to the New

York Guaranty & Indemnity Co. have been called for redemption, and will be paid on July 1, 1899, at the Guaranty Trust Co. of New York.—V. 66, p. 1190.

**Quincy & Boston Street Ry.—Option to Sell.**—The directors notify stockholders that parties controlling a majority of the capital stock have given an option on their shares to John A. Graham at \$150 per share; all stockholders may participate on the same terms.—V. 68, p. 724.

**Republic Iron & Steel Co.—Directors.**—The following have been elected directors:

August Belmont, Myron C. Wick, Grant B. Schley, Randolph S. Warner, George E. Sheldon, J. G. Caldwell, G. Watson French, Alexis W. Thompson, John F. Taylor, T. A. Meyersburg, L. E. Cochran, James C. Corna, H. W. Haessinger, P. L. Kimberly, George M. Bard, Samuel Thomas, S. J. Llewellyn and Harry Rubins.

President, Randolph S. Warner; First Vice-President, George D. Wick; Second Vice-President, Samuel Thomas; Third Vice-President, James C. Corna; Fourth Vice-President, George M. Bard; Secretary, Silas J. Llewellyn; Treasurer, John F. Taylor.

The new company will have its headquarters in the Stock Exchange Building, Chicago, and a branch office in this city. It is understood that the property embraces sufficient furnace capacity to produce all its own pig iron, sufficient mines and ore lands to supply its ore wants and enough coal lands to supply the demand for coal of its Southern plants.—V. 68, p. 674, 872.

**Rochester & Irondequoit (Street) R.R.—Receiver.**—On application of the Rochester Trust & Safe Deposit Co., mortgage trustee, Justice Dunwell, at Rochester on Thursday, appointed H. F. Atwood receiver of this street railroad. Interest due on the first mortgage in April, 1898, it is stated, remains unpaid and the floating debt aggregates \$235,000.—V. 67, p. 1209.

**St. Louis Indianapolis & Eastern R.R.—Foreclosure.**—At Springfield, Ill., in the U. S. District Court, a bill has been filed by the Central Trust Co., asking for a decree of foreclosure under the first mortgage for \$790,000, interest on which is in default. Control of the property recently passed to the Illinois Central, and the foreclosure suit is brought to acquire clear title.—V. 68, p. 618.

**Seattle & San Francisco Ry. & Navigation Co.—Mortgage Filed.**—The company has made a mortgage for \$1,500,000 to the Metropolitan Trust Co. of New York as trustee, to secure 5 per cent gold bonds dated Apr. 1, 1899, and due Apr. 1, 1939. The company was incorporated a few weeks ago with \$3,000,000 of authorized capital stock, the President being W. E. Guerin, formerly President of the Columbus Sardony & Hocking R.R. Mr. Guerin writes us as follows:

The company owns about 2,000 acres of valuable coal lands about thirty miles southeasterly from Seattle, and expects its principal business to be in connection with coal, and its transportation from the mines to Seattle, thence via vessels to all California points, to Alaska, Honolulu, and such other markets as are reached by coal from this territory. The business will include all classes of freight, also passengers.

The necessary 35 miles of railroad, it is expected, will be in operation by Oct. 1, 1899.

**Southern Car & Foundry Co.—Stock Increased.**—This company, incorporated in New Jersey last month with a capital stock of \$75,000, has increased this to \$3,500,000, of which \$1,750,000 is preferred.—V. 63, p. 826.

**Southern Railway.—Leases Confirmed.**—The stockholders on Thursday formally approved the leases of the property of the following companies: Mobile & Birmingham R.R., South Carolina & Georgia R.R. and Richmond & Mecklenburg R.R.—V. 68, p. 872, 873.

**Southwest Virginia Improvement Co.—Bonds Called.**—All the \$262,000 first mortgage 6 per cent gold bonds of 1892 are called for redemption on May 15, 1899, at 105 and accrued interest at the office of E. W. Clark & Co., bankers, 139 South Fourth St., Philadelphia. On Jan. 1, 1898, the company had outstanding, besides the above bonds, \$770,000 capital stock (par \$100) and bills payable \$10,167. Logan M. Bullitt is President.

**Terre Haute (Ind.) Electric Ry.—Bonds Sold.**—Stone & Webster, of Boston, have exercised their option to purchase a majority of the reorganization committee's certificates representing the first mortgage 6 per bonds (price said to be par) and certificates representing some of the second mortgage bonds (price said to be about one-third face value). The road has been ordered to be sold under foreclosure. The receiver will continue in possession until after the sale, and reorganization will proceed. The sale, it is stated, will take place June 23.—V. 68, p. 333.

**Texas & Pacific Ry.—Bonds Listed.**—The New York Stock Exchange has listed \$350,000 additional first mortgage 5 per cent gold bonds, making total amount listed to date \$21,546,000. The \$350,000 bonds were issued to take the place of 350 bonds of the Eastern Division drawn for its sinking fund on Oct. 1, 1898.—V. 68, p. 829.

**Third Ave. R.R.—Quarterly.**—Earnings for the quarter and the nine months ending March 31 were:

3 Months ending	Gross earnings.	Net earnings.	Other income.	Interest, taxes, &c.	Balance, surplus.
Mar. 31.					
1892.....	\$492,775	\$190,411	\$130,908	\$91,069	\$230,250
1893.....	581,616	199,539	14,846	92,941	121,443
9 months—					
1898-9.....	\$1,705,151	\$601,820	\$187,115	\$274,532	\$314,403
1897-8.....	1,925,754	758,835	48,252	273,005	733,142

Loans and bills payable, \$10,420,122, against \$9,693,348 on June 30.—V. 68, p. 872.

**United Electric Light & Power Co. of Balt.—Consolidation.**—The agreement to unite the Edison Elec. Illuminating

Co., the Brush Electric Co. and the Northern Electric Co., forming the United Electric Light & Power Co., was consummated on May 6. The consolidation gives the Brown Syndicate full control of the street railway and electric-lighting systems in the City of Baltimore. The United Electric Light & Power Co. and the United Railway & Electric Co., however, will remain distinct corporations, though having the same officers.

**Stock.**—The United Electric Light & Power Co. is authorized to issue \$2,000,000 common and \$1,000,000 of 5 per cent cumulative preferred stock, all in \$50 shares. Of the common stock 14,584 shares, it is stated, will be exchanged for 7,292 shares of the common stock of the Brush Company and 25,416 shares, together with 14,000 shares of the preferred stock, for entire capital stock (\$1,000,000) of the Edison Company, comprising 10,000 shares of \$100 each. The new company will also acquire the \$100,000 mortgage bonds and the \$400,000 capital stock of the Northern Electric Co. at par.

**Bonds.**—The company has made a first consolidated mortgage for \$1,500,000 to the Maryland Trust Co., as trustee, to secure 4½ per cent 30-year gold bonds drawing interest from May 1, 1899.

**Officers.**—The officers of the new company are:

President, Nelson Perrin; Vice-President, Josiah L. Blackwell; Treasurer, John W. Ellard; Secretary, W. Stuart Symington; Directors—Alexander Brown, Nelson Perrin, Joseph W. Jenkins, Jr., S. C. Adler, H. Crawford Black, W. T. Dixon and Jesse Hillis.—V. 68, p. 430.

**United Power & Transportation Co.—Official Statement.**—“This company was organized under the laws of New Jersey, with a capital of \$12,500,000, and is given the right to construct, operate and own street railways, power companies of all descriptions, buy and sell real estate and do a general business, etc. At the present time there will be issued 125,000 shares, upon which a call of \$10 has been made; the par value of the shares being \$25 each. The company at the present time has acquired either for cash or for collateral trust 4 per cent certificates, the following street railway systems:

United Traction Co. of Reading, Pa.  
Lebanon Valley Street Railway Co. of Lebanon, Pa.  
Roxboro Chestnut Hill & Norristown Street Railway Co.  
Frankfort Tacony & Holmesburg Railway Co.  
Wilmington & Chester Traction Co.

“The new company has also acquired several electric lighting companies, but this information, as yet, is not ready for announcement.”

A majority of the stock of the United Traction Co. has been acquired on the terms mentioned last week, and the minority interest will receive the same treatment if deposited on or before May 20. The bonds to be received in exchange are 4 per cent gold trust certificates, bearing interest from July 1, 1899.

The \$800,000 stock of the Frankfort Tacony & Holmesburg Ry., it is stated, is acquired on the basis of \$35 in 4 per cent trust certificates for each \$50 share, the United Co. also assuming the \$400,000 first mortgage 5s of the Holmesburg Co. According to the Philadelphia “Times” of May 11 the new company has acquired also the Delaware County & Philadelphia Electric Railway (the line to Media), paying for the latter's 6,000 outstanding shares \$150 a share in 4 per cent trust certificates secured by the stock of the Delaware County & Philadelphia Electric Ry. Co.—V. 68, p. 873.

**United States Flour Milling Co.—Bonds Offered.**—By advertisement on another page there are offered for subscription, at 102½ and interest, \$1,500,000 of the company's present issue of \$7,500,000 first mortgage 6 per cent gold bonds, of which \$3,000,000 have been taken by the vendors and at private subscription. The \$7,500,000 bonds have a par value of \$1,000 each, and are payable in 40 years, but redeemable after 10 years at 110 and interest. They are secured by first mortgage made to the Central Co., as trustee, on all the properties acquired excepting the Hecker-Jones Jewell Milling Co., where they are secured by the deposit of 90 per cent of its capital stock; bonds of the United States Flour Milling Co. equal in amount to the outstanding bonds of the Hecker-Jones-Jewell Milling Co. have been deposited with the trustee to retire such outstanding bonds, a large portion of which have already been exchanged.

**Property Acquired.**—The company has acquired the 19 flour mills of the following well-known companies and also all their elevators, plants, trade-marks, good-will, etc.:

Hecker-Jones-Jewell Milling Co., 4 mills; Empire State Mills (Jacob Amos), 2; Urban Milling Co., Buffalo, 1; Dalry Roller Mill Co., Milwaukee, 2; Anchor Mill Co., Superior, 1; William Listman Milling Co., 1; Russell & Miller Milling Co., 1; Freeman Milling Co., West Superior, 1; Minkota Milling Co., Duluth, 1; Duluth Imperial Mill Co., 1; Duluth Roller Mill, 1; Minneapolis Flour Mfg. Co., 3.

The aggregate capacity of the above flour mills is stated as 39,000 barrels per day, and their storage and elevator capacity 2,272,000 bushels. The real estate of the nineteen mills, together with the machinery, water and steam power, docks, warehouses and elevators, as appraised, is valued at \$10,500,000; their personal property, brands, trade marks and good-will at \$4,250,000, and the cash working capital is \$1,250,000, making the total assets \$16,000,000.

**Securities.**—To acquire the foregoing property, including the cash working capital of \$1,250,000, there have been issued: First mortgage 6 per cent gold bonds, \$7,500,000; 6 per cent cumulative preferred stock, \$5,000,000; common stock, \$3,500,000; total, \$16,000,000. In addition, \$7,500,000 bonds, \$7,500,000 preferred stock and \$9,000,000 common stock are held unissued in the treasury, and can only be issued for the

acquisition of other securities and property, real and personal, and to provide additional working capital, provided, however, that not more than \$1,500,000 of said reserved bonds can be used for working capital.

**Earnings.**—The above mills as combined under one head and running to their full capacity, it is stated, have an annual grind of over 50,000,000 bushels, and the aggregate savings have been carefully estimated to be 1 cent per bushel, or equal to  $4\frac{1}{2}$  cents per barrel, amounting to \$500,000 per annum without increasing the price of flour to the consumer. The average net earnings per annum, as certified by Yalden, Walker & Co., accountants, have been \$922,873. Adding to this one-half the estimated annual savings of \$500,000, \$250,000, the prospectus shows the expected total available net income to be at least \$1,172,873, or equal to 6 per cent interest on \$7,500,000 bonds, 6 per cent dividends on \$5,000,000 preferred stock, 7 per cent dividends on \$3,500,000 common stock, leaving a net surplus of \$177,873.

**Officers.**—The officers and directors are:

President, George Urban, Jr.; Vice-President, Jacob Amos; Treasurer, Thomas A. McIntyre; Secretary and Assistant Treasurer, Joseph A. Knox.

**Directors.**—Wm. A. Nash, President Corn Exchange Bank, N. Y.; Turner A. Beall, President Produce Exchange Trust Co., N. Y.; Eugene Jones, President Hecker-Jones-Jewell Milling Co., N. Y.; Clinton Morrison, President Minneapolis Flour Manufacturing Co.; John A. Shibley, of Dean & Shibley; William Dick, Director American Sugar Refining Co.; Samuel Taylor, Jr., of McIntyre & Wardwell; Fred J. Middlebrook, of Bowers & Sands; C. Gerhard Moller, Vice-President Hecker-Jones-Jewell Milling Co.; Thomas A. McIntyre, of McIntyre & Wardwell; George Urban, Jr., President Urban Milling Co.; Jacob Amos, Empire State Mills, Syracuse, N. Y.; Joseph V. Clark, New Jersey Title Guarantee & Trust Co.; Charles M. Warner, President United States Sugar Refining Co.—V. 6\*, p. 873.

**United States Pneumatic Horse Collar Co.**—On "Unlisted" in Philadelphia.—Of this company's \$1,000,000 stock (in one dollar shares) \$850,000 has been placed on the unlisted department of the Philadelphia Stock Exchange. The registrar is the Continental Trust Co., New York. An advertisement says: "The capital stock is \$1,000,000, full paid and non assessable. Factory at East Orange, N. J. Office, 52 Broadway, N. Y. President, F. R. Brooke; Secretary and Treasurer, E. R. Holden, of E. R. Holden & Co., New York and Boston. The company owns basic patents for the United States, Belgium and France, covering a horse collar which is to a horse what the pneumatic tire is to a bicycle rider. The collar is now in daily use on the teams of some of the principal breweries in New York City and other large commercial houses, and also by the fire departments in New York and Boston."

It was recently reported that the company would acquire other foreign patents, including Canada, from the estate of the inventor, and might increase the capital stock from \$1,000,000 to \$5,000,000 and the par value of the stock from \$1 to \$10.

**Washington (D. C.) Gas Light Co.**—Official Circular.—John R. McLean, John C. Bullitt, Joseph G. Rosengarten, John F. Rodgers and James W. Orme, under date of April 24, 1899, have issued a circular stating that on behalf of themselves and such stockholders as may unite with them, they have executed an agreement for the sale of their stock in the company at \$60 per \$20 share, payable in three equal instalments, on the 15th of June, July and August, with interest thereon at 5 per cent from April 1, 1899. The purchaser is said to be ex-Senator Arthur P. Gorman. See V. 68, p. 830.

—The North American Trust Co. of this city has been appointed the depositary of all the United States Government's funds in the Island of Cuba. The company was recently appointed fiscal agent for the Government in the Island, but under the new appointment the company becomes the depositary of the War Department, which has charge of the collections of the customs, taxes and other revenues of the Island. In other words, the company performs pretty much the same duties for the United States Government as the Bank of Spain did for the Spanish Government before the United States assumed control of the Island. The company will transact all the financial business of the Government in Cuba.

—The unold portion of \$250,000 first mortgage five per cent thirty-year gold refunding bonds of the Hudson River Gas & Electric Co. of Tarrytown, N. Y., are offered for sale by Messrs. Wilson & Stephens, 41 Wall Street, who will furnish report of F. H. Shelton, Esq., gas engineer, and other information on request. The company does all the public and domestic lighting of Tarrytown, North Tarrytown, Irvington, Town of Greenburgh, Dobbs Ferry, Ardsley, Hastings and Pccantico Hills. The advertisement is on page x.

—The fourth annual edition of the "Investors' Manual," published by the Economist Publishing Co. of Chicago, has just been issued. It is an excellent compilation, covering all those street railway and miscellaneous companies whose securities are identified with the Chicago market.

—C. I. Hudson & Co. are making a specialty of Wisconsin Central securities. They own, offer and recommend the new four per cent fifty-year gold bonds, and will give price and details on application.

—Attention is called to the offering by Messrs. Lamprecht Bros & Co. of municipal issues of Cleveland, Camden, N. J.; Colorado Springs and Bowling Green, Ky.

—H. Montague Vickers has removed from 71 Broadway to 7 Wall Street.

## The Commercial Times.

### COMMERCIAL EPITOME.

FRIDAY NIGHT, May 12, 1899.

A generally healthy tone has dominated the commercial markets. The continued reactionary tendency to the financial markets has received some attention, and while it has had the effect to hold in check speculative operations, legitimate trade has not been influenced to any extent. Confidence in the future prospects for trade shows no indications of waning and values in most lines of merchandise have been maintained to a steady basis. At the close of last week an unusually large deal was closed in print cloths, and this has had a favorable influence in dry goods circles. Weather conditions in the South and West have been generally satisfactory, and crop accounts have been good. A strike of the grain shovellers at Buffalo has interfered with the export business in grain. At the close, however, the strike was reported as practically over.

Lard on the spot has been quiet, as exporters have been light buyers and the demand from refiners has been quiet. Prices have declined under moderate offerings, closing at 5.25c. for prime Western and 4.90c. for prime City. Refined lard has had only a limited sale and prices have declined, closing quiet at 5.45c. for refined for the Continent. Speculation in lard for future delivery has been quiet, and under moderate offerings and absence of buyers prices have declined. The close was steady.

#### DAILY CLOSING PRICES OF LARD FUTURES.

May.....	Sat. 5.40	Mon. 5.32	Tues. 5.22	Wed. 5.22	Thurs. 5.27	Fri. 5.25
----------	-----------	-----------	------------	-----------	-------------	-----------

Pork has been quiet and prices have weakened slightly closing at \$8 37½@9 for mess, \$10 50@11 for family and \$10 50@12 for short clear. Cnt meats have been quiet and easier, closing at 4¾@4½c. for pickled shoulders, 7¼@8c. for pickled hams and 5@5½c. for pickled bellies, 14@10 lbs. average. Beef has had a better sale, but at slightly easier prices, closing at \$8 50@9 for mess, \$9@9 50 for packet, \$9 50@10 50 for family and \$14@15 for extra India mess in tierces. Tallow has been firmer, closing at 4½c. Oleo-stearine has been quiet at 5¾c. Lard stearine has sold slowly and prices have weakened to 5½c. for prime City. Butter has been in fair demand and steady, closing at 14½@17½c. for creamery. Cheese has been in demand for export, and steady, closing at 7½@11½c. for State factory, full cream. Fresh eggs have been in fair demand, closing firm at 14c. for choice Western. Cotton seed oil has been in moderate demand, but at lower prices, closing at 26c. for prime yellow.

Brazil grades of coffee have been dull. The distributing business has been slow and the demand for invoices has been light. Offerings from Brazil have increased, and under selling by bear operators prices have declined, closing at 6¾c. for Rio No. 7 on the spot. West India growths have been fairly active and steady at 8¼c. for good Cncuta. East India growths have been dull but steady at 25@25½c. for standard Java. Speculation in the market for contracts has been quiet and prices have declined under moderate offerings and absence of buyers. The close was dull but steady. Following are final asking prices:

May.....	5.05c.	Aug.....	5.30c.	Nov.....	5.50c.
June.....	5.10c.	Sept.....	5.40c.	Dec.....	5.70c.
July.....	5.20c.	Oct.....	5.50c.	Jan.....	5.85c.

Raw sugars have declined in response to weaker advices from London, closing steady at 4½c. for centrifugal, 96 deg. test, and 4¼c. for muscovado, 89 deg. test. Refined sugar has been quiet and unchanged, closing at 5¾c. for granulated. Spices have been more active and higher. Other groceries have been steady.

Kentucky tobacco has been in moderately active demand and fairly firm. Seed-leaf tobacco has been in fair demand and firm. Sales for the week were 1,970 cases, as follows: 130 cases 1898 crop, New England Havana seed, forced sweat, 20@50c.; 140 cases 1896-1897 crops, State Havana seed, 12@14c.; 450 cases 1897 crop, Zimmers, 11@17c.; 300 cases 1895-1896 crops, Pennsylvania seed leaf, 12@13½c.; 150 cases 1897 crop, Pennsylvania Havana seed, 11@12c.; 300 cases 1897 crop, Wisconsin Havana, 8@9c.; 200 cases 1896 crop Wisconsin Havana, 10@11c., and 300 cases 1891 crop, Wisconsin Havana, p. t.; also 600 bales Havana at 70@85c. in bond and 160 bales Sumatra at 80c.@\$1 85 in bond.

Straits tin has been in fairly active demand, but in response to weaker foreign advices prices have weakened slightly, closing at 25½@25¾c. Ingot copper has been quiet and prices have weakened to 19½c. for Lake. Lead has been in moderate demand and steady at 4.45@4.50c. for domestic. Spelter has had a fair sale at full values, closing at 6¾@7c. Pig iron has been firm but quiet at \$14 50@16 50 for domestic.

Refined petroleum has been unchanged, closing at 6 95c. in bbls., 4.45c. in bulk and 7.70c. in cases. Naphtha steady at 10c. Crude certificates have been neglected; credit balances have been unchanged at \$1 13. Spirits turpentine has been quiet and easier, closing at 42¼@42¾c. Rosins have been in fair demand and steady at \$1 47½@1 50 for common and good strained. Wool has been in fairly active demand and firm. Hops have been quiet but steady.

## COTTON.

FRIDAY NIGHT, May 12, 1899.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 62,818 bales, against 63,966 bales last week and 71,179 bales the previous week, making the total receipts since the 1st of Sept., 1898, 8,057,187 bales, against 8,361,557 bales for the same period of 1897-8, showing a decrease since Sept. 1, 1898, of 307,370 bales.

Speculation in cotton for future delivery has continued without animation, and changes in prices have been unimportant. Early in the week operators generally were disposed to hold off, awaiting the Bureau report. When the report was issued, however, it had little if any influence, as it was not complete, and the figures given, it was announced, were subject to modification in the next month's Bureau report. English advices have been of a more encouraging nature. An active spot market has been experienced at Liverpool, and now that all fears of labor troubles are allayed, spinners are free buyers to replenish stocks, which apparently were allowed to run down during the period when a strike was thought probable. At the close of last week an unusually large deal was consummated at Fall River in print cloths, 1,250,000 pieces being contracted for. But while the condition of the cotton goods trade has had a tendency to give tone to the market for raw cotton, there has been no advance in prices, favorable weather at the South and good crop prospects holding buyers in check. To-day there was a dull market, and prices weakened 1 to 3 points under disappointing foreign advices, continued favorable weather conditions in the cotton belt and liquidation by a few tired holders. Cotton on the spot has been quiet. Prices advanced 1-16c. on Monday. To-day the market was quiet and unchanged at 6 1/4c. for middling uplands.

The rates on and off middling, as established Nov. 16, 1893, by the Revision Committee, at which grades other than middling may be delivered on contract, are as follows.

Fair.....	6 1/4 on	Good Ordinary.....	6 1/2 off
Middling Fair.....	7 on	Good Middling Tinged.....	Even
Strict Good Middling.....	7 1/2 on	Strict Middling Stained.....	2 3/4 off
Good Middling.....	8 on	Middling Stained.....	1 1/2 off
Strict Low Middling.....	7 1/2 off	Strict Low Mid. Stained.....	1 off
Low Middling.....	7 1/4 off	Low Middling Stained.....	1 1/2 off
Strict Good Ordinary.....	7 1/4 off		

On this basis the official prices for a few of the grades for the past week—May 6 to May 12—would be as follows.

UPLANDS.	Sat.	Mon.	Tues.	Wed.	Th.	Fri.
Good Ordinary.....	5 1/2	5 1/2	5 1/2	5 1/2	5 1/2	5 1/2

The above totals show that the interior stocks have decreased during the week 17,697 bales, and are to-night 140,687 bales more than at same period last year. The receipts at all towns have been 14,573 bales more than same week last year.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for the week and since Sept. 1, as made up from telegraphic reports Friday night. The results for the week ending May 12 and since Sept. 1 in the last two years are as follows.

	1898-99.		1897-98.	
May 12.	Week.	Since Sept. 1.	Week.	Since Sept. 1.
<i>Shipped—</i>				
Via St. Louis.....	6,208	872,682	5,514	809,273
Via Cairo.....	2,479	350,790	2,463	360,430
Via Parker.....				30,498
Via Rock Island.....		42,967		45,471
Via Louisville.....	2,402	172,227	2,421	124,700
Via Cincinnati.....	1,804	159,081	2,058	139,752
Via other routes, &c.....	4,818	193,464	3,842	150,180
Total gross overland.....	17,711	1,821,211	16,295	1,661,304
<i>Deduct shipments—</i>				
Overland to N. Y., Boston, &c..	6,117	488,802	7,730	448,892
Between interior towns.....	1,249	42,596	1,325	30,791
Inland, &c., from South.....	2,716	81,757	913	41,587
Total to be deducted.....	10,082	613,155	9,971	521,270
Leaving total net overland*.....	7,629	1,208,056	6,327	1,140,034

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 7,629 bales, against 6,327 bales for the week in 1898, and that for the season to date the aggregate net overland exhibits an excess over a year ago of 63,023 bales.

<i>In Sight and Spinners' Takings.</i>	1893-99.		1897-98.	
	<i>Week.</i>	<i>Since Sept. 1.</i>	<i>Week.</i>	<i>Since Sept. 1.</i>
Receipts at ports to May 12.....	62,818	8,057,187	56,593	8,364,557
Net overland to May 12.....	7,629	1,208,056	6,327	1,140,034
Southern consumption to May 12.....	26,000	916,000	21,000	804,000
Total marketed.....	96,447	10,271,243	63,920	10,308,591
Interior stocks in excess.....	17,697	209,198	19,735	217,554
Came into sight during week.....	78,750		44,185	
Total in sight May 12.....		105,10441		105,26145
North'n spinners tak'gs to May 12.....	21,847	2,020,369	11,557	2,040,503

\* Decrease during week.

It will be seen by the above that there has come into sight during the week 78,750 bales, against 44,185 bales for the same week of 1898, and that the decrease in amount in sight to-night as compared with last year is 15,704 bales.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all European figures are brought down to Thursday evening. But to make the total the complete figures for to-night (May 12), we add the item of exports from the United States, including in it the exports of Friday only.

WEATHER REPORTS BY TELEGRAPH.—Reports to us by telegraph this evening denote that while rain has fallen in many districts of the South during the week, in portions of the Atlantic and Gulf States dry weather has prevailed and moisture is needed to bring up seed. The temperature has been satisfactory as a whole. Planting is about completed in Northern Texas.

Galveston, Texas.—In some sections of the State the rainfall has been excessive, but on the whole rains have been favorable. Planting is about completed over the northern portions of the State. There has been a trace of rain on three days of the week. The thermometer has ranged from 73 to 83, averaging 78.

Palestine, Texas.—Rain has fallen heavily on two days of the week, the rainfall being four inches and thirty-two hundredths. Average thermometer 75, highest 88, lowest 63.

Corpus Christi, Texas.—Rain has fallen on two days of the week, the precipitation being one inch and fifteen hundredths. The thermometer has averaged 74, the highest being 82 and the lowest 66.

Dallas, Texas.—We have had rain on five days during the week, to the extent of one inch and sixty-nine hundredths. The thermometer has averaged 75, ranging from 60 to 90.

San Antonio, Texas.—Rain has fallen on three days during the week, the precipitation being one inch and ninety-one hundredths. Minimum temperature 62.

Luling, Texas.—There has been heavy rain on two days during the week, the precipitation reaching two inches and twenty hundredths. Average thermometer 77, highest 90 and lowest 63.

Columbia, Texas.—There has been rain on one day of the week, to the extent of ten hundredths of an inch. The thermometer has averaged 77, the highest being 85 and the lowest 68.

Guero, Texas.—We have had rain on two days of the past week, the precipitation reaching one inch and seventy-three hundredths. The thermometer has averaged 79, ranging from 64 to 94.

Brenham, Texas.—We have had rain on two days of the past week, to the extent of seventy-nine hundredths of an inch. The thermometer has ranged from 65 to 88, averaging 77.

Huntsville, Texas.—Rain has fallen on two days of the week, the rainfall being one inch and twenty-one hundredths. Average thermometer 78, highest 89, lowest 66.

Weatherford, Texas.—There has been rain during the week, to the extent of four inches and two hundredths, on six days. The thermometer has averaged 78, ranging from 58 to 87.

New Orleans, Louisiana.—There has been no rain the past week. The thermometer has averaged 78.

Shreveport, Louisiana.—There has been rain on three days during the week, the precipitation reaching seventy-six hundredths of an inch. Average thermometer 76, highest 92 and lowest 64.

Columbus, Mississippi.—The weather has been dry all the week and rain is needed to bring up the crop. The thermometer has averaged 76, the highest being 92 and the lowest 58.

Vicksburg, Mississippi.—We have had only a trace of rain during the week. The thermometer has ranged from 67 to 88, averaging 77.

Greenville, Mississippi.—The weather has been cloudy and damp during the week, with a good, general rain on Wednesday.

Memphis, Tennessee.—There are some complaints of necessity for replanting on account of defective seed and cut worms. Otherwise crop reports are favorable. We have had rain on three days during the past week, to the extent of ninety-six hundredths of an inch, and it is now raining. The thermometer has ranged from 61<sup>1</sup>/<sub>2</sub> to 85<sup>1</sup>/<sub>2</sub>, averaging 73<sup>1</sup>/<sub>2</sub>.

Nashville, Tennessee.—The week's rainfall has been twenty-one hundredths of an inch. Average thermometer 72, highest 86, lowest 60.

Little Rock, Arkansas.—We have rain on two days of the week, to the extent of sixteen hundredths of an inch. The

thermometer has averaged 73, the highest being 89 and the lowest 60.

Helena, Arkansas.—The weather has been cloudy most of the week, with showers on two days and rain is threatened now. The precipitation reached forty-eight hundredths of an inch. The thermometer has averaged 71<sup>1</sup>/<sub>2</sub>, ranging from 63 to 82.

Mobile, Alabama.—We have had no rain during the week. Crop reports are conflicting. There is general complaint that rain is badly needed. The thermometer has averaged 78, the highest being 86 and the lowest 63.

Montgomery, Alabama.—Cotton is doing well. It has been dry all the week. The thermometer has averaged 80, ranging from 68 to 91.

Selma, Alabama.—We have had dry weather all the week. Farmers complain of poor stands on stiff lands on account of continued dry weather. Some report rotten seed, causing bad stands. The thermometer has ranged from 63 to 94, averaging 78.

Madison, Florida.—We have had no rain the past week. Average thermometer 82, highest 95, lowest 63.

Savannah, Georgia.—Rainfall for the week thirty-two hundredths of an inch, on two days. The thermometer has averaged 80, the highest being 93 and the lowest 63.

Augusta, Georgia.—We have had rain on one day of the past week, to the extent of eleven hundredths of an inch. The thermometer has averaged 77, ranging from 64 to 91.

Charleston, South Carolina.—We have had rain on three days during the week, the rainfall reaching one inch and seventy-two hundredths. The thermometer has ranged from 63 to 93, averaging 78.

Stateburg, South Carolina.—It has rained on one day of the week, the rainfall reaching fourteen hundredths of an inch. Average thermometer 75<sup>1</sup>/<sub>2</sub>, highest 91 and lowest 59.

Greenwood, South Carolina.—Rain has fallen on two days of the week, the precipitation being forty-six hundredths of an inch. The thermometer has averaged 74, the highest being 86 and the lowest 62.

Wilson, North Carolina.—We have had rain on two days during the week, the rainfall being one inch and forty-five hundredths. The thermometer has averaged 69, ranging from 54 to 82.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock May 11, 1899, and May 12, 1899.

1897-98..	.....	10,000	10,000	11,000	55,000	66,000
1896-97..	.....	5,000	7,000	22,000	68,000	90,000
Total all—						
1898-99..	.....	27,000	27,000	20,000	493,000	513,000
1897-98..	.....	60,000	61,000	25,000	356,000	381,000
1896-97..	.....	41,000	43,000	58,000	574,000	632,000

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 12,000 bales. Exports from all India ports record a loss of 34,000 bales during the week and since September 1 show an excess of 132,000 bales.

NEW ENGLAND MILLS SITUATION.—A number of operatives in the Ponemah Cotton Mills, Taftville, Conn., returned to work May 10, and it is now believed that the backbone of the strike is broken. It is claimed that considerable progress has been made in the efforts to bring into a combination the yarn mills of New England.

JUTE BUTTS, BAGGING, &c.—The market for jute bagging has been quiet the past week, and prices are as last quoted, viz: 55¢@54¢c. for 1 1/4 lbs. and 61¢@61 1/4¢c. for 2 lbs., standard grades. Jute butts dull at 1.05¢c. for paper quality and 1.50¢c. for mixing to arrive.

ALEXANDRIA RECEIPTS AND SHIPMENTS OF COTTON.—

Alexandria, Egypt, May 10	1893-99.	1897-98.	1898-97.
Receipts (cantars)....			
This week.....	12,000	38,000	30,000
Since Sept. 1....	5,519,000	6,489,000	5,726,000

ENGLISH WEAVERS' TROUBLE SETTLED.—Our Liverpool correspondent cables us to-day that "the wages dispute with the weavers has been settled and that the settlement has stimulated an enormous trade. Yarns and cloth are active, and the business done is of a steady, healthy character. The large purchases of raw cotton are indicative of a continued margin of profit for producers.

LARGE SALE OF PRINT CLOTHS AT FALL RIVER.—An important incident of the past week in the cotton-goods trade was the sale last Saturday at Fall River of 1,250,000 pieces of printing cloth—the largest single transaction of the kind ever consummated. The actual quantity of each grade figuring in the deal has not been made public, but the sale was made on the basis of 2 3/4 c. for regular 28-inch 64x64s. The period during which delivery of the goods is to be made extends to October 1, and the Selling Committee, through which of course the sale was made, guarantees to maintain the Fall River prices upon basis of 2 3/4 c. for regulars up to that date.

SOUTHERN COTTON SPINNERS IN SESSION.—The largest meeting in the history of the Southern Cotton Spinners' Association was called to order at Charlotte, N. C., at 1 o'clock on Thursday, May 11, about one hundred and forty members attending. Among the important matters passed upon at the meeting was the appointing of arbitration committees as follows: Differences relating to cotton, consisting of two mill men; differences relating to yarn, two members and two yarn commission men; differences in cloth, two members and two cloth commission men; freight rates, two members and a representative each from the Southern Railway, the Seaboard Air Line and the Atlantic Coast Line. Upon motion the Textile School at Clemson College, S. C., the School of Technology at Atlanta, Ga., and the Agricultural and Mechanical College at Raleigh, N. C., were unanimously commended. Dr. J. H. McAden, of Charlotte, was elected President for the ensuing year. Mr. J. P. Verdery, of Augusta, Ga., Vice-President and Mr. George D. Hiss, Secretary and Treasurer. The Board of Governors is: D. A. Tomkins, Chairman; R. H. Reinhardt, of Lincolnton; A. P. Rhine, of Mount Holly; Leroy Springs, of Lancaster, S. C.; J. T. Anthony, of Charlotte; J. C. Smith, of Newton; R. R. Ray, of McAdenville, N. C.; W. C. Heath, of Monroe; and A. C. Miller, of Shelby.

THE TEXAS STANDARD COTTON BALE.—Yesterday the Galveston Maritime Association passed a resolution which will have an important bearing on the transportation of cotton from Texas, as all rates on that product are based upon the rates through Galveston. Heretofore the minimum density permitted on cotton was 23 1/2 pounds to the cubic foot. Under the rules of the Railroad Commission all cotton not coming up to this standard could be re-compressed at the expense of the press doing the inferior work. Last year some of the ship-brokers went a step further and offered a premium for cotton put up in standard gin boxes and properly pressed. It resulted in marked improvement, although all of the ginners did not make the change and give their customers a chance to get the premiums. The step which is now taken is the naming of a standard to which ginners and compresses must both play to in order to please their customers. Instead of offering premiums, there are penalties prescribed in the way of higher rates on cotton below the standard. This is, perhaps, the same thing in the end, but it is believed that it

is the most effective way of bringing about good baling and good compressing. Freight rates will be quoted hereafter on the 51x24 bale, with a minimum density of twenty-five pounds.—Galveston "News" May 5.

GOVERNMENT WEEKLY COTTON REPORT.—Mr. James Berry, Chief of the Climate and Crop Bureau of the Agricultural Department, made public on Tuesday the following telegraphic reports on the crops in the Southern States for the week ending May 8:

NORTH CAROLINA.—Warm weather followed by cooler, cloudy conditions and fine rains caused continued improvement in crops; cotton planting active; coming up to good stand, chopping begun.

SOUTH CAROLINA.—Favorable week; light showers very beneficial; more rain needed to germinate cotton; good stands of cotton general; chopping begun.

GEORGIA.—Seasonable temperature and plenty of sunshine were conducive to growth of crops and favorable for general work; cotton nearly all planted and coming up with good stands.

FLORIDA.—Considerable complaint from some western counties that grasshoppers are damaging cotton; cotton would be improved by rain.

ALABAMA.—Hot and dry, with drought in central and southern counties; all crops beginning to need rain; cotton making very good stands and chopping becoming general.

MISSISSIPPI.—Week has been trying upon crops; temperature high, and while scattered showers are reported the rainfall is deficient; cotton planted early has come up and is being worked; that planted late not up in many sections.

LOUISIANA.—Stand of cotton only fair and considerable yet to be planted; cotton suffering for rain.

TEXAS.—Weather throughout week favorable for farming operations, except too much rain in places in northern portion and not enough for some crops in southern portion; cotton chopped out in southern portion, growing nicely, and planting nearing completion; in northern portion cotton is coming up to good stands and being chopped out, but washing rains necessitated some replanting.

ARKANSAS.—Cotton planting progressing, early-planted coming up, reports differ as to condition; some being plowed up on account of poor stand, cutworms doing damage.

TENNESSEE.—Warm sunshine until 4th, when refreshing showers fell quite generally over the State; a fine week for farm work and growing crops. Cotton growing well in southern portions.

OKLAHOMA.—Unfavorable for cotton, and planting further delayed.

These reports on cotton are summarized by the Department as follows:

Cotton planting continues over the northern portion of the cotton belt, and the early-planted has made favorable progress over the southern and central portions. Rain is needed in portions of South Carolina, Florida and Louisiana, while washing out by rains has necessitated replanting in Northern Texas. In Oklahoma planting has been delayed by heavy rains.

MAY COTTON REPORT OF THE AGRICULTURAL BUREAU.—In the following, which is the full report of the Agricultural Bureau on cotton for May 1, it will be noticed that no indication of the actual reduction in acreage is given. The report, in fact, merely shows the expressed intentions of planters in April as to the matter of area, and therefore may differ very materially from the final figures:

The cotton report for the month of May indicates merely the belief of correspondents on May 1 as to the intentions of planters regarding the acreage to be planted, and the estimates being liable to modification during May, they should be regarded merely as a general indication of the strength of the tendency toward an enlargement or reduction of acreage. In every cotton-growing State the indications on the first instant pointed to a reduced acreage, with a corresponding decrease in the sale of fertilizers, and an increased acreage in the various food crops.

The probable reduction by States is as follows: In Mississippi and Indian Territory, 5 per cent; in Alabama, 8; Texas, 9; Arkansas, 10; South Carolina, 11; Louisiana, 12; Georgia, 13; North Carolina and Tennessee, 14, and Oklahoma, 18 per cent.

No estimate of the total reduction will be published until next month, when the final reports on planting will be compared with the revised acreage figures for last year.

THOMAN'S COTTON REPORT.—We have also received this week Mr. Thoman's cotton report, which he summarizes as follows:

Reviewing the crop situation as a whole, the evidence at the moment points to a decrease in acreage as compared with last year, probably amounting to five per cent. The largest decrease occurs in Georgia, now indicated at 13 per cent, which is largely due to the fact that the cereal acreages have been notably increased this year. The acreage of wheat alone shows an increase of 35 per cent in that State and, while it is a little early to speak positively as to corn and oats, reports at the present time show that each crop will be increased by about 20 per cent. What is true of Georgia is equally true of the Carolinas, Alabama, Texas and Arkansas. As to the probable promise of the earlier stages of growth it is too early to say. However, the season is very backward. The soil in many instances was not well prepared and in others it broke badly. These conditions, in connection with cool temperatures still prevailing at night over considerable sections of the belt, may have a tendency to check the growth, at least for the present. It is believed, however, that a continuance of favorable weather would go far to make good any discouraging phases of the situation that have been encountered to date and might, in addition, have a bearing on the amount of planting yet to be done.

The following statement shows, by States, the estimated increase or decrease in acreage as represented by percentages:

CONTEMPERATED ACREAGE, 1899.			
States—	Per Ct.	States—	Per Ct.

NEW YORK COTTON EXCHANGE.—Amendments to the rules of the Cotton Exchange have recently been posted as follows:

Amend Rule 2 by substituting the following for paragraph fourth: "No transaction that is not made by open outcry shall be reported or recorded in the record of transactions. The names of purchaser and seller shall be given when required."

The amendment relating to membership certificates reads: "A membership may be transferred to a member or member-elect, but to no other person, by the owner thereof, making the necessary transfer on the transfer book of the Exchange, and paying to the Treasurer of the Exchange a fee of \$25 for making the transfer. But no membership shall be so transferred until the notice of the intention to make such transfer, signed by the member or his legal representative, shall

have been posted upon the bulletin of the Exchange for ten days, and until all claims against such members which may be presented within said ten days by other members of the Exchange be settled, or while any annual dues or assessments levied on such membership shall remain unpaid, and if the said membership is not transferred at the expiration of the said ten days, such notice of intention to transfer shall become void."

**SEA ISLAND COTTON MOVEMENT.**—We have received this (Friday) evening by telegraph from the various ports the details of the Sea Island cotton movement for the week. The receipts for the week ending to-night (May 13) and since Sept. 1, 1898, the stocks to-night, and the same items for the corresponding periods of 1897-98, are as follows.

Receipts to May 12.	1898-99.		1897-98		Stocks.	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	1899	1898
Savannah.....	115	52,847	17	56,789	2,030	9,374
Charleston, &c.....	3	5,364	1	9,797	374	3,108
Florida, &c.....	.....	9,161	.....	6,706	2,001	1,915
Total.....	118	66,372	18	73,242	4,405	14,395

The exports for the week ending this evening reach a total of 376 bales, of which 349 bales were to Great Britain, 27 to France and — to Reval, and the amount forwarded to Northern mills has been 611 bales. Below are the exports for the week and since September 1 in 1898-99 and 1897-98.

## BREADSTUFFS.

FRIDAY, May 12, 1899.

Business in the local market for wheat flour has been quiet. The home trade has continued to show only indifferent interest, jobbers generally confining their purchases to car-load lots, not being disposed to take supplies in advance of their immediate wants. The export business also has been quiet. Advices from the Northwestern market, however, have reported large export sales, principally of bakers' mills in a number of instances being sold ahead. Prices have weakened slightly following a decline in the grain. Rye flour has had a better sale at steady prices. Corn meal has been in fairly active demand and firm.

Speculation in wheat for future delivery has been quiet and prices have declined. Early in the week the labor troubles at Buffalo interfered with the export business. Favorable weather conditions at the West also had a weakening influence and prompted moderate selling by longs to liquidate their account. Tuesday there was a slight improvement in values on purchases for investment account, stimulated by the anticipation of an unfavorable Bureau report. Wednesday the market again turned easier under moderate offerings, prompted by favorable weather conditions in the West, and also by a more general disposition to anticipate a more favorable Bureau report than was at first expected. Thursday there was a weak and lower market, prices declining 1½@2c. under general selling, prompted by a more favorable Bureau report than was generally anticipated. Indications were that the labor troubles at Buffalo would be shortly settled and resulted in an improved cash trade. Business in the spot market has been fairly active, as exporters have been buyers. The trading, however, has been interfered with by the grain shovellers.

strike at Buffalo. To-day there was a firmer market, prices advancing  $\frac{3}{8}$  to  $\frac{1}{2}$  c. on buying by recent sellers to cover short sales. Business in the spot market has been active, with rumors of large sales, with about 250,000 bushels confirmed.

Indian corn futures have received a moderate amount of attention. Early in the week there was a slight weakening in values under a free movement of the crop and liquidation by longs. Thursday, however, there developed a steadier tone. During the latter part of the week the movement of the crop was smaller, and this, together with an active export business and aggressive buying for investment account, advanced prices. Business in the spot market has been active, as exporters have been free buyers. To-day the market was firmer on light receipts and continued good export business. The spot market was active. The sales for export here and at outports were about 500,000 bushels.

#### DAILY CLOSING PRICES OF NO. 2 MIXED CORN IN NEW YORK.

Oats for future delivery at the Western market have been moderately active, but at lower prices. Crop accounts have been favorable, receipts in the interior have been large, and the Bureau report was favorable, all of which prompted free offerings, under which values weakened. A fairly large business has been transacted in the spot market, as both exporters and the home trade have been buyers; prices have weakened with futures. To-day the market was firmer with other grains and on shorts covering. The spot market was fairly active. Sales reported for export were 20,000 bushels.

AGRICULTURAL DEPARTMENT REPORT ON CEREALS, &c.—The report of the Department of Agriculture showing the condition of cereal crops on May 1 was issued on the 10th inst., and is as follows:

The May returns to the Statistician of the Department of Agriculture show the acreage in winter wheat in cultivation on May 1 to have been about 25,900,000 acres. This is about four million acres less than the area estimated to have been sown last fall, but it still slightly exceeds the area of winter wheat harvested last year. The reduction in acreage in the principal States, as compared with the area seeded last fall, is as follows: Kansas, 868,000; Illinois, 701,000; Indiana, 394,000; Missouri, 345,000; Texas, 227,000; Ohio, 149,000; Nebraska, 144,000; Michigan, 128,000; Wisconsin, 120,000; Tennessee, 105,000. For the area remaining under cultivation the average condition is 76·2, as compared with 86·5 on May 1, 1899, and 85·9, the mean of the averages of the last ten years. The condition in the principal States, after reducing the acreage as indicated, is as follows: Pennsylvania, 86; Maryland, 83; Virginia, 7; Texas, 67; Tennessee, 78; Kentucky, 76; Ohio, 82; Michigan, 60; Indiana, 88; Illinois, 54; Missouri, 65; Kansas, 64; California, 96; Oklahoma, 86.

The average condition of winter rye is 86·6, as compared with 94·5 on May 1, 1898, and 90·8, the mean of the May averages for the last ten years. About one-half of the entire winter rye crop is grown in New York and Pennsylvania, where the conditions are 96 and 87 respectively.

Spring plowing is unusually late in almost every part of the country. The work already done is estimated at 57·2 per cent of the total contemplated. The proportion usually done by May 1 is about 75 per cent of the whole.

The average condition of meadows is 84·9, against 92·9 on May 1 of last year and 93·4 on the corresponding date in 1897.

The average condition of spring pastures is 83·5, against 91·2 on May 1, 1898, and 93·4 on the corresponding date in 1897.

The following comparison for a number of years covers the condition of winter wheat in the leading States:

#### CONDITION OF WINTER WHEAT.

GOVERNMENT WEEKLY GRAIN REPORT.—Mr. James Berry, Chief of the Climate and Crop Bureau of the Agricultural Department, made public on Tuesday the telegraphic reports on the grain crops in the various States for the week ending May 8 as follows:

WEATHER.—In the Lake Region and in the States of the Ohio, Central and Upper Mississippi valleys, the Carolinas and Texas, the weather conditions of the week ending May 8, 1899, have been generally favorable to crops. Generally favorable conditions have also continued in the Middle Atlantic States and the Missouri Valley, but in portions of the first-named district it has been too dry, and in the latter too cool for best results. In the Central Gulf States the absence of rain has intensified the droughty conditions reported in the preceding week and crops are beginning to suffer. Drought also prevails in Florida, Central and Southern Colorado, Arizona and New Mexico, and rains would prove beneficial in New England, while excessive rains have interrupted farm work in Oklahoma, North Dakota and Minnesota. In the Rocky Mountain and Pacific Coast regions the week has been much too cool, a severe "norther" on the 2d and 3d causing heavy loss of calves and lambs in Montana. Frosts in the Rocky Mountain region were destructive to fruit, and while light to heavy frosts occurred in New England and portions of the Middle Atlantic States and California, the damage was not serious.

CORN.—Excellent progress has been made with corn planting in the Middle Atlantic States and generally in the central valleys. Some corn has been planted as far north as New York, Michigan and South Dakota. Heavy rains have interrupted planting in Missouri and washed out a considerable portion of the crop in Oklahoma. Early corn is being cultivated as far north as North Carolina, Tennessee and the southern portions of Missouri and Kansas. In the East Gulf States corn is generally in need of rain, but in Texas the crop is well cultivated, growing rapidly and the early planted tasseling.

WINTER WHEAT.—Generally the condition of winter wheat continues to improve. It is jointing in Illinois, Indiana and Ohio, heading in Tennessee and North Carolina, and further south, and in California is beginning to ripen, with prospects for a heavy yield in the last-named State. In Oregon winter wheat continues in good condition, and the crop is improving slowly in Washington.

SPRING WHEAT.—Spring wheat seeding has been delayed in Oregon, and much remains to be seeded in the Lower Red River Valley in both North Dakota and Minnesota. Over the southern and central portions of the spring wheat region the crop is coming up to good stands and growing well.

OATS.—The seeding of oats in the more northerly sections is about finished. The crop is making good growth and is in generally promising condition in the central valleys. In the Central and West Gulf States and in South Carolina oats are suffering for rain. Harvesting will soon begin in Georgia.

The movement of breadstuffs to market as indicated in the statements below is prepared by us from the figures collected by the New York Produce Exchange. The receipts at Western lake and river ports for the week ending May 6, and since Aug. 1, for each of the last three years, have been:

Receipts at—	Flour.	Wheat.	Corn.	Oats.	Barley.	Rye.

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., May 13, 1899.

On Saturday last, Fall River manufacturers, through their committee, sold 1,250,000 pieces of print cloths to a syndicate of printers on the full price basis of 2 1/2 c. for regulars; value involved about \$1,750,000. The sellers guarantee not to sell further cloths at less than 2 1/2 c. before October 1. This is the largest single transaction in the history of Fall River, and its importance as a market factor is enhanced by the "guarantee," which is a unique feature in the print cloth business. Up to Saturday stocks of print cloths had been gradually accumulating, and there were apprehensions of the Fall River price breaking. There is a certainty now that nothing of that kind will occur this side of October. The effect upon the general market has been beneficial, although not pronouncedly so, it being seen more in the undertone than in actual developments. The latter have, however, again been in favor of sellers, such price changes as are noted being all in an upward direction. The day-to-day demand has proved of fair volume, but business in cotton goods is restricted by the scarcity of ready supplies in most leading makes. In the woolen goods division of the market and in silks the week has not produced any new feature of importance.

WOOLEN GOODS.—The demand for men's-wear woollens and worsteds has been irregularly distributed this week. A considerable volume of business has come forward for staple worsteds of the clay and serge order. Stocks of these are reduced to limited compass; the tone of the market for them is very firm, and further advances in prices are considered probable in the near future. For wool chevots and cassimeres in medium grades there has been a moderate call without material change in prices, but for low qualities the market is dull and tends in favor of buyers. Satinets and cotton-warp goods also dull and irregular. The overcoating division shows no new feature. Kerseys firm. Cloakings are dull and featureless. Plain styles of woolen and worsted

dress goods are firm, with moderate sales. Fancies dull. Flannels and blankets quiet but firm.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending May 8 were 3,898 packages, valued at \$166,802, their destination being to the points specified in the tables below:

New York to May 8.	1899.	1898.
	Week.	Since Jan. 1.
Great Britain.....	25	887
Other European.....	79	430
China.....	.....	89,489
India.....	.....	1,318
Arabia.....	1,846	20,369
Africa.....	47	5,628
West Indies.....	431	10,781
Mexico.....	123	1,787
Central America.....	277	3,424
South America.....	876	19,237
Other Countries.....	189	3,652
Total.....	3,898	157,012
China, via Vancouver.....	.....	6,742
Total.....	3,898	163,754

\* From New England mill points direct.

The value of the New York exports for the year to date has been \$5,490,047 in 1899, against \$3,873,018 in 1898.

All leading makes of heavy brown sheetings and drills are in a strong position. The market is practically bare of supplies and well sold ahead. Eastern makes generally advanced 1/8 to 1/4 c. per yard; Southern tending upwards. Gray goods in fine yarn makes also strong and 1-16 c. dearer. Ducks quiet but firm. Brown osenaburgs in moderate request at previous prices. A renewed upward movement is noticeable in bleached cottons, "Fruit of the Loom" 4-4s and a number of other makes being advanced 1/4 c. per yard. Low-grade bleached occasionally 1/4 c. higher. Wide sheetings are firm but quiet. Cotton flannels and blankets unchanged. Denims in moderate request; prices firmly maintained. Ticks firm, with moderate sales, and other coarse colored cottons well held in face of quiet general demand. Quilts are heavily sold ahead. Kid-finished cambrics firmer. Fancy and staple prints in steady re-order demand, with very firm tone. Some good orders taken in new fall fancy prints "at value." Gingham of all descriptions are scarce; demand quiet; prices very firm. Since Saturday a moderate business has been done in regular print cloths at 2 1/4 c. Wide odds have sold fairly and are 1-16 c. higher on the week.

FOREIGN DRY GOODS.—Fall orders for woolen and worsted dress goods moderate only, but sellers generally firm. Silks quiet; previous prices well maintained. Men's-wear woollens and worsteds inactive. Ribbons and laces steady. Linens quiet. Burlaps firm.

## Imports and Warehouse Withdrawals of Dry Goods

The imports and warehouse withdrawals of dry goods at this port for the week ending May 11, 1899, and since January 1, 1899, and for the corresponding periods of last year are as follows:

Imports and Warehouse Withdrawals of Dry Goods	Imports	Warehouse Withdrawals
	May 11, 1899.	Since Jan. 1, 1899.

## STATE AND CITY DEPARTMENT.

## News Items.

**Alabama.**—*Constitutional Convention Bill Repealed.*—The State Legislature has repealed the bill passed at the regular session providing for a Constitutional convention. The vote for repeal was as follows: House, 58 for to 35 against, and in the Senate 18 to 13. The Governor, in a recent message, urges the adoption for the submission to the people of a Constitutional amendment to eliminate the votes of the illiterate.

**Connecticut.**—*A Savings Bank Law Amendment Defeated.*—On May 9, 1899, the Senate accepted the adverse report of the committee on House Bill No. 344 and the bill was defeated. This bill permitted the savings banks of the State to invest in the bonds of the city of Danbury. It was stated in the Senate that \$550,000 of the bonds of this city were held in Connecticut, but as the city's debt had increased largely, the bonds could not now be legally bought by savings banks. This bill must not be confounded with the Savings Bank Law, which greatly increases the investments for savings banks and which was given in the CHRONICLE April 29, 1899, p. 803. This latter bill passed the Senate Thursday last with an unimportant amendment.

**St. Augustine, Fla.**—*Bond Litigation.*—Suit has been instituted by W. C. Middleton and others against the city of St. Augustine, asking for an injunction to restrain the city from issuing the \$20,000 electric-light plant bonds voted last March.

**Santa Cruz, Cal.**—*Bond Litigation.*—A suit is pending in the United States Circuit Court concerning the validity of 450 5% bonds, in denomination of \$500, issued Jan. 16, 1889. We are advised that "the city of Santa Cruz has been disposed to pay these bonds and has been paying the maturing principal and interest thereon, notwithstanding their supposed invalidity, because the city received value for the bonds and is not desirous of repudiating them. The contest has been forced upon the officers of the city by the determined opposition to their payment by a comparatively small but influential body of citizens."

**Spokane, Wash.**—*Charter Amendments Carried.*—At the election held May 2, 1899, the proposed amendments to the city charter were favorably voted upon. The only amendment of particular interest to investors was that to Section No. 161 and was given in the CHRONICLE April 22, 1899.

**Wisconsin.**—*Legislature Adjourns.*—The State Legislature adjourned on May 4, 1899.

## Bond Proposals and Negotiations this week have been as follows:

**Akron (Ohio) School District.**—*Bond Offering.*—Proposals will be received until 10 A. M. May 30, 1899, by F. W. Shirer, Clerk Board of Education, for \$5,000 4% refunding bonds. Securities are in denomination of \$500, dated May 22, 1899. Interest will be payable semi-annually, and the principal will mature May 22, 1904.

**Allegheny, Pa.**—*Bond Election Ordinance Voted Down.*—The Finance Committee of the City Councils has voted against the ordinance recently introduced in the City Council providing for an election to decide the question of issuing \$500,000 bonds for a filtration plant.

**Allen County (P. O. Scottsville), Ky.**—*Bond Election.*—At the November election (Nov. 7, 1899,) the question of issuing \$175,000 4% 1-20-year refunding bonds will be voted upon. This question was to have been voted upon on May 2, 1899, but the Court of Appeals of Kentucky having decided that an election held for this purpose on any day other than at the November election was unconstitutional, the order for the election May 2 was revoked.

**Antelope School District No. 50, Wasco County, Ore.**—*Bonds to be Issued.*—We are advised that this district will soon ask proposals for \$3,000 bonds.

**Arkansas City, Kan.**—*Bond Issue.*—This city will issue about the last of the present month \$95,000 bonds for the purchase of the local water-works plant. Of this amount \$20,000 have already been subscribed for by citizens, and Mayor Hess is endeavoring to have the entire amount so taken.

**Ashland, Ohio.**—*Bonds Authorized.*—The Village Council has authorized the issuance of \$2,000 6% Fire Department bonds. Securities are in denomination of \$250, dated June 1, 1899. Principal will mature one bond yearly on June 1 from 1903 to 1910, inclusive. E. B. Westover is the Village Clerk.

**Athens, Ga.**—*Bond Sale.*—On May 5, 1899, the \$100,000 4% gold street improvement bonds were awarded to Rudolph Kleybolte & Co., Cincinnati, at 103-60. Following are the bids:

W. J. Hayes & Sons, Cleve., \$105,170 75	Edw. C. Jones & Co., N. Y., \$103,000 00
H. Kleybolte & Co., Cin., 103,600 00	Denton Prior & Co., Cleve., 102,250 00
S. A. Kean, Chicago, 103,500 00	J. Y. Carithers & Co., Athens, 100,000 00
Frank E. Calloway, Atlanta, 103,150 00	T. Philotzy, Athens, 100,000 00

James White, Athens, bid par for the bonds, with privilege to the city of delivering one-half July 1, 1899, and one-half Jan. 1, 1900. W. J. Hayes & Sons, Cleveland, failed to deposit guarantee check, and hence bonds were awarded to the second bidder.

Bonds mature \$3,000 yearly on July 1 from 1900 to 1928, inclusive, and \$13,000 July 1, 1929. For further description of bonds see CHRONICLE April 22, 1899, p. 786.

**An Gros (Mich.) School District.**—*Bonds Voted.*—This district has voted to issue \$2,000 school bonds.

**Baker City, Ore.**—*Bond Election.*—An election will be held May 15, 1899, to vote on the question of issuing \$60,000 gravity water system bonds and \$20,000 bonds to improve the present system.

**Bedford City, Va.**—*Bond Sale.*—We are advised by Mayor J. L. Campbell, under date of May 8, that the city has sold \$60,000 5% 10-30-year (optional) refunding bonds at par. Mr. Campbell says: "There was no advertisement of these bonds, but they were sold upon an offer from the National Exchange and First National banks of Lynchburg, Va. The sale was made about ten days ago."

**Belgrade, Stearns County, Minn.**—*Bond Offering.*—Proposals will be received until 8 P. M. June 3, 1899, by this village for \$6,000 5% water and light bonds which were voted on May 5, 1899. Bonds will be dated July 1, 1899. Place for payment of interest will be optional with purchaser. Principal will mature July 1, 1909.

**Belleville (Ill.) School District.**—*Description of Bonds.*—The refunding bonds voted on April 15, 1899, will probably not be issued until next September or October. They will bear 4% interest, payable semi-annually at Belleville. Principal will mature November 1, 1919.

**Bellevue (Ohio) School District.**—*Bond Proposition Not Voted Upon.*—We are advised that the proposition to issue \$40,000 school-building bonds was not voted upon at the spring election, as originally intended. There is no certainty when the question will be submitted.

**Beltrami county (P. O. Bemidji), Minn.**—*Bonds Offering.*—The Board of County Commissioners has authorized the issuance of \$20,000 5% 20-year bonds to take up outstanding orders of the county. These bonds are dated June 30, 1899, and proposals for the same will be received until May 28 (Sunday), 1899 (so in the advertisement), by J. H. Haner, County Auditor.

**Benton Township, Spink County, S. Dak.**—*Bonds Valid.*—The Minneapolis "Tribune" on May 5, 1899, contained the following dispatch from Redfield, S. Dak.:

An important decision has been rendered by the State Supreme Court in regard to the bonds of Benton Township of Spink County which is of great import to the artesian-well industry of the James River Valley. The bonds were held to be valid. The case grew out of the proposed issue of bonds by Benton Township for the purpose of sinking artesian wells, and interest in the case was general because other townships have been awaiting the determination of the case before taking measures for the issuance of bonds for the same purpose.

**Bituxi, Miss.**—*Bonds Authorized.*—The City Council has authorized the issuance of \$25,000 5% 20-year street-paving and \$15,000 5% 20-year bridge bonds.

**Birmingham, Ala.**—*Bids Not Opened.*—At the meeting of the Board of Aldermen held May 3, 1899, the bids received for the \$25,000 6% 10-year improvement bonds (advertised for sale on that day) were not opened. The bids will probably be considered at a special meeting of the Board to be called shortly.

**Bridgeport, Conn.**—*Bond Bill Passes Legislature.*—The Legislature has authorized the issuance of \$300,000 bonds for new city buildings.

**Buffalo, N. Y.**—*Bond Issue.*—The Comptroller has been authorized to issue \$3,691 91 3/4 bonds to meet expenses of the Board of Public Works. Bonds bear date May 1, 1899. Interest will be payable semi-annually and principal will mature May 1, 1900. The Park Bond Redemption Sinking Fund takes the bonds as an investment.

**Burlington Junction School District No. 1, Nodaway County, Mo.**—*Bonds Voted.*—At the election held May 2, 1899, \$6,000 4% school bonds were authorized. Securities will be in denomination of \$100 and will mature \$500 yearly from 1901 to 1906, inclusive, and \$600 yearly from 1907 to 1911, inclusive. Interest will be payable annually. Date of sale has not been determined.

**Camden County, N. J.**—*Bonds Authorized.*—The County Board of Freeholders has passed a resolution providing for the issuance of \$40,000 4% bonds for building an addition to the County Asylum.

**Carnegie (Pa.) School District.**—*Bond Sale.*—The Dollar Savings Bank of Pittsburg has been awarded \$40,000 4% school bonds at 111-60.

**Central City, Neb.**—*Description of Bonds.*—The refunding bonds which this city proposes to issue will amount to \$25,000, bearing 4% interest. They will be in denomination of \$500, and will mature 20 years from date of issue, \$10,000 being subject to call after 5 years and \$15,000 after 10 years. Any taxpayer who may so desire may file objections to these bonds with the City Clerk before May 22, 1899.

**Charlotte, N. Y.**—*Bond Offering.*—Proposals will be received until 7:30 P. M. May 17, 1899, by the Board of Village Trustees for \$6,000 5-16-year incandescent-light bonds. Securities were voted on May 2, 1899. They are in denomination of \$500. Interest (to be named by bidders) will not exceed 5%.

**Chicago, Ill.**—*Bonds Authorized.*—An ordinance has been passed authorizing the issuance of \$618,000 bonds, to refund those maturing July 1, 1899.

**Cincinnati, Ohio.**—*Bond Sale.*—The Sinking Fund Trustees have taken the \$35,000 3 1/2% Grove Avenue improvement bond authorized by the Board of City Affairs on April 25, 1899. This bond will be dated Dec. 1, 1897, and will mature Dec. 1, 1917, subject to call after Dec. 1, 1907.

**Clay County, Ind.**—*Bond Offering.*—This county will sell on May 18, 1899, \$16,200 6% bonds for the construction of Laferty ditch in Harrison Township. Securities are in de-

nomination of \$310. Interest will be payable semi-annually, and the principal will mature two bonds yearly beginning June 1, 1901.

**College Hill, Ohio.—Bond Sale.**—On May 1, 1899, the \$40,000 5% water-works bonds were awarded to German National Bank, Cincinnati, at 124-77. Bonds mature May 1, 1929. For description of bonds, see CHRONICLE April 1, 1899, p. 635.

**Conneautville, Pa.—Bonds Not Yet Issued.**—We are advised that nothing has as yet been done towards the issuance of the \$10,500 water-works bonds voted last November and that nothing will likely be done in the matter in the near future.

**Ursine Township, Wyandot County, Ohio.—Bond Offering.**—Proposals will be received until 12 M. June 6, 1899, by W. E. Bowsher, Clerk of Township, for \$10,000 6% road-improvement bonds. Securities are in denomination of \$500, dated April 1, 1899. Interest will be payable semi-annually at the Ninth National Bank, New York City. Principal will mature \$5,000 April 1, 1909, and \$5,000 April 1, 1910. A certified check for \$500 on some bank doing business in Wyandot County must accompany proposals. Bids will be opened at 1 P. M. June 6.

**Cranston, R. I.—Bonds Proposed.**—A bill now in the State Legislature provides for the issuance of \$50,000 3½% gold school-house and bridge bonds.

**Danvers, Mass.—Bond Sale.**—School bonds to the amount of \$12,500 were sold last March. To "perfect this issue" a meeting was recently held and whatever action was necessary was taken by the citizens of this place.

**Decatur County (P. O. Leon), Iowa.—Bond Election.**—At the election to be held in November next the question of issuing \$42,000 court-house bonds will be submitted to the people.

**Delaware, Ohio.—Bonds Voted.**—At the recent election this city voted in favor of issuing \$35,000 4% electric-light-plant bonds. Full details of this issue have not yet been determined.

**Denison, Iowa.—Bonds Voted.**—At an election held recently this district voted to issue \$15,500 high-school building bonds.

**Detroit, Mich.—Bonds Proposed.**—The Common Council has passed a resolution requesting the State Legislature to pass an Act to enable the city to issue \$600,000 bridge bonds.

**Dover, N. H.—Loan Authorized.**—The City Treasurer has been authorized to negotiate a six months' loan of \$18,000.

**Dover (N. J.) School District.—Bonds Defeated.**—At an election held recently the proposition to issue \$30,000 school-house bonds was voted down.

**Eddy County, N. Dak.—Bond Election.**—An election will be held in this county to vote on the question of issuing \$15,000 court-house bonds.

**Edgewood, Pa.—Bond Election.**—An election will be held May 22, 1899, to vote on the question of issuing \$22,000 school-house bonds.

**Elk Point, S. Dak.—Bond Sale.**—On April 28, 1899, the \$12,000 4½% water bonds which were voted on April 3 were awarded to John Naveen & Co., Chicago, at 100-6125. Kane & Co., Minneapolis, offered a premium of \$15. Other bids received were not considered, as they did not comply with the specifications. Securities are in denomination of \$500; interest will be payable semi-annually. Principal matures fifteen years from date of issue, subject to call after five years.

**Ely, Minn.—Bond Issue.**—This city is negotiating a loan of \$7,000 for building purposes from the State of Minnesota.

**Fall River County (P. O. Hot Springs), S. Dak.—Bond Offering.**—Proposals will be received until 12 M. July 5, 1899, by William H. Stanley, County Auditor, for \$16,000 6% coupon refunding bonds. Securities will be in denomination of \$1,000, dated July 1, 1899; interest will be payable annually in New York City. Principal will mature July 1, 1914. Bonds are issued pursuant to the provisions of Chapter 32, Session Laws of 1891, approved March 9, 1891. The official circular states that the county has always paid its interest promptly.

**Fall River, Mass.—Bond Sale.**—On May 10, 1899, the \$50,000 4% water loan and \$40,000 4% sewer loan were awarded to N. W. Harris & Co., New York, at 117-135. Following are the bids:

N. W. Harris & Co., N. Y.,.....117-125	Adams & Co., Boston,.....116-79
W. Holman & Co., Boston,.....116-47	E. H. Rollins & Sons, Boston,.....116-79
Blake Bros. & Co., Boston,.....116-48	Bertron & Storrs, New York,.....116-08
Perry, Coffin & Barr, Boston,.....116-43	Blodget, Merritt & Co., Boston,.....116-03
Duncomb & Jenkinson, N. Y.,.....116-36	

The water bonds mature May 1, 1929, and the sewer bonds May 15, 1929. For further description of issue see CHRONICLE May 6, 1899, p. 884.

**Florida.—Bond Bill Passes House.**—The House has passed the bill providing for the refunding at maturity of the \$324,500 State bonds of 1871 and 1873, now held by individuals. The new bonds will bear 3½% interest, and will mature 30 years from date of issue. The old bonds mature in 1901 and 1903.

**Floyd County, Va.—Bond Election.**—The election to vote on the question of issuing \$150,000 5% bonds as a subscription to the capital stock of the Atlantic & Western Railroad will be held May 25, 1899. These bonds will be in denominations of \$100, \$200, \$300, \$500 and \$1,000 and will mature 35 years from date of issue, subject to call after three years. The citizens of the county are to have the privilege of purchasing the bonds or any number thereof from the railroad company at par value for ten days after their delivery. As stated in the CHRONICLE April 22, 1899, the resolution calling this

election provides that no bonds shall be issued until the railroad company shall have completed and have in operation at least 30 miles of road within the limits of the county.

**Fond du Lac, Wis.—Loan Authorized.**—A loan of \$15,000 has been authorized by the Common Council.

**Franklin Township, Bergen County, N. J.—Bond Offering.**—Proposals will be received until 2 P. M. May 15, 1899, by Daniel Depew, Township Clerk, care of Ernest Koester, Hackensack, N. J., for the \$15,000 4% coupon road-improvement bonds voted last December. Securities will be in denomination of \$1,000, dated June 1, 1899; interest will be payable semi-annually at the United States Mortgage & Trust Company, New York City. Principal will mature part yearly on June 1 as follows: \$1,000 from 1900 to 1909, \$2,000 from 1910 to 1928 and \$27,000 in 1929. Proposals must be accompanied by a certified check on a national bank for \$250, payable to Daniel Van Houten, Township Treasurer. The United States Mortgage & Trust Company will certify as to the genuineness of the bonds.

**Gallon (Ohio) School District.—Bond Sale.**—On May 2, 1899, the \$15,000 4½% school bonds were awarded to Season-good & Mayer, Cincinnati, at 110-125. Bonds mature \$500 on March 1 and September 1 from 1904 to 1918, inclusive. For further description of bonds see CHRONICLE April 22, 1899, p. 787.

**Glen Ridge, N. J.—Bond Offering.**—Proposals will be received until 8 P. M. May 22, 1899, by Nathan Russell, Borough Clerk, for \$37,000 4 per cent sewer bonds and \$40,000 5 per cent sewer bonds. Securities are issued to provide funds to pay the township of Bloomfield for sewers or systems of sewerage and drainage constructed by it within the limits of the borough of Glen Ridge. The \$37,000 issue will be coupon bonds of \$1,000 each, dated June 1, 1899. Interest will be payable June 1 and December 1 at the Bank of Montclair, Montclair, N. J. Principal will mature \$2,000 yearly, beginning June 1, 1909. The \$40,000 issue will also be in denomination of \$1,000, dated June 1, 1899. Interest will be payable June 1 and December 1 at the above bank. They will be registered bonds and will mature June 1, 1914, subject to call after June 1, 1900. A certified check for 5% of the par value of bonds bid for, payable to the "Clerk of the borough of Glen Ridge," must accompany proposals.

The official notice of this bond offering will be found among the advertisements elsewhere in this Department.

**Glenwood (Minn.) Independent School District.—Bond Offering.**—Proposals will be received until 3 P. M. May 15, 1899, by C. L. Peterson, Secretary of the Board of Education, for \$15,000 4% 10-year bonds. Securities are in denomination of \$500, dated July 1, 1899. Interest will be payable semi-annually at the National Bank of St. Paul. The assessed valuation of the district is \$168,571; the real valuation about \$500,000. The population is estimated at 1,500. The district has no other debt than above.

**Gloucester, Mass.—Bond Offering.**—Proposals will be received until 5 P. M. May 18, 1899, by the Committee on Finance, care of Edward Dolliver, City Treasurer, for \$30,000 3½% notes or coupon school bonds. Securities are in denomination of \$1,500, dated June 1, 1899. Interest will be payable semi-annually.

**Greenburgh School District No. 10, White Plains, N. Y.—Bond Sale.**—This district has awarded to Bertron & Storrs, New York, \$15,000 11½% (average) bonds at 101 for 4 per cent. Other bidders present were Walter Stanton & Co., L. W. Morrison, Price McCormick & Co., and Geo. M. Hahn of New York, and Isaac W. Sherrill of Poughkeepsie.

**Hartford, Conn.—Bond Bill Passes Legislature.**—The Legislature has passed the bill providing for the issuance of \$250,000 4% 30-year refunding bonds, \$300,000 4% 30-year funding bonds and \$200,000 4% 30-year paving bonds.

**Hastings, Mich.—Loan Authorized.**—The Finance Committee has been authorized to negotiate a loan of \$1,000, to mature January 10, 1900.

**Haverhill, Mass.—Bonds Authorized.**—The Common Council has authorized the issuance of \$50,000 street bonds.

**Healdsburg, Cal.—Bonds Re-awarded.**—The \$90,000 5% water-works bonds which were awarded last August to the Oakland Bank for Savings have been re-awarded to E. D. Shepard & Co., New York, the sale being subject to the opinion of the firm's attorney as to the legality of the issue. It was provided that the money to pay for the bonds must be forthcoming on the first of May, but the firm's attorney has not reported yet. As told in the CHRONICLE of April 22, 1899, p. 785, Judge Barnett of the Superior Court on April 3 handed down an opinion dissolving the injunction restraining the city from issuing these bonds.

**Houghton, Mich.—Bond Bill Passed by House.**—The House has passed the bill providing for the issuance of \$60,000 water-works and street improvement bonds.

**Huntsville, Ala.—Bond Offering.**—Proposals will be received until May 22, 1899, for \$30,000 5% 30-year water-works bonds. Securities will be in denomination of \$500, dated February 1, 1899. Interest will be payable semi-annually at the Mechanics' National Bank, New York City. These are the same bonds which were awarded to Briggs, Todd & Co., Cincinnati, last February. City Clerk Shelby S. Fletcher writes us that the Cincinnati firm raised several technical

objections and that therefore the City Council decided it was best to cancel the trade and re-advertise the issue.

**Indianapolis (Ind.) School District.—Bonds Authorized.**—At a meeting of the Board of School Commissioners held April 23, 1899, the issuance of \$500,000 funding bonds was authorized to take up indebtedness to that amount on July 1, 1899.

**Iron Mountain, Mich.—Bond Sale.**—On May 2, 1899, \$15,000 6½ school bonds were awarded to W. J. Hayes & Sons, Cleveland, at 108'93. Following are the bids:

W. J. Hayes & Sons, Cleveland.....\$16,347	Mason, Lewis & Co., Chicago.....\$16,035
Lamprecht Bros. Co., Cleve..... 16,264	Farson, Leach & Co., Chic..... 15,450
Denison, Prior & Co., Cleve..... 16,143	

It is stated that the amount of bonds issued was afterwards reduced to \$13,500.

**Jackson, Miss.—Bond Issue.**—Sidewalk bonds to the amount of \$20,000 will be issued by this city.

**Jefferson County, Tenn.—Bond Election.**—An election will be held June 1, 1899, to vote on the question of issuing \$100,000 road bonds.

**Jennings (Mo.) School District.—Bonds Authorized.**—The issuance of \$4,000 school bonds has been authorized.

**Jersey City, N. J.—Bonds Redeemed.**—On May 10, 1899, City Comptroller Jordan redeemed \$411,000 4½% tax-arrearage bonds.

**Knox County, Tenn.—Change in Bond Sale.**—Feder, Holzman & Co., Cincinnati, who were recently awarded \$50,000 of the \$100,000 4½ 10-20-year (optional) funding bonds at 105'187, have made a proposition to the County Court to take 3½% 20-year bonds instead, at their par value. The County Court has accepted the proposition. See CHRONICLE April 29, 1899, for original sale.

**La Grande School District No. 1, Union County, Ore.—Bond Sale.**—On May 1, 1899, \$17,000 school bonds were sold to Francis C. McMullen at 100'609.

**Lake County (P. O. Crown Point), Ind.—Bond Offering.**—On May 15, 1899, at 11 A. M., the following bonds will be offered for sale by John W. Dyer, County Treasurer, at his office in Crown Point:

\$167,500 Center and St. Johns townships (joint) 200 bonds—100 for \$1,000 each—40 for \$187 50 each. Four \$1,000 bonds and one \$187 50 bond will fall due each six months, commencing Nov. 15, 1899. Bonds are issued to raise money for constructing 40 miles of road, and were voted at the joint election held March 14, 1899, by a vote of 505 for to 190 against. Assessed valuation, 1898, was \$2,564,210.

\$2,900 bonds of Center Township—40 bonds of \$322 50 each, maturing one bond each six months, commencing Nov. 15, 1899. Securities are issued to raise money to construct 3 3/8 miles of road. The election, held March 14, 1899, resulted in 423 votes for to 236 against this issue. Assessed valuation, 1898, \$902,015.

The above bonds will all carry 4½% interest, payable semi-annually at the office of the County Treasurer. Bonds are issued under an Act of the General Assembly approved March 3, 1893, amended March 7, 1895, and Feb. 28, 1899, and by order of the full Board of Commissioners in session April 13, 1899.

**Lake County (P. O. Painesville) Ohio.—Bond Offering.**—Proposals will be received until 12 M. May 30, 1899, by the Board of County Commissioners, for \$35,000 4½ bridge bonds. Securities are issued in accordance with sections 871, 872 and 873 Revised Statutes of Ohio, and in pursuance with a resolution passed by the board on April 21, 1899. They are in denomination of \$500, dated June 1, 1899. Interest will be payable June 1 and December 1 at the office of the County Treasurer. Principal will mature part yearly on June 1 as follows: \$1,500 from 1900 to 1909, inclusive, and \$2,000 from 1910 to 1919, inclusive. A certified check on a Painesville bank or cash in the sum of \$700 will be required with each bid.

**Lake Providence, East Carroll Parish, La.—Bond Offering.**—Proposals will be received until 12 M. June 1, 1899, by G. M. Franklin, Mayor, for \$17,500 5% gold bonds. Securities are in denomination of \$500, dated April 1, 1899. Interest will be payable at the Merchants' National Bank, Vicksburg. Principal will mature April 1, 1939, subject to call after April 1, 1919.

**Lakeview, Ore.—Bond Election.**—An election will be held May 15, 1899, to vote on the question of issuing \$25,000 water-works bonds.

**Lansingburg, N. Y.—Bond Sale.**—On May 10, 1899, \$63,000 5½-year (average) street-improvement bonds were awarded to Allen, Sand & Co., New York, at 101'39. Following are the bids on 3½% bonds:

Allen, Sand & Co., New York.....101'39	R. B. Smith & Co., New York.....100'80
W. J. Hayes & Sons, Cleveland.....101'10	Edw. C. Jones & Co., N. Y.....100'57
Bertrou & Storrs, New York.....101'09	J. W. Shearill, Foughkeepsle.....100'56

N. W. Harria & Co., New York, bid 103'80 for a 4% bond.

**Lawrence County, Tenn.—Bonds Defeated.**—At a recent election this county voted against the issuance of turnpike bonds.

**Madrid (Iowa) School District.—Bond Sale.**—On April 15, 1899, \$6,000 4½ 5-10-year (optional) school bonds were awarded to D. B. Lyons, Des Moines, at par.

**Mansfield, Ohio.—Bond Sale.**—On May 11, 1899, the \$4,000 (\$300 not issued) 6% 1-5-year and \$1,650 6% 1-5-year street-assessment bonds were awarded to the Mansfield Savings Bank at 107'525 and 107'03 respectively.

**Maquoketa, Iowa.—Bond Sale.**—On April 26, 1899, \$8,000 4% funding bonds and \$3,500 refunding bonds were sold to the American Savings Bank of Maquoketa at 100'29. Bonds mature April 1, 1909, subject to call \$1,000 yearly. They are in denomination of \$500, and interest will be payable annually on April 1.

**Maricopa County (Ariz.) School District No. 4.—Bond Sale.**—On May 4, 1899, \$7,000 7% 10-20-year (optional) gold

school bonds were awarded to D. B. Heard at 107'50. Following are the bids:

D. B. Heard.....\$7,525'00	J. C. Wasson.....\$7,315'00
J. B. Heard..... 7,500'00	William Christy..... 7,300'00
New Ist Nat. Bk., Columbus..... 7,500'00	Phoenix National Bank..... 7,140'00
Mark Lewis..... 7,490'00	Sol Lewis..... 7,100'00
E. E. Pasco..... 7,355'00	Arthur D. Thompson..... 7,017'50

A bid of \$7,260 was received from Duke M. Farson, Chicago, too late to be considered.

**Marquette, Mich.—Bond Election.**—An election will be held June 5, 1899, to vote on the question of issuing \$5,000 bonds for the normal school.

**Marshall County, Ala.—Bids Rejected.**—All bids were rejected on May 1, 1899, for \$100,000 turnpike, bridge and ferry bonds, according to reports.

**Mutton (Ill.) School District No. 1.—Bond Sale.**—On May 1, 1899, the \$28,000 4½ 10-20-year (optional) school bonds were awarded to the First National Bank, Chicago, at 105. For description of bonds see CHRONICLE April 15, 1899, p. 737.

**Milwaukee, Wis.—Temporary Loan.**—At a special meeting of the Council held April 29, 1899, the city officials were authorized to borrow \$450,000 from the school fund for general city purposes. Of this amount \$330,000 will be borrowed for the purpose of retiring notes issued earlier in the year, and \$120,000 for the payment of April salaries.

On May 9, 1899, another \$100,000 was borrowed from local banks for the purpose of meeting general expenses.

**Minneapolis, Minn.—Certificate Offering.**—Proposals will be received until 2 P. M. May 22, 1899, by Chas. P. Preston, Secretary of the Board of Court House and City Hall Commissioners, for \$175,000 4½ certificates of indebtedness. Securities are in denomination of \$1,000, dated June 1, 1899. Interest will be payable semi-annually at the city's fiscal agency in New York City. Principal will mature yearly on January 1, \$50,000 from 1901 to 1903, inclusive, and \$25,000 in 1904.

**Monroe County (P. O. Sparta), Wis.—Bond Offering.**—Proposals will be received until 1 P. M. May 30, 1899, by J. A. Mosheu, County Treasurer, for \$15,000 4½ "poor farm purchase and building fund" bonds. Securities are in denomination of \$100, dated June 15, 1899. Interest will be payable annually on March 1 at the office of the County Treasurer. Principal will mature \$3,000 on March 1 of the years 1904 and 1905 and \$9,000 March 1, 1906.

**Morgan County, Ala.—Bond Deal Declared Off.**—A dispatch in the Nashville "American" dated May 2, 1899, stated that the Court of County Commissioners met in adjourned session on that day and declared the contract made by Denison, Prior & Co., Cleveland, for the purchase of the \$265,000 4½% road bonds vacated and covered the forfeit into the county's treasury. This action was taken, it is stated, because the Cleveland firm failed to take the bonds on May 1, 1899, the date of issue agreed upon.

**Mount Pleasant Union Free School District No. 1, Westchester County, N. Y.—Bond Offering.**—Proposals will be received until 8 P. M. May 16, 1899, by G. F. Van Tassel, Clerk, at North Tarrytown, for \$50,000 4½ school-building bonds. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable January 1 and July 1, and the principal will mature \$2,000 yearly on July 1 from 1900 to 1924, inclusive. Bonds were voted at a meeting of the district held Nov. 22, 1898.

**Nashville (Ill.) School District.—Bond Sale.**—At a recent meeting of the Board of Education the resolution to receive bids until May 20, 1899, for the \$13,000 4½ refunding bonds was reconsidered and the bonds were then sold to local investors.

**Nebraska City (Neb.) School District.—Bond Sale.**—On May 1, 1899, the \$20,000 refunding bonds were awarded to John Nuveen & Co., Chicago, who bid on a 4% bond. Bonds mature in 20 years, \$10,000 being subject to call after five years and \$10,000 after ten years.

**New Hanover County, N. C.—Bonds Defeated.**—At the election held on May 2, 1899, the proposition to issue \$50,000 road-improvement bonds was defeated.

**New Holland (Ohio) School District.—Bonds Voted.**—This district, by a vote of 107 to 47, recently authorized the issuance of \$6,000 bonds for the new school house.

**New London, Conn.—Bond Offering.**—Proposals will be received until 8 P. M. May 18, 1899, by the Board of Sewer Commissioners—Mayor Cyrus G. Beckwith, President—for \$20,000 3½% sewer bonds. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable semi-annually and the principal will mature July 1, 1919.

**New Mexico.—Bids.**—As stated last week, this Territory on May 1, 1899, sold \$60,000 4% Capitol rebuilding bonds to Denison, Prior & Co., Cleveland, at 101'3375 and transportation charges (Santa Fe delivery). Following are the bids received:

Denison, Prior & Co., Cleveland, \$802 50 premium and transportation charges (Santa Fe delivery).

John F. McDonald, Niagara Falls, \$828 premium (Buffalo delivery).

International Trust Co., Denver, \$500 premium.

Mason, Lewis & Co., Chicago, \$255 premium.

Duke M. Farson, Chicago, par less \$2,300 commission.

W. J. Hayes & Sons, Cleveland, par, "fair commission."

W. H. McLuttrell, Mesalero, N. M., \$50 premium for \$1,000.

Interest will be payable semi-annually at the National Bank of Commerce, New York City.

**New Rochelle, N. Y.—Bond Offering.**—Proposals will be received until June 6, 1899, by this city for \$150,000 street-improvement and \$18,000 city-prison bonds. Securities will be in denomination of \$1,000. Interest, to be named by purchaser, will be payable in New York City.

**Niagara Falls, N. Y.—Bond Sale.**—On May 5, 1899, the highest bid received for \$15,000 4% sewer bonds was that of

N. W. Harris & Co., Chicago, at 112-53. Following are the bids:

N. W. Harris & Co., Chicago.....112-53	Seasongood & Mayer, Clioctn..... 111-18
Joseph E. Gavin, Buffalo.....112-65	M. M. Marcus, Buffalo.....110-73
Lamprecht Bros. Co., Cleveland.....111-97	Geo. M. Hubbs, New York.....110-35
R. O. McNair, Buffalo.....111-752	F. E. Johnson, Niagara Falls.....110-11
Deulson, Prior & Co., Cleveland..... 111-656	J. F. McDonald, Niagara Falls.....101-44
Bertron & Storrs, New York.....111-59	

Bonds are in denomination of \$1,000, dated May 1, 1899. Interest will be payable semi-annually, and the principal will mature May 1, 1919.

**Nora Springs, Floyd County, Iowa.—Bond Offering.**—At 2 P. M. May 25, 1899, will be sold by the incorporated town of Nora Springs \$6,540 water-works bonds. Six of the bonds will be in denomination of \$1,000 and one bond will be for \$540, all to be dated June 1, 1899; interest will be payable semi-annually at the office of L. H. Piehn, Town Treasurer. Principal will mature June 1, 1919. Proposals are asked for either a 5, 4½ or 4% bonds. Bonds are issued under Section 720-726, Title V, Chapter 4, Code of Iowa, and were authorized by a vote of 195 to 72 at the election held March 27, 1899. The official circular states that the town has never defaulted in the payment of principal or interest. The town has no bonded debt exclusive of this issue. Assessed valuation, \$150,828; estimated real value, \$600,000. Estimated present population, 1,300.

**North Bend, Dodge County, Neb.—Bond Offering.**—Proposals will be received until 2 P. M. June 1, 1899, for the \$7,200 5% water-works bonds. Interest will be payable at the City Treasurer's office and the principal will mature June 1, 1919, subject to call after June 1, 1904.

**North Dakota.—Bond Offering.**—Proposals will be received until 3 P. M. May 15, 1899, by D. W. Driscoll, State Treasurer, Bismarck, N. Dak., for \$50,000 certificates of indebtedness authorized by Senate Bill No. 94, passed at the sixth session of the State Legislature. The certificates will be issued in denomination to suit purchaser and will be dated June 1, 1899. Interest will be payable at maturity Nov. 1, 1903. Each bid must state the lowest rate of interest which the bidder will accept upon such certificates. A certified check to the amount of 5%, payable to the State Treasurer, must accompany proposals.

**Northwood, Worth County, Iowa.—Bond Sale.**—This town has sold \$2,000 5½% refunding bonds.

**Norwalk, Conn.—Bond Offering.**—Proposals will be received until 12 M. May 29, 1899, by Charles L. Glover, Mayor, for \$250,000 3½% gold refunding bonds. Securities are in denomination of \$1,000, dated July 1, 1899, and will be either coupon or registered, as the purchaser may elect. Interest will be payable semi-annually at the Fairfield County National Bank of Norwalk. Principal will mature July 1, 1929, subject to call on any January 1 or July 1 after January 1, 1919. Bonds will refund \$200,000 water-bonds and \$50,000 municipal expense bonds. A certified check for 1% of the par value of bonds bid for must accompany proposals. Bids will be opened by the City Council at 8 P.M. June 1, 1899.

The official notice of this bond offering will be found among the advertisements elsewhere in this Department.

**Norwich, Conn.—Bond Bill Passes Legislature.**—The Senate has passed, in concurrence with the House, a resolution authorizing this city to issue \$300,000 3½% 25-year water bonds.

**Oconomowoc, Wis.—Bond Election Authorized.**—The Common Council has authorized an election on May 15, 1899, to vote on the question of issuing \$42,000 water-works bonds.

**Odessa, Minn.—Bond Offering.**—Proposals will be received "at once" for an \$800 5% 5-year village-hall bond.

**Orange, N. J.—Bond Sale.**—On May 8, 1899, the \$50,000 4% sewer bonds were awarded to Dick Bros. & Co., Philadelphia, at 110-21. Following are the bids:

Dick Bros. & Co., Philadelphia.....110-21	Edw. C. Jones & Co., New York.....106-10
Benwell & Everett, New York.....109-31	Half-Dime Savings Bank, Orange (\$50,000).....106-76
N. W. Harris & Co., New York.....109-29	W. J. Hayes & Sons, Phila.....108-14
W. J. Hayes & Sons, Phila.....108-14	Orange Sav. Bank.....106-50
Farson, Leach & Co., N. Y.....108-10	
Walter Stanton & Co., N. Y.....108-08	
E. H. Hollins & Sons, Boston.....106-213	

Principal will mature \$10,000 in the years 1919, 1920 and 1921 and \$20,000 in 1922. For further description of bonds see CHRONICLE April 29, 1899, p. 840.

**Ormsby County (P. O. Carson City), Nev.—Bond Sale.**—On May 1, 1899, this county sold \$20,000 gold 5% Agricultural Association bonds to Richard Kirman, Carson City, at 100-50

## NEW LOANS

\$77,000

**BOROUGH of GLEN RIDGE, ESSEX COUNTY, N. J., SEWER BONDS.**

Proposals will be received until 8 P. M. of May 22nd, 1899, at the Council Rooms of the Borough of Glen Ridge, N. J., for the purchase of Sewer Bonds as hereinafter described:

Said bonds are to be issued by said Borough of Glen Ridge, Essex County, N. J., to provide funds to pay the Township of Bloomfield for Sewers & systems of sewerage and drainage constructed by it within the limits of the Township of Glen Ridge, N. J., and for rights, interest or property in outlet systems of sewerage and drainage of trunk sewers in the water outside of the Borough of Glen Ridge, N. J., in accordance with the terms of the contract between said Township of Bloomfield and said Borough of Glen Ridge and other parties, dated on the 31st day of March, 1898, and under the authority of an Act of the Legislature of the State of New Jersey, entitled "An Act respecting boroughs and providing for the purchase of sewers and systems of sewerage and drainage therein, with outlets therefor and providing for the extension of the same." Approved April 4, 1898.

Said Bonds will be divided into two classes as follows:

One class of said Bonds will be Coupon Bonds, and will be thirty seven in number and of the denomination of \$1,000 each; they will be dated on the 1st day of June, 1899, and will bear interest at the rate of 4 per cent per annum, payable semi-annually at the Bank of Montreal, in the town of Montreal, N. J., on the 1st days of June and December of each year. Both principal and interest will be payable in the lawful money of the United States.

None and 5 of said Bonds will fall due on the first day of June, 1900, and the consecutive numbers will fall due two on the 1st day of June in each year thereafter until all are paid.

The other class of said Bonds will be forty in number; they will be of the same denomination and date as those above mentioned, but will be Registered Bonds and will bear interest at the rate of 4 per cent per annum, payable as above, and will fall due on the first day of June, 1914, but with the right, and the Bonds will bear upon their face a reservation to that effect, in said Borough to pay off the principal of any of said Bonds at par on any date when the interest shall become due thereon, beginning with the first day of June, 1900, from the proceeds derived from the assessments for lateral sewers upon the property benefited.

The Bonds so to paid to be drawn by lot.

The assessed valuation of Real Estate in said Borough in 1898 was \$1,124,500.

The present bonded debt of said Borough is \$20,000, incurred for Road Improvement Bonds issued in 1897, and maturing \$1,000 on February 1st, 1902, and afterwards \$2,000 or \$3,000 each year until all are paid.

Each proposal must be accompanied by a certified check to the order of the Clerk of the Borough of Glen Ridge, N. J., in the amount of 5 per cent of the par value of the Bonds bid for, as a guaranty of the good faith of the bidder, and must be presented in a sealed envelope addressed, "Bid for Glen Ridge, N. J. Sewer Bonds."

The Borough Council reserves the right to reject any or all bids.

Inquiries and proposals may be directed to the undersigned.

NATHAN RUSSELL, Borough Clerk,  
Glen Ridge, N. J.

## NEW LOANS.

\$250,000

**CITY of NORWALK 3½% GOLD BONDS.**

Sealed proposals for the purchase of the whole or part of an issue of Two Hundred and Fifty \$1,000 Bonds to be issued by the City of Norwalk, to be paid in Gold Coin of the United States of the present weight and fineness; to bear 3½ per cent interest, payable in equal semi-annual payments, payable July 1st, A. D. 1909, and at the option of the City on any January 1st or July 1st after January 1st, 1919, upon giving three months' notice of intention to pay, will be received by Mayor Charles L. Glover of the City of Norwalk until the 29th day of May, A. D. 1899, at 12 o'clock noon.

Said bonds are to pay a like amount of bonds now outstanding and payable July 1st, 1899. Two hundred thousand of which were for water-works construction and fifty thousand municipal expenses. The bonds will be dated July 1st, 1899, have interest coupons attached or be registered as purchasers shall elect, and are to be payable, both principal and interest, at the Fairfield County National Bank, in said city.

Proposals should state the number of bonds bid for, and must be accompanied by a certified check for one per cent of the amount per value of the bonds bid for. All bids will be opened by the City Council on June 1st, 1899, at 8 P. M. The right is reserved to reject any and all bids.

The City's Grand List is over 15,000,000. Population is over 17,000. The income from water-works is several thousand in excess of all expenses and interest and is required by the charter to be applied to expense of construction, etc., of water works.

OLIVER E. WILSON,  
GOULD HOYT,  
A. H. HOYT,  
Finance Committee,  
City of Norwalk, Conn., May 14th, 1899

## NEW LOANS.

**City of Yankton, So. Dakota. BOND CALL.**

To the Holders of City of Yankton, South Dakota, Bonds, Dated August 15th, 1886, and July 1st, 1885.

### TAKE NOTICE:

That the following-described bonds of the City of Yankton, South Dakota,

\$54,000 Railroad Aid Bonds, dated Aug. 15, 1885,  
2,000 Water Works Bonds, dated July 1st, 1886,  
have been called for payment May 15th, 1899, after which time all interest will cease. The \$57,000 above-mentioned bonds will be paid at the Chemical National Bank, in the City and State of New York.

By order of the City Council of the City of Yankton, which chooses to exercise the right of prepayment mentioned in said bonds.

Dated at Yankton, South Dakota, this 7th day of April, 1899.

S. S. BUCKWALTER,  
City Treasurer.

Other bidders were the Bullion Exchange Bank, Carson City, and Denison, Prior & Co., Cleveland, Ohio. Securities are issued in denomination of \$1,000. Principal will mature in twenty years, subject to call after ten years.

**Orrville (Village), Ohio.—Bond Offering.**—Proposals will be received until 12 M. June 2, 1899, by the Finance Committee of the Council at the office of Edward Wirth, Village Clerk, for \$30,000 5% paving bonds. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable semi-annually and the principal will mature \$3,000 yearly on July 1 from 1900 to 1909, inclusive. A certified check for 5% of the amount of each bid, payable to the Village Clerk, must accompany proposals.

**Oxford, Miss.—Bonds Authorized.**—According to local reports the City Council has authorized the issuance of \$20,000 sewer bonds.

**Peoria, Ill.—Bond Sale.**—The city has sold \$14,700 6% 14-year improvement bonds to the First National Bank of Peoria at a little over 104. Bonds mature part yearly on April 15.

**Perham (Minn.) School District.—Bond Sale.**—This district has sold to the State the \$8,000 bonds recently voted for a new school house.

**Phoenixville, Pa.—Bonds Proposed.**—We are advised that this borough may refund its water debt (now subject to call) about October next.

**Pine County, Minn.—Bonds Authorized.**—The County Commissioners have authorized the issuance of \$30,000 bonds to fund the floating indebtedness.

**Portsmouth, Va.—Bond Offering.**—Proposals will be received until 6 P. M. May 16, 1899, by E. Thompson, Jr., City Clerk, for \$25,000 5% coupon paving redemption bonds. Securities are in denomination of \$500, dated June 1, 1899. Interest will be payable June 1 and December 1 and the principal will mature June 1, 1929. Bonds are exempt from city taxes and can be registered, principal and interest or principal only, at the option of the holder.

**Price (Utah) School District.—Bonds Voted.**—According to local reports, at a recent election the proposition to issue bonds for a school house was favorably voted upon.

**Randolph, Vt.—Bond Issue.**—The National Life Insurance Co. of Montpelier has offered to extend from July 1, 1899,

the payment of \$17,000 4% water bonds of this village, at the rate of 3½%.

**Red Lodge, Mont.—Bonds Voted.**—On May 1 this city, by a vote of five to one, authorized the issuance of \$25,000 water-works bonds. Interest will not exceed 5%, and will be payable in Red Lodge unless the purchaser notifies the City Treasurer to pay in New York City. Principal will mature in 20 years, subject to call after 10 years. We are advised that the date of sale has not been determined upon, as the preliminary surveys have yet to be made.

**Reldsville, N. C.—Bids.**—The following bids were received on May 2, 1899, for the \$25,000 5% and \$7,500 6% improvement bonds:

	For \$25,000 Issue.	For \$7,500 Issue.
Rudolph Kleybolte & Co., Cincinnati.....	\$27,350 00	\$8,613 75
Denison, Prior & Co., Cleveland.....	27,287 50	8,493 75
N. W. Harris & Co., Chicago.....	27,207 50	8,316 25
F. M. Stafford & Co., Chattanooga.....	27,065 00	8,648 25
Seasongood & Mayer, Cincinnati.....	27,062 50	8,681 62
Edward C. Jones & Co., New York.....	26,787 50	8,500 00
W. J. Hayes & Sons, Cleveland.....	26,673 00	8,500 00
J. R. Gilliam.....	26,625 00	8,914 50
The Lamprecht Bros. Co., Cleveland.....	25,632 50	8,274 00
F. M. Stafford & Co. (for 4½% bond).....	25,105 00	.....

In addition to above Rudolph Kleybolte & Co. bid \$8,150 for the \$7,500 bonds, but for an issue bearing only 5% interest. The \$25,000 bonds mature May 1, 1929, and the \$7,500 on July 1, 1921. For full description of bonds see CHRONICLE April 8, 1899, p. 686.

**Rochester, N. Y.—Bonds Authorized by Legislature.**—This city has legislative authority to issue \$100,000 Hemlock Lake water-shed bonds. The Common Council, we are advised, has as yet taken no action looking towards the issuance of these bonds.

**Saginaw, Mich.—Bonds Voted.**—This city has voted in favor of issuing \$35,000 market-house bonds. They have yet to be authorized by the City Council before issuance.

**St. Joseph (Mo.) School District.—Bond Offering.**—Proposals will be received until 4 P. M. May 22, 1899, by Harry H. Smith, Secretary of School Board, for the \$50,000 4% coupon school-house bonds which were voted by a large majority at the election held on April 29, 1899. Securities will be in denomination of \$1,000, and will be dated not later than July 1, 1899; interest will be payable semi-annually at the National Bank of Commerce, New York City. Principal

will mature 20 years from date of issue, subject to call after 10 years. Bonds will be issued pursuant to State Laws, and the Attorney of the district, Thos. J. Porter, has certified as to their legality. A certified check for \$500, payable to the school district of St. Joseph, must accompany proposals.

**San Francisco, Cal.—Bond News.**—This city proposes to issue bonds for the purpose of public improvements, including the extension of what is known as the Panhandle of Golden Gate Park; also to acquire a strip of land for a boulevard, to acquire property and to erect thereon school buildings, and for sewers.

The estimated cost for the acquisition of the land for the extension of the Panhandle of Golden Gate Park alone amounts to \$3,500,000. Resolutions have been passed for the purpose of determining the cost of the various improvements, but reports must be first received before a special election can be called to vote the bonds. The law requires that special elections for the different improvements mentioned must be held on separate days.

**Sault Ste. Marie (Mich.) School District.—Bond Offering.**—Proposals will be received until 4 P. M. June 1, 1899, by James T. Moore, Secretary of the Board of Education, for \$22,000 4½% school bonds. Securities are in denomination of \$500, dated July 1, 1899. Interest will be payable semi-annually in New York exchange. Principal will mature July 1, 1919.

**Sedalia, Mo.—Bond Sale.**—Rudolph Kleybolte & Co., Cincinnati, have been awarded \$30,000 20-year refunding bonds at 106½ for 4 per cents. A conditional sale of \$17,000 bonds was also made to the same company, which bonds will be voted upon at a special election.

**Shelby (Iowa) School District.—Bond Offering.**—Proposals will be received until June 1, 1899, for \$6,000 4½% 5-10-year (optional) school bonds, bearing date June 13, 1899. Securities were authorized by a vote of 114 to 38 at a recent election.

**South Omaha, Neb.—Bond Sale.**—Refunding bonds to the amount of \$70,000, bearing 5% interest, have been awarded to F. J. Moriarty, Cashier Packers' National Bank of South Omaha, at 106½.

**Starkville (Town), Miss.—Bond Offering.**—Proposals will be received until 8 P. M. June 6, 1899, by F. L. Wier, Mayor.

for \$12,500 5% 5-20-year (optional) school bonds and \$2,000 6% 5-20-year (optional) street-improvement bonds. Interest in above issues will be payable semi-annually in New York City. Certified checks for \$500 for the school bonds and \$100 for the street-improvement bonds, payable to the Town Treasurer, must accompany proposals.

**Stewartville (Minn.) School District.—Bonds Voted.**—At a special school meeting held May 2, 1899, the issuance of \$15,000 school-house bonds was authorized by a vote of 188 to 133.

**Sullivan, Ill.—Bond Election.**—An election will be held on May 20, 1899, to vote on the question of issuing bonds for the purpose of improving the water supply, for a cemetery and for the extension of the sewerage system.

**Snubury, Pa.—Refunding Bonds Not Yet Authorized.**—No action has yet been taken by the Borough Council looking towards the refunding of the borough's indebtedness. Steps will probably be taken to this end later in the season.

**Tecumseh, Neb.—Bond Offering.**—Proposals will be received until 8 P. M. May 23, 1899, by this city for the \$21,000 4½% coupon refunding water bonds which were recently voted and for which proposals were originally asked for until April 27, 1899. Securities will be in denomination of \$500 and will draw interest from May 1, 1899; interest will be payable May 1 at Nebraska Fiscal Agency, New York City. Principal will mature May 1, 1919, subject to call after May 1, 1909. Proposals must be accompanied by a certified check for \$500.

**Toledo, Ohio.—Bonds Authorized.**—The Board of Aldermen has authorized the issuance of \$32,387 20 Woodville Street improvement bonds and \$4,427 07 Fassett Street improvement bonds.

**Topeka, Kan.—Bonds Authorized.**—The City Council has passed an ordinance creating Sewer District No. 13 and providing for the issuance of bonds for the payment of the expenses of the proposed improvement. Bonds are to bear interest at a rate not exceeding 8% and will mature within ten years. Another ordinance passed by the Council authorizes the issuance of \$2,670 44 6% 1-10-year improvement bonds, bearing date April 1, 1899.

**Trenton, Gibson County, Tenn.—Bond Offering.**—Proposals are asked by this city for the \$2,500 6% (optional) bonds

recently authorized by the State Legislature for the extension of the water-works system. Securities will be in denomination of \$500 and the interest will be payable in Trenton.

**Uinta County School District No. 1, Evanston, Wyo.—Bond Sale.**—On May 1, 1899, the \$24,900 refunding bonds were awarded to E. H. Rollins & Sons, Denver, Col., at par for a 4½% bond. Following are the bids:

For a 4½% Bond.		For a 5% Bond.	
E. H. Rollins & Sons, Denver.	Par	N. W. Harris & Co., Chicago.	\$25,003 00
For a 5½% Bond.		John F. McDonald, N. Falls.	24,050 00
Louis Kirk, Cheyenne.	\$25,896 00	Le Roy Davidson, N. Y. City.	Par
Spokane & East Tr. Co., Spok.	25,635 00	Denison, Prior & Co., (less	Par
R. Kleybold & Co., Cin.	25,285 00	commission of \$250)	
First Nat. Bank, Cheyenne.	25,278 50	Duke M. Farson (less commis-	Par
Mason, Lewis & Co., Chic.	25,255 00	sion of \$700)	
W. J. Hayes & Sons, Cleve.	25,024 50		

F. R. Fulton & Co., Chicago, bid par and accrued interest and \$757 premium, also furnish blank bonds for \$25. Amanda R. Buck, Newburgh, N. Y., bid par and \$25 premium for one \$1,000 bond. Principal will mature May 1, 1919, subject to call after May 1, 1909. For further description of bonds see CHRONICLE April 8, 1899, p. 687.

**Vernon (Mich.) School District.—Bonds Proposed.**—This district proposes to issue bonds for a school house.

**Wadesboro, N. C.—Bonds Voted.**—Road-improvement bonds to the amount of \$25,000 were voted at the election held May 2, 1899.

**Wasco County (Ore.) School District No. 5.—Bond Sale.**—On May 1, 1899, School District No. 5 of this county sold \$800 6½ 10-20-year (optional) bonds to W. E. Bell, Spokane, Wash., at 103-25.

**Washburn County, Wis.—Bond Issue.**—The County Board has made application to the State for a loan of \$35,000 to refund the present indebtedness of the county. Loan will mature one-twentieth yearly.

**Washington, Pa.—Bonds Authorized.**—The Borough Council has passed ordinances providing for the issuance of \$67,000 street-paving and \$8,000 fire-alarm system bonds.

**Westbrook (Town), Me.—No Bonds Sold.**—It has been reported by some newspapers that this town had sold \$2,000 4% refunding bonds. Upon inquiry we learn that the town has not sold any bonds recently, but that a small amount of refunding bonds will probably be issued during the month of June.

**Wayne County (P. O. Detroit), Mich.—Bond Sale.**—On May 6, 1899, \$700,000 3½% building bonds were awarded to the State Savings Bank, Detroit, at 105-0152. Following are the bids:

Premium.		Premium.	
State Sav. Bank, Detroit.	\$35,106 67	Seasongood & Mayer, Cin.	\$5,050 00
Mason, Lewis & Co., Chicago.	34,230 00	Duncomb & Jennison, N. Y.	3,500 00
W. J. Hayes & Sons, Cleve.	3,170 00	Denison, Prior & Co., Cleve.	2,835 00
New Nat. Bk. of Comm.	12,480 00	E. H. Gay & Co., Boston.	1,000 00
N. W. Harris & Co., Chicago.	10,785 00	Ill. Trust & Sav. Bk., Chic.	750 00
Farson, Loach & Co., Chic.	10,301 00	N. Y. Security & Trust Co.	Par
People's Sav. Bank, Detroit.	10,200 00	City Sinking Fund (\$200,000)	11,000 00
Lamprecht Bros. Co., Cleve.	8,875 00	First Nat. Bank (\$100,000)	10,200 00
Briggs, Todd & Co., Cin.	5,500 00	Carson, Craig & Co. (\$40,000)	2,000 00

Securities are in denomination of \$1,000, dated May 1, 1899. Interest will be payable semi-annually in New York City and the principal will mature May 1, 1914.

**West Conshohocken, Pa.—Bond Offering.**—Proposals will be received on June 1, 1899, by this borough for the \$3,000 4% street-improvement bonds which were voted in February last. Principal will mature in 20 years, subject to call after five years.

**West Point, Neb.—Bonds Authorized.**—This city will shortly advertise for sale \$23,000 4½% refunding bonds.

**White Plains, N. Y.—Bonds Refused.**—E. H. Gay & Co., New York, who on April 17, 1899, were awarded \$25,000 4% water-works bonds, have refused to take the same. The ground for refusal was that Section 4, Chapter 769, Laws of 1896, under which the bonds were issued, provided for 30-year bonds, whereas the bonds advertised matured part yearly from 1929 to 1932. This technical error must be rectified and the bonds re-advertised.

**Wilkesbarre, Pa.—Bonds Voted.**—At a special election held May 9, 1899, the proposition to issue \$100,000 improvement bonds carried by about 300 majority.

**Williamsport, Pa.—Bonds Proposed.**—An ordinance has passed first reading in the Councils providing for the issuance of \$95,000 3½% 10-30-year improvement bonds. We are advised that it will be some months before the ordinance will pass.

**Wilmington, N. C.—Date of Sale of Bonds.**—Proposals for the \$150,000 4% 30-year coupon bonds mentioned in the CHRONICLE April 22, 1899, will be received until 12 M. May 15, 1899, by the Mayor. Proposals "may stipulate for gold bonds." These securities will be prepared by the American Bank Note Co. and certified as to genuineness by the United States Mortgage & Trust Co.

### THE FINANCIAL SITUATION.

The sudden death last Friday evening at Eastport, Long Island, of Ex-Governor Roswell P. Flower—who has during late months been the leader in the stock market and the controlling spirit in some of the most active properties dealt in at the Exchange—very naturally caused deep anxiety at the opening of the board Saturday morning. It so happened, likewise, that for weeks prices had been fluctuating widely, the prevailing trend after each decline and recovery being towards a little lower level of values. Nor was this the only disturbing feature; there was a new source of disquietude that had just then begun to arouse public attention, the Ford tax bill, which had passed the Legislature and needed but the signature of the Governor to become a law. At a moment when Stock Exchange affairs were embarrassed by these less favorable conditions, and without the public having had any preparation for the event, came the announcement of the end to the life of the chief actor and most widely trusted promoter of prominent organizations, most of them still in process of development. Under such circumstances nothing could be more reasonable than just what occurred Saturday morning when the Exchange opened. The session was, as usual on that day of the week, only two hours in length. It seemed as if almost every broker belonging to the organization was in the assembly room before the gavel dropped, each with his long list of orders, eager to sell, and to sell, too, as quickly as possible. Hence, in the general rush to realize there was a wide range in the bids at the very opening. For illustration, Brooklyn Rapid Transit, which closed Friday at 118½, sold almost at the same time and in large amounts all the way from 110 to par; then the price fluctuated between 100 and 104, when there came a rally again to 109, and thereafter a moderate decline, the close being at 106½. The lowest price was recorded within the first ten minutes after the Board opened. The movements and fluctuations cited represent as well as any we could mention the nature and course of the panic.

Monday, however, brought with it a very different state of affairs. Weak holders had been shaken out by Saturday's upheaval. With time for reflection, also, operators realized that there was no real need for alarm, public confidence in values was in some measure restored, London was reported to be buying freely, and those who were short of the market sought to cover; altogether, in place of the panicky condition ruling Saturday, steadiness became the prevailing feature, with prices a trifle better, Brooklyn Rapid Transit making with one exception the most substantial advance, closing at 109½. The total sales Monday were 655,844 shares, against 742,264 shares during the two hours of Saturday. Tuesday the better feeling which had become so evident on Monday further strengthened. Transactions were light, the stock sales reaching only 458,825 shares, the smallest total (excepting Saturdays) since Tuesday, March 7, when the sales aggregated 427,953 shares; but the improvement extended through the whole list. Brooklyn Rapid Transit closed at 112½ and some of the railroad properties showed conspicuous advances. Wednesday the market received a new impulse, under which values not only adjusted themselves to the old conditions but almost all classes of property advanced, and some of them to higher figures than the close last

week Friday, notwithstanding London was said to be selling. The notable fact which went far to explain this very rapid rise was that the most material part of it followed the announcement that the Governor had issued a call for an extra session of the Legislature, with the purpose of amending the Ford bill and relieving it of its most burdensome features. On the next day, Thursday, a reasonable and expected reaction set in. Nothing had yet transpired to justify the extreme values which in many cases were recorded Wednesday. The market was consequently irregular and lower on Thursday, and somewhat the same, though steadier, on Friday. One influence favoring a buoyant tone, which is at work all the time and explains the quick recovery from a panicky condition that has taken place the past week, is found in the fact that under the present sound conditions of business, confidence and not distrust is the normal state.

Another highly satisfactory trade statement has been made public this week by the Bureau of Statistics, and we give to-day the figures in full on page 954, with our usual compilation for previous years for comparison. The record covers the month of April, and shows a total favorable merchandise balance of \$23,145,658, which with the single exception of 1898 is the largest favorable merchandise balance in that month since 1878, twenty-one years ago, and then the total was only \$23,927,386; other than in 1878 and 1898 there has been no April with nearly as large a favorable balance, while in 13 of those 21 years the April record shows an *adverse* (or import) balance. Much the same comparative situation is found to exist with reference to the figures for the four months of this calendar year; the only difference is that the comparison is even more favorable. That is to say, for the four months from January to April, both months inclusive, in 1899 the net merchandise export balance is \$145,803,010, and that is the largest for those months in the entire trade record of the United States with the single exception of last year 1898. The only other year when the first four months' record came near this year's total was in 1878, when it was \$125,082,388; the next nearest balance was in 1879, when for the four months it was \$91,852,767, and the next in 1881, when it was \$81,834,039. With the exceptions mentioned, the favorable foreign trade balance in the first four months of any year has never risen above 56 million dollars.

But even the foregoing does not bring out the full significance of the existing condition of our foreign trade. A fact of great importance to be added is that before this last four months began, that is prior to January 1899, there was a series of 12 months (the whole of 1898) during which a net balance of merchandise exports was accumulated amounting to \$621,260,535, or almost double any previous year's statement; if we include silver and gold, there still remained a book balance due the United States at the beginning of 1899 on the 1898 foreign trade of 504 million dollars; add then to that the 142 million dollars (the net balance for the last 4 months, including merchandise, gold and silver) and we had according to the book accounts April 1 1899 a balance due the United States, accumulated since Jan. 1 1898, of 646 million dollars. No one will be surprised in view of the above that the United States has just paid 20 million dollars to Spain without the least disturbance and indeed without a trace of the

movement being discoverable in any direction. One other fact of importance in the latest trade statement (that for the month of April) is that our *general* exports still continue to increase. Many will be surprised to know that this should be the case after such a rise in the prices of manufactures as has occurred since the first of January. We have not received the details of exports as yet, but the fact we have stated is proved through the preliminary figures for breadstuffs, provisions, cotton, petroleum &c. Those articles in the April 1899 exports were about 20 million dollars less than they were in April 1898, whereas the total exports (that is those which cover the whole trade) are only about 11 million dollars less. That would leave the exports other than breadstuffs, &c., about 9 million dollars more in April 1899 than they were in 1898. In other words, the exports of manufactures were in April still on the increase.

The reports that the Southern Railway had acquired the Atlantic & Yadkin Railway and the Carolina Midland have both this week been officially confirmed. We referred quite recently to the company's acquisition of the South Carolina & Georgia, and these further purchases call attention to the fact that the Southern has in a quiet way been making a good many additions to its mileage during the last three or four months. The Carolina Midland is not an important line in itself. It runs from Allendale, S. C., to Seivern, and including the Seivern & Knoxville, from Seivern to Batesburg, 17 miles, comprises only 72 miles altogether. Its usefulness, however, consists in the fact that it will reduce the amount of road to be built in constructing the proposed new line between Columbia, S. C., and Savannah, Ga. As is known, the Florida Central & Peninsular with its South Bound line (Columbia to Savannah) having passed into the control of the Seaboard Air Line, a rival system, the Southern Railway Company has determined to build an independent road between Columbia and Savannah. The distance is 140 miles, and with the Carolina Midland in its possession the filling of a gap of 28 miles from Columbia to Perrys (the latter a point on the Midland) will give the Southern Railway 80 miles out of the 140 miles referred to. In other words, it will obviate the necessity for the building of 52 miles of road. As to the Atlantic & Yadkin, this is the old Cape Fear & Yadkin, recently sold at foreclosure, and running from Wilmington, N. C., to Mt. Airy, N. C., with a branch to Bennettsville. The line is divided, the Wilmington & Weldon, or Atlantic Coast Line, taking the part south of Sanford, and the Southern Railway getting the piece of road north of Sanford which it has so long desired. The latter runs through an important mineral region, and is capable of being made a valuable feeder to the Southern, besides protecting it in its territory.

But, as already said, the Southern has during the last few months absorbed a number of other roads. The South Carolina & Georgia is perhaps the most important of these. We showed at the time that transaction occurred that under the peculiar circumstances which had arisen in the rivalry between the different systems in that part of the South, the control of that road had become almost indispensable to the Southern. Holding it, the position of the latter is measurably strength-

ened and fortified. Some months before—that is in February 1899—the Southern incorporated in its system another desirable line. We refer to the Mobile & Birmingham. The value of this line will be obvious to any one from a glance at the map. It furnishes the Southern with an outlet on the Gulf of Mexico at Mobile. In view of the changes which the Spanish-American war has made in the relations between this country and the West Indies, and the certainty of a resulting great development in American trade with those islands, the advantage which possession of such an outlet gives will be readily appreciated. Besides this, the Southern a short time since absorbed the Northern Alabama Railway. This runs from Sheffield, Ala., to Parrish, Ala., and embraces about 120 miles of road in an important iron and coal territory. Lately also the Southern Railway and the Louisville & Nashville jointly purchased some 25 miles of road in the vicinity of Birmingham from the Tennessee Coal & Iron Company. Altogether the Southern has added in these various ways about 850 miles of road. As far as we can learn no disposition exists to spread out for the mere sake of expansion. These roads have been acquired in order to protect and perfect the system, and because the opportunity was presented to acquire them and the management had to avail of it or let it pass. It should be borne in mind, too, that the most of these properties have recently passed through drastic reorganizations. The Southern Railway now takes rank with the largest systems of the day. The mileage directly operated before the new additions was 5,255 miles; the added lines will bring the total up to 6,100 miles. But the company also has 2,441 miles of affiliated mileage, comprising such roads as the Central of Georgia, the Cincinnati New Orleans & Texas Pacific, the Alabama Great Southern, and the Georgia Southern & Florida. Including this, the system embraces over 8,500 miles of road.

The market for money has been easier this week. There was a little disturbance Monday, due to the panic in stocks on Saturday caused by the sudden death of Ex-Gov. Roswell P. Flower on Friday evening of last week. That event and panic were followed Monday by quite a general calling for more margin, but the response of borrowers was prompt, and so far as the money market was concerned all traces of the disturbance quickly disappeared. The favorable bank return of last week had some influence upon the market for money, especially in the afternoon of Monday, and later in the week the assurance that the settlement on Monday of next week for subscriptions to the Amalgamated Copper Company will be so arranged as not to disturb the market had a good effect. The payment of the fourth and final warrant of \$5,000,000 of the Philippine indemnity, which was made through the Clearing House on Tuesday, had no influence. It may be of interest to note the changes in the loan, deposit and specie items of the National City Bank, which in great part resulted from the settlements of three-fourths of the Philippine indemnity. Comparing the Clearing House statement of this bank of April 29 with that of May 13, the loans increased \$12,462,400, deposits gained \$25,583,800 and the specie increased \$12,402,300. The return of the bank this week will reflect the changes which have been partially caused by the pay-

ment of the last warrant of the Philippine indemnity.

Money on call, representing bankers' balances, has loaned at the Stock Exchange during the week at 4 per cent and at 2 per cent, averaging about 3½ per cent. On Monday loans were made at 4 per cent and at 2 per cent, with the bulk of the business at 3½ per cent. On Tuesday the transactions were at 4 per cent and at 2½ per cent, the majority being at 3@3½ per cent. On Wednesday the loans were at 3½ per cent and at 2 per cent, with the bulk of the business at 3@3½ per cent. On Thursday the transactions were at 4 per cent and at 2½ per cent, chiefly at 3 per cent. On Friday loans were at 4 per cent and 2½ per cent, with the bulk of the business at 3 per cent. Banks and trust companies quote 3½ per cent as the minimum, though a few of the last-named institutions loan at 3 per cent. Time contracts on good mixed Stock Exchange collateral are quoted at 3½@4 per cent for all periods from four to six months, and there is only a slight inquiry for shorter dates. On loans with a moderate admixture of listed dividend-paying industrial stocks the rate is 4 per cent for four to six months. Lenders seem inclined to be somewhat more liberal in their views regarding industrial collateral, accepting it in larger volume, but at the same time they exact ample margin and give preference to borrowers of first-class standing. Commercial paper continues in good demand, especially from out-of-town buyers. The supply is not abundant, indicating prompt collections by merchants, and there is no accumulation of names. Rates are 3½@3¾ per cent for sixty to ninety day endorsed bills receivable, 3¾@4¼ per cent for prime and 4½@5 per cent for good four to six months' single names. Bankers who are in a position to be good judges of the situation express the opinion that after the more important of the new combinations of capital are financed, money will gradually grow still easier. Business conditions throughout the country are good and in most branches they are excellent; money seems to be abundant in the interior, and much of it belonging to country banks is seeking employment in this market; and taking the situation as a whole the outlook for money is very assuring.

The only new feature in the European political situation this week has been some slight tension caused by the demand by Russia upon China for a concession for a railway line from Manchuria to Peking. This, however, seems to have had not the least influence upon securities in London. Exaggerated reports from South Africa of arrests at Pretoria of some adventurers on the charge of treason against the Transvaal Republic caused a little flurry at Paris, which soon subsided. The Bank of England minimum rate of discount remains unchanged at 3 per cent. The cable reports discounts of sixty to ninety day bank bills in London 2 3-16@2¼ per cent. The open market rate at Paris is 2½ per cent and at Berlin and Frankfurt it is 3½ per cent. According to our special cable from London, the Bank of England lost £195,700 billion during the week and held £30,201,986 at the close of the week. Our correspondent further advises us that the loss was due to the export of £9,000 to the Argentine Republic and to shipments of £315,000 net to the interior of Great Britain, and to imports of £128,000, of which £112,000 were bought in the open market and £16,000 were received from Australia.

The tone of the foreign exchange market has been generally strong this week. The supply of bankers' and commercial bills has been small, and though sufficient for ordinary requirements, the offerings were inadequate to meet the urgent inquiry early in the week, and rates were advanced. It is reported that the demand above noted was due to settlements in connection with the Baltimore & Ohio Railway reorganization scheme. Another statement was to the effect that the strength was caused by a demand for remittance for securities sold for European account. Whatever may have been the real influence, it was only temporarily exerted, for the demand quickly subsided, leaving the market dull and steady. Some observers claim to have knowledge of a speculative movement in exchange, based to some extent upon the reports of shortage in the winter-wheat crop, and thus account for the sharp fluctuations which have recently been noticeable. Others who are usually well informed attach little importance to the movements in the market this week. Until commercial bills grow more plentiful, easier rates cannot be expected. The arrivals of gold at the Custom House this week amounted to \$465,815, of which \$376,350 came from Europe. Nominal rates for exchange ranged from 4 85½ to 4 86 for sixty-day and from 4 87½ to 4 88 for sight on Monday, but on the following day all the drawers posted the higher rates, and after Wednesday the range was from 4 86 to 4 86½ for sixty day and from 4 88 to 4 88½ for sight. Rates for actual business opened on Monday unchanged, compared with those at the close on Friday of last week, at 4 84¾@4 85 for long, 4 86¾@4 87 for short and 4 87½@4 87¾ for cables. The market was steady and without special feature, but on the following day it grew strong in consequence of a demand for remittance, and rates for actual business in long and short advanced one quarter of a cent, to 4 85@4 85½ for the former and 4 87@4 87½ for the latter, while cables were unchanged. On Wednesday the inquiry was urgent and the rates for actual business in long sterling rose one-quarter of a cent, to 4 85½@4 85¾, while rates for short and for cables were advanced half a cent, to 4 87½@4 87¾ for the former and to 4 88@4 88½ for the latter. The tone closed firm and it so continued on Thursday, but in the afternoon the demand subsided, the offerings grew a little more plentiful, and the market closed steady at unchanged rates. The tone was firm again on Friday. The following shows daily posted rates for exchange by some of the leading drawers.

### THE FORD FRANCHISE TAX-BILL.

Governor Roosevelt's call for an extra session of the Legislature, to assemble next Monday, is certain to bring forward again into active discussion the Franchise-tax Bill, which the extra session is asked to amend. Certain alterations and amendments have been published this week, and the Governor's approval of them has been announced. The possibility of other changes has been vaguely reported. But meantime there has been, and still is, so much confusion in the public mind regarding the significance of the bill in question that a fresh review of its origin and character will be profitable. This we shall undertake to give, as briefly as so complicated a subject will admit.

The Ford bill, which passed the Legislature immediately before adjournment, and which has set on foot all the present discussion, was in the main a response to the Governor's special message of March 27. In that message Mr. Roosevelt argued that "the tax laws of this State are in an exceedingly unsatisfactory condition," and that he failed to see "how they can be put upon a just and wise basis, save after careful investigation by legislative action." The inequality of New York State taxation, the Governor proceeded, lay in the relatively heavy burden of taxation imposed on individuals as contrasted with corporations. He then referred specifically to the propriety of taxing franchises bestowed on street railway companies, gas companies and kindred corporations. As to the best method for such taxation, Mr. Roosevelt gave no definite opinion; suggesting taxation of franchises as real estate, or taxation of gross earnings, but leaving decision between such alternatives to the judgment of the Legislature "after careful investigation."

Eventually the Legislature adopted Senator Ford's bill classing public grants and franchises as real estate. To quote the bill exactly, it is provided, after specifying numerous forms of tangible property

which must be taxed as real estate, that "the terms 'land,' 'real estate' and 'real property,' as used in this chapter (of the General Tax Law) include \* \* \* all surface, underground or elevated railroads, including the value of all franchises, rights or permission to construct, maintain or operate the same in, under, above, on or through streets, highways and public places." Similarly the term real estate is made to cover the right granted a company to build and operate through public streets "any mains, pipes, tanks, conduits or wires, with their appurtenances, for conducting water, steam, heat, light, power, gas, oil, or other substances; or electricity for telegraphic, telephonic or other purposes."

All this intangible property being classed by the new tax provisions as real estate, it became somewhat interesting to know how real estate as hitherto classified was actually taxed. On this point it so happens that the one distinct provision of the existing tax-law is precisely that which is not observed in practice. The law declares that "all real and personal estate liable to taxation shall be estimated and assessed by the assessors at its full and true value, as they would appraise the same in payment of a just debt due from a solvent debtor." But every tax-payer knows that nothing of the sort is done. As Professor Taussig points out, in a review of the tax problem in the "Political Science Quarterly," the prevalent rate of taxation for real estate in this country is, as a rule, only one-half to two-thirds of its salable value.

How, then, was the law to be practically applied in the valuation of the intangible rights or privileges now proposed to be included under real estate? On this point the text of the Ford bill says nothing. Nothing was said, so far as we know, in the legislative debate upon the bill. In fact no light was thrown upon the question how this extremely important law should be executed, until after it had been pushed through both houses. This, it might be remarked in passing, scarcely took account of Governor Roosevelt's intimation that just and wise tax legislation could not be expected "save after careful investigation by legislative action." But the plan for applying the law, as outlined by Senator Ford in a newspaper interview after the passage of his bill, was sufficiently curious in itself. "The aggregate market value of the stock of a company," Mr. Ford explained in this interview, "plus the market value of its indebtedness, is equivalent to the total value of all the assets, tangible and intangible—the investment of the company and the public franchise possessed by the company. Under the law as it stands, it is the duty of the assessors to appraise and place a valuation upon all the tangible assets of the company. They can also easily find, from quotations on the Stock Exchange daily, the price of the securities of the company, and therefore the total value of its assets. Deducting therefrom the value of the tangible property, there remains the value of the intangible, or the public franchise."

The first objection to this scheme, as ex Senator Hill pointed out in his argument before the Governor, is that it does not appear in the bill itself, and therefore has no more binding force than any other personal opinion of Senator Ford. But several other and more serious objections will at once occur to mind. The Ford Bill does not say that Stock Exchange valuations are to be used at all; Mr. Ford suggests the Stock Exchange, but does not say how

the valuations are to be thus used. Is the assessor to use the prices quoted on the day when the tax rolls are prepared? Any one familiar with Wall Street will appreciate the absurdity of such a plan. On such a method the stock alone of the Metropolitan Street Railway would have been rated last Saturday some \$21,000,000 lower than on March 28, the date of the season's highest price. If, on the other hand, the average price for a period is taken, what period is to be selected? We do not say that there is no conceivable method of reaching a valuation by this plan. But we have not been able to see how fictitious values of an excited speculative period can be eliminated, or how the abnormally low prices of a panic period could be corrected. Nor, indeed, does it appear at all plain what proportion of estimated value is to be taken as basis for taxation, even if Mr. Ford's system of assessment were to work out satisfactorily. Real estate, as we have pointed out, is assessed under present laws at a valuation twenty-five or fifty per cent below its actual worth; yet the law distinctly requires assessment at the "full and true value." Which method would be followed in the case of the enormous tax levies on franchises of the city traction and miscellaneous enterprises? The only certain result which we can foresee, in the event of such a practical dilemma, is a period of corruption or litigation such as no tax law has yet brought forth. The opportunity for blackmail on the part of an unscrupulous assessor, made possible by the Ford bill as it stands, is almost incalculable.

The proposed amendments to the bill, with a view to passing which the Governor has called an extra session, deal in some measure with this last-mentioned objection. Real estate of corporations is by existing law "assessed in the town or ward in which the same shall lie, in the same manner as the real estate of individuals." The Franchise-tax Bill as originally passed would have left assessment of franchises in precisely the same hands. The amendment transfers this power to the State Board of Tax Commissioners. It also endeavors to meet an extremely serious objection—namely, the fact that numerous corporations subject to this new taxation are already paying local taxes which are themselves remuneration to the locality for right to use the public streets. Under the Ford bill, as originally passed, every trolley company, for instance, which by agreement is paying a percentage of its earnings to a city, town or village, as return for its franchise, would to precisely that extent be paying double taxation. The amendment favored by the Governor provides that "the amount so paid shall be deducted from any tax levied on such local franchise for city, town or village purposes."

In other words, two of the worst defects of the original bill would be removed by the proposed amendments, and it is not perhaps remarkable that the stocks of companies affected should have been helped in their advance this week by the news that in these respects there is some prospect of improvement. It scarcely seems to us, however, that the bill approaches anywhere near a sound and reasonable basis of taxation, even with the proposed alterations. It would still remain altogether vague in the provisions for its application, extremely confused in many of its details, and subject, even with transfer of assessment power to State authorities, to gross injustice and favoritism.

The difficulty, it seems to us, lies deeper than any general question of how the law may be applied. The theory on which the entire measure is constructed is erroneous. A corporate franchise is not real estate, and the briefest possible discussion of the bill has shown into what embarrassment and confusion the tax administration will inevitably be thrown by insisting upon such classification. The case simply amounts to this—that provisions framed for one purpose, and peculiarly adapted to that purpose, are suddenly and without substantial change, applied to something of a wholly different nature. The results of such experiments are familiar. We do not believe that the companies concerned are seeking to shirk taxation; indeed, Ex-Senator Hill himself, representing a number of such corporations, declared to the Governor at the public hearing that "we do not object to the taxation of franchises, but our objection is aimed at the particular method here proposed. Any fair and practicable method of arriving at such reasonable assessment would be acceptable." Mr. Hill indeed went so far as to intimate that "the payment of a fixed percentage of gross earnings would be the most satisfactory system that could be devised." It will not be necessary for us to go into that general question here. What we have endeavored to show is the radical defect in the Ford bill, even with the proposed amendments. We regret very much that the whole matter should not have been referred, as Governor Roosevelt himself originally proposed, to the "careful investigation" of a committee appointed "by legislative action." The very fact of the extra session proves how little of such careful investigation the subject had received before the Legislature voted.

#### LEGISLATIVE POWER TO ENACT MILEAGE TICKET LAWS.

The decision of the United States Supreme Court, last month, in the case involving the constitutionality of the Michigan mileage ticket law, possesses some features of decided general interest. The Court refused to uphold the law referred to. The reasons which it advances for this conclusion seem to be of wide application. As is well known, other States have attempted similar enactments. In the Michigan case the question as to the constitutionality of such a statute came up in the strongest form it is likely ever to be presented; for the particular piece of road with reference to which a violation of the statute was charged was the property of a company organized under the State's own laws, and moreover the State held the right absolutely to repeal the charter of the road.

In 1891, in amending the general railroad law of Michigan, an amendment was incorporated requiring that one thousand mile tickets be kept for sale at the principal ticket offices of all railroad companies in the State or carrying on business partly within and partly without the limits of the State. The price for such tickets was not to exceed twenty dollars in the Lower Peninsula and twenty-five dollars in the Upper Peninsula. The tickets might be made non-transferable, but when required by the purchaser were to be issued not only in his name, but in that of his wife and children. Moreover, the tickets were to be valid for two years from the date of purchase. One Smith applied to the ticket agent of the Lake Shore & Michigan

Southern at Adrian, Mich., for a ticket in the names of himself and wife, and being refused sued for a mandamus to compel the company to issue the ticket. The motion was granted. Upon certiorari the Michigan Supreme Court affirmed the order, but held that the statute applied only to the lines of the Lake Shore within the State of Michigan. A writ of error was then taken to the U. S. Supreme Court. One of the defenses set up by the company was that under the charter from the State to one of the predecessor companies to whose rights it had succeeded, it had the right to charge three cents a mile for the transportation of passengers, and that the law in question was an impairment of the contract existing between itself and the State. The U. S. Supreme Court, however, did not pass on this point, since it was unnecessary, the law being found unconstitutional on other grounds, as we shall see.

Justice Peckham, who delivered the opinion, said that if unhampered by contract there is no doubt of the power of the State to provide by legislation for maximum rates of charges for railroad companies, subject to the condition that the rates must be such as will admit of the carrier earning a compensation that under all the circumstances shall be just to it and to the public, and whether they are or not is a judicial question. If the rates are fixed at an insufficient amount within the meaning of that term as given by the courts, the law would be invalid as amounting to the taking of the property of the company without due process of law. The validity of the mileage-ticket Act was rested upon the proposition that the State Legislature has the power of regulation over all corporations created by it and (in case of railroad corporations) full control also over the subject of rates. But the Court notes that this power must be exercised in subordination to the provisions of the Federal Constitution.

Justice Peckham says the Act is not a general law upon the subject of rates, establishing maximum charges which the company can in no case violate. The Legislature, having established such maximum as a general law, now assumes to interfere with the management of the company while conducting its affairs pursuant to and obeying the statute regulating rates and charges; and notwithstanding such rates it assumes to provide for a discrimination—an exception in favor of those who may desire and are able to purchase tickets at what might be called wholesale rates; a discrimination which operates in favor of the wholesale buyer, leaving the others subject to the general rule. And it assumes to regulate the time in which tickets purchased shall be valid, and to lengthen it to double the period the railroad company has ever before provided. It thus invades the general right of a company to conduct and manage its own affairs, and compels it to give the use of its property for less than the general rate to those who come within the provisions of the statute; and to that extent the statute takes the property of the company without due process of law.

The right of the Legislature to make all proper rules and regulations for the general conduct of the affairs of the company, relating to the running of trains, the keeping of ticket offices open, and providing for the proper accommodation of the public is not denied. The mileage-ticket law is not like one establishing certain hours in the day during which trains shall be run for a less charge than during the other

hours. In such a case maximum rates of fare are established for the whole public during those hours, and there is no discrimination in favor of certain persons by which they can obtain lower rates by purchasing a certain number of tickets, compelling the company to carry them at the reduced rate, and thus in substance to part with its property at a less sum than it would be otherwise entitled to charge. The power to compel a company to carry persons under such circumstances for less than the usual rates is not based, the Court thinks, upon any reason which has hitherto been regarded as sufficient to authorize an interference with the corporation, although a common carrier. The Act also compels the company to carry not only those who choose to purchase the tickets, but their wives and children, and it makes the tickets good for two years. If the Legislature can, under the guise of regulation, provide that the tickets should be good for two years, why can it not provide, Justice Peckham asks, that they shall be good for five or ten or even a longer term of years?

It is declared to be no answer to the objection to this legislation to say that the company has voluntarily sold 1,000-mile tickets, good for a year. What the company may choose voluntarily to do furnishes no criterion for the measurement of the power of a legislature. Persons may voluntarily contract to do what no legislature would have the right to compel them to do. Nor does it furnish a standard by which to measure the reasonableness of the matter exacted by the Legislature. The action of the company, upon its own volition, purely as a matter of internal administration, and in regard to the details of its business which it has the right to change at any moment, cannot be accepted as an argument for the existence of a power in a legislature to pass a statute in relation to the same business imposing additional burdens upon the company.

As to the claim that the Legislature has the power absolutely to repeal the charter of the company, the Court says that does not answer the objection that this particular exercise of legislative power is neither necessary nor appropriate to carry into execution any valid power of the State over the conduct of the business of its creature. To terminate the charter and thus end the legal life of the company does not take away its property, but on the contrary leaves it all to the shareholders of the company after the payment of its debts. The power to alter or amend does not extend to the taking of the property of the corporation either by confiscation or indirectly by other means.

The authority to legislate in regard to rates comes from the power to prevent extortion or unreasonable charges or exactions by common carriers or others exercising a calling and using their property in a manner in which the public has an interest. "In this case there is not an exercise of the power to fix maximum rates. There is not the exercise of the acknowledged power to legislate so as to prevent extortion or unreasonable or illegal exactions. The fixing of the maximum rate does that. It is a pure, bald and unmixed power of discrimination in favor of a few of the persons having occasion to travel on the road and permitting them to do so at a less expense than others, provided they buy a certain number of tickets at one time. It is not legislation for the safety, health or proper convenience of the public, but an arbitrary enactment in favor of the persons spoken of, who in the

legislative judgment should be carried at a less expense than the other members of the community. There is no reasonable ground upon which the legislation can be rested unless the simple decision of the Legislature should be held to constitute such reason."

### RAILROAD GROSS AND NET EARNINGS FOR MARCH AND THE QUARTER.

That the tendency of the earnings of our railroads is still strongly upward, is well shown in the compilations we present below for the month of March. In February the exceedingly bad weather experienced proved a serious drawback, and railroad gross earnings fell off, while railroad expenses were contemporaneously increased, so that the showing, very naturally, was a poor one. In March, with a return to more nearly normal weather conditions (though on certain roads the old drawbacks still existed), we find an immediate and large gain in the revenues of the roads, both gross and net. In the gross the increase reaches \$5,971,771, or 8.43 per cent, in the net \$1,844,831, or 8.19 per cent, as will be seen by the following:

	March. (128 roads.)			January 1 to March 31. (162 roads.)		
	1899.	1898.	Increase.	1899.	1898.	Increase.
Gross earn'g.	\$ 76,802,517	\$ 70,830,746	\$ 5,971,771	\$ 253,642,163	\$ 240,159,655	\$ 13,482,508
Oper. exp.	52,119,720	48,292,780	4,126,940	179,877,307	168,100,268	11,777,039
Net earn'g.	24,682,797	22,537,966	1,844,831	73,764,856	72,059,455	1,705,401

The improvement here disclosed must be regarded as due mainly to the activity of general trade, with a resulting expansion in the merchandise and general freight of the roads. We say this because the grain movement in the West and the cotton movement in the South alike fell below the totals of a year ago. Another circumstance should not be overlooked. The present gains come after very exceptional gains last year, the improvement then having amounted to no less than \$8,434,516 (13.70 per cent) in the gross and \$3,803,357 (20.35 per cent) in the net. Herewith we present the figures for the last six years.

Year and Number of roads.	Gross Earnings.			Net Earnings.		
	Year Given.	Year Preceding.	Increase or Decrease.	Year Given.	Year Preceding.	Increase or Decrease.
March.						
1894 (136)	50,218,618	60,776,780	-10,558,162	15,073,291	18,210,291	-3,137,000
1895 (137)	52,202,055	51,398,346	+803,709	15,853,187	16,401,116	-547,929

1898 (142)	70,010,199	61,575,653	+8,434,546	22,496,362	18,693,008	+3,803,354
1899 (128)	76,802,517	70,830,746	+5,971,771	24,332,707	22,537,966	+1,794,741
Jan. 1 to Mar. 31.						
1894 (175)	172,991,656	208,504,700	-35,513,044	48,248,490	55,423,141	-7,174,651
1895 (185)	182,850,132	185,325,002	-2,474,870	53,608,636	51,516,059	+2,092,577
1896 (188)	193,258,561	186,632,320	+6,626,241	57,093,915	52,637,459	+4,456,456
1897 (179)	232,564,596	206,439,920	+26,124,676	59,035,793	57,433,971	+1,601,822
1898 (173)	232,794,912	207,023,623	+25,771,289	68,875,951	58,936,352	+9,939,599
1899 (162)	253,642,163	240,159,655	+13,482,508	73,764,856	72,059,455	+1,705,401

When we make the results for the quarter we see clearly reflected the adverse weather conditions to which reference has already been made. In this case we have a somewhat larger representation of roads, since a number of companies which do not contribute monthly figures make quarterly returns. In the gross for the three months the ratio of gain is only 5.61 per cent, in the net but 2.37, as against 8.43 and 8.19 per cent respectively for the month of March by itself. No group records a loss in gross for the month and only one in the net. On the other hand, for the quarter there are no less than four groups that have fallen behind in net. Here is our usual summary covering both periods.

† Covers lines directly operated east and west of Pittsburgh and Erie. The net on Eastern lines decreased \$180,700 and the net on Western lines increased \$318,300.

## WORLD'S WHEAT CROP IN 1898.

Mr. John Hyde, Statistician of the Department of Agriculture, has furnished us this week an advance copy of his compilation covering the world's wheat crop in 1898, and it is given in detail below. One of the important facts disclosed by the statement is that the aggregate production for the year was not far short of three thousand millions of bushels—2,879,924,000 bushels—making 1898 the record year in this most important cereal crop. It is worthy of note, moreover, that improvement in yield over 1897 was not confined to any particular quarter of the globe, for while in the United States the figures show a considerable increase, the excess was even greater in Europe. Asia also has made an appreciable gain over the total for the previous year, and the same is true of South America, Africa and Australasia. How the results for the various countries for 1898 compare with the figures for 1897 and 1896 is indicated in the following.

## WHEAT CROP OF THE WORLD.

COUNTRIES—	1898. Bushels.	1897. Bushels.	1896. Bushels.
United States.....	675,149,000	530,149,000	427,681,000

Africa.....	44,439,000	36,200,000	37,457,000
Australasia.....	31,980,000	27,652,000	25,906,000
Grand total.....	2,879,924,000	2,226,745,000	2,488,349,000

From an examination of the foregoing details it would seem that the crop of almost every producing country was a fair yield from the area planted. The more noticeable feature is that the gains over 1897 were chiefly in those countries where the previous year's crop was seriously short—Italy, France, Russia, Hungary, Argentina, etc. Prior to 1891 no very complete statistics of this crop for the whole world were compiled, but for that year and annually since the full results have been made public by our Agricultural Department, and from them we have prepared the following, which covers the yearly aggregates.

## AGGREGATE WHEAT CROP OF WORLD.

<i>Bushels.</i>		<i>Bushels.</i>	
1898.....	2,879,924,000	1804.....	2,860,557,000
1897.....	2,226,745,000	1803.....	2,559,174,000
1896.....	2,488,349,000	1802.....	2,481,805,000
1895.....	2,562,518,000	1801.....	2,432,322,000

The average annual product for the seven years, 1891 to 1897 inclusive, was 2,487,353,000 bushels. The 1898 crop consequently shows a gain over that average of 392,571,000 bushels, or 14 per cent, but compared with 1897 the increase is 652,179,000 bushels, or nearly 30 per cent.

## ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S.

—The sales this week of bank stocks at auction and at the Stock Exchange reached 499 shares, distributed in various amounts among 15 banks. Prices realized do not show any marked changes; we look in vain for evidences in the transactions of the crisis which Wall Street has just passed through.

Among the trust companies we note that 100 shares of the Farmers' Loan & Trust Co. sold at a very material advance (51½ points) on the price obtained in March, and that 1 share of the New York Life Insurance & Trust Co. sold at an advance of 80 points. The week's record of the public sales of both bank and trust companies of New York and Brooklyn is subjoined.

BANKS—New York.	Price.	Last previous sale.
75 American Exchange Nat. Bank.....	177½	May '99—180
10 Broadway Bank, National.....	244	Apr. '99—245½
4 Chemical National Bank.....	415½	Apr. '99—4170
5 Citizens' Bank, National.....	145½	May '99—145½
1 Commerce, National Bank of.....	235	May '99—229
50 Corn Exchange Bank.....	367.370½	May '99—370
130 Eleventh Ward Bank.....	170	Feb. '99—205
10 Fourteenth Street Bank.....	150	No sale in 1898.
5 German-American Bank.....	119	May '99—118
56 Merchants' National Bank.....	175	Apr. '99—170½
20 New York, N. B. A., Bank of.....	250	May '99—250½
9 New York Nat. Exchange Bank.....	118	May '99—115½
4 Ninth National Bank.....	95½	Apr. '99—90
137 Phenix National Bank.....	114.115	May '99—115½
3 Western National Bank.....	301	May '99—260
TRUST COMPANIES—New York.		
23 Central Trust.....	1076-2001	Apr. '99—2006
25 City Trust.....	408	First sale.
100 Farmers' Loan & Trust.....	1451½	Feb. '99—1400
10 Mercantile.....	875	No sale in 1898.
1 N. Y. Life Insurance & Trust.....	1501	Apr. '99—1421
15 United States Mortgage & Trust.....	474½	Feb. '99—451
TRUST COMPANIES—Brooklyn.		
5 Franklin Trust.....	303	May '99—300½

\* Of this, 126 shares sold at Stock Exchange at 114-115.

—Mr. William H. Kimball has resigned the position of National Bank Examiner at New York and has been elected Vice-President of the Seventh National Bank, located at Broadway, corner John Street, and Mr. J. Preston McAnerney has been appointed Assistant Cashier. Mr. Kimball has had more than thirty years' experience in banking. In 1863 he was engaged in this line of business in Watertown, N. Y. Subsequently he became President of the St. Lawrence County Bank, located at Canton, N. Y., and he there remained until 1892 when he was appointed National Bank

Examiner at New York. Mr. Kimball's resignation leaves a vacancy which doubtless will be promptly filled by the Comptroller of the Currency for, under the system of two examinations per year, there must be two bank examiners, and Mr. Forrest Raynor is now the only official in this district.

—An increase of \$1,000,000 in the capital stock of the Illinois Trust & Savings Bank of Chicago has been decided upon by the stockholders. This addition will make that institution the largest financial concern outside of New York City in the country, with the single exception of the Bank of California at San Francisco. The last-named bank has a capital of \$3,000,000 and surplus and undivided profits of \$3,159,928. The capital of the Illinois Trust & Savings Bank of Chicago now is \$2,000,000, and the surplus and undivided profits are \$3,095,457; hence, on the basis of the present condition of the surplus of the two institutions, the Illinois Trust after the new capital has been paid in will come short by only \$64,471 of being as large in capital and surplus as the Bank of California. Though the First National Bank of Chicago has a capital of \$3,000,000, the surplus is only \$2,269,836, or \$825,621 below that of the Illinois Trust and Savings Bank. The other institutions in the West which have \$3,000,000 capital are the National Bank of Commerce and the Mississippi Valley Trust Company, both of St. Louis (but these concerns have each only a little over \$1,000,000 surplus) and the Nevada National Bank of San Francisco, with \$816,457 surplus.

The business of the Illinois Trust & Savings Bank is largely increasing, and hence the desire for greater capital. The institution aided in the negotiation of the sale of the Chicago & Alton Railroad. It will take an active part in financing the Carnegie combination, and also the Chicago Street Railway deal, and it is interested in other important schemes which are now pending. The President, Mr. John J. Mitchell, is represented to be one of the most energetic and skillful financiers in the West. The Vice-President is Mr. William H. Mitchell, who was a large owner of Chicago & Alton stock; Mr. W. H. Reid is Second Vice-President, Mr. F. T. Haskell, Third Vice-President, Mr. James S. Gibbs, Cashier. The board of directors embraces the names of some of the most enterprising and financially substantial men in Chicago. The statement of the company on March 6 showed \$61,339,296 59 of resources, including \$25,077,606 cash and exchange, \$27,623,750 loans on demand, on time and on real estate, and \$8,573,720 stocks and bonds. The deposits were \$56,243,838, of which \$32,592,535 were demand and \$23,651,306 on time. This deposit line, it may be noted, is \$8,859,423 higher than that of the First National Bank of Chicago, and indeed larger than that of any institution in the country outside of New York City. The market value of the stock is 530 bid. The increased capital of \$1,000,000 will be offered to the present stockholders at par in the proportion of one share of new to every two shares of stock now held by them.

—The directors of the Third National Bank of Louisville have recommended to the stockholders a reduction of the capital from \$300,000 to \$200,000. This movement, if it shall be agreed to, will follow a reduction last year from \$400,000 to \$300,000. The explanation for this reduction of capital is that with the present very low rates for money the bank cannot longer maintain the customary dividends, which for twenty-five years have averaged 6-76 per cent on the larger capital, and therefore it is deemed advisable to reduce the capital. In the opinion of New York bankers the Louisville banks have more or less suffered from the concentration of the local whiskey business into trusts which have been financed at other centres. A similar movement in reduction of capital has recently been noticed among banks in Texas, due to decreased profits of banking.

—Recently clearings of institutions in the Baltimore Clearing House have largely increased, last week reaching unprecedented amounts. These large clearings have been chiefly due to extensive financing of new combinations of capital in street railway and other enterprises by two of the trust companies in that city: it is due also to the fact that the general business of the city, and consequently of the banks, is increasing.

—Mr. Harry L. Burrage, Cashier of the Third National Bank of Boston, will leave that institution to become Vice President of the Eliot National Bank of Boston, succeeding

Mr. Albert H. Wiggin, who, as was announced in this column on May 6, has been elected one of the Vice-Presidents of the National Park Bank of this city.

### IMPORTS AND EXPORTS FOR APRIL.

The Bureau of Statistics at Washington this week issued the statement of the country's foreign trade for April, and from it and from previous statements we have prepared the following interesting summaries. The tables are the same as those formerly given by us in our article on the Financial Situation.

#### FOREIGN TRADE MOVEMENT OF THE UNITED STATES.

In the following tables three figures (000) are in all cases omitted.

Month.	1898-99.			1897-98.		
	Exports.	Imports.	Excess.	Exports.	Imports.	Excess.
Merch'dise.	\$	\$	\$	\$	\$	\$
July-Sept....	247,738	149,116	+98,618	256,470	135,918	+120,552

## DEBT STATEMENT APRIL 29 1899.

The following statement of the public debt of the United States on April 29 1899 is made up from official figures issued on that day. Further on we give an interesting exhibit of the Treasury cash holdings of the same date.

## INTEREST-BEARING DEBT APRIL 29, 1899.

Title of Loan—	Interest payable.	Amount issued.	Amount Outstanding.		Total.
			Registered.	Coupon.	
4½% Fund. loan, 1891. } Q.—M.		250,000,000			
Continued at 2 p. c.			25,364,500		25,364,500
4½% Fund. loan, 1897. } Q.—J.		740,913,400	401,249,500	68,764,150	659,652,050
4½% Refund'g certifica. } Q.—J.		40,012,750			88,019
5% Loan of 1901. } Q.—F.		100,000,000	67,631,540	32,468,060	100,000,000
5% Loan of 1902. } Q.—F.		162,315,400	113,778,090	48,537,310	162,315,400
5% of 1903-1913. } Q.—F.		198,678,730	94,322,540	104,356,190	198,678,730

Total, excluding Pacific Railroad Bonds.....1,491,920,370 792,193,090 253,917,590 1,045,048,680

NOTE.—The denominations of bonds are as follows: Two per cents (registered only), \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, \$20,000, \$50,000; 4s of 1907, registered, \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, \$20,000, \$50,000, coupon, \$50, \$100, \$500, \$1,000; 4s, refunding certificates, \$10; 5s of 1904, registered, \$50, \$100, \$500, \$1,000, coupon, \$50, \$100, \$500, 4s of 1902 registered, \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, coupon, \$50, \$100, \$500, \$1,000; 5s of 1903-1913 registered, \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, coupon, \$50, \$100, \$500, \$1,000.

## DEBT OF WHICH INTEREST HAS CEASED SINCE MATURITY.

	Mar. 31, 1899.	April 29, 1899.
Funded Loan of 1891, matured September 2, 1891.....	\$11,451 0	\$112,500 00
Old debt matured prior and subsequent to Jan. 1, '81.....	1,103,070 36	1,106,740 28

Debt on which interest has ceased.....\$1,312,420 36 \$1,218,239 39  
Bonds issued to Pacific railroads matured but not yet presented; Union Pacific, \$85,000; Central Pacific, \$65,000; Kansas Pacific, \$85,000; total.....\$112,000 00

## DEBT BEARING NO INTEREST.

United States notes.....	\$316,061,016 00
Old demand notes.....	53,097 50
National bank notes—Redemption account.....	31,530,371 00
Fractional currency.....	\$13,294,376 64
Loss amount estimated as lost or destroyed.....	4,378,984 00
	6,993,342 64

Aggregate of debt bearing no interest.....\$394,447,747 14

## RECAPITULATION.

	April 30, 1899.	March 31, 1899.	Increase or Decrease.
Classification of Debt—			
Interest-bearing debt.....	1,046,048,680 00	1,013,778,290 00	Inc. 372,390 00
Debt, interest ceased.....	1,312,420 36	1,219,470 36	Dec. 1,090 00
Debt bearing no interest.....	394,447,747 14	394,554,016 16	Inc. 1,066,269 00
Total gross debt.....	1,435,714,797 43	1,435,944,736 43	Inc. 3,129,939 00
Cash balance in Treasury.....	268,127,333 06	244,043,163 78	Dec. 20,084,169 28
Total net debt.....	1,172,587,254 37	1,194,505,542 67	Inc. 23,918,288 30

The foregoing figures show a gross debt on April 29, 1899, (interest-bearing and non-interest-bearing) of \$1,435,714,797 43 and a net debt (gross debt less net cash in the Treasury) of \$1,172,587,254 37.

PACIFIC RAILROAD DEBT.—These bonds are never included in the official total of the Government debt. To show their present status we have made the following compilation:

## UNLIQUIDATED BONDS ISSUED TO PACIFIC RAILROADS—THEIR STATUS MAY 1, 1899.

Name of Railway	Railroad Liability.		Repaid by Companies.		Total.	Balance Due U. S.
	Bonds Issued by Gov't.	Not Paid by Gov't.	Through Sinking Fund.	Settlement with Government.		
Central Pacific.....	\$1,796,176	\$6,064,295	\$10,452	\$3,280,933	\$8,690,506	
Kansas Pacific.....	6,309,000	6,607,435		\$12,910,435	13,910,435	
Union Pacific.....	27,234,512	31,211,712	14,194,818	40,283,900	57,444,224	
Cent. Br. U. Pac.....	1,600,000	2,163,174			3,763,174	
West. Pacific.....	1,970,499	2,458,108		6,423,691	5,453,691	
Mont. C. & Pac.....	1,938,320	2,562,273			4,500,593	
Total.....	44,623,512	87,432,106	27,919,070	111,977,724	149,871,450	7,243,767

\* Government accepted principal of bonds—\$6,993,000—in full payment of all indebtedness.

TREASURY CASH AND DEMAND LIABILITIES.—The cash holdings of the Government as the items stood April 29 we take from the Treasury statement of that date. The net cash balance given below is the same as deducted above in reaching the net debt.

## CASH IN THE TREASURY.

Gold—Coin.....	\$134,155,300 32
Bars.....	120,829,915 20
Silver—Dollars.....	\$378,985,234 61
Subsidiary coin.....	6,616,630 75
Paper—United States notes.....	507,916,792 01
Treasury notes of 1890.....	569,329 00
Gold certificates.....	1,641,400 00
Silver certificates.....	8,647,355 00
Certificates of deposit (Act June 8, 1878).....	60,000 00
National bank notes.....	8,919,501 14
Other—Bonds, interest and coupons paid, awaiting reimbursement.....	129,547 68
Minor coin and fractional currency.....	378,902 58
Deposits in nat'l bank depositories—general acctl.....	79,390,857 24
Disbursing officers' balances.....	5,799,737 85
Aggregate.....	\$917,165,517 46

## DEMAND LIABILITIES.

Gold certificates.....	\$31,484,929 00
Silver certificates.....	94,091,504 00
Certificates of deposit Act June 8, 1878.....	21,395,000 00
Treasury notes of 1890.....	91,515,990 00
Fund for redemp. of uncurrent nat'l bank notes.....	9,413,630 82
Outstanding checks and drafts.....	84,374,106 28

Decrease during the month.....	\$20,018,330 78

## Monetary? Commercial English News

(FROM OUR OWN CORRESPONDENT.)

LONDON, Saturday, May 6.

The stock markets this week have been depressed, owing to the fear that a quarrel with the Transvaal Government is imminent. President Kruger has persistently refused to make even the slightest concession either to the Uitlanders or to the mining industry. Immediately after the raid he had a splendid opportunity to conciliate the more moderate portion of the foreign-born residents and to consolidate his authority. But he allowed the opportunity to pass. And he persists in excluding the population which pays the bulk of the taxes and contributes most largely to the wealth of the country from all voice in the management of the country's affairs. The result is that dissatisfaction has continued to grow and the relations between the Boers and the Uitlanders are as bad now as they were immediately before the raid.

Recently a petition signed by 21,000 British subjects in the Transvaal was presented to the High Commissioner for South Africa and by him has been forwarded to the Secretary of State for the Colonies. The High Commissioner would hardly have forwarded the petition unless he had convinced himself that it really expresses the feeling of the whole British community in the Transvaal. And it is difficult for the Government to refuse to act upon a petition which is thus backed up by its own representative in South Africa, the man who is responsible for the peace and order of the whole of South Africa. It is hardly credible however that a war will result. President Kruger must see that he cannot permanently exclude from all voice in the management of their own affairs two thirds of the residents in the country, and that he cannot refuse them even municipal government in Johannesburg and education in English in their own schools. The probability, therefore, is that a compromise of some kind will be arrived at, that the President will make concessions to the mining industry and at the same time will give some sort of political representation to the Uitlanders. The people of this country are very unwilling to meddle in the internal affairs of the Transvaal, and they are especially unwilling to do anything that would be contrary to the wishes and feelings of the large Dutch population both in Cape Colony and in Natal. But on the other hand, if the Government is to retain the position of Suzerain Power in the Transvaal it clearly cannot refuse to recognize the claims of its own people for fair treatment.

On the Stock Exchange people are afraid that President Kruger will refuse to listen to all reason; that he will assert that his Government has the right to make what laws it pleases in its own country, and that he will defy the British Government, and possibly even increase the repressive rule over the Uitlanders. If he should do this there would certainly be disturbances, and it might then become imperatively necessary for the Imperial authority to interfere. The anxieties in the market however have been exaggerated by the action of the jobbers—that is, those members of the Stock Exchange who, acting for themselves, buy from and sell to brokers. It is believed that during the recent advance in mining shares the jobbers generally sold a great deal of stock which they did not actually possess, in the hope that they would be gradually able to obtain it. If that be so it is natural that they should welcome a decline in prices which may frighten holders into selling. And as a matter of fact there has been a good deal of selling throughout the week.

It is noticeable on the other hand that there is not much selling from the Continent. In fact, opinion both in France and in Germany has changed greatly since the raid. At that time Continental opinion was altogether against the Uitlanders and in favor of the Boers. Now the business classes both in France and in Germany are as anxious that the British Government should interfere as any British holders of shares. They have come to the conclusion that there can be no quiet in the Transvaal and no steady markets until the whole of the questions at issue are settled somehow, and they have given up all hope of a settlement by President Kruger.

The weakness in New York has added to the general uneasiness here. And furthermore the German operators have continued throughout the week to liquidate. Lastly, in Paris the continuance of the uncertainty respecting the Dreyfus case keeps apprehension alive. Serious fears are now entertained that the exhibition next year may be injured by the prolongation of the uncertainty. Large sums are being laid out in Paris in preparing for the exhibition. But it is reported that neither British, nor American, nor German exhibitors are showing a willingness to exhibit on the scale that was expected. And therefore, unless the Dreyfus case is settled somehow or other soon, it is not at all improbable that the exhibition may be a failure.

The general unsettlement in markets has been increased moreover by the fear that we are about to see dear money. It is reported that very large amounts of American bills are coming forward for discount in this market, and that that may lead by and by to gold shipments. Moreover the payment of the 20 millions of dollars to Spain has resulted in some gold shipments to Paris. The best opinion is that only a comparatively small amount will go, that the bulk of the money will remain in London. But some undoubtedly will go.

Furthermore, owing to the great activity of trade, more especially in Scotland, the remittance of gold to that country

is larger this year than for a long time past. In that month of May there is always a considerable increase in the note circulation in Scotland. This year it is exceptionally large because of the activity of shipbuilding, the high prices of iron and coal, and the great expansion in trade generally. As the note circulation increases the banks are compelled by law to hold augmented amounts of gold. It is an inconvenient law for it would seem sufficient that the banks should hold the gold in London. But they are compelled to hold it at their head offices in Scotland. And therefore a considerable amount is now being sent from London to Edinburgh and Glasgow. The gold will come back in the course of three or four weeks or possibly more. But it is argued that not as much as usual will come back because of the great activity of trade; and that furthermore the beginning of harvest, the holiday season, and the demands for the Continent, and possibly for the United States, will all make themselves felt by and by.

The general impression, therefore, is that rates will tend upwards. But as far as can be seen at present there is no likelihood of any real stringency in the market. And even in the autumn it is possible that the stringency, at all events in Germany, may be much less than hitherto has been expected. Until now the Imperial Bank of Germany was allowed to issue without cover of any kind somewhat over 14½ millions sterling of notes. It could likewise issue any amount of notes against gold. And it could issue an unlimited amount beyond that also on condition that it paid a 5 per cent duty on the excess to the Government. The new law regulating the Bank's management now provides that the bank may issue without holding gold and without paying a tax 22½ millions sterling of notes. In other words, the authorized issue, as it is called in this country, or the fiduciary issue, if the words are preferred, is increased from a little over 14½ millions sterling to 22½ millions sterling, or by nearly 8 millions sterling. It is to be hoped that that will enable the Bank to meet all the demands in the autumn without raising unduly the rate of discounts.

Meantime the India Council continues successful in selling its drafts. It offered for tender on Wednesday 30 lacs and the applications amounted to 568¾ lacs. The whole amount offered was disposed of at prices ranging a little over 1s. 4d. per rupee for bills and 1s. 4 1/2d. per rupee for telegraphic transfers. In consequence of the strong demand this week, it has been decided to increase next week the offer of drafts to 40 lacs.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

Messrs. Pixley & Abell write as follows under date of May 4:

Gold.—With a fair demand for the Continent, amounting to about £300,000, only a portion of the week's arrivals will reach the Bank. Since our last, £56,000 has been bought by the Bank of England, while £200,000 has been withdrawn. Arrivals: Cape Town, £599,000; Chili, £5,000; Australia, £21,000. Total, £625,000. Shipments: April 27—Bombay, £34,000; Calcutta, £5,500. Total, £39,500.

Silver.—The price rose rapidly on the 28th until 29th, was touched, but the market eventually closed below the best. All support was suddenly withdrawn the next day, and with free speculative selling the price fell to 28½d. New York continues to hold off, and through out the rise has sold but little. The Indian rate is Rs. 7 1/4 per 100 Tola. Arrivals: New York, £98,000; Chili, £20,000; South Africa, £5,000. Total, £123,000. Shipments, Apr. 27: Bombay, £45,000; Calcutta, £20,000. Total, £65,000.

Mexican Dollars.—There are no dealings in these coin.

The quotations for bullion are reported as follows:

#### Commercial and Miscellaneous News

IMPORTS AND EXPORTS FOR THE WEEK.—The following are the imports at New York for the week ending for dry goods May 11 and for the week ending for general merchandise May 12; also totals since the beginning of the first week in January.

##### FOREIGN IMPORTS AT NEW YORK.

For week.	1899.	1898.	1897.	1896.
Dry Goods.....	\$1,940,086	\$1,279,633	\$3,297,165	\$1,372,899
Gen'l mer'dise	7,206,891	7,883,783	8,761,529	6,701,881
Total.....	\$9,146,977	\$9,163,416	\$12,058,694	\$8,074,780
Since Jan. 1.				
Dry Goods.....	\$42,858,050	\$40,259,072	\$55,774,925	\$50,681,563
Gen'l mer'dise	156,851,631	130,339,313	153,294,681	133,820,174
Total 19 weeks	\$199,509,711	\$170,593,385	\$209,069,606	\$184,501,737

The imports of dry goods for one week later will be found in our report of the dry goods trade.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending May 15 and from January 1 to date:

##### EXPORTS FROM NEW YORK FOR THE WEEK.

	1899.	1898.	1897.	1896.
For the week.....	\$8,389,281	\$11,382,103	\$9,676,876	\$8,095,354
Prev. reported	167,488,072	168,756,203	137,314,024	134,731,359
Total 19 weeks	\$175,877,353	\$180,138,311	\$146,990,700	\$142,826,743

The following table shows the exports and imports of specie at the port of New York for the week ending May 13 and since January 1, 1899, and for the corresponding periods in 1898 and 1897.

\* We omit two ciphers in all these figures.

† Including for Boston and Philadelphia the item "due to other banks."

—Messrs. F. J. Lisman & Co. offer a lot of first mortgage bonds paying 4% @ 6 per cent. The list is a very interesting one, and well worthy of perusal, as some of the bonds according to Messrs. Lisman & Co., earn as much as three times their interest and most of them are issued at very low rates per mile. They are nearly all listed on the Stock Exchange, and the reason they can be bought to return such a large rate of interest, the firm states, is because they are comparatively small issues which are not well-known. The list is on page viii.

Auction Sales.—Among other securities the following, not regularly dealt in at the Board, were recently sold at auction by Messrs. Adrian H. Muller & Son:

Shares.	Bonds.
5 Brooklyn Life Ins. Co. 116½	25 Amer. Bond & Mortgage

\*Correction: reported in our last issue as common stock.

WALL STREET, FRIDAY, MAY 19, 1899.—3 P. M.

**The Money Market and Financial Situation.**—There has been a good illustration this week of the inherent strength and recuperative powers of the security markets. A sensational drop in the stock market followed the announcement on Saturday of the sudden death of the head of a prominent Stock-Exchange house, but before the close of business on that day a reaction set in which early this week carried nearly all issues up to and above the best prices of last week. Evidence of stability is also seen in the steady demand for investment bonds which is one of the features of the present situation in Wall Street. The shock referred to above was scarcely perceptible in the bond market, and the volume of business there seems to be limited chiefly by the small amount of offerings.

The foreign trade statement for April issued this week has attracted attention. It recalls the fact that grain shipments were abnormally large last year and therefore are not equaled by those of the corresponding period this year. The deficiency is in part made up, however, by an increase of about \$8,000,000 in the exports of general merchandise. The statement further shows that the imports continue to be larger than last year, but nevertheless the balance is about \$23,000,000 in favor of this country. Only once in our history, previous to last year, has the April balance been so largely in our favor.

The final payment of \$5,000,000 on account of the Spanish indemnity has this week been made, and the effect upon the bank statement to-morrow is looked for in a larger reserve. This and other matters have contributed to a steadily increasing ease in the money market.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 2 to 4 per cent. To-day's rates on call were 2 $\frac{1}{2}$  to 4 per cent. Prime commercial paper quoted 3 $\frac{1}{2}$  to 4 $\frac{1}{2}$  per cent.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £195,700, and the percentage of reserve to liabilities was 39.35, against 39.50 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows an increase of 7,350,000 francs in gold and 5,200,000 francs in silver.

The New York City Clearing-House banks in their statement of May 13 showed an increase in the reserve held of \$8,269,900, and a surplus over the required reserve of \$27,137,625, against \$19,351,950 the previous week.

**Foreign Exchange.**—The foreign exchange market has been firm on a limited supply of all classes of bills and a better inquiry from remitters. The tendency of rates was steadily upward.

To-day's actual rates of exchange were as follows: Bankers' sixty days' sterling, 4 85 $\frac{1}{4}$  @ 4 85 $\frac{1}{2}$ ; demand, 4 87 $\frac{1}{4}$  @ 4 87 $\frac{3}{4}$ ; cables, 4 88 @ 4 88 $\frac{1}{4}$ ; prime commercial, sixty days, 4 84 $\frac{1}{4}$  @ 4 85; documentary commercial, sixty days, 4 84 @ 4 85; grain for payment, 4 84 $\frac{1}{4}$  @ 4 85; cotton for payment, 4 84 $\frac{1}{4}$  @ 4 84 $\frac{1}{2}$ ; cotton for acceptance, 4 84 $\frac{1}{4}$  @ 4 85.

Posted rates of leading bankers follow:

May 19.	Sixty days.	Demand.
Prime bankers' sterling bills on London	4 86 @ 4 86 $\frac{1}{2}$	4 88 @ 4 88 $\frac{1}{2}$
Prime commercial	4 84 $\frac{1}{4}$ @ 4 85	
Documentary commercial	4 84 @ 4 85	
Paris bankers' (francs)	519 $\frac{1}{2}$ @ 518 $\frac{1}{2}$	5 16 $\frac{1}{2}$ @ 5 16 $\frac{1}{2}$
Amsterdam (guilder) bankers	40 @ 40 $\frac{1}{16}$	40 $\frac{1}{16}$ @ 40 $\frac{1}{16}$
Frankfort or Bremen (reichmarks) bankers	94 $\frac{1}{4}$ @ 94 $\frac{1}{4}$	95 $\frac{1}{16}$ @ 95 $\frac{1}{16}$

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling 75c. per \$1,000 premium; Charleston buying par, selling  $\frac{1}{8}$  premium; New Orleans, bank, \$1 00 premium; commercial, \$1 25 discount; Chicago, 25c. per \$1,000 premium; St. Louis, 10c. per \$1,000 discount.

**United States Bonds.**—Sales of Government bonds at the Board include \$110,000 4s, coup., 1-25, at 128 $\frac{1}{2}$  to 130; \$12,500 4s, coup., 1907, at 113 $\frac{1}{4}$ ; \$24,600 4s, reg., 1907, at 112 $\frac{1}{2}$  to 112 $\frac{3}{4}$ ; \$26,000 3s, coup., at 108 $\frac{1}{2}$  to 108 $\frac{3}{4}$ ; \$1,300 ditto (small bonds), at 108 to 108 $\frac{1}{2}$  and \$5,500 3s, reg., at 108 $\frac{1}{2}$  to 108 $\frac{3}{4}$ . The following are the daily closing quotations: for yearly range see seventh page following.

\*This is the price bid at the morning board; no sale was made.

**State and Railroad Bonds.**—Sales of State bonds at the Board are limited to \$19,500 Virginia fund, debt 2-3s of 1991 at 84 to 85.

The market for railway bonds has been relatively firm under somewhat trying circumstances. An event which caused a severe break in the stock market, and which at the moment it was thought might result in even more serious consequences, passed almost unnoticed in the market for bonds, and closing prices are in many cases the best of the week. As is generally well known, the larger field open to savings bank funds has augmented the demand for several issues of railway bonds, but the present inquiry for investment securities does not seem to be limited to such sources. The volume of business was much larger than of late, averaging about \$4,500,000 par value per day. Central Pacific and Southern Pacific issues, in sympathy with the shares of those companies, were strong and with Rio Grande Western, San Antonio & Aransas Pass and Wisconsin Central bonds made substantial gains.

**Stock and Bond Sales.**—The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since January 1.

Sales	Week ending May 19.	1898.	Jan. 1 to May 19.	1898.
N. Y. Stock Exch.	1899.	1898.	1899.	1898.
Government bonds	180,900	\$59,500	\$6,009,500	\$3,521,500
State bonds	18,500	15,000	1,589,500	608,800
R.R. & misc. bonds	22,943,000	9,570,800	466,640,900	802,884,810
Total	\$23,143,400	\$9,645,800	\$494,913,900	\$307,114,010
Stocks—No. shares	8,702,601	1,821,425	86,581,599	40,974,938
Par value	\$364,226,900	\$166,144,500	\$3,432,224,500	\$3,069,796,725
Bankshares, par val	\$3,420	\$2,900	\$176,580	\$69,175

We add the following daily record of the transactions:

Week ending	Shares.	Par value.	Railroad, &c.	State Bonds.	U. S. Bonds.
May 19, 1899.					
Saturday	774,264	\$78,255,900	\$1,559,000		\$54,200
Sunday	665,844	\$4,321,500	3,578,000		15,600

**Railroad and Miscellaneous Stocks.**—The stock market suffered a severe shock on Saturday as a result of the death of a prominent member of the Stock Exchange. It quickly rallied, however, and after some reaction from the best prices of the week, caused chiefly by sales to realize profits, closing quotations are in many cases higher than last week. The stocks most affected were Brooklyn Rapid Transit and some of the industrial issues. The former dropped 18 $\frac{1}{4}$  points over night, New York Air Brake 60 points, People's Gas 18 points, International Paper 14 $\frac{1}{2}$  points, American Steel & Wire 12 points and Federal Steel 11 $\frac{1}{4}$  points. The railway list suffered much less severely, and the decline of the active list, averaging between 2 and 3 points, was soon recovered. Central Pacific and Southern Pacific have been conspicuous for activity and strength, due chiefly to arbitrage operations. Chicago Terminal Transfer preferred shows a net gain of 6 $\frac{1}{2}$  points and Great Northern preferred and Atchison preferred were strong features. The local traction stocks were irregular on uncertainty as to legislative action, Metropolitan Street Railway covering a range of 16 points, Third Avenue Railway 13 points and Manhattan Elevated 9 points. American Sugar Refining was also erratic, fluctuating between 146 and 161 $\frac{1}{4}$ , closing at 156 $\frac{1}{2}$ , a net gain of 2 points.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every **STRA** railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

**Net Earnings Monthly to Latest Dates.**—The following shows the gross and net earnings to latest dates of all STREAM railroads furnishing monthly statements. The compilation includes every road from which we can get returns of this character and in that form is given once a month. Early returns are published from week to week, as soon as issued, but for the convenience of our readers all the roads making returns are brought together here in the week in which we publish our monthly article on net earnings—say on or about the 20th of the month. Besides the roads furnishing monthly returns, we have added this time the roads which make quarterly returns.

The returns of the street railways we give by themselves under a separate head at the extreme end of these tabulations—see page 971.

After deducting "reserve fund for repairs of steamers," balance in March, 1899, was \$80,616, against \$83,858, and from May 1 to March 31 \$1,076,232, against \$571,764. The reserve fund for depreciation and general and extraordinary repairs of steamers has been increased to the standard of the English companies, i. e., five per cent upon the value of the steamers.

**Interest Charges and Surplus.**—The following roads, in addition to their gross and net earnings given in the foregoing, also report charges for interest, &c., with the surplus or deficit above or below those charges

## STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

Includes Baltimore Traction and City & Suburban for both years. These figures include results on Bridge Division.

**Street Railway Net Earnings.**—In the following we show both the gross and the net earnings to latest dates of all STREET railways from which we have been able to procure monthly returns. As in the case of the steam roads, the returns of the different roads are published by us each week as soon as received, and once a month (on the third or the fourth Saturday of the month) we bring all the roads reporting together, as is done to-day.

## West Jersey &amp; Seashore RR.

(Report for the year ending Dec. 31, 1893.)

President Frank Thomson says in substance:

**EARNINGS.**—The gross earnings for the past year show an increase in every class of business, and while the operating expenses increased \$42,628, there was an increase in net of \$38,553, or 14.96 per cent.

**IMPROVEMENTS.**—The double-tracking of the main line of the Atlantic City Division, extending from Camden to Atlantic City, was completed during the year, and the new road, laid throughout with steel rails weighing 100 pounds to the yard, was opened for use as a double-track line on May 4, 1893, providing ample facilities for the traffic via Camden and the increasing business via Delaware River Bridge route. There has been charged to "cost of road" during the year 1893 \$373,006, being the amount expended during that year for construction of the second track from Berlin to Atlantic City, the amount expended in 1893 in renewing the existing tracks between Camden and Atlantic City having been charged to "profit and loss."

**STOCK AND BONDS.**—To pay for the above-mentioned improvements, made in 1897 and 1898, and also for redeeming the \$136,500 Swedesboro RR. first mortgage 7s, due Dec. 1, 1898, there was sold \$600,000 of first consolidated mortgage 4 per cent gold bonds, and holders of common stock were allotted at par 8 per cent of their holdings of such stock, the latter privilege to shareholders producing \$362,840. Since the close of the year negotiations have been completed for the sale of \$1,500,000 of first consolidated mortgage bonds, with interest reduced to 3 1/4 per cent per annum, to redeem \$1,000,000 West Jersey RR. first mortgage 7 per cent bonds which mature April 1, 1899, and \$97,000 Camden & Atlantic RR. second mortgage 6 per cent bonds which mature Oct. 1, 1899.

**Statistics.**—The earnings, expenses and charges, and the balance sheet, have been:

## United States Rubber Company.

(Report for the year ending Dec. 31, 1898.)

President Frederick M. Shepard in the report speaks as follows:

The operations for the year have been the most important of any since the organization of the company, and from them the company found itself in the responsible position of providing a large part of the rubber boots and shoes required in this country. The directors and officers immediately resolved to make their plans and prices so fair and liberal that there should be no reasonable cause for complaint, and that all goods should give good value to the purchaser. As a result the relations between the company in its manufacturing departments and with its customers have been most harmonious and friendly. The company has secured from some of the claims referred to in the last annual report as being in process of settlement securities, at market value, amounting to \$334,498, which will be included in the statement when all the matters are fully adjusted. The physical condition of the factory properties has been kept good and the cost charged in expense accounts.

The manufacturing companies in which the United States Rubber Co. has investments earned \$438,871, as compared with \$354,143 last year; and the undivided earnings in the treasuries of such companies are now \$3,488,364, showing an increase of \$438,871 over the previous year.

The operations for the year ended April 1 were:

	1899.	1898.	1897.	1896.
Profit from oper. plant, inc. from investments...	2,519,231	1,411,395

#### Philadelphia Company.

(Report for year ending March 13, 1899.)

The company's operations have been extended during the year to include the gas and electric light companies of Pittsburgh. An offer was also made for the stock of the United Traction Co. (see V. 68, p. 479). The report says in substance:

During the year the company has acquired by purchase the entire capital stock of the Mansfield & Chartiers Gas Co. and the controlling interest in the capital stock of the Consolidated Gas Co. of Pittsburgh, the Chartiers Valley Gas Co. and the Allegheny County Light Co. To provide for these purchases the common stock of the company was increased by the issue of 12,000 shares; first mortgage bonds were created by the company, of which \$4,000,000, par value, were issued and sold, and preferred stock was also created, of which 50,000 shares of the par value of \$1,000,000 were authorized to be exchanged for common shares of the Consolidated Gas Co. of Pittsburgh, subject to the payment of \$7.50 per share, which has been placed in a special fund for the purpose of acquiring the floating indebtedness of the Chartiers Valley Gas Co. and the Allegheny County Light Co., thus relieving these companies from the pressure of this indebtedness and placing them in control of the Philadelphia Co. The purchase of the controlling interest in these companies insures harmonious action, and the dividends upon their shares will add largely to the revenues of the Philadelphia Co. None of these dividends appear in the report of earnings herewith submitted. By the acquisition of the stock of the Chartiers Valley Gas Co. the share of earnings paid as rental to that company will almost entirely inure to the benefit of the Philadelphia Co.; this would have amounted, out of the earnings of the past fiscal year, to \$197,509.

Your company sold during the year a total of 11,729,512,000 cubic feet of gas, being an increase of 9,855,000 cubic feet, with additional receipts from that source of \$147,258. These additional receipts have been occasioned by increased domestic consumption, making the average earnings per 1,000 feet higher than in the previous year.

Statistics.—Earnings and expenses, &c., were as follows:

#### New England Telephone & Telegraph Company.

(Report for year ending Dec. 31, 1898.)

The report says in part:

As was stated in the last annual report, treasury stock to the amount of \$488,500 was issued early in the year 1898, being a portion of the amount named in the offer of Aug. 10, 1897. Under the offer of Aug. 6, 1898, a further amount of \$560,300 was subscribed for at par by stockholders and issued Nov. 16, 1898. Within the year \$150,000 20-year five per cent debenture bonds, seventh series, payable in 1916, and \$500,000 five per cent bonds, eighth series, payable in 1919, have been sold. The first series of \$500,000 six per cent debenture bonds, payable April 1, 1899, have been retired and canceled, with the exception of 47 bonds of \$1,000 each, which have not been presented.

The expenditure for new construction and properties purchased during the year amounted to \$898,203, of which \$191,500 was for exchange aerial construction, \$449,785 for underground conduits and cables, \$136,834 for equipment and \$110,865 for toll lines. The expenditure for repairs and maintenance was \$1,210,022, making the total outlay on the property in 1898 \$2,099,315, as against an expenditure in 1897 of \$1,556,372. We estimate that the expenditure for maintenance and extension of the property during the year 1899 will be: For new construction, \$1,000,000; for maintenance, \$1,250,000; total, \$2,250,000.

Statistics.—Results of operations were as given below:

**American Agricultural Chemical Co.—Fertilizer Consolidation.—Prospectus.**—This company has been organized under special charter, granted by the Legislature of the State of Connecticut, with \$10,000,000 of authorized capital stock, of which \$20,000,000 is 6 per cent cumulative preferred and \$20,000,000 common, the present issue being \$17,000,000 of each, for the purpose of acquiring control of the following firms and corporations:

Alexandria Fertilizer & Chemical Co., Alexandria, Va.; H. J. Baker & Bro., Brooklyn, N. Y.; Bradley Fertilizer Co., Boston, Mass., and Los Angeles, Cal.; Chemical Co. of Canton, Baltimore, Md.; Cleveland Dyer Co., Cleveland, Ohio; Cumberland Bone Phosphate Co., Boothbay Harbor, Me.; Crocker Fertilizer Co., Buffalo, N. Y.; Dietrick Fertilizer & Chemical Co., Baltimore, Md.; Jarecki Chemical Co., Sandusky, Ohio; Lazaretto Guano Co., Baltimore, Md.; Liebig Manufacturing Co., Carteret, N. J., and Wilmington, Del.; Lister's Agricultural Chemical Works, Newark, N. J.; Maryland Fertilizing & Manufacturing Co., Baltimore, Md.; Michigan Carbon Works, Detroit, Mich.; Millsom Rendering & Fertilizer Co., Buffalo, N. Y.; Northwestern Fertilizing Co., Chicago, Ill.; Preston Fertilizer Co., Brooklyn, N. Y.; Quinnipiac Co., Boston, Mass.; Read Fertilizer Co., Brooklyn, N. Y.; Tygart Allen Fertilizer Co., Philadelphia, Pa.; Williams & Clark Fertilizer Co., Carteret, N. J.; The Zell Guano Co. of Baltimore City, Md.

"These companies," the prospectus states, "are recognized as the strongest concerns, with the best equipped plants, engaged in the manufacture of fertilizers in the Northern and Eastern States, and are so located at distributing centres as to enable them to market their products at a minimum cost." Several of the constituent companies are also large producers of boneblack, ivory-black, gelatine, glue, sulphuric, muriatic and phosphoric acid, carbonate of ammonia, sulphate of ammonia, sulphate of potash, sulphate of soda, etc. The Audit Company of New York has found the average annual profits of the several concerns for the last five years to amount to \$1,419,879, or equivalent to 6 per cent on the preferred and more than 2 per cent on the common stock of the new company. It is believed that as a result of consolidation large saving will be effected in the cost of operation and the earnings will be largely increased.

The prospectus affords the following:

The value of the assets of the constituent companies has been appraised as follows: Lands, piers and bulkheads, \$1,825,887; buildings and machinery, \$3,893,840; equipment, \$233,577; accounts and bills receivable (where deemed necessary guaranteed or secured by vendors), \$6,141,894; merchandise, \$3,479,197; cash, \$1,146,336; other assets, \$700,823; total assets, \$17,226,307; liabilities of all companies, \$4,082,026; making total net assets of the subordinate companies, \$13,164,287.

Of the new preferred stock there will be used to acquire the foregoing properties about \$11,500,000, and to provide working capital and liquidate the indebtedness of the constituent companies about \$5,500,000. After liquidation of the indebtedness shown the new company will have tangible assets (or stock of subordinate companies covering the same), excluding all brands, trade marks, patents, processes and good-will, amounting to about \$18,684,287, included in which are accounts, bills receivable and merchandise, about \$9,600,000, and cash of nearly \$2,500,000.

The preferred stock is cumulative, entitling the holder to a preference in dividends to the extent of 6 per centum per annum before any dividends are payable on the common stock, and also entitling the holder to a preference in the distribution of assets on liquidation of the company. The common stock is entitled to surplus dividends and to all surplus assets on such liquidation.

John F. Gibbons (Vice-President of the Liebig Manufacturing Co. of New York City) has been selected as President, Robert S. Bradley and Mr. William H. Grafflin as Vice-Presidents of the new company.

Clark, Dodge & Co., of New York, and Jackson & Curtis and Hornblower & Weeks, of Boston, announces that upwards of \$10,000,000 of the preferred stock has been applied for or underwritten and allotted to vendors, and that the balance is offered for subscription at par, with a bonus of 75 per cent in common stock. Subscriptions are payable at the Guaranty Trust Co., New York, as called for.

**American Alkali Co.—Officers, etc.**—President Gibbs announces that the company has arranged for the location of its works at Sault Ste. Marie, where it has contracted with the Lake Superior Power Co. for such amount of power as shall be required at the rate of \$10 per horse-power per annum, for 24 hours per day and every day in the year. The officers and directors are:

Directors—W. W. Gibbs, F. H. Clergue, George Philler, Samuel R. Shipley, Herbert M. Howe, W. M. Kerr, all of Philadelphia, and Ernest E. Davies, of New Jersey.

Officers—W. W. Gibbs, President, Drexel Building, Philadelphia; F. H. Clergue, Vice-President and General Manager; George Philler, Second Vice-President; Clayton E. Platt, Secretary and Treasurer.—V. 68, p. 925.

**American Bicycle Co.—Incorporated.**—This company was incorporated at Trenton, N. J., on May 12, with \$80,000,000 of authorized capital stock, of which \$35,000,000 is 7 per cent cumulative preferred. The company is being financed by the United States Mortgage and Trust Co. of this city and Lee, Higginson & Co. of Boston. Options have been secured on the properties of more than 100 makers of bicycles, in-

cluding the Pope Manufacturing Co., A. G. Spalding & Bros., the Remington Co., the Stearns Co., the Pierce, Eldridge and Rambler companies, and all the best-known makers of bicycles in the country. Reports on the properties are now being examined by the financial agents, and those properties which are approved will be included in the trust. The following statement is made:

"The principal aim of the new company will be to improve the product, reduce the price and control the output. For several years it has been the custom of the makers of the cheaper wheels to flood the market in mid-season with bicycles at reduced prices, so as to be able to get money to meet obligations. This practice has tended to lower the standard of American bicycles and has materially injured the business. With the consolidation of interests we shall be able to control this mid-season output and at the same time produce a better wheel for less money."

A typewritten statement, believed to be official, was issued on Monday announcing that the Western Wheel Works, the one large concern which had withdrawn its option of purchase originally given to A. G. Spalding, had renewed the option and would join the consolidation. With this option in hand the American Bicycle Co., it is stated, will control 95 per cent of the bicycle-making industry in this country and will have facilities for turning out 2,160,000 wheels annually. The International Vehicle & Manufacturing Co. was organized last week, it was understood, by R. L. Coleman, President of the Western Wheel Works, as a rival concern, but apparently the opposing interests have come to terms, and will unite in the American Bicycle Co.

**American Hide & Leather Co.—Outside Companies.**—The "Boston Boot & Shoe Recorder" has compiled a list of 27 firms with an aggregate commercial rating of from \$7,000,000 to \$9,525,000 which are not included in the upper leather consolidation. They include the Pfister & Voegel Leather Co. of Milwaukee, rated at \$1,000,000 and over; DuBois & Van Tassel Bros. of Boston, at \$1,000,000 and over; Trostel & Sons and Gallun & Sons of Milwaukee and Callery & Co., of Chicago rated at \$500,000 to \$1,000,000 each.—V. 68, p. 925.

**American Linseed Co.—First Dividend.**—The company on Tuesday declared its first dividend, viz. 1 1/4 per cent on the preferred stock, payable June 24.—V. 68, p. 668.

**American Plumbing Supply & Lead Co.—Purchased.**—H. B. Hollins & Co. are still unable to furnish a prospectus for this company, but they confirm the reported purchase of the Jordan L. Mott Iron Works, situated at 133d Street and Third Avenue, and employing about 600 men. The consolidation, it is said, will embrace about forty-five plumbers' supply companies. The capital stock will be \$35,000,000 (of which \$10,000,000 is 7 per cent cumulative preferred), but this may be increased to \$50,000,000.—V. 68, p. 821.

**American Railway Equipment Co.—Consolidation.—Prospectus.**—This company will presently be organized under the laws of New Jersey, to acquire the following companies furnishing patented articles for freight cars:

Brake beams: Chicago Railway Equipment Co., Chicago (see National Hollow Brake Beam Co.); American Brake Beam Co., Jersey City; Sterlingworth Railway Supply Co., Easton, Pa.; Monarch Brake Beam Co., Limited, Detroit.

Brake shoes, cast steel trucks and bolsters and steel castings: Sargent Company, Chicago (licensee American Brake Shoe Co.); Shickle, Harrison & Howard Iron Co., St. Louis.

Pressed steel trucks and bolsters: Cloud Steel Truck Co., Chicago; Standard Car Truck Co., Chicago; Simplex Railway Appliance Co., Chicago; Common Sense Bolster Co., Chicago.

Car roofs: Chicago-Cleveland Car Roofing Co., Chicago, Ill., and Cleveland, O.; C. B. Hotelins & Sons, Detroit; P. H. Murphy Manufacturing Co., East St. Louis, Ill.

Car doors and grain doors: National Railway Specialty Co., Chicago; Q. & C. Company (car door business only), Chicago; McGuire Manufacturing Co., Chicago (grain door business only).

Journal boxes: McCord & Co., Chicago.

Negotiations are reported pending for the acquisition of additional properties.

The authorized capital stock of the new company, it is stated, will be \$12,000,000 common and \$10,000,000 per cent preferred stock. Of these amounts the immediate issue, it is understood, will be \$9,730,000 of common and \$7,730,000 of preferred. Subscriptions received through the Illinois Trust & Savings Bank of Chicago, it is stated, exceed the amount offered. Professional accountants are examining the books of the various companies, and it is expected that the new company can begin business about June 1. Charles L. Freer is promoting the enterprise. The board of directors is announced as follows:

J. E. French, New York; Henry B. Laughlin, Chicago; Willard A. Smith, Chicago; George B. Leighton, St. Louis; James H. Berry, Detroit; Charles H. Hotelins, Detroit; W. V. Kelly, Chicago; Charles F. Quincy, Chicago; William J. Cook, Chicago; E. B. Leigh, Chicago.

The President, it is stated, will be a Chicago man, and the general office will be in that city.

**Atchison Topeka & Santa Fe Ry.—Subsidiary Lines Merged and Brought Under Direct Lien of General Mortgage.**

—Since the 1st of January of the present year a number of railroad lines in Kansas and New Mexico that previously were vested in separate corporations, the stock and bonds of which were owned by the Atchison company and pledged under its general mortgage, have been conveyed directly to the Atchison company. As a result of this the Atchison now has the ownership in fee of 2,219 miles of railroad, upon which its general mortgage has a direct first lien. Under laws passed during the present year the lines of railroad in Colorado and in Illinois can also be vested in the Atchison company by direct ownership, and it is expected that these lines, as well as the lines in Missouri and Iowa, will also soon be conveyed to the Atchison company. This will place 1,000 miles under

the direct lien of the general mortgage in addition to the 2,319 miles above mentioned. The remainder of the railroads in the company's system is held by separate companies, the bonds and stocks of which are pledged under the general mortgage, and it is expected that title to the greater part thereof will also ultimately be vested in the Atchison company directly.—V. 68, p. 669.

**American Smelting & Refining Co.—Official Statement.**—An official statement signed by Thomas B. Adams, Assistant Treasurer, says:

**ORGANIZATION AND CAPITAL STOCK.**—Organized April 4th, 1899, under the laws of New Jersey. Authorized capital: preferred cumulative 7 per cent stock \$32,500,000; common, \$32,500,000. Par value of shares \$100 each. No personal liability. Outstanding: preferred, \$27,400,000; common, \$27,400,000. Balance in treasury. Registrar, Chase National Bank, N. Y. Transfer agent, Manhattan Trust Co., N. Y.

**PROPERTY.**—This company owns or fully controls the business and plants of the following corporations, viz.:

United Smelting & Refining Co., Helena and Great Falls, Mont.	Consolidated Kansas City Smelting & Refining Co., Kansas City, Mo., El Paso, Tex., Leadville, Col., and El Carmen, Chihuahua and Sierra Mojada, Mex.
National Smelt'g & Refining Co., Chic. Omaha & Grant Smelting Co., Omaha & Denver.	Pennsylvania Lead Co., Pennsylvania Smelting Co., Salt Lake City and Pitts. Bt-Metallie Smelting Co., Leadville.
San Juan Smelting & Mining Co., Durango Colo.	Germania Lead Works, Salt Lake City.
Pueblo Smelt'g & Refining Co., Pueblo, Colorado Smelting Co., Pueblo.	Chicago & Aurora Smelting & Refining Co., Chicago and Aurora, Ill., and Leadville, Col.
Hanauer Smelt'g Wks., Salt Lake City.	
Globe Smelting & Refining Co., Denr.	

**BONDS.**—The above properties will be free and clear with the exception of Omaha & Grant Smelting Co. first mortgage 6 per cent bonds, due March 1, 1911, \$1,133,000; Consolidated Kansas City Smelting & Refining Co. first mortgage 6 p. c. bonds, due May 1, 1900, \$1,000,000.

**RIGHTS OF PREFERRED STOCK.**—The certificate of incorporation says: "The preferred stock shall be entitled in preference to the common stock to cumulative dividends at the rate of 7 per cent yearly, payable quarterly, half-yearly, or yearly; that is to say, dividends may be paid upon the common stock only when the preferred stock shall have received dividends at said rate from the time of the issue thereof. The preferred stock shall also have a preference over the common stock in any distribution of the assets of the corporation other than profits until the full par value thereof and 7 per cent per annum thereon from the time of issue shall have been paid by dividends or distribution. The preferred stock shall not be entitled to any dividend in excess of said 7 p. c. per annum, nor to any share in distribution of the assets in excess of said par value and the amount then unpaid of such cumulative dividends; but only the common stock shall be entitled to any further dividend or any further share in distribution."

**OFFICERS.**—President, E. W. Nash; Vice-President, Barton Sewell; Secretary, Edward Brush; Assistant Treasurer, Thomas B. Adams. Directors:—E. W. Nash, J. B. Grant, Guy C. Burton, W. S. Gurnee, Barton Sewell, A. Ellers, M. D. Thatcher, D.H. Moffat, Dennis Sweeney, A. R. Meyer, N. Witherell, R. S. Towne, Grant B. Schley, H. H. Rogers, Leonard Lewisha.

"The consolidation," the statement says, "was effected upon the basis of actual current earnings sufficient to pay dividends on the stock of the new company issued and outstanding of approximately 7 per cent on the preferred and 5 per cent on the common. It may be reasonably assumed that with the advantages accruing from a combination of formerly competing interests and with possible economies in the consolidated management the earnings hereafter should show a substantial increase."

The net earnings in 1898 exceeded \$3,100,000 and are expected to increase largely as a result of consolidation. Working capital of at least \$7,500,000 was to be provided (see V. 68, p. 823, 821.)

**Baltimore & Ohio.—New Securities to be Ready May 24.**—Notice is given that on and after May 24th, 1899, holders of the Mercantile Trust Company's reorganization certificates of deposit issued under the plan and agreement for the reorganization of the Baltimore & Ohio RR. Co. dated June 22, 1898, may receive the new securities and cash to which they are entitled, either at the office of the Mercantile Trust Company, No 120 Broadway, in the City of New York, or at the London & Westminster Bank, Limited, its London Agency. Not more than one hundred schedules will be taken in each business day, and the new securities and cash in exchange will be ready for delivery on the following day. The new coupon bonds are in denominations of \$1,000 and \$500 each. The new shares (trust certificates) are of the par value of \$100 each. Non-interest bearing scrip exchangeable in round amounts for the new securities will be issued for fractional amounts of new bonds and shares.

Interest upon coupons matured prior to July 1st, 1898, and deposited separately from the bonds will cease to accrue on and after May 24th, 1899.

J. P. Morgan & Co. give notice to the holders of their certificates for consolidated mortgage 5 per cent gold bonds of the Baltimore & Ohio Railroad Co., due 1898, that upon surrender of such certificates at their office, they will arrange to deliver thereorganization certificates entitling the holders to the new Baltimore & Ohio securities, when issued, and also to the cash payment to be made under the plan.—V. 68, p. 879.

**Bethlehem Steel Co.—Bethlehem Iron Co.—Official Circular.**—The circular sent the stockholders of the Bethlehem Iron Co. regarding the lease of the property to the Bethlehem Steel Co. states that the iron company is to receive, as already announced, a guaranteed rental equal to 6 per cent on its \$7,500,000 of capital stock (as increased by the 50 per cent stock dividend) and is to be relieved from further payments on account of its indebtedness. The circular adds:

The expansion of the business will naturally require from time to time large expenditures for the purchase of machinery and for the general enlargement of facilities, whereby the greatest production may be obtained at the least possible cost. Your directors are of the opinion that the funds required for these expenditures and for the liquidation of the bonded debt (\$1,351,000 first mortgage 6c, due Feb. 1, 1907. Ed.) should not be provided as heretofore

out of earnings. It is therefore determined that the new corporation taking the lease shall have ample capital—namely \$15,000,000, divided into 300,000 shares of a par value of \$50 each. The share capital of the Bethlehem Iron Co. is \$5,000,000. A scrip dividend of 50 per cent out of the accumulated earnings has been declared to shareholders of record on March 29, 1899. The scrip thus issued will be convertible into stock certificates on May 15, 1899. By this action the capital stock of the company will be increased to \$7,500,000. To the shareholders of the Bethlehem Iron Co. is offered the privilege of purchasing shares of the Bethlehem Steel Co. in the proportion of two shares of Steel Co. stock for each share of the Bethlehem Iron Co. stock as held on May 25, 1899, upon payment of the first instalment of \$1 per share, which is to be called on or about June 1, 1899. Holders of the dividend scrip must, in order to exercise this privilege, convert the scrip into shares on or before May 25, 1899. A second instalment of \$1 per share will be called by the Steel Company payable on or about Oct. 1, 1899. It is believed that additional calls for some years to come will not exceed \$2 per share per annum.—V. 68, p. 821.

**Brooklyn Dock & Terminal Co.—Incorporated.**—This company was incorporated at Albany on April 29 with authorized capital stock of \$1,500,000 in \$100 shares. The company proposes to erect a large freight depot at the foot of Twenty-fifth Street and two large coal trestles at the foot of Twenty-sixth Street in Brooklyn. Work was to have been begun on Wednesday on the station, which, it is said, will cover about nine acres, will have frontage of 260 feet and a depth of 2,400 feet, and will contain large storehouse facilities. The company's office is at 136 Liberty Street. Ex-State Senator C. P. Vedder is President of the company, D. A. Heald Vice-President, and James B. Van Woert Secretary and Treasurer.

**Brooklyn Rapid Transit Co.—People's Gas Light & Coke Co. of Chicago.—Elected.**—Anson R. Flower has succeeded his brother, the late Roswell P. Flower, as a voting trustee of the Brooklyn Rapid Transit Co., and as director of the People's Gas Light & Coke Co. of Chicago.—V. 68, p. 870; V. 68, p. 825.

**Cambria Steel Co.—No Assessment June 1.**—A Philadelphia paper says that the directors on Thursday decided not to call the \$1.50 assessment due June 1.—V. 68, p. 128.

**Carnegie Steel Co.—Underwriting.**—While it is denied that subscription books for the underwriting have formally opened, it is generally believed that a large part, if not all, of the funds necessary for the consolidation have been privately underwritten. The plan is not ready for announcement, but the expectation is the new company will issue \$375,000,000 of common stock, \$250,000,000 of 6½ non-cumulative preferred stock and \$100,000,000 of 5½ bonds, the bonds with a considerable amount of stock or cash to go to Mr. Carnegie. Judge W. H. Moore, of Chicago, who was instrumental in the organization of the American Tin Plate Co., the National Steel Co. and the American Steel Hoop Co., is actively engaged in effecting arrangements for financing the plan. The First National Bank of this city is likely to be the depository. A list of the properties to be united was given last week on page 925; see also page 899.

A Chicago press dispatch says: "Subscriptions to the stock command a premium of 6 points at the start, the underwriting being put out at 106 instead of at par. For each single subscription at that price the subscriber gets one share of preferred of the par value of \$100 and one share of common. It is said about \$25,000,000 will be placed by the Moores here and in the West."

**Lease.**—A press dispatch states that the Oliver Mining Co., controlled by the Carnegie Steel Co. has leased the Stevens property on the Mesaba Range. The lease is for ninety-nine years at fifteen cents a ton royalty. It is said that the Oliver Mining Co. contemplates purchasing the Champion Mine at Champion Mills.—V. 68, p. 925.

**Central Vermont RR.—Deed of Burlington & Lamoille.**—The deed of the sale of the Burlington & Lamoille RR. to the Central Vermont RR., in consideration of \$250,000 in 4 per cent gold bonds, has been filed in the City Clerk's office at Burlington, Vt. The deed does not extend to that portion of the road between the terminus of the Rutland RR. at Burlington to Essex Junction.—V. 68, p. 871.

**Chicago Burlington & Quincy RR.—Extensions.**—The Denver & Montana RR. Co. was incorporated in Colorado, April 27, with a capital stock of \$1,000,000, to construct a railway from Brush, Col., to Alliance, Neb., thus giving Denver a closer connection with the Montana line of the Chicago Burlington & Quincy RR. Co. The Nebraska Wyoming & Western RR. Co. was incorporated in Wyoming April 11 with a capital stock of \$1,000,000, to build an extension from Alliance, Neb., westerly through the counties of Laramie, Converse, Natrona, Sweetwater and Uinta to the western boundary line of the State. The incorporators of both the new companies are G. W. Holdredge, J. G. Taylor and W. P. Durkee, officers of the C. B. & Q.—V. 68, p. 771.

**Merger.**—The Chicago Burlington & Northern RR. was formally merged with the Chicago Burlington & Quincy on May 1, becoming the Northern Division of the latter road. On Thursday the following nine leased lines were merged by consolidation in the C. B. & Q.:

Illinois Valley & Northern, 59 miles; Galesburg & Rio, 12 miles; Chicago & Iowa, 102 miles; Peoria & Hannibal, 33 miles; Ottawa & Fox River Valley, 67 miles; Illinois Grand Trunk, 65 miles; American Central, 51 miles; Quincy & Warsaw, 40 miles, and St. Louis Rock Island & Chicago, 285 miles.—V. 68, p. 771.

**Chicago Milwaukee & St. Paul Ry.—Possession Taken.**—The company has taken formal possession of the Des Moines Northern & Western RR., whose entire amount of stock and bonds was purchased several months ago.—V. 68, p. 528.

**Chicago Great Western Ry.—Purchase.**—The company has purchased the main line of the Wisconsin Minnesota & Pacific, extending from Red Wing, Minn., to Mankato, 93.7 miles, and will operate it after June 1. This section of the road was not included in the recent transfer to the Minneapolis & St. Louis.—V. 68, p. 771.

**Chicago Peoria & St. Louis RR.—St. Louis & Peoria Ry.—Plan Operative.**—The reorganization committee of the Chicago Peoria & St. Louis RR. Co. announces that more than 87 per cent of the first mortgage bonds and a large majority of each other class of securities have been deposited, and that the plan and agreement is declared effective and binding. Non-depositing security holders have until May 29 to deposit their securities, after which date they will be received only upon such terms as may be imposed by the committee. The plan provides for consolidation with the St. Louis Chicago & St. Paul Ry., under title of St. Louis & Peoria Ry. Co.—V. 68, p. 722.

**Chicago Terminal Transfer RR.—Chicago & Alton RR.—Reported Terminal Agreement.**—It is reported that a contract has been signed between these companies for the Alton's use of the Chicago Terminal Transfer terminals in Chicago.—V. 67, p. 954.

**Chicago Union Traction—North Chicago Street RR.—West Chicago St. RR.—Consolidated Traction Co.—Purchase and Lease.**—The plan by which Mr. Yerkes sells his holdings in the North Chicago and West Chicago Street Railroad companies to the Eastern syndicate provides for the formation under the laws of Illinois of the "Chicago Union Traction Company." This new company will be authorized to issue \$15,000,000 of 5 per cent preferred and \$20,000,000 of common stock. Only \$12,000,000 of the preferred stock will be issued at present, and the subscriptions to this at par, with a bonus of 50 per cent in common stock, have largely exceeded the required amount. Of the proceeds, \$10,000,000 will go to Mr. Yerkes in payment for his stock, and \$2,000,000, it is stated, will be placed in the treasury of the new company as working capital.

The stock obtained from Mr. Yerkes is acquired, it is stated, on a 4¾ per cent basis, say 127 for West Chicago and 253 for North Chicago. At this rate the purchase embraces less than a majority interest, and the Chicago Traction Co. will accordingly lease the property of those companies at a rental of 12 per cent per annum on the North Chicago and 6 per cent on the West Chicago stock. The stockholders of these two companies will meet June 2 to take action on the leases. The success of the plan is reported practically assured, holders of large blocks of the majority interest favoring the leases. The Chicago Traction Co. will also lease on terms not made public the Chicago Consolidated Traction Co., recently formed by the union of the suburban lines, but will not, it is said, own any of that company's stock. The shareholders of the Consolidated Traction Co. will vote on the lease May 22. Mr. Yerkes retains, at least for the present, his control of the Union Elevated RR., the Lake Street Elevated RR. and the Northwestern Elevated RR., the last-named being still under construction, and, it is stated, is endeavoring to effect a consolidation of the three properties and the South Side Elevated RR.

The first payment of subscriptions on account of the Chicago Union Traction Co. it is understood will be 25 per cent and will be called for on the day the allotment to individual subscribers is officially made. New York, according to report, has taken \$7,000,000 and Philadelphia \$3,000,000 of the underwriting.—V. 68, p. 923, 769.

**Cincinnati New Orleans & Texas Pacific Ry.—Renewal of Lease Postponed.**—The board of trustees charged with the care of the City of Cincinnati's interests in the Cincinnati Southern Ry. (leased to the Cincinnati New Orleans & Texas Pacific Ry.) has indefinitely postponed action on the proposition of President Spencer, of the Southern Railway, to renew the lease of the Cincinnati Southern. This postponement was adopted on May 13 in the shape of a resolution providing that there shall be no further consideration of the lease until such time as all cases now pending in the courts shall have been settled. A long delay, it is thought, may result unless the action is reconsidered. The principal cases now pending are the Roberts bond case, now in the State Supreme Court; the bridge case, and the Kentucky franchise tax case.—V. 68, p. 84.

**City of Baltimore United Breweries.—Maryland Brewing Co.—Sale.**—At a meeting in London on May 5 it was shown that 19,995 shares of the 21,000 shares (£10 each) of stock of the City of Baltimore United Breweries had assented to a proposition for the sale of their stock to the Maryland Brewing Co. It was thereupon unanimously voted that "if the undertaking shall be sold upon such terms as will enable this company to have as surplus assets available for distribution among its members fully-paid shares of stock in the Maryland Brewing Co. at the rate of £3 (at the exchange of \$4.87) in 6 per cent preference shares or stock in the said Brewing Company for each £10 preference share in the company, and at the rate of £5 in ordinary shares of the said Brewing Company for each £10 ordinary share," that in such case upon appropriate resolution to that effect the English company should go into liquidation and should distribute at the rate named the stock received. The English company has had outstanding also £135,100 debenture mortgage 6s.—V. 68, p. 331.

**City of Chicago Brewing & Malting Co.—Milwaukee & Chicago Breweries.—Dividends Passed.**—Both these companies have passed the semi-annual dividend of 4 per cent now due on the preferred stock. The City of Chicago company is in arrears, it is stated, 20 per cent on its preferred shares, and the Milwaukee & Chicago Company 14½ per cent.—V. 67, p. 1307.

**Columbus & Hooking Coal & Iron Co.—New Management.**—At the annual meeting this week there was a complete change in the management, the following directors being elected:

W. L. Freudenstein, Frederick W. Ritter, E. S. Laroher and John E. Knapp, of New York, and S. A. McManigle, Willie P. Bloom, Arthur P. Devlinish, George M. McDonald, and John C. Knapp, of Columbus.—V. 67, p. 28.

**Continental Cotton Oil Co.—Organization.**—This company, recently organized, is said to control seven plants, most of them in Texas. C. L. Rathborne & Co. are interested in the enterprise.—V. 68, p. 670.

**Delaware & Hudson—Albany & Susquehanna—New York & Canada—Rensselaer & Saratoga.—Earnings of the D. & H. leased lines in New York State for the quarter ending March 31 were:**

3 months.	Alb. & Susq.	N. Y. & Can.	Rens. & Sar.			
	1899.	1898.	1899.	1898.		
Gross.....	\$973,624	\$881,656	\$196,931	\$181,396	\$502,532	\$508,302
Net.....	498,670	341,942	64,777	34,943	104,001	125,063
Charges.....	292,150	803,747	88,818	90,031	297,498	304,672
Balance, surplus.....	116,520	38,696	df. 22,036	df. 51,098	193,497	179,919

—V. 68, p. 920; V. 67, p. 1054.

—V. 68, p. 920; V. 67, p. 1054.

**Delaware Lackawanna & Western RR.—Quarterly.**—Earnings of the company's leased lines for the quarter ending March 31 were:

3 mos. ending Mar. 31—	Gross earnings.	Net earnings.	Interest, taxes, &c.	Balance, sur. or def.
1899.....	\$1,489,369	\$623,846	\$619,249	sur. \$4,607
1898.....	1,422,396	504,826	619,248	def. 114,422

—V. 68, p. 871.

**Diamond Match Co.—Rumor.**—A rumor from Chicago says the company may issue \$31,000,000 common stock at par, to take in independent factories. Later reports are that negotiations with the thirty-four independent factories are progressing satisfactorily, but that it is too early to predict their outcome.—V. 68, p. 328.

**Easton Consolidated Electric Co.—Purchase.**—A press despatch says the company has bought the Easton Palmer & Bethlehem Ry. for \$300,000 and has an option on the Bethlehem & Allentown road for \$1,000,000. By the latter is probably intended the Allentown & Lehigh Valley Traction, of which the Allentown & Bethlehem Rapid Transit is a component part. See statement in February, 1899, STREET RAILWAY SUPPLEMENT, page 8.—V. 68, p. 670.

**Electric Storage Battery Co.—Stock Allotment.**—The stockholders will be allotted from the authorized increase in common stock 25 per cent of their holdings as of May 18, 1899, payment to be made in full at par for such allotment between June 1 and 10. New certificates will be ready for delivery June 10. Benj. W. Tingley, Drexel Building, Philadelphia, is the company's Secretary.—V. 68, p. 926, 927.

**Electric Vehicle Co.—Stock Increased.**—At Trenton, N. J., on May 13, the company filed papers increasing its capital stock from \$10,000,000 to \$13,000,000, of which \$5,000,000 is 8 per cent non-cumulative preferred.—V. 68, p. 927.

**Erie RR.—Jersey City Tracks Elevated.**—The elevation of the company's tracks through Jersey City has been practically completed and on Saturday last trains began to run regularly over the elevated structure.—V. 68, p. 926.

**Flint & Pere Marquette RR.—Chicago & West Michigan Ry.—Detroit Grand Rapids & Western RR.—Consolidation Pending.**—Plans for the consolidation of these companies are under consideration, T. F. Ryan and Oliver W. Mink representing the Flint & Pere Marquette. The new company if formed may be called the Detroit & Pere Marquette RR., and have W. W. Crapo, of New Bedford, Mass., as President, and Charles Merriam, of Boston, as Treasurer. There are also unconfirmed reports of a possible alliance of the Flint & Pere Marquette with interests independent of those above-named.

At the annual meeting of the Flint & Pere Marquette RR., held May 17, 1899, there was only one change in the directory, F. H. Prince, of Boston, succeeding Geo. Coppell.—V. 68, p. 819, 924.

**General Carriage Co.—President.**—Winfield Scott Jewell has been elected President and General Manager. He was formerly the General Manager of the Indianapolis Street Railway Co. and was also identified with the Toledo (Ohio) Traction Co.—V. 68, p. 926.

**Great Northern Ry.—Possession Taken.**—On May 1 the Duluth Mississippi River & Northern RR. was turned over to the Eastern Railway of Minnesota, by which it was recently purchased. See V. 68, p. 822.

**Hartford Electric Light Co.—Stock Increase.**—The directors have authorized an increase of \$200,000 in the capital stock, making the capital \$700,000. The new stock will be allotted at par to the stockholders.—V. 66, p. 1089.

**Hooking Valley Ry.—Bonds Called.**—Columbus Hooking Valley & Toledo Railway Car Trust bonds, Series "A," to the amount of \$48,000 have been drawn by lot for redemption at par and accrued interest on July 1, 1899, at the Atlantic Trust Co., No. 39 William St., New York.—V. 68, p. 927.

**Jacksonville & St. Johns River Ry.—Jacksonville Tampa & Key West Ry.—Successor Company.**—The Plant Investment Co., which recently purchased the main line of the Jacksonville Tampa & Key West Ry. at foreclosure sale is applying for a charter for the Jacksonville & St. Johns River Ry. Co., which will take over the property.—V. 68, p. 672.

**Jefferson Coal & Ry. Co.—Coal Properties Reported Leased.**—A press dispatch from Birmingham, Ala., on May 1 said:

J. Harry Lee of Baltimore, President of the Ironton (Ohio) Iron & Steel Co. and of the Palestine Coal Co. of Tyreconnell, W. Va., and member of the firm of S. S. Lee & Son of Georges Creek, Md., has leased for a long term of years the coal property of the Jefferson Coal & Ry. Co. at Lewisburg, eight miles from Birmingham. The mines, which are known as the Mary Lee property, have a capacity of 1,000 tons per day, and attached to them are 130 coke ovens and eight miles of railway, together with 2,200 acres of coal lands. The property is owned by the bondholders of the Jefferson Coal & Railway Co. residing in Baltimore, and because of much litigation has not been operated regularly for several years.

**Jersey City Water Supply Co.—Incorporated.**—This company was incorporated at Trenton, N. J., on May 1 with authorized capital of \$1,000,000. The incorporators are M. J. Kennedy, Fred. C. Cochen, M. K. Connelly, John McCarthy, Louis H. Meht of Brooklyn, Henry Belden of New York, and W. D. Edwards of Jersey City.

The company is organized for the purpose of carrying out the contract made by Jersey City recently with Patrick H. Flynn for a new water supply. It is a contracting company, and it will begin at once to lay the necessary conduits, build the dam and reservoir, and secure the right of way for the pipe-line.

**Kings County Elevated Ry.—Deposits till May 25.**—The reorganization committee has extended to and including May 25 the time within which bonds and stock may be deposited with the Guaranty Trust Co. under the plan of reorganization.—V. 68, p. 724.

**Lake Shore & Michigan Southern.—Quarterly.—Earnings for the quarter ending March 31 were:**

3 months end.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
Mar. 31.					
1898.....	\$5,340,082	\$1,943,254	\$52,045	\$937,045	\$1,058,254
1899.....	5,200,780	1,934,100	\$3,240	968,240	1,069,100

—V. 68, p. 868.

**Lexington (Ky.) Electric Railroad Co.—Purchased.**—John L. Williams & Sons, of Richmond, and Middendorf, Oliver & Co., of Baltimore, have purchased the street railway system of Lexington, Ky., including the ice factory and the electric light plant of that city. The following directors have been elected:

R. Lancaster Williams, President, George W. Darnall, Vice-President, Richard P. Stoll, Treasurer, J. R. Morton, S. Davies Warfield, J. W. Middendorf, W. J. Longbridge.—V. 68, p. 380.

**Long Island RR.—\$4,000,000 New 4s Offered.**—By advertisement on another page, August Belmont & Co., and Strong, Sturges & Co. of this city, and Lee, Higginson & Co. of Boston, offer for sale \$4,000,000 of the company's unified mortgage 4 per cent 50 year gold bonds, at 93½ and accrued interest. The bonds offered are part of a total issue of \$45,000,000 recently authorized by the stockholders of the railroad company for the purpose of bringing the various properties composing the Long Island System into a single ownership. At the same time adequate provision has been made in the mortgage for the future needs of the company. Nearly two-thirds of the issue is reserved to retire the present bonded indebtedness of the company and its leased lines and for the liquidation of floating debt, real estate mortgages and equipment notes. The proceeds of the remainder are to be used for improvements, such as the abolition of grade crossings, the Atlantic Avenue improvement, and to defray the cost of a change of motive power to electricity or other power, should such a change seem advisable. Of the proceeds of the bonds now offered \$3,500,000 will provide sufficient funds to pay off the floating debt of the company and all of its real estate mortgages and equipment notes, and also pay for improvements that have been or are now being made to the property. The proceeds of the remaining \$500,000 have been used to purchase, on favorable terms, underlying securities of various issues. The company has already issued \$1,650,000 of the bonds in exchange for other underlying issues, making the total amount outstanding \$1,650,000. The refunding of the obligations of the company already made will result in a saving of fixed charges of over \$24,000 per annum. On the other hand, the issue of new bonds for improvements will make a net increase in fixed charges of about the same amount, but this is justified, in the opinion of the management, by the large increase in net earnings that will result from the expenditures referred to. Further details of the issue, together with a statement of recent operations of the company, are printed in an adjoining column.

**Control of Steamboat Line.**—The company has obtained control of the stock of the Montank Steamboat Company by purchase of the majority interest held by Joseph Fahys & Co. of Sag Harbor. The minority stockholders will receive the same price if they care to sell. The capital of the steamboat company is \$200,000. Possession will be taken May 25.—V. 68, p. 927.

**Mason City & Fort Dodge RR.—Denied.**—The report that the Mason City & Fort Dodge RR., has been acquired by the Chicago Milwaukee & St. Paul Ry. Co. is officially denied.—V. 68, p. 523.

**Manhattan Ry.—Quarterly.—Earnings for the quarter and the nine months ending March 31 were:**

3 mos. end.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Surplus.
Mar. 31.					
1899.....	\$2,342,714	\$1,014,591	\$48,300	\$675,701	\$387,190
1898.....	2,429,301	1,067,756	45,625	639,067	474,314

9 Months—  
1898 9.....\$6,488,023 2,570,007 \$143,300 \$2,014,657 \$698,650  
1897 8..... 6,966,717 3,012,389 147,917 2,021,011 1,139,295

Dividends of 1 per cent quarterly call for \$300,000 quarterly or \$900,000 for the nine months.—V. 68, p. 872.

**Manhattan Tunnel Ry.—Tunnel to New Jersey.**—This company was incorporated at Albany on May 17 with a capital stock of \$10,000, which may be increased to an unlimited amount, to construct a sub-surface or tunnel railroad of standard gauge for the transportation of passengers and freight from a point "on the west side of the borough of Manhattan somewhere below Canal Street to some terminus in Jersey City." The directors are:

Frederick Martin Lande, Charles S. Bradley, William E. Knight, Arthur P. Knight, William A. Courtland, John P. Laffin and David J. Newland of New York City, James V. Hulse of Brooklyn and Philip W. Hall of Cranford, N. J.

The offices are at 20 Broad St.

**Manufactured Rubber Co.—Incorporated.**—This company was incorporated at Trenton, N. J., on May 11, with \$8,000,000 authorized capital stock in shares of \$50 each, 20,000 of which are preferred 8 per cent cumulative. Incorporators: Josiah H. Dubois, William J. Jackson, A. Thompson Dukes and Crayton E. Platt of Camden, N. J.

There is called on the preferred 20 per cent, payable May 25. The preferred, it is stated, received a bonus of 100 per cent in common stock, issued full paid. The preferred stock is entitled to dividends at the rate of 8 per cent per annum, cumulative, on the amount paid in, after which both classes of stock share alike. Various facts of interest are:

W. W. Gibbs, President; George Philler, Vice-President; Clayton E. Platt, Secretary and Treasurer; Samuel R. Shipley, Herbert Lloyd, W. M. Sharpe, all of Philadelphia; J. Appleton, New Jersey. The company, by means of patented processes, produces a material which resembles pure rubber. The prospectus says it can naturally be used in a very large proportion when mixed with pure rubber, and when made up with rubber into finished goods cannot be detected even by experts. Finished goods made from 50 per cent pure rubber and 50 per cent manufactured rubber present as good an appearance and have as lasting qualities as those ordinarily on the market made from pure rubber.

**Massachusetts Electrical Companies.—Union.**—An apparently authoritative statement says: The stock of the new company being formed to own the principal street railways in Massachusetts outside of the Boston elevated system will be about \$24,000,000. One half will be cumulative 4 per cent preference stock and the balance common. It is underwritten at par for the preferred with 60 per cent common as a bonus. The balance, 40 per cent of common stock, is used in organization, etc.

The amalgamation will be known as the "Massachusetts Electrical Companies," and will be organized as an association, and will not be incorporated. The companies which it is understood will be acquired are as follows:

Lowell Lawrence & Haverhill, Reading & Lowell, Lowell & Suburban, Rockport Street Ry., Nashua Street Ry., Gloucester Street Ry., Gloucester & Rockport, Gloucester Essex & Beverly, Lynn & Boston, Beverly & Danvers, Salem & Wakefield, Wakefield & Stoneham, Woburn & Reading, Mystic Valley, North Woburn Street Ry., West Roxbury & Roslindale, Needham & Boston, Norfolk Central, Norfolk Suburban, Boston Milton & Brockton, Braintree Street Ry., Brockton Street Ry., Brockton & East Bridgewater, Brockton Bridgewater & Taunton, Quinor & Boston, Taunton Street Ry., Dighton Somerset & Swansea, Providence & Taunton, Globe Street Ry. (Fall River), Newport & Fall River, Newport Street Ry., Newport Illuminating Co. and Hyde Park Electric Light Co.

The preferred stock, it is stated, will soon be offered for public subscription at 105, each share carrying one-half share of common stock as a bonus. E. Rollins Morse & Bro. and Tucker, Anthony & Co., Boston, have the consolidation in charge.

**Minneapolis St. Paul & Sanit Ste. Marie Ry.—Canadian Pacific Ry.—Sale of Guaranteed Bonds.**—A cablegram from London announces the offering of \$3,500,000 Minneapolis St. Paul & Sanit Ste. Marie second mortgage 4 per cent fifty-year gold bonds, interest guaranteed by the Canadian Pacific Railway, the issue price being £196 per \$1,000 bond. The loan is part of an authorized issue of \$5,000,000, fully described in the CHRONICLE of April 22, page 770.

**Missouri Kansas & Texas Ry.—Consolidation.**—Gov. Sayers has signed the bill which authorizes the company to purchase and operate the Sherman Shreveport & Southern road on condition that the road shall be extended from Jefferson, Texas, to Shreveport, La., and from San Marcus to San Antonio within two years.—V. 68, p. 572.

**Nashville Street Railway.—Sale of Road.**—The stockholders will vote June 17 on a proposition to sell the property to the Nashville Railway Co.—V. 68, p. 872.

**National Carbon Co.—Purchase Completed.**—The deed transferring the plant of the National Carbon Co. of Cleveland to the new consolidated corporation was recorded at Cleveland on May 11. This purchase, it is stated, ensures the success of the plan of consolidation.—V. 68, p. 130.

**National Cash Register Co.—Preferred Stock Offered.**—Baring, Magonn & Co., New York, recently offered at 112 \$500,000 of this company's 7 per cent cumulative preferred stock. The following statement is made:

This company has acquired the business of the National Cash Register Co., of Dayton, O., which has been in successful operation

for some seventeen years, and it will be controlled by the same staff management. The entire assets and good-will of the Ohio company are turned over to the New Jersey corporation in consideration of the above \$4,000,000 of common stock. Of the \$1,000,000 of preferred stock only \$600,000 is at present issued, the balance being held in the treasury and only issuable for cash at par, or for property purchased to the value of \$400,000. Vice-President F. J. Paterson, of the Ohio Company, says:

"The business is the manufacture and sale of cash registers, autographic registers and similar devices. The company employs about 1,700 hands, and its yearly sales are nearly \$2,500,000. The plant used by the company consists of several acres of ground, upon which stand six structures, five of brick and one of steel. Two more large new buildings are to be erected this year, and two more stories are to be added to the present steel building and the entire plant and machinery are in the very best condition. The proceeds of the \$600,000 of preferred stock now issued will be used to erect the additional factory buildings above referred to, to pay existing debts and to provide an increased working capital."

The preferred stock has priority over the common stock, both as to dividends and as to all property and assets in case of liquidation.

Chartered accountants report the net earnings of the Ohio company for 1896 as \$187,796, for 1897 as \$293,212, and for 1898 as \$297,591. It has not been the custom to take into consideration at the end of each year the value of the consigned stock of registers in the hands of agents; if a conservative valuation had been made of this property the profits of each of the above years would have been as follows: 1896, \$255,998; 1897, \$400,178; 1898, \$372,188. The first dividend (1½ per cent) will be due July 15 next, and future dividends will be due semi-annually, Jan. 15 and July 15.—V. 68, p. 672.

**National Electric Co.—Authoritative Statement.**—It is authoritatively stated that the following properties have been secured and are now under the company's actual control:

(1) Beacon Light Co., which is the lessee of the Chester Electric Light & Power Co. The Beacon Light Co. has the exclusive street lighting contract of the City of Chester until 1902, the Borough of Upland and the Borough of Ridley Park, which latter contracts cover a period of five years. Thus the company covers all of the territory between Philadelphia and Chester, inclusive of the latter.

(2) Overbrook Electric Co., which covers that district in West Philadelphia known as Overbrook Farms and vicinity, and whose charter entitles it to supply light, heat and power anywhere in Philadelphia. It is proposed that a new and larger plant shall be built in West Philadelphia for the use of this company.

(3) Cheltenham Electric Light, Heat & Power Co., which supplies light for territory in Montgomery County and adjacent territory in Philadelphia. The plant is located at Oak Lane on the Philadelphia County line.

Negotiations are now pending with representatives of certain large lighting companies in Philadelphia and elsewhere. A considerable sum in cash, it is stated, is in the treasury of the new company in addition to the securities of the companies just purchased. The new company was incorporated on May 1, 1899, with \$25,000,000 capital, consisting of 500,000 shares at \$50 each. "It expects to engage in the business of purchasing, acquiring control and financing electric-lighting companies in and adjacent to Philadelphia County, confining its operations, however, chiefly to electric lighting-plants in Pennsylvania." Offices have been secured in the Real Estate Trust Company Building, S. E. Cor. Broad and Chestnut streets. The officers are:

President, Isaac A. Sweigard; Vice-President, Clarence Wolf; Secretary, Ellis Ames Ballard; Treasurer, Winthrop Smith; Assistant Treasurer, W. L. McClintock.

The company's stock (150,000 shares par \$50, \$10 paid) has been placed in the unlisted department of the Philadelphia Stock Exchange. See also item published last week, page 928.

**Newport News Abattoir Co.—On "Unlisted" in Philadelphia.**—Of the company's \$1,000,000 capital stock, \$460,000 common and \$467,000 preferred (par value \$100) registered with New Jersey Corporation Guarantee & Trust, have been placed on the unlisted department of the Philadelphia Stock Exchange. The company, whose directors are Chas. H. Graham and Chas. Warthman, of Philadelphia, E. S. Palmer, of Merchantville, N. J., and C. W. Harvey, of Wenonah, N. J., has acquired 25 acres of land at Newport News on the main line of the C. & O. RR., and in connection with the wharves of the Ches. & Ohio, Steamship Co. and other lines, and proposes to establish a large packing plant for export business. The plan is to handle 150,000 cattle, 300,000 head of sheep and 200,000 head of hogs the first year. The company is a New Jersey corporation.

**New York & Brooklyn (Tunnel) RR.—Ordinance.**—An ordinance was introduced in the Board of Aldermen on Tuesday, confirming and completing this company's right to construct and operate a double-track tunnel railroad, extending from Ann Street and Park Row under the East River to Adams and Willoughby streets in Brooklyn. The franchise is to run for fifty years, with the right to twenty-five year renewals, and the city is to receive 3 per cent of the net profits from operation remaining after deduction of 5 per cent on the cost of construction. Frederic B. Esler, President of the Metropolis Contract Co., which wishes to construct the rapid transit tunnel in Manhattan, is interested in the company, and Emerson McMillin & Co. are the bankers which are proposing to finance it. Various facts as to the New York & Brooklyn RR. were in V. 63, p. 794 and V. 64, p. 83. See also V. 68, p. 673.

**New York Chicago & St. Louis.—Quarterly.**—Earnings for the quarter ending March 31 were:

3 months end-	Gross	Net	Other	Interest,	Balance,
ing Mar. 31.	Earnings.	Earnings.	income.	taxes, etc.	sur. or def.
1899.....	\$1,633,566	\$312,291	\$1,107	\$300,317	sur. \$13,081
1898.....	1,569,358	255,838	1,225	299,801	def. 42,738

—V. 68, p. 923.

**New York Philadelphia & Norfolk RR.—Listed in Philadelphia.**—The Philadelphia Stock Exchange has listed \$2,500,000 first mortgage 4 per cent gold bonds, due Jan. 1, 1939. "both principal and interest payable in gold coin, free of United States and States of Maryland and Virginia taxes;"

and \$1,000,000 income mortgage 4 per cent registered gold bonds. The official statement says:

The authorized issue of first mortgage 4 per cent gold bonds is \$3,000,000, of which amount there has been issued \$2,032,800, exchanged for \$1,848,000 old 6 per cent first mortgage bonds, and \$467,200 in part settlement of overdue coupons held by the Pennsylvania RR. and the Philadelphia Wilmington & Baltimore RR. companies; in all, \$2,500,000. The remaining \$500,000, unissued, are reserved for betterments, to be issued from time to time at the discretion of the board of directors.

Floating debt, none. Authorized capital stock, \$2,000,000; issued, \$1,714,375 in shares of \$50 each, represented by negotiable trust certificates issued by the Fidelity Insurance Trust & Safe Deposit Co.

**Income Bonds.**—The mortgage provides for the payment of the interest on the income bonds, as follows:

"The registered owner of this bond shall be entitled to receive semi-annually, on the first days of May and of November in each year, out of the net earnings of the company, such interest, not exceeding the rate of 4 per centum per annum, as the board of directors may from time to time declare; to be payable thereout upon the principal of this bond after they shall have made such provision out of surplus income or net earnings as to them from time to time shall be deemed necessary to provide for such reasonable improvements and betterments of, and additions to, the property as shall be advantageous for the safe, proper and economical operation of the same; *Provided, however,* That no dividend shall be declared upon the capital stock of the company unless interest at the rate of 4 per centum per annum shall have been paid upon this bond for twelve months preceding the declaration of said dividend; *And provided also,* That the interest herein provided to be paid shall not be accumulative."

The Fidelity Insurance Trust & Safe Deposit Co. is trustee under both mortgages.—V. 68, p. 773.

**Northern Pacific Ry.—Registered Bonds Called.**—The first call for redemption of registered bonds secured by the general first mortgage of 1881 is made this week. To meet the requirements of the sinking fund \$482,000 of the loan has been drawn and will be paid at 110 and interest on presentation at the Central Trust Co., interest ceasing July 1. Of this amount \$232,000 are coupon bonds, completing the retirement of the coupon issue, and the remainder consists of fifty bonds of \$5,000 each, a portion of the registered bonds which under the deed of trust were not subject to call until after the redemption of all the coupon bonds. The outstanding issue of general first mortgage bonds will be reduced by this drawing to less than 5¼ millions. The amount of the issue at the time of the reorganization in 1896 was \$40,732,000. See notice in advertising columns of to-day's CHRONICLE.—V. 68, p. 188.

**Norfolk Suburban Street Ry.—Sale of Stock.**—Owners of more than a majority of the capital stock having arranged to sell their holdings at \$300 per share, the minority stockholders are offered the same price, provided they deposit their holdings at the office of the International Trust Co., Boston, on or before May 20, 1899.

**Pacific Coast Biscuit Co.—Securities Offered.**—The part not already subscribed for of the company's authorized issue of \$1,500,000 bonds, \$1,500,000 preferred stock and \$2,500,000 common stock, namely, \$1,250,000 first mortgage gold 6s and \$250,000 seven per cent cumulative preferred stock, has been advertised for sale in Portland, Ore., at par.—V. 68, p. 872.

**Park Steel Co.—First Dividend.**—The directors have declared a quarterly dividend of 1¼ per cent on the preferred stock, payable June 1, 1899. D. C. Clapp is Secretary.—V. 68, p. 525.

**Peoria Decatur & Evansville Ry.—Early Decree Expected.**—There is said to be no opposition to the foreclosure proceedings under the first mortgage, and it is thought the Court will soon grant a decree, though the date of sale may be delayed pending the determination as to the respective value of the two divisions of the road. The modified plan of the second mortgage committee has received the assents of \$1,800,000 out of the \$2,000,000 bonds. This committee will protect the interests of the seconds at the foreclosure sale, as provided in the bondholders' agreement. Second mortgage bonds not deposited with the New York Security & Trust Co. would be wiped out in the event of a foreclosure sale under the first mortgage.—V. 68, p. 619.

**Rutland RR.—Ogdensburg Transit Co.—Boats Purchased.**—President Percival W. Clement of the Rutland RR. Co., on May 5, bought a large block of the securities of the Ogdensburg Transit Co., which owns a fleet of eight freight boats and elevators at Ogdensburg on Lake Champlain, and on May 17 he was made receiver of the property preparatory, no doubt, to foreclosure and the acquisition of a clear title.—V. 68, p. 131; V. 68, p. 188.

**Sloss Iron & Steel Company.—Operations.**—In the editorial pages of last week's CHRONICLE was given an article showing the remarkable development of steel and iron companies within recent months. As bearing on the subject the following items are of interest:

A special dispatch to the "Evening Post" from Birmingham, Ala., May 17 said: "The Sloss Iron & Steel Company of Birmingham has let the contract for erecting one hundred bee-hive coke ovens at New Found Brookside, Ala. A coal mine is being opened, and an output of from 400 to 500 tons of coal will be mined each day. The Sloss Company fired its furnace No. 1 to-day in Birmingham. This is the first time in eight years that all four furnaces have been in blast. No more iron is being sold for export to Europe, as better prices can be had in the domestic market."

The "Iron Age" understands that the American Steel & Wire Co. will require this year 1,200,000 tons of steel billets, and estimates the company's total product at about 1,000,000 tons gross.

The "Chicago Times-Herald" is authority for the statement that within the next month a company with \$10,000,000 of capital stock will be organized to establish at Chicago a large plant for the construction of steel freight cars.

It is reported that the Wheeling Iron & Steel Co. of West Virginia is about to begin the construction of a tin-plate mill. As to the new Warwick Iron & Steel Co. see below.

**South Carolina & Georgia Extension RR.—New Mortgage.**—The company has recorded its new mortgage for \$1,800,000 made to the Continental Trust Co. of New York, as mortgage trustees. A release of the mortgage for \$1,800,000 on the old Ohio River & Charleston RR., held by the Boston Safe Deposit & Trust Co., was filed.—V. 68, p. 873.

**Southern Ry.—Atlantic Coast Line—Atlantic & Yadkin Ry.—Carolina Midland Ry.—Acquisitions—New Bonds—Atlantic & Yadkin.**—An arrangement has been entered into between the Southern Ry. Co. and the Atlantic Coast Line by which the Atlantic & Yadkin, formerly the Cape Fear & Yadkin, will be divided between the two companies. The road north of Sanford, N. C., to Mt. Airy, with its branches, 161 miles in all, goes to the Southern Ry. Co. through purchase of the entire \$1,000,000 stock of the Atlantic & Yadkin, and the line south of Sanford to Wilmington with the branch to Bennettsville goes to, and will be owned in fee, by the Wilmington & Weldon, which latter company is controlled by the Atlantic Coast Line. The Southern Ry. Co. will issue \$1,500,000 of 4 per cent 50 year bonds on its portion of the road and the Wilmington & Weldon will issue \$1,300,000 of 4 per cent 50 year bonds on its portion.

**Carolina Midland Ry.**—The Southern Railway Co. has purchased the Carolina Midland, which runs from Allendale, S. C., to Seivern, 55 miles, and also the Seivern & Knoxville, running from Seivern to Batesburg, 17 miles. The building of 28 miles of road between Columbia and Perry, a point on the Carolina Midland, will give the Southern Railway 80 miles out of the 140 miles of its proposed line between Columbia and Savannah.—V. 68, p. 381, 929, 370; V. 63, p. 357.

**Standard Metal Co.—Brass Specialty Consolidation.**—A New Jersey corporation bearing this title, it is proposed, shall consolidate the following concerns, making car journal bearings, bronze and brass specialties:

E. Blunt Manufacturing Co., of Newark, N. J.; Paul S. Reeves & Son, Philadelphia; the Damascus Bronze Co., Pittsburg; Fulton Iron & Engine Works, Detroit; United States Bronze Co., Chicago; Hewitt Manufacturing Co., Chicago; Buffalo Brass Co., Depew, N. Y.; Milwaukee Brass & Copper Co., Milwaukee, and Moore, Jones & Co., St. Louis; Brady Metal Co., of Jersey City.

The capital stock of the new company will be \$5,300,000, consisting of \$1,800,000 of 7 per cent cumulative preferred stock and \$4,000,000 common stock. The cash necessary to bring about the combination, it is said, has been underwritten. A portion of the preferred stock is being offered at par, with a bonus of 100 per cent in common stock, by a Pittsburg house. The several properties are to be acquired free of all encumbrances and indebtedness. The prospectus says in part:

The estimated value of the properties to be taken over, including their real estate, plants, patterns, equipments, patents, trade marks, merchandise, cash, accounts receivable, business, good will, etc., is upwards of \$5,200,000, of which the quick assets alone amount to about \$520,000. It is proposed that the new corporation shall have a capital stock of \$5,200,000, divided as above stated, and shall issue all of the same in lieu of the properties to be taken over; of the stock so issued \$30,000 of the preferred stock shall be returned to the treasury of the new company. The companies whose properties are to be taken over have been successfully engaged in business upwards of ten years or longer. Their aggregate annual sales and net profits, as shown by their balance sheets, are as follows: For the year 1896, sales, \$2,068,719, net profits, \$171,160; for 1897, sales, \$2,110,707, net profits, \$179,093; for 1898, \$2,950,971, net profits, \$218,529.

The net profits of 1898, \$218,529, are alone sufficient to pay dividends on the proposed issue of capital stock of the new company, as follows: 7 per cent on \$1,750,000 preferred stock, \$122,500, and 2-24 per cent on \$3,400,000 common stock, \$96,029. The savings and advantages from consolidation it is conservatively estimated will annually approximate \$300,000. The principal product is journal bearings for all classes of railway cars and locomotives. The business done by the companies named during the last year was about 90 per cent of the whole in this country. As a rule the customers are responsible, and the risk of loss from bad sales very slight. Gen. Charles Miller of Franklin, Pa., has consented to accept the Presidency of the new corporation.

The following named persons, most of whom have been actively engaged in and all of whom have been identified with the business of the constituent companies, have consented to act as directors: William J. Watson, Jules E. French, Millard T. Conklin, H. H. Hewitt, C. M. Hewitt, Gen. Charles Miller, Chas. N. Finch, Geo. N. Seecis, Paul B. Reeves, Edward A. More, Geo. A. McLean.

**Union Bag & Paper Co.—New Director and 2d Vice Pres.—Reserve Fund.**—At a recent meeting of the directors N. G. Pierce resigned as Second Vice-President and director and A. M. Perrin was elected to fill his place. The executive committee was authorized to invest \$1,000,000 of the cash reserve in the treasury in United States Government bonds. G. R. Sheldon & Co., No. 2 Wall Street, are interested in the enterprise.—V. 68, p. 675.

**United Fruit Co.—Consolidated Company.**—This company was recently organized under the laws of New Jersey with authorized capital stock of \$30,000,000. Of this amount, it is stated, \$12,000,000 has been issued, including \$1,650,000 issued at par for cash and \$10,350,000 for properties in the consolidation. Among the properties acquired are stated to be:

Boston Fruit Co. of Boston, with associated companies, including Buckman Fruit Co. of Baltimore, Domínguez Fruit Co. of Puerto Plata, San Domingo, Quaker City Fruit Co. of Philadelphia and Santa Martha, Co. of Sama, Cuba; Banes Fruit Co. of Banes, Cuba; American Fruit Co., New York City; Tropical Trading & Transport Co. of Central America; Columbian Fruit Co., Bocas del Toro, South America; Snyder Banana Co., New Orleans, La.; properties of M. C. Keith in Costa Rica, Domingo and Santa Martha, Colombia, New Orleans, Belize Royal Mail & Central America Steamship Co., Limited, known

as the Machecha Line of New Orleans, La. (six steamships), the Otor Pioneer Steamship Co. of New Orleans (four steamships) and properties in Honduras.

These companies, with others to be acquired, it is stated, will give the new concern practical control of the tropical fruit business of the United States. Minor C. Keith is quoted as saying:

The United Fruit Co. will do business not only as a shipper but as a producer, and to that end has recently acquired my personal plantation properties in San Domingo, Costa Rica and Santa Martha, Colombia. It also owns extensive plantations in British and Spanish Honduras, at Port Llimon, Bocas del Toro, Jamaica and Cuba. My own properties produced about two and a half million bunches of bananas annually, and altogether the company will possess growing interests to the extent of about six million bunches. We now have the fruit trade of the country substantially in our hands and will be able to direct it intelligently. During the last twenty five years not more than four or five banana companies have pulled through intact, and scores have gone to the wall. They operated blindly, and consequently overstocked some markets and left some bare. All that will now be changed and we confidently anticipate increasing the volume of business as much as 25 per cent. There will be no tendency toward an increase of price. At the same time, all parties concerned will make a fair living profit.

The directors include Andrew W. Preston, Vice-President and General Manager Boston Fruit Co.; Minor C. Keith, Costa Rica; Lamont G. Burnham, President Metropolitan Coal Co. of New York; T. Jefferson Coolidge, Jr., President Old Colony Trust Co. of Boston. Mr. Preston is President of the new company.—V. 68, p. 620.

**United States Glue Co.—Pending Consolidation.**—Preliminary plans for the organization of this New Jersey corporation were effected on May 13 by Guggenheimer, Untermyer & Marshall. The company, it is stated, will acquire the plants of the Armour Company in Chicago, the American Glue Co. of Boston, the Diamond Glue Co. and the United States Glue Co. of Milwaukee, the Delaney Co. of Philadelphia, the United Tanners' Glue Co., etc., and, it is claimed, will practically control the glue stock and raw material from which glue is manufactured. Of the capital stock of \$35,000,000, \$15,000,000 will be 7 per cent cumulative preferred. Only \$15,000,000 of common and \$10,000,000 of preferred will be issued at present. The par value of shares is \$100. Louis Steinfeld, who lives at St. Andrew's Hotel, Seventy-second Street and the Boulevard, is said to be promoting the enterprise.

**Warwick Iron & Steel Co.—Purchase.**—The Warwick Iron Co. of Pottstown has agreed to a sale of its pig iron plant to the Warwick Iron & Steel Co., with a capital stock of \$1,500,000, of which \$500,000 to remain in the treasury. The shares are \$10 each, and are being offered full paid for \$10.50 by H. Bachman & Co. of Philadelphia. Improvements, including a steel mill, may be undertaken.

**Williamsport & North Branch RR.—Purchased.**—A press dispatch from Williamsport says that a syndicate composed of S. D. Townsend, of Philadelphia, C. W. Woddrop and B. H. Welch, of Poughsville, Penn.; H. H. Farrier, of Jersey City, and Henry C. Adams, of New York, has purchased all the bonds and preferred and common stock of the Taylor and Satterfield estate of Buffalo, N. Y., amounting to over \$2,000,000 of the total issues of \$1,225,000 stock and \$1,125,000 bonds. B. H. Welch has chosen President, H. H. Farrier, Vice-President, H. C. Adams, Secretary and Treasurer, and S. D. Townsend, General Manager.—V. 66, p. 812.

**Winchester Avenue (New Haven) R. R.—Bonds Called.**—The directors have formally voted to call for redemption at 102 at the Merchants' Bank of New Haven on June 1 the entire issue of \$100,000 six per cent debentures due in 1909. The \$200,000 new stock, increasing the total issue to \$300,000, has all been sold.—V. 68, p. 774.

**Wisconsin Central Co.—First Instalment of Assessment payable by June 3.**—The reorganization managers have called for payment on or before June 3 the first instalments of 25 per cent each on income bonds, preferred and common stock, as provided in plan of reorganization.—V. 68, p. 873.

**Wisconsin Telephone Co.—Erie Telegraph & Telephone Co.—Control Acquired.**—A controlling interest in the \$1,200,000 capital stock of the Wisconsin Telephone Co., which operates under Bell patents in Wisconsin, has been acquired in the interest of the Erie Telephone & Telegraph Co. The price paid is said to have been about \$300,000. The stock has been paying dividends, it is stated, at the rate of 7 per cent. The "Evening Wisconsin" of Milwaukee says:

At the present time the Wisconsin Telephone Co. owns and operates 14,000 miles of lines and exchanges in Wisconsin, reaches seventy towns and cities, has 250 toll stations throughout the State, and in addition to the exchange lines of 14,000 miles it also owns and operates 6,000 miles of toll lines. The system was started in Milwaukee twenty years ago.

**Officers:**—Chas. J. Glidden of Lowell, Mass., has been elected President of the Wisconsin Telephone Co.; Jas. P. McKinstry of Cleveland, Ohio, Vice-President; Chas. A. Grant, Treas., and Geo. B. Perham, Sec.—V. 68, p. 869, 878.

—The list of investment bonds advertised on page x by Messrs. Redmond, Kerr & Co. is an unusually varied one, embracing not only issues of the large railroad corporations, but also an assortment of street railway and electric-light bonds. Descriptive circulars will be furnished on request.

—The firm of Benwell & Everitt, 6 Wall St., has been dissolved and is succeeded by a new firm under the name of John D. Everitt & Co. The house makes a specialty of municipal bonds and investment securities.

# The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, May 19, 1899.

The flurry in financial circles at the close of last week, owing to the sudden death of ex Gov. Flower, had no effect upon the commercial markets. Business in most lines of trade has been of a satisfactory character, there being a fairly free movement of merchandise both in the way of new purchases and deliveries on outstanding contracts. A further advance has been established in prices for Bessemer pig iron. Wheat values have advanced on a tendency to reduce crop estimates and numerous reports of damage to the crop by insects. There has been a renewal of the labor troubles at Buffalo, and the export business has continued to be held in check. Advices received from the Philippine Islands indicate that the insurrection is practically ended. A feature of the week has been the opening of the Peace Conference at The Hague.

Lard on the spot has been in only limited demand, as both refiners and exporters have continued light buyers. There has been, however, no pressure to sell and prices have advanced slightly, closing at 5.35c. for prime Western and 5c. for prime City. Refined lard has sold slowly, but prices have advanced to 5.55c. for refined for the Continent. Speculation in lard for future delivery has been moderately active, as packers have been buying, and this, together with smaller receipts of swine, has advanced prices. The close was steady.

### DAILY CLOSING PRICES OF LARD FUTURES.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
	5:32	5:37	5:35	5:27	5:35	5:40
May.....						

Pork has been quiet but prices have held to a fairly steady basis, closing at \$8 25 @ 9 00 for mess, \$10 50 @ 11 00 for family and \$10 50 @ 12 00 for short clear. Cut meats have been in moderate demand and steadier, closing at 4 3/4 @ 4 1/2 c. for pickled shoulders, 8 @ 8 1/4 c. for pickled hams and 5 @ 5 1/4 c. for pickled bellies, 14 @ 10 lbs. average. Beef has been quiet and unchanged at \$8 50 @ 9 00 for mess, \$9 00 @ 9 50 for packet, \$9 50 @ 10 50 for family and \$13 50 @ 14 00 for extra India mess in tcs. Tallow has been more active and higher, closing at 4 1/2 c. Oleo-stearine has been steady, closing at 5 5/8 c. Lard stearine has advanced to 6c. for prime City. Butter has been in fair demand and higher, closing at 15c. @ 19c. for creamery. Cheese has been quiet and rather easier, closing at 8c. @ 11 1/2 c. for State factory, full cream. Fresh eggs have been in fair demand and steady at 14c. @ 14 1/2 c. for choice Western.

Brazil grades of coffee have been steady and a large business has been transacted in Santos coffee on a cost and freight basis, including Nos. 5 to 9 at 6c. and Nos. 3 to 9 at 6 1/4 c. The spot market has been slightly more active and steady at 6 3/4 c. for No 7. Mild grades have had a fairly large sale at steady prices, closing at 8 1/4 c. for good Cuentra. Speculation in the market for contracts has been dull and prices have sagged slightly. The close was steady.

The following are final asking prices:

May.....	5:05c.	Aug.....	5:25c.	Nov.....	5:45c.
June.....	5:05c.	Sept.....	5:35c.	Dec.....	5:65c.
July.....	5:15c.	Oct.....	5:45c.	Mar.....	5:80c.

Raw engars have been sparingly offered and firm, closing at 4 5/8 c. for centrifugal, 96 deg. test, and 4 1/2 c. for muscovado, 89 deg. test. Refined has been fairly active and firm, closing at 5 1/2 c. for granulated. Syrups have been in fair demand for export and steady. Other groceries have been quiet.

Kentucky tobacco has been in only limited demand, but values have held steady. Seed leaf tobacco has had a fairly large sale at full prices. Sales for the week were 2,359 cases, as follows: 700 cases 1898 crop, New England Havana seed, fillers, &c., for export, 6 1/2 @ 7 1/4 c.; 100 cases 1898 crop, New England Havana seed, forced sweat, 25 @ 50 c.; 200 cases 1897 crop, Dutch, 13 1/2 @ 15 c.; 400 cases 1897 crop, Zimmers, 11 @ 16 1/2 c.; 150 cases 1896 crop, Pennsylvania seed leaf, 12 @ 12 1/2 c.; 200 cases 1895 crop, Pennsylvania seed leaf, 13 @ 13 1/2 c.; 100 cases 1897 crop, Pennsylvania Havana, 12 c.; 200 cases 1897 crop, Wisconsin Havana, 8 @ 9 c., and 300 cases 1898 crop, Wisconsin Havana, 10 @ 11 c.; also 1,050 bales Havana at 65 @ 85 c., in bond, and 225 bales Sumatra at 85 c. @ \$1 75, in bond.

Strait tin has had only a moderate sale, but as there has been no pronounced pressure to sell, values have held steady, closing at 25.66 @ 25.75. Ingot copper has been quiet but steady at 18 1/2 @ 19 c. for Lake. Lead has been quiet but values have held to a steady basis, closing at 4.45 @ 4.50 c. for domestic. Spelter has been quiet but steady at 6 3/4 @ 7 c. for domestic. Pig iron has been in fairly active demand and firm at \$14 50 @ 16 50 for domestic.

Refined petroleum has been unchanged, closing at 6 95 c. in bbls., 4.45 c. in bulk and 7.70 c. in cases. Naphtha steady at 10 c. Crude certificates have been neglected; credit balances have been unchanged at \$1 12. Spirits turpentine has weakened slightly, closing quiet at 41 1/2 @ 42 c. Rosins have been quiet and slightly easier for the low grades, closing at \$1 45 @ \$1 47 1/2 for common and good strained. Hops have been quiet but steady. Wool has been in fairly active demand and higher.

## COTTON.

FRIDAY NIGHT, May 19, 1899.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 59,949 bales, against 62,818 bales last week and 63,966 bales the previous week, making the total receipts since the 1st of Sept., 1898, 8,117,136 bales, against 8,401,011 bales for the same period of 1897-8, showing a decrease since Sept. 1, 1898, of 283,875 bales.

Speculation in cotton for future delivery has been quiet. Little if any new outside interest has been shown in the market, and regular operators have confined their ventures largely to scalping transactions. In fact the only feature of interest to the trading has been the transactions for Liverpool account; the disposition has been to buy the summer months, particularly August, and sell the new-crop deliveries. Early in the week prices sagged off a few points under the absence of speculative interest, slightly easier foreign advices and generally favorable crop accounts. Subsequently, however, there developed a steadier tone. Foreign advices were stronger and Liverpool reported a more active spot market, although the demand, it was stated, was stimulated by the fact that the Liverpool cotton market will be closed Saturday to Monday, inclusive, in observance of the Whitsuntide holidays. The weekly statement of the Government's Weather Bureau reported less favorable crop prospects in the Gulf States, owing to the lack of moisture, and subsequent private advices also stated that rain was needed in this section. To-day there was a dull, narrow and uninteresting market, prices barely changing throughout the session. The close was quiet but steady, with prices unchanged to 1 point lower for the day. Cotton on the spot declined 1-16c. on Monday and advanced 1-16c. on Wednesday. To-day the market was quiet and unchanged, closing at 6 1/4c. for middling uplands.

The rates on and off middling, as established Nov. 16, 1898, by the Revision Committee, at which grades other than middling may be delivered on contract, are as follows.

Fair.....	1 1/4 on	Good Ordinary.....	0.11 1/2 off
Middling Fair.....	1 1/4 on	Good Middling Tinged.....	Even
Strict Good Middling.....	1 1/4 on	Strict Middling Stained.....	7 1/2 off
Good Middling.....	1 1/4 on	Middling Stained.....	7 1/2 off
Strict Low Middling.....	1 1/4 on	Strict Low Mid. Stained.....	1 off
Low Middling.....	1 1/4 on	Low Middling Stained.....	1 1/4 off
Strict Good Ordinary.....	1 1/4 on		

On this basis the official prices for a few of the grades for the past week—May 13 to May 19—would be as follows.

UPLANDS.	Sat.	Mon	Tues	Wed	Th.	Fri.
Good Ordinary.....	53 1/4	5 1/4	5 1/4	53 1/4	53 1/4	53 1/4
Low Middling.....	51 1/4	5 1/4	5 1/4	51 1/4	51 1/4	51 1/4
Middling.....	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4
Good Middling.....	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4
Middling Fair.....	7 1/4	7 1/4	7 1/4	7 1/4	7 1/4	7 1/4

GULF.	Sat.	Mon	Tues	Wed	Th.	Fri.
Good Ordinary.....	57 1/4	5 1/4	5 1/4	57 1/4	57 1/4	57 1/4
Low Middling.....	55 1/4	5 1/4	5 1/4	55 1/4	55 1/4	55 1/4
Middling.....	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4
Good Middling.....	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4
Middling Fair.....	7 1/4	7 1/4	7 1/4	7 1/4	7 1/4	7 1/4

STAINED.	Sat.	Mon	Tues	Wed	Th.	Fri.
Low Middling.....	4 1/4	4 1/4	4 1/4	4 1/4	4 1/4	4 1/4
Middling.....	5 1/4	5 1/4	5 1/4	5 1/4	5 1/4	5 1/4
Strict Middling.....	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4
Good Middling Tinged.....	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4	6 1/4

The quotations for middling upland at New York on May 19 for each of the past 32 years has been as follows.

1899.....	6 1/4	1891.....	6 1/4	1883.....	6 1/4	1875.....	6 1/4
1898.....	6 1/4	1890.....	12 1/4	1882.....	12 1/4	1874.....	18 1/4
1897.....	7 1/4	1889.....	11 1/4	1881.....	10 1/4	1873.....	19 1/4
1896.....	8 1/4	1888.....	10	1880.....	11 1/4	1872.....	24 1/4
1895.....	7	1887.....	11	1879.....	13 1/4	1871.....	15 1/4
1894.....	7 1/4	1886.....	9 1/4	1878.....	11 1/4	1870.....	23 1/4
1893.....	7 1/4	1885.....	10 1/4	1877.....	10 1/4	1869.....	22 1/4
1892.....	7 1/4	1884.....	11 1/4	1876.....	12 1/4	1868.....	31 1/4

Note.—On Oct. 1, 1874, grades of cotton as quoted were changed. According to the new classification Middling was on that day quoted 1/4c. lower than Middling of the old classification.

#### MARKET AND SALES.

The total sales of cotton on the spot each day during the week are indicated in the following statement. For the convenience of the reader we also add columns which show at a glance how the market for spots and futures closed on same days.

	SPOT MARKET CLOSED.	FUTURES MARKET CLOSED.	SALES OF SPOT & CONTRACT			
			Ex. port.	Con. supp.	Con. tract.	Total
Saturday.....	Quiet	Steady	103	66		169
Monday.....	Q't & s't'y, 1 1/2 do	Quiet & s't'y	...	119	100	219
Tuesday.....	Steady	Steady	...	403	100	503
Wednesday.....	Firm at 1 1/2 adv.	Steady	910	130		950
Thursday.....	Steady	Quiet & s't'y	...	110		110
Friday.....	Quiet & s't'y	Quiet & s't'y	...	74		74
<b>Total.....</b>			<b>923</b>	<b>902</b>	<b>200</b>	<b>2,025</b>

FUTURES.—The highest, lowest and closing prices of Futures at New York are shown in the following table.

	May 13 to May 19.	Saturday.	Sunday.	Tuesday.	Wednesday.	Thursday.	Friday.	Week.

JULY.....	5.85							

**Memphis, Tennessee.**—The weather has been very favorable for growth. Considerable replanting of cotton has been necessary on account of defective seed and the ravages of cut worms. There has been rain on two days during the week, to the extent of one inch and forty hundredths. Average thermometer, 74.1, highest 90, lowest 59.

**Mobile, Alabama.**—Crop reports are unfavorable, rain being badly needed. Planting, germination and growth have been delayed. About 61 per cent of cotton is up with fair stand; about 20 to 30 per cent is not yet up, and 10 to 20 per cent remains to be planted. Considerable damage is reported in some localities by grasshoppers. The thermometer has averaged 78, ranging from 63 to 88.

**Montgomery, Alabama.**—Cotton up is doing well. The State Agricultural Bureau has made public to-day the comparative statement of sales of fertilizer tags. It shows that thus far in 1898-99 the sales have reached 993,490 tags, against 1,210,441 tags for the same period last year. There has been rain on one day during the week, to the extent of twenty-two hundredths of an inch. The thermometer has ranged from 65 to 94, averaging 80.

**Selma, Alabama.**—There are still complaints from farmers of poor stands due to the planting of rotten seed. We have had rain on one day of the week, the rainfall reaching one inch and thirty-five hundredths. Average thermometer 75, highest 95, lowest 63.

**Madison, Florida.**—We have had rain on one day during the week, to the extent of forty hundredths of an inch. The thermometer has averaged 80, the highest being 98 and the lowest 66.

**Savannah, Georgia.**—We have had rain on two days of the past week, to the extent of fifty hundredths of an inch. The thermometer has averaged 80, ranging from 63 to 97.

**Augusta, Georgia.**—There has been rain on one day during the week, to the extent of two hundredths of an inch. The thermometer has ranged from 65 to 96, averaging 80.

**Charleston, South Carolina.**—There has been rain on one day during the week, to the extent of nineteen hundredths of an inch. Average thermometer 80, highest 98, lowest 70.

**Stateburg, South Carolina.**—The weather has been dry and hot all the week, and crops are suffering from lack of moisture. This is especially true of oats and wheat. The thermometer has averaged 79.5, the highest being 95 and the lowest 63.

**Greenwood, South Carolina.**—We have had no rain during the week. Moisture is badly needed. The thermometer has averaged 79, ranging from 66 to 92.

**INDIA COTTON MOVEMENT FROM ALL PORTS.**—The receipts of cotton at Bombay and the shipments from all India ports for the week ending May 18, and for the season from Sept. 1 to May 18 for three years have been as follows:

Total Europe.....	4,000	604,000	13,000	698,000	4,000	645,000

\* A cantar is 95 pounds.  
Of which to America in 1898-99, 44,038 bales; in 1897-98, 47,702 bales; in 1896-97, 47,435 bales.

**NEW ENGLAND MILLS SITUATION.**—The Ponemah Cotton Mills, Taftville, Conn., are now running in full, the striking weavers having all returned at the former rate of wages. The strikes in the mills in Massachusetts and Rhode Island have also been settled; some by the unconditional surrender of the operators and others through concessions made by the management.

**MANCHESTER MARKET.**—Our report received by cable to-night from Manchester states that the market is firm for both yarns and shirtings. The demand for both India and China is good. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison.

**OUR COTTON ACREAGE REPORT.**—Our cotton acreage report will probably be ready about the 8th of June. Parties desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible, to ensure early delivery.

**EUROPEAN COTTON CONSUMPTION TO MAY 1.**—We have received to-day (Friday) by cable Mr. Ellison's figures brought down to May 1. We have also received the revised totals for last year and give them for comparison. The spinners' takings in actual bales and pounds have been as follows:

October 1 to May 1.	Great Britain.	Continent.	Total.
For 1898-99.			
Takings by spinners...bales	2,200,000	3,166,000	5,366,000
Average weight of bales lbs	514	489	499.2
Takings in pounds.....	1,130,800,000	1,548,174,000	2,678,974,000
For 1897-98.			
Takings by spinners...bales	2,223,000	3,119,000	5,342,000
Average weight of bales lbs	511	487	495.6
Takings in pounds.....	1,136,090,000	1,511,430,000	2,647,520,000

According to the above the average weight of the deliveries in Great Britain is 514 pounds per bale this season, against 511 pounds during the same time last season. The Continental deliveries average 489 pounds, against 487 pounds last year, and for the whole of Europe the deliveries average 499.2 pounds per bale against 495.6 pounds last season. Our dispatch also gives the full movement for this year and last year in bales of 500 pounds.

Oct. 1 to May 1.	1898-99.			1897-98.		
	Great Britain	Continent.	Total.	Great Britain	Continent.	Total.
Bales of 500 lbs. each, 000s omitted.						
Spinners' stock Oct. 1.	56	441	497	31	183	214

Supply.....	2,318	3,537	5,855	2,303	3,205	5,508
Consumption, 30 weeks	2,070	2,768	4,838	2,001	2,644	4,645
Spinners' stock May 1	245	769	1,017	392	561	953
Weekly Consumption, 00s omitted.						
In October.....	69.0	91.0	160.0	66.0	87.0	153.0
In November.....	69.0	91.0	160.0	66.0	87.0	153.0
In December.....	69.0	91.0	160.0	66.0	87.0	153.0
In January.....	69.0	93.0	162.0	67.0	89.0	156.0
In February.....	69.0	93.0	162.0	67.0	89.0	156.0
In March.....	69.0	93.0	162.0	67.0	89.0	156.0
In April.....	69.0	94.0	163.0	68.0	89.0	157.0

Our cable states that Mr. Ellison has revised consumption on the Continent for the whole of last season and for the elapsed portion of the current season by adding 1,000 bales per week to his previous estimates.

The foregoing shows that the weekly consumption is now 163,000 bales of 500 pounds each, against 157,000 bales of like weights at the corresponding time last year. The total spinners' stocks in Great Britain and on the Continent have decreased 80,000 bales during the month, and are now 154,000 bales more than at the same date last season.

**JUTE BUTTS, BAGGING, & CO.**—The demand for jute bagging has continued quiet during the week under review and prices are as last quoted, viz.: 55¢@53¢c. for 13½ lbs. and 61½¢@6½¢c. for 2 lbs., standard grades. Jute butts are dull at 1.05c. for paper quality and 1½¢c. for mixing to arrive.

**CLASSIFICATION OF COTTON.**—It is reported from Atlanta Georgia, that the Legislature of Georgia will in all probability at its next session in October give consideration to a plan for the uniform classification of cotton throughout the State. The plan is to have all cotton classified by sworn inspectors at the point from which it is shipped. At the present time the cotton is classed by the consumers and not by the producers, and the standard which is put on the material by the former has to be accepted by the latter. It is claimed that this state of affairs results in the reclamation of thousands of dollars annually by the consumers upon the intermediary brokers, and indirectly, therefore, upon the producers. The people who at present put the classification upon the staple

act independently and wherever the cotton falls off in quality, according to their standard, they hold the right to come back upon the Southern houses for the amount claimed to be short. It is stated by the Department of Agriculture of Georgia that during the past year one firm in the State lost as much as \$55,000 through reclamations. The proposal to establish a uniform classification, it is held, must not only be final in its nature, but it must be entered into by all or the majority of the cotton-producing States. By this means, it is the belief of Commissioner Stevens, the arbitrary methods employed abroad can be done away with.

**NEW YORK COTTON EXCHANGE.**—At a meeting of the New York Cotton Exchange Tuesday, May 16, the amendments relating to transactions and membership certificates, as published in last week's CHRONICLE, were adopted by a decisive vote.

**GOVERNMENT WEEKLY COTTON REPORT.**—Mr. James Berry, Chief of the Climate and Crop Bureau of the Agricultural Department, made public on Tuesday the following telegraphic reports on the crops in the Southern States for the week ending May 15:

**VIRGINIA.**—Week very favorable; fine rains and warm weather. **NORTH CAROLINA.**—Cloudy, rainy week, with many severe local storms; weather favorable for growth, but farm work was delayed and crops are becoming grassy; all crops doing well; chopping cotton under way.

**SOUTH CAROLINA.**—Weather favored cultivation, but rain is needed for late cotton; planting delayed by dryness, stands satisfactory, plant being healthy and strong, chopping general.

**GEORGIA.**—Characteristic features of week high temperature, plenty of sunshine and very little rain; favorable for general work; crops are well cleaned and will make rapid growth with good rains; high temperature at night especially favorable to growth of cotton.

**FLORIDA.**—Week fair, with temperature above the normal and deficient rainfall; bulk of cotton chopped; pressing need of copious rains over all sections.

**ALABAMA.**—Hot and dry; insufficient showers in north and middle portions and drought continuing in south portion; cotton healthy, but small and growing slowly, though chopping is progressing rapidly; worms and grasshoppers working in cotton.

**MISSISSIPPI.**—Copious rains Friday in northern and central districts; greatly improved crop outlook; rain needed over southern counties; crop conditions vary with location; cotton generally poor stand; much late cotton plowed up and replanted; some land being held.

**LOUISIANA.**—Good rains fell in north and northwest parishes, elsewhere weather continues dry and hot; stand of cotton not good and last planting, owing to lack of moisture, cannot germinate; all crops need rain, but are not yet suffering seriously.

**TEXAS.**—Dry weather continues in extreme southeast portion; general showers elsewhere first part of week, with excessive rains on 11th, hindering farm work and causing some damage; week closed clear and warm, just as needed for cleaning crops; cotton planting continues in northwest portion, where some replanting is necessitated by washing rains, but bulk of crop is up to good stands, growing rapidly, clean in south portion but badly in grass in central and north portions.

**ARKANSAS.**—General rains Thursday retarded farm work; out worms injuring cotton, considerable replanting necessary; cotton poor stand on account of defective seed.

**TENNESSEE.**—Except in southern portions excess of rain hindered plowing and planting, but warm, humid conditions induced rapid growth of vegetation; early cotton worked over; cotton only fairly.

**MISSOURI.**—Some cotton a poor stand. **OKLAHOMA.**—Weather favorable for all plant growth, but heavy rains have further delayed cotton planting.

These reports on cotton are summarized by the Department as follows:

"In the Carolinas and Georgia the week has been favorable for cotton, but in the central portion of the cotton belt the crop has suffered from insects, and in the southern portions of Mississippi and Louisiana from drought. Poor stands are reported from Missouri and Arkansas. Planting continues in Northwest Texas, where some replanting will be necessitated on account of heavy rains, which have also delayed planting in Oklahoma. The bulk of the crop in Texas, however, is up to good stands, is well cultivated, and is growing rapidly in the south portion, but is badly in grass in the central and north portions.

**SHIPPING NEWS.**—As shown on a previous page, the exports of cotton from the United States the past week have reached 63,920 bales. The shipments in detail, as made up from mail and telegraphic returns, are as follows:

		Total bales.
<b>NEW YORK—To Liverpool, per steamer Bovic, 1,744 upland and 60 Sea Island.</b>		
To Hull, per steamer Ohio, 1,682.		1,804
To London, per steamer Marquette, 1.		1,682
To Havre, per steamer La Champagne, 372 upland and 10 Sea Island.		1
To Bremen, per steamers H. H. Meier, 2,539. Lahn, 707.		3,246
To Hamburg, per steamers Israelia, 200. Pretoria, 100.		300
To Antwerp, per steamers British Empire, 100. South-west, 149.		249
To Rotterdam, per steamer Wineland, 200.		200

## BREADSTUFFS.

FRIDAY, May 19, 1899.

There has been more activity to the demand for wheat flour and there has been a slight hardening of values. The upward turn to values for the grain has had a favorable influence; this, together with the renewal of the labor troubles at Buffalo, which has delayed shipments of flour from that point as well as interfered with arrival of flour purchased for lake and rail shipment, have made buyers seek the local market to obtain supplies to meet their current wants. Rye flour has been quiet, but values have held to a steady basis. Corn meal has been in only limited demand, but prices have been unchanged and steady.

Speculation in wheat for future delivery has been only moderately active, but there has been a decidedly stronger tone to the market, and for the week prices show an advance of several cents. Bear operators have been less aggressive in their operations, they apparently showing more of a disposition to heed the smaller crop estimates. There also have been numerous reports of damage to the crop by insects and advices received from California stating that the yield of the crop in that State will be comparatively small have received considerable attention and stimulated a demand from shorts to cover contracts. Early in the week reports that the acreage will be smaller in the Northwest, particularly in North Dakota, also had a strengthening influence upon values. There has been, however, nothing of an encouraging nature in the advices from the European markets, as they have been dull and have failed to respond fully to the advance in our market, being held in check by the favorable crop prospects abroad. Business in the spot market has been less active, as exporters have been disposed to hold off, owing to the same advices from abroad, and a renewal of the labor troubles at Buffalo also has had a tendency to hold the export business in check. To-day there was a fairly active and firmer market. Early in the day prices advanced in response to stronger foreign advices and crop-damage reports, reacted under realizing sales, but closed steadier, with prices showing little change for the day. The spot market was steady. The sales for export were 96,000 bushels.

#### DAILY CLOSING PRICES OF NO. 2 RED WHEAT IN NEW YORK.

Sept. delivery in elev. ....	69½	70	70½	71½	73¼	73¼

Indian corn futures have been quiet but there has been a fractional improvement in values in sympathy with the advance in wheat. Crop accounts have been of a favorable character, and indications are that a large acreage will be planted; this, together with the fact that business in the spot market has been held in check to a considerable extent by the Buffalo strike, has prompted liquidation by longs; sympathy with the advance in wheat and covering by shorts, however, have held values to a steady basis. Business in the spot market has been comparatively quiet. To-day the market was easier under liquidation by longs. The spot market was more active at slightly easier prices. The sales for export here and at outports were 550,000 bushels.

#### DAILY CLOSING PRICES OF NO. 2 MIXED CORN IN NEW YORK.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.

July delivery in elev. ....	33¼	33¼	33¼	33¼	33¼	33¼
Sept. delivery in elev. ....	33¼	33¼	34¼	33¼	34¼	33¼

Oats for future delivery at the Western market have been quiet, but the tone has been steadier and prices have made a fractional advance. Elevator people have been large buyers, based largely on the belief that the supplies to come into sight between now and the new crop will be comparatively small. Sympathy with the advance in wheat also has had a strengthening influence. Business in the spot market has been moderately active, as there has been a demand from both the home trade and exporters. To-day the market was quiet and slightly easier. The spot market was steady. Sales for export were 15,000 bushels.

#### DAILY CLOSING PRICES OF OATS IN NEW YORK.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.

**GOVERNMENT WEEKLY GRAIN REPORT.—Mr. James Berry, Chief of the Climate and Crop Bureau of the Agricultural Department, made public on Tuesday the telegraphic reports on the grain crops in the various States for the week ending May 15 as follows:**

**WEATHER.**—The most unfavorable features of the week ending May 15, 1899, were the unseasonably low temperatures on the North Pacific coast, the continued absence of rain over the greater part of the Gulf States and excessive rains which retarded farming operations in the Ohio and Mississippi valleys. Except on the North Pacific coast, the temperature conditions of the week have been decidedly favorable, and crops generally have made good growth, except in portions of the Gulf States, where they are suffering from drought. Frosts were frequent in portions of the Lake Region, Upper Mississippi and Upper Missouri valleys, but on the whole no serious damage is reported.

**CORN.**—Excessive rains have delayed corn planting in Missouri, Illinois, Iowa and Indiana, but elsewhere over the northern portions of the country planting progressed favorably, about half of the proposed acreage having been planted in Illinois and Ohio. The early planted corn is receiving its first cultivation in the States of the Lower Missouri, Central Mississippi and Ohio valleys, the stands being generally reported good. In the Central Gulf States the crop is needing rain and is being injured to some extent by insects. In Oklahoma and Southern Missouri much corn has been washed up by heavy rains. In Texas a good yield from the early planted seems assured.

**WINTER WHEAT** has made rapid growth during the week in the States of the Central Valley, where it is now heading. Chin ch bugs and Hessian flies are causing injury in portions of Missouri and Illinois; the crop needs rain in Nebraska, and is suffering from drought in the East Gulf States. In Washington an improved condition is reported, but in California dry northerly winds have been injurious in some sections. The outlook in Oregon continues promising.

**SPRING WHEAT.**—Spring wheat seeding is not yet flushed in North Dakota, and a large acreage remains to be seeded in Minnesota. Over the southern portions of the spring-wheat region the crop is making good growth and is stealing well. South Dakota reports frost injury to spring wheat, generally considered only temporary and conducive to luxuriant stooling.

**OATS.**—Oats have been injured by frost in South Dakota, and are suffering for rain in the Central Gulf States, South Carolina and Nebraska, but generally the crop is in promising condition, and has made rapid growth during the week. Harvest is in progress in Florida.

**EXPORTS OF BREADSTUFFS, PROVISIONS, COTTON AND PETROLEUM.**—The exports of these articles during the month of April, and the ten months, for the past three years have been as follows:

Exports from U. S.	1895-96.		1897-98.		1898-97.

\*Including cattle and hog and all months and years.  
NOTE.—All the above figures are based on the monthly preliminary statements by the Bureau of Statistics, and cover about 98 per cent of the total exports.

The movement of breadstuffs to market as indicated in the statements below is prepared by us from the figures collected by the New York Produce Exchange. The receipts at Western lake and river ports for the week ending May 13, and since Aug. 1, for each of the last three years, have been:

Receipts at—	Flour.	Wheat.	Corn.	Oats.	Barley.	Rye.
	Bbls. 100 lbs.	Bush. 60 lbs.	Bush. 56 lbs.	Bush. 32 lbs.	Bush. 48 lbs.	Bush. 56 lbs.

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., May 19, 1899.

The strength of the cotton goods situation is still its most prominent feature. The demand for the general run of merchandise has been on a more liberal scale than last week on home trade account but expansion in the actual volume of business passing is retarded by the scarcity of ready supplies in a number of important lines. The market is practically bare of leading makes of brown sheetings and drills; both Eastern and Southern being scantily supplied with the best makes of bleached cottons and printed goods and quite clean in ginghams. This is a most unusual situation at this time of year, and as there are large oversales against forward production there is little prospect of near relief. It is natural that under such conditions the tendency of prices should be upwards and further advances are reported during the week, chiefly in bleached cottons. Mills are actively employed in all branches of the industry and as a rule their productions are returning them satisfactory profits. The tone of the woolen goods division is steady, but business is quiet in both men's-wear fabrics and dress goods. Reports from out-of-town distributing centres are encouraging, current business is good and the outlook is considered decidedly satisfactory. Collections good.

WOOLEN GOODS.—There has been a fair demand for staple and fine fancy worsteds in heavy weights for men's wear, but in other directions business has been disappointing. Clay worsteds and serges are well situated, some prominent makes are withdrawn from the market, sold up, and prices have a further hardening tendency. Wool piece-dyed goods in chevots, etc., and medium and low grade fancy woolens are in fair supply but not unduly pressed for sale. Sellers are expecting a considerable development of supplementary business shortly and the strength of the wool market is a further supporting influence. Business in satinet and doeskin jeans has been indifferent. In overcoatings the kersey fabric still holds first place, is well sold up and firm in price. Cloakings are inactive at unchanged prices. Dress goods have ruled quiet throughout, with a

firm market in all staple lines. Flannels and blankets quiet; prices maintained.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending May 15 were 4,379 packages, valued at \$173,603, their destination being to the points specified in the tables below:

NEW YORK TO MAY 15.	1899.		1898.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	4	891	55	1,487

Total.....	4,279	168,033	16,889	128,993

\* From New England mill points direct.

The value of the New York exports for the year to date has been \$5,663,650 in 1899, against \$4,450,146 in 1898.

There has been fully as much business turned down in heavy brown sheetings and drills on home account as actually put through. Buyers do not cavil over prices, but supplies are inadequate. Fair sales have been made to exporters for shipment during the closing months of the year. Prices very firm. Fine grey goods also well sold up and tending against buyers. Ducks quiet but firm. Brown osenaburgs unchanged. Bleached cottons strong and advances of 1/4c. reported in such leading lines as Lonsdale, Hope, Blackstone, Fitchville, Fearless, Rival and Hill 4-4 bleached. The demand is good and stocks well under control. There has been no change in wide sheetings, cotton flannels, blankets or quilts. All firm in price with quiet business. Denims, ticks, plaids and other coarse-colored cottons are firm with rather more business doing. Kid-finished cambrics are steady with moderate sales. Light fancy and staple calicoes firm with average demand. New dark fancies for fall are opening. Some lines quoted 1/4c. higher but business mostly "at value." Ginghams firm, with no stocks in leading makes. Print cloths firm at 23/4c. for regulars, but no demand. Odds in fair request with upward tendency.

FOREIGN DRY GOODS.—A fair demand for dress goods has come forward, buyers anticipating a higher market, owing to strong advices from abroad. Silks are firm but business quiet. Linens quiet throughout at previous prices. Ribbons firm. Burlaps quiet at previous prices.

## IMPORTATIONS AND WAREHOUSE WITHDRAWALS OF DRY GOODS

The importations and warehouse withdrawals of dry goods at this port for the week ending May 18, 1899, and since January 1, 1899, and for the corresponding periods of last year are as follows:

IMPORTS ENTERED FOR CONSUMPTION FOR THE WEEK AND SINCE JANUARY 1, 1899, AND 1898.	Week Ending May 18, 1899.		Since Jan. 1, 1899.		Week Ending May 18, 1898.		Since Jan. 1, 1898.

## STATE AND CITY DEPARTMENT.

## News Items.

**Alabama.—Legislature Adjourns.**—The extra session of the State Legislature adjourned on May 17, 1899.

**Connecticut.—Savings Bank Investment Law Passed.**—The House of the State Legislature on May 16, 1899, passed, in concurrence with the Senate, the Savings Bank Law, which greatly enlarges the field for savings bank investments. This law was published in the CHRONICLE April 29, 1899, p. 802, together with similar laws passed by the States of New York and Massachusetts.

**Louisiana.—Status of "Baby Bonds."**—Having received inquiries relative to the "baby bonds" of this State and as to the meaning of the statement in the STATE AND CITY SUPPLEMENT that provision had been made to pay the principal of the bonds at not more than 50¢, we have procured from the State Treasurer the following particulars setting out the present situation of affairs:

Replying to your letter of the 9th inst. relative to "baby bonds" of our State, I beg to state that only unpaid taxes, due the State prior to 1879 were pledged for their payment, but as a portion of this revenue was diverted, the State, in 1894, at the solicitation of a majority of the holders of these bonds, passed an Act providing that, in the discretion of the Board of Liquidation any surplus to the credit of the general fund might be used in retiring these bonds at not more than 50 cents on the dollar of their face value, including any and all over-due interest.

Owing to the demands made upon the general fund for the last two years on account of the Constitutional Convention, pensions, drought, war, etc., there has been no surplus to this fund, and hence no bonds could be retired. It is believed there will be a surplus in the near future that can be devoted to this purpose. The delinquent ex-Treasurer Burke some eleven years ago procured in some way the original plates from which these bonds were printed, and placed upon the market a fraudulent issue of something over \$25,000. I know of no way that a holder may be able to discriminate between the good and the bad, though the Auditor's Department has a system by which the bad can be detected when presented.

**Massachusetts.—C. B. & Q. Bonds Legal Investment for Saving Banks.**—Attorney-General Knowlton has given an opinion that the bonds of the Chicago Burlington & Quincy Railroad come within the requirements of the new law as investments for the savings banks. The company is specifically mentioned in the new law, but the question raised was whether the company had, as the law requires, paid and earned dividends of not less than 4 per cent per annum for the last ten years.

**Mobile, Ala.—Water Litigation.**—A decision was rendered in the Chancery Court at Mobile by Chancellor Thos. H. Smith, last Saturday, in the suit of the Bienville Water Supply Company (which at present supplies the city with water, and claims to have an exclusive contract for that purpose) to restrain the City of Mobile from issuing \$750,000 water bonds. These bonds were sold to Sperry, Jones & Co. in September, last year, on condition that legislative authority be given for the issue of the bonds. On November 30 the General Assembly gave the authority sought for. The bill of the Bienville Water Company was filed in September, 1898, before the Legislature had taken action on the city's request. In October, 1898, the Water Company sought to amend their bill, but the Court refused to grant the amendment, and from this the impression arose that a decision had been given in the suit itself. Such was not the case, and the matter came up for a hearing last week, and Chancellor Smith has now decided adversely to the plaintiff and in favor of the city. After disposing of a number of technical objections, the opinion says:

Whatever may have been the power of the municipal corporation to issue bonds in payment of a system of water works and sewers at the time the bill was filed, on the 15th day of September, 1898, under its charter has now become a useless inquiry.

The General Assembly of Alabama passed two Acts on the 5th day of November, 1898, entitled, respectively, "An Act to authorize the city of Mobile to provide, maintain and operate systems of water works and sewerage," and "An Act to authorize the city of Mobile to make and issue bonds for building, purchasing or otherwise acquiring systems of water works and sewerage for the said city, and to mortgage said works to secure said bonds."

By said Acts the Mayor and General Council of the city of Mobile were granted full power and authority to buy or to build, erect and maintain and to operate water works for the supply of its inhabitants with water for various uses, and also authorized to buy or to build, erect and maintain and operate a system of sewerage for the use of said city and its inhabitants, and to make all contracts necessary to do so.

They were also authorized and empowered to make and execute bonds of the city of Mobile in any amount not exceeding \$750,000, with interest, payable semi-annually, as evidenced by coupons attached to said bonds, and to sell and issue the same and apply the proceeds arising therefrom to the building, purchasing or otherwise acquiring a system of water works and a system of sewerage for said city.

There can be no doubt of the authority of the Legislature to grant the municipality the power to acquire works of public necessity, and to authorize them to issue bonds in payment thereof. A citation of authorities in support of so well settled a proposition is needless.

The General Assembly has already decided this cause against complainant, and has left no alternative to this Court but to declare that the municipality has been vested with full power and authority to do all the bill seeks to enjoin and no duty but to dismiss complainant's bill.

**New York City.—Long Island City Bonds Legal.**—On May 18, 1899, Corporation Counsel Whalen transmitted to the Comptroller his opinion declaring valid the \$1,254,500 improvement bonds issued by Long Island City prior to consolidation. One bond of \$500, numbered 38, issued May 13, 1895, and maturing Sept. 10, 1909, has not yet been passed upon. This bond is known as "Broadway grading" bond, and no authority for its issuance has yet been found. A list of the securities passed upon will be given in a later issue.

**New York State.—Extra Session of Legislature.**—The Governor has called an extra session of the State Legislature to meet May 23, 1899, for the purpose of revising the Ford Franchise Tax Bill, passed on the last day of the recent session and now in the hands of the Governor for approval.

**Philadelphia, Pa.—Loan Bill Valid.**—A decision of great interest to bond dealers was handed down in the State Supreme Court on May 15, 1899, declaring valid the proposed loan of this city for \$11,200,000 for various purposes. The

Court's decision was notably short, being practically confined to the following:

"The questions involved have been so ably and exhaustively considered and correctly decided by the learned Court below that nothing we can add would better indicate the correctness of its decree."

The history of these litigations have been given from time to time in the CHRONICLE and need not be repeated at this time. For reference we refer the reader to the numbers dated Jan. 7, 1899, and Dec. 17, Nov. 19, Sept. 24, July 30 and July 16, 1898.

## Bond Calls and Redemptions.

**Galveston, Texas.—Bond Call.**—City Treasurer Ed. McCarthy has called for payment June 1, 1899, the following "forty-year limited debt bonds" issued in 1881 and 1882: One thousand dollar bonds Nos. 797 to 802, dated Sept. 1, 1881; Nos. 806, 810 to 814, inclusive, dated Jan. 18, 1882; No. 831, dated March 15, 1882; No. 839, dated March 1, 1882, and No. 841, dated Sept. 1, 1882. Interest will cease on above date.

**Franklin County, Ky.—Bond Call.**—J. D. Moore, Judge of Franklin County Fiscal Court, calls for payment on July 1, 1899, at the Bank of America, New York City, the Kentucky Midland Railway bonds issued July 1, 1889.

The official notice of this bond call will be found among the advertisements elsewhere in this Department.

**Harris County, Texas.—Bond Redemption.**—On March 7, 1899, this county redeemed \$3,000 bridge bonds.

**Washington.—Warrant Call.**—State Treasurer Young has called for payment May 15, 1899, the following warrants: General fund warrants Nos. 32,811 to 33,615, inclusive, amounting to \$57,593.55; military fund warrants Nos. 2,541 to 2,645, inclusive, amounting to \$6,661.04.

## Bond Proposals and Negotiations this week have been as follows:

**Aberdeen, Chehalis County, Wash.—No Bonds to be Issued.**—The issuance of \$6,000 street-improvement bonds was recently considered by this city, but we are advised by the City Clerk that the "bond proposition is off."

**Alliance, Ohio.—Bond Offering.**—J. H. McConnell, City Clerk, will sell at public auction, commencing at 2 P. M. May 29, 1899, \$44,000 4½ improvement bonds as follows:

\$1,000 North Avenue, maturing \$5,000 on June 15, 1900, and \$4,000 yearly on June 15 from 1904 to 1904, inclusive.  
15,000 South Freedom Avenue, maturing \$5,000 yearly on June 15 from 1900 to 1904, inclusive.  
8,000 North Union Avenue, maturing \$2,000 on June 15, 1900, and \$1,000 yearly on June 15 from 1901 to 1906, inclusive.

Securities of all the above bonds will be in denomination of \$1,000, dated June 15, 1899; interest will be payable semi-annually at the office of the City Treasurer. Bonds are issued pursuant to sections 274 and 275, Revised Statutes of Ohio, and a city ordinance passed April 19, 1899, authorizing their issue. Each bidder will be required to deposit with the City Clerk a properly certified check in the sum of \$300.

**Alma (Gratiot County), Mich.—Bond Offering.**—Proposals will be received until July 10, 1899, by this village for the \$6,000 4½ street improvement bonds recently voted. Securities will bear date of August 1, 1899. Interest will be payable at the banking house of W. S. Turck & Co., Alma, in New York exchange, and the principal will mature \$2,000 on August 1 in the years 1904, 1905 and 1906.

**Angleton (Texas) School District.—Bonds Proposed.**—This district proposes to issue in the near future from \$6,000 to \$10,000 bonds.

**Ashkum (Ill.) School District No. 1.—Bond Offering.**—Proposals will be received until 2 P. M., June 1, 1899, by the School Directors, at the Ashkum Bank, Ashkum, for \$5,000 5½ bonds. Securities are in denomination of \$500, dated June 1, 1899. Interest will be payable annually at the Ashkum Bank and the principal will mature one bond yearly on April 1, from 1900 to 1900, inclusive. An unconditional certified check for \$100, payable to M. R. Meents, School Treasurer, must accompany proposals.

**Bad Axe, Mich.—Bonds Voted.**—At a special election held May 9, 1899, the issuance of \$3,500 electric-light plant bonds was authorized by a vote of 150 to 30.

**Baton Rouge, La.—Bonds Voted.**—At the election held May 16, 1899, the issuance of \$200,000 4½ general improvement bonds was authorized. In favor of the proposition 419 votes were cast, representing \$961,894 valuation of property, as against 49 votes and \$63,861 valuation represented.

**Bayonne, N. J.—Bond Offering.**—Proposals will be received until 8 P. M. May 23, 1899, by the City Council, for \$50,000 4½ 6-year gold improvement bonds and \$100,000 4½ 10-year gold tax bonds. Securities are dated June 1, 1899. Interest will be payable January 1 and July 1.

**Bellefontaine, Ohio.—Bonds Voted.**—At the election held May 4, 1899, the issuance of \$5,000 bonds for a new fire department house was authorized by a vote of 521 to 171.

**Bement School District No. 2, Platt County, Ill.—Bond Offering.**—Proposals will be received until 4 P. M., June 1, 1899, by William J. Day, President Board of Education, for \$11,700 4½ 7-15-year (optional) bonds. Securities will all be in denomination of \$1,000 except one of \$700. They will be dated May 1, 1899. Interest will be payable annually at the First National Bank of Chicago.

**Big Stone Gap, Wise County, Va.—Bond Offering.**—H. J. Ayers, Attorney of Big Stone Gap, writes us that the city proposes to issue \$25,000 5% 30 year water-works bonds. We are advised that "the form of the bonds has not been agreed upon and orders will be taken to suit the purchaser." Mr. Ayres may be addressed on the subject.

**Blackwell, Okla.—Bond Sale.**—This city has sold \$24,000 6% 10-30 year (optional) water bonds to F. L. Patrick, Contractor for the work.

**Blair (Neb.) School District.—Bonds Voted.**—At a special election held May 9, 1899, the district was authorized to issue \$32,000 school-house bonds by a vote of 223 to 135.

**Bloomfield (Township), N. J.—Bond Sale.**—On May 15, 1899, the \$75,000 4% street-improvement bonds were awarded to Dick Bros. & Co., Philadelphia, at 111-58. Following are the bids:

Dick Bros. & Co., Philadelphia. 111-58	N. W. Harris & Co., N. Y. .... 107-59
Walter Stanton & Co., N. Y. .... 107-50	Howard Sav. Bank, Newark. .... 106-77
Franklin Sav. Bank, N. Y. .... 108-40	Montclair Savings Bank. .... 107-75
Bloomfield Savings Inst. .... 107-63	R. D. Shepard & Co., New York. 103-90
Edw. C. Jones & Co., New York. 107-75	Estate of Warren Ackerman. .... 103-75

W. J. Hayes & Sons, Philadelphia, bid "par and 77" for the bonds. Bonds mature \$5,000 June 1, 1919, and \$7,000 yearly on June 1 from 1920 to 1929, inclusive. For further description of bonds see CHRONICLE April 29, 1899, p. 837.

**Bottineau County, N. Dak.—Bond Sale.**—On May 10, 1899, the \$2,000 jail bonds were awarded to the Minnesota Loan & Trust Co., Minneapolis, as 103 for 5% bonds. Principal will mature in 1914. For further description of bonds see CHRONICLE, April 29, 1899, p. 837.

**Brazoria County, Texas.—Bond Sale.**—H. A. Perry, County Treasurer, advises us that the county has disposed of the \$32,000 refunding court house bonds and \$23,000 refunding bridge bonds recently approved by the Attorney General.

**Brockton, Mass.—Bond Offering.**—Proposals will be received until 7 p. m. May 25, 1899, by W. H. Emerson, City Treasurer, for the following loans:

\$30,000 3 1/4% street-improvement loan. Bonds are issued under authority of Chapter 224, Acts of 1898, and by order of the City Council passed April 15, 1899. Principal will mature \$2,500 yearly on May 1 from 1900 to 1919, inclusive.

\$33,000 3 1/4% school-house loan. Bonds are issued under authority of the Public Statutes of Massachusetts, and by order of the City Council passed April 27, 1899. Principal will mature \$1,650 yearly on May 1 from 1900 to 1919, inclusive.

\$10,000 3 1/4% sewerage loan. Bonds are issued under authority of Chapter 36, Acts of 1895, and by order of the City Council passed April 27, 1899. Principal will mature \$500 yearly on May 1 from 1900 to 1919, inclusive.

\$5,000 3 1/4% surface drainage loan. Bonds are issued under Chapter 207, Acts of 1890, and by order of the City Council passed April 27, 1899. Principal will mature \$1,000 yearly on May 1 from 1900 to 1904, inclusive.

All the above bonds are registered and bear date May 1, 1899. Interest will be payable May 1 and November 1.

**Brownsville, Tenn.—Bonds Voted and Defeated.**—An election was held in this place on May 9, 1899, to vote on the question of issuing \$27,500 water-works and \$12,000 school bonds. The former proposition carried, while the latter was defeated.

**Calhoun County, Texas.—Bond Bill Passed.**—The House of the State Legislature has passed a bill authorizing this county to issue bonds for the construction of public roads and highways.

**Camden, N. J.—No Bonds to Be Issued.**—It has been reported that the Mayor had approved an ordinance authorizing an issue of \$15,000 water bonds. We are advised by R. R. Miller, City Treasurer, that there is no such issue in contemplation.

**Chaffee County (P. O. Buena Vista), Col.—Bonds Proposed.**—This county has under consideration the issuance of about \$40,000 or \$45,000 5% judgment funding bonds as authorized by the last Legislature. If bonds are issued they will be in denominations of \$1,000, \$500 and \$100; interest will be payable semi-annually at the office of the County Treasurer, or at some bank in New York or Boston. Principal will mature 20 years from date of issue, subject to call after 10 years. The question of issuing these bonds will probably be submitted to the people at the general election to be held in November, 1899. C. W. Erdlen is the County Treasurer.

**Charles Town, W. Va.—Bond Sale.**—On May 15, 1899, the \$10,000 4% refunding bonds were awarded to the Bank of Charles Town, W. Va., at 104-125. Principal will mature June 1, 1929. For further description of bonds see CHRONICLE, April 29, 1899, p. 835.

**Chester, Pa.—Bond Offering.**—Proposals will be received until 12 m. May 25, 1899, by Frank W. Harrison, City Clerk, for \$180,000 3 1/4% 30-year coupon bonds. Securities are in denomination of \$1,000; interest will be payable semi-annually at the office of the City Treasurer. Bonds are clear of State taxes. A certified check on a national bank for 3% of the amount bid for must accompany proposals.

**Chicago, Ill.—Certificate Sale.**—On May 15, 1899, the Comptroller sold to various local institutions \$500,000 3 1/4% 3-year water certificates.

**Chicopee, Mass.—Bond Offering.**—Proposals will be received until 2 p. m. May 25, 1899, by John D. White, City Treasurer, for \$23,000 3 1/4% gold school bonds. Securities are in denomination of \$1,000, dated June 1, 1899. Interest will be payable June 1 and December 1 at the Third National Bank, Boston. Principal will mature June 1, 1909.

**Cohoes, N. Y.—Bond Offering.**—At 12 m. May 24, 1899, Miller Hay, City Chamberlain, will sell at public auction \$6,000 4% bonds. Securities are issued under authority of Chapter 263, Laws of 1899. They are in denomination of \$500, dated May 15, 1899. Interest will be payable semi-annually at the office of the Central Trust Co., New York City. Principal will mature \$2,000 yearly on July 1 from 1902 to 1904, inclusive.

**Collierville, Tenn.—Bond Sale.**—On May 2, 1899, the \$1,400 6% water-works bonds, recently authorized by the State Legislature, were sold to the Bank of Collierville at par. Securities are in denomination of \$100, dated May 2, 1899; interest will be payable at Collierville. Principal will mature May 2, 1909, subject to call after May 2, 1900.

**Columbus, Ohio.—Bonds Authorized.**—The City Council has authorized the issuance of \$7,000 street-improvement bonds.

**Crawford County, Ohio.—Bonds Proposed.**—The issuance of bonds for the building of pikes in the townships of Bucyrus, Whetstone and Holmes is under consideration.

**Danbury, Woodbury County, Iowa.—No Bonds to be Issued.**—We are advised by Louis Lasson, Town Recorder, that the election held on May 3, 1899, authorized the Council to erect and maintain a system of water works but not to issue bonds. The Council will try to sell warrants to the amount of \$3,000 at about 5% interest and \$500 payable annually.

**Dixon County School District No. 60, Wakefield, Neb.—Bond Sale.**—On May 10, 1899, the \$11,000 5% bonds were awarded to the Third National Bank of Rockford, Ill., at 106-145. Following are the bids:

Third Nat. Bank, Rockford. \$11,674 00	W. J. Hayes & Sons, Cleve. .... \$11,323 00
Chas. S. Kidder, Chicago. .... 11,578 69	Trowbridge, Ma Donald & Niver Co., Chicago. .... 11,311 00
First Nat. Bank, Barnesville. .... 11,460 00	Western Masons' Mut. Life Assoc., Yankton, S. Dak. .... 11,275 00
First Nat. Bank, Chicago. .... 11,375 00	I. M. Imhoff, Lincoln. .... 11,230 00
S. A. Kean, Chicago. .... 11,330 00	
Chas. S. Coffin, Chicago. .... 11,333 00	
Denison, Prior & Co., Cleve. .... 11,320 00	

Bonds mature \$1,000 yearly on November 1 from 1904 to 1914, inclusive. For further description of bonds see CHRONICLE April 29, 1899, p. 838.

**Dodge County, Neb.—Bond Sale.**—On May 9, 1899, the \$50,000 4% 10-20 year (optional) Fremont precinct refunding bonds were awarded at 101-142.

**Dover, N. H.—Temporary Loan.**—This city has negotiated with a Boston broker a six months' loan of \$13,000, dated May 16, 1899.

**East Grand Forks, Minn.—Bond Offering.**—Proposals will be received until 8 p. m. June 6, 1899, by Henry Harm, City Recorder, for \$25,000 5% funding bonds. Securities are in denomination of \$500, dated June 1, 1899. Interest will be payable annually on June 1 at the Chase National Bank, New York City, and the principal will mature June 1, 1929. A certified check on a national bank for 10% of the face value of bonds must accompany proposals.

**East Jordan, Mich.—Bond Offering.**—At the election held May 1, 1899, it was voted to issue \$7,000 water-works and \$3,000 public-improvement bonds. Proposals for these bonds will be received until June 15, 1899. They will bear 4% interest.

**East Rutherford (Borough) N. J.—Bonds Proposed.**—The Borough Council has passed a resolution favoring the issuance of \$17,000 town hall and fire department bonds. It is stated that the consent of the owners of one quarter of the borough property will have to be obtained, after which a special election will take place about July 15.

**Eddy County (P. O. New Rockford), N. Dak.—Date of Election.**—The election, to which we referred last week, called for the purpose of submitting to the people the question of issuing \$15,000 court-house and jail bonds, will be held on May 23, 1899.

**Elmwood Place, Ohio.—Bonds Authorized.**—On May 10, 1899, the Council passed an ordinance authorizing the issuance of \$3,000 delinquency bonds.

**Essex Junction, Vt.—Bond News.**—At the regular meeting of the Village Council held April 29, 1899, the committee on water supply made its report, which was accepted, and the committee continued with instructions and power to further investigate the question of water supply for the village, and to make a final report at a meeting to be held in the near future. If it is decided to do anything in the matter, bonds will be issued.

**Franklin Township, N. J.—Bond Sale.**—The highest bid received for the \$75,000 4% coupon bonds, proposals for which were asked for on May 15, 1899, was that of R. B. Smith & Co., New York City, at 102-27. Bonds mature part yearly on June 1 as follows: \$1,000 from 1900 to 1909, \$2,000 from 1910 to 1928 and \$27,000 in 1929. For further description of bonds see CHRONICLE May 13, 1899, p. 939.

**Gallipolis, Ohio.—Bond Offering.**—Proposals will be received until 1 p. m. August 10, 1899, by T. E. Bradbury, City Clerk, for \$13,000 5% bonds. Securities are issued in accordance with Section 2701 Revised Statutes of Ohio. They are in denomination of \$1,000. Interest will be payable February 25 and August 25 at the City Treasurer's office. Principal will mature 20 years from date of issue. Bids must be made on blanks furnished by the City Clerk. A certified check for 3% of the bonds bid for must accompany proposals.

**Geary County, Kan.—Bond Sale.**—On May 15, 1899, the \$35,000 4% 20-year court-house and jail bonds were awarded to J. C. Horton, Kansas City, Mo., Agent for Thomas Kerley, Cashier Ballston Spa (N. Y.) National Bank, at 105-02. Following are the bids:

J. C. Horton, Kansas City. .... \$36,760 00	Mason, Lewis & Co., Chicago. \$35,567 13
G. W. McKnight. .... 35,918 75	S. D. Carr. .... 35,350 00
L. L. Dondelay. .... 35,762 50	M. T. Herrick. .... 35,913 13

**Glenwood (Minn.) Independent School District.—Bond Sale.**—On May 15, 1899, the \$15,000 4% 10-year bonds were awarded to F. H. Wellcome, Minneapolis, at 100-37 and all expenses. Following are the bids:

F. H. Wellcome, Minneapolis...\$15,055 Minn. L'n. & Tr. Winn..... Par  
Winona Deposit Bank..... 15,103 W. J. Hayes & Sons, Cleve..... \$14,850  
Chas. H. Combs, Chicago..... 15,031 Chas. H. Kidder & Co., Chic..... 14,900

J. D. Cleghorn & Co., Minneapolis, offered \$15,326 for bonds bearing 4½% interest, and Denison, Prior & Co., Cleveland, offered par for a 4½% bond. For description of securities see CHRONICLE last week, p. 939.

**Gloucester, Mass.—Bond Sale.**—On May 18, 1899, the \$30,000 3½% school bonds were awarded to Jose, Parker & Co., Boston, at 102-9125. Bonds mature \$1,500 yearly on June 1 from 1900 to 1919, inclusive.

**Halifax County (P. O. Enfield), N. C.—Bond Offering.**—This county will sell at 12 M. June 6, 1899, 15,000 6½ bonds. Securities will be dated July 1, 1899. Interest will be payable January 1 and July 1, and the principal will mature \$1,500 yearly on January 1 from 1901 to 1910 inclusive. W. F. Parker is the Chairman of the Board of Commissioners.

**Hallock (Minn.) School District.—Bonds Issue.**—This district is seeking a loan of \$5,500 from the State for school purposes.

**Hamilton (Ohio) School District.—Bonds Authorized.**—The Board of Education on May 10, 1899, authorized the issuance of \$9,783-85 bonds for school house purposes.

**Hardwick, Vt.—Bonds Voted.**—On May 2, 1899, this village voted to issue \$6,000 4½ additional electric-light and \$11,600 4½ water coupon bonds. The issues will be 5-20 year coupon bonds, and the interest will be payable semi-annually. Denomination of the securities and place of payment to be determined by the Board of Trustees. Bonds will be placed on the market at once. W. H. Taylor is Chairman of the Board of Water and Light Commissioners.

**Hartford (Conn.) Southwest School District.—Bonds Authorized by Senate.**—The State Senate has passed a resolution authorizing this district to issue \$10,000 4½ 25-year bonds.

**Hartford (Conn.) Washington School District.—Bonds Authorized.**—At a meeting of this district held May 16, 1899, the issuance of \$25,000 25-year school bonds was authorized. Interest is not to exceed 4½.

**Haverhill, Mass.—Description of Bonds.**—The \$50,000 street improvement bonds recently authorized by the Common Council will bear 4½ interest payable April 1 and October 1 at the National Bank of Redemption, Boston. They are in denomination of \$1,000 and will mature April 1, 1909. Date of sale has not yet been determined but will probably be the last of May or the first of June.

**Herkimer, N. Y.—Bond Offering.**—The Board of Trustees of this village will sell at public auction at 2 P. M. May 29, 1899, \$13,000 incandescent electric-light plant bonds. Securities will be sold to the bidder who will take them at the lowest rate of interest.

**Hillsboro, Ore.—Warrant Sale.**—The City Council has sold \$5,100 8½ refunding warrants to the Shute & Foote Bank of Hillsboro. Warrants are payable on demand.

**Hood County (P. O. Granbury), Texas.—Bonds Proposed.**—The Commissioners' Court is considering the question of refunding \$30,000 6½ court-house and bridge bonds. Offers have been received to take the new bonds at 4½.

**Itasca County (P. O. Grand Rapids), Minn.—Bond Offering.**—Proposals will be received until 11 A. M., June 14, 1899, by E. J. Farrell, County Auditor, for \$5,000 5½ gold funding bonds. Securities are issued pursuant with Chapter 259, Laws of 1899. They are in denomination of \$1,000, dated June 1, 1899. Interest will be payable annually, and the principal will mature June 1, 1919. A certified check payable to C. C. Miller, County Treasurer, for \$3,000, must accompany proposals.

**Jackson, Madison County, Tenn.—Bond Offering.**—Proposals will be received until 12 M. June 1, 1899, by Thos. Tate, Chairman Finance Committee, at the First National Bank, Jackson, for \$25,000 4½ refunding water-works bonds. Securities are in denomination of \$500, dated July 1, 1899. Interest will be payable January 1 and July 1, at the First National Bank of Jackson. Principal will mature July 1, 1929, subject to call after July 1, 1914. Bonds are exempt from city and county taxes. The official circular states that no bonds have ever been contested and that no default has ever occurred.

**Jackson, Minn.—Bonds Voted.**—At the election held May 16, 1899, the issuance of \$10,000 electric-light plant bonds was authorized by a vote of 194 to 33.

**Jellico, Tenn.—Bond Election.**—An election will be held in this place to vote on the question of issuing \$8,000 street-improvement bonds.

**Joplin (Mo.) School District.—Bond Offering.**—Proposals will be received until 1:30 P. M. May 22, 1899, by the Board of Education, J. C. Faulkender, Secretary, for \$20,000 4½ school bonds. Interest will be payable June 1 and December 1 and the principal will mature twenty years from date of issue, subject to call after five years. Each bidder will be required to deposit a forfeit of \$500 for the faithful performance of his agreement. Proposals were originally asked for these bonds, bearing 5½ interest, on May 11, 1899, but all bids received at that time were rejected.

**Kanabec County, Minn.—Bonds Authorized.**—The Board of County Commissioners has authorized the issuance of \$12,500 bonds to take up the county's floating indebtedness.

**Kansas.—School District Bonds Purchased.**—The State School Fund Commissioners have purchased the following bonds:

Lynn Co. School Dist. No. 98.....\$500 Stafford Co. School Dist. No. 47.....\$400  
Rawlins Co. School Dist. No. 16..... 300 Thomas Co. School Dist. No. 10..... 50  
Rawlins Co. School Dist. No. 109..... 460 Thomas Co. School Dist. No. 79..... 500

**La Plata County (P. O. Durango, Col.) School District No. 9.—Bond Sale.**—On May 10, 1899, the \$26,000 5½ 10-20-year and \$12,000 5½ 5-15-year bonds were awarded to Rudolph Kleybolte & Co., Cincinnati, at 103-289.

**Lawrence, Mass.—Bond Sale.**—Proposals were asked for until 12 M. yesterday (May 19, 1899,) by Arthur A. Bailey, City Treasurer, for \$56,000 4½ school bonds. Securities are in denomination of \$1,000, dated August 1, 1898. Interest will be payable February 1 and August 1 at the "Tremont National Bank" (now Eliot) of Boston. Principal will mature \$5,000 yearly on August 1, from 1904 to 1910, inclusive. Bonds were awarded to Towle & Fitzgerald, Boston, at 107-20.

**Libertyville (Iowa) School District No. 3.—Bonds Voted.**—This district has voted to issue \$2,000 bonds for a new school house.

**Logan County, Okla.—Bond Sale.**—This county has sold \$126,000 refunding bonds at par. Of this amount \$20,000 bearing 4½ interest and maturing in from 21 to 30 years was purchased by the Western National Bank of Oklahoma City. The remaining \$106,000 was purchased by the Oklahoma Bond & Trust Co. of Guthrie at 5 per cents. These latter bonds are dated July 1, 1899, and mature July 1, 1919, subject to call after July 1, 1909.

**Lynn, Mass.—Bond Sale.**—Blodget, Merritt & Co., Boston, have been awarded \$61,000 4½ 10-year municipal bonds at 107-08. Following are the bids:

Bonds mature \$3,000 yearly on July 1 from 1900 to 1924, inclusive. For full description of bonds see CHRONICLE May 13, 1899, p. 940.

**Napoleon, Ohio.—Bonds Voted.**—On May 17, 1899, by a vote of 314 to 59, this place authorized the issuance of \$15,000 water-works and electric-light plant bonds.

**Nevada City, Nevada County, Cal.—Bond Offering.**—Proposals will be received until 8 P. M. June 15, 1899, by the Board of City Trustees, T. H. Carr, Clerk, for \$28,000 6% gold sewerage bonds. Securities will be in denomination of \$350; interest will be payable annually at office of the City Treasurer. Principal will mature \$700 yearly, beginning first Monday in August, 1900. Proposals must be accompanied by a certified check for 5% of the amount bid for.

**New York City.—Bonds Authorized.**—On May 16, 1899, the Mayor signed a resolution of the Municipal Assembly authorizing the issuance of \$500,000 bonds to defray the expenses of removing the old reservoir from Bryant Park and the building of the foundations for the new library.

**New York State.—Bond Offering.**—Proposals will be received until 12 M. May 25, 1899, by Wm. J. Morgan, State Comptroller, Albany, N. Y., for \$500,000 3½% registered bonds. Securities are issued under the provisions of Chapter 672, Laws of 1898, and Chapter 493, Laws of 1899, for the payment of expenses of the National Guard and Naval Militia in the public defence. They will be in denomination

of \$5,000, dated May 1, 1899. Interest will be payable semi-annually at the Bank of the Manhattan Co., New York City. Principal will mature \$100,000 yearly on May 1 from 1902 to 1906 inclusive. A certified check for 1% of the amount of bonds bid for, payable to the State Comptroller, must accompany proposals.

*The official notice of this bond offering will be found among the advertisements elsewhere in this Department.*

**Norfolk (Conn.) Sewer District.—Bond Offering.**—Proposals will be received until 7:30 P. M. May 29, 1899, by E. P. Darrow, Clerk, for \$18,000 4% gold sewer bonds. Securities are in denomination of \$1,000, dated June 1, 1899. Interest will be payable semi-annually. Principal will mature \$6,000 June 1, 1903, and \$12,000 June 1, 1919. Bonds are certified to as to genuineness by the United States Mortgage & Trust Co., New York City. A certified check on a national bank for \$250, payable to H. E. Stevens, District Treasurer, must accompany proposals. The above issue represents the total debt of the district. The assessed valuation is \$652,000, about 65% of actual value.

**Norwalk, Ohio.—Bonds Authorized.**—On April 18, 1899, an ordinance has been passed providing for the issuance of \$11,000 5% bridge bonds. Securities are in denomination of \$500, dated May 1, 1899. Principal will mature one bond each March 1 and September 1, beginning March 1, 1904. The ordinance provides that they be sold "within 50 days from passage."

**Oconomowoc, Wis.—Bonds Voted.**—At the election held May 15, 1899, the proposition to issue \$42,000 water-works bonds carried by a vote of 430 to 131.

**Oneonta, N. Y.—Bond Sale.**—The First National Bank of Oneonta has been awarded \$5,000 4% 9½-year (average) bonds at 102.50. A bid of 102.29 was received from W. J. Hayes & Sons, Cleveland, and one of 101.50 from R. B. Smith & Co., New York City.

**Ontonagon (Village), Ontonagon County, Mich.—Bond Offering.**—Proposals will be received until 2 P. M. June 5, 1899, by Jas. J. Vincent, Village Clerk, for \$40,000 5% refunding bonds. Securities are in denomination of \$500, dated June 15, 1899. Interest will be payable May 1 and

## NEW LOANS.

\$77,000

### BOROUGH of GLEN RIDGE, ESSEX COUNTY, N. J., SEWER BONDS

Proposals will be received until 8 P. M. of May 22nd, 1899, at the Council Rooms of the Borough of Glen Ridge, N. J., for the purchase of Sewer Bonds as hereinafter described:

Said bonds are to be issued by said Borough of Glen Ridge, Essex County, N. J., to provide funds to pay the Township of Bloomfield for sewers or systems of sewerage and drainage owned and controlled by it within the limits of the Borough of Glen Ridge, N. J., and for rights, interest or property in outlet systems of sewerage and drainage or trunk sewers to tide-water outside of the Borough of Glen Ridge, N. J., in accordance with the terms of the contract between said Township of Bloomfield and said Borough of Glen Ridge and other parties, dated on the 31st day of March, 1899, and under the authority of an Act of the Legislature of the State of New Jersey, entitled "An Act respecting boroughs and providing for the purchase of sewers and systems of sewerage and drainage therein, with outlets therefor and providing for the extension of the same." Approved April 8, 1898.

Said Bonds will be divided into two classes as follows:

One class of said Bonds will be Coupon Bonds, and will be thirty-seven in number and of the denomination of \$1,000 each; they will be dated on the 1st day of June, 1899, and will bear interest at the rate of 4 per cent per annum, payable semi-annually at the Bank of Montclair, in the town of Montclair, N. J., on the 1st days of June and December of each year. Both principal and interest will be payable in the lawful money of the United States.

No. 1 and 2 of said Bonds will fall due on the first day of June, 1900, and the consecutive numbers will fall due two on the 1st day of June in each year thereafter until June 1, 1927, when the last one will fall due.

The other class of said Bonds will be forty in number; they will be of the same denomination and date as those above mentioned, but will be Registered Bonds and will bear interest at the rate of 5 per cent per annum, payable as above, and will all fall due on the first day of June, 1914, but with the right, at the time the Bonds will bear upon their face a reservation to that effect, to said Borough to pay off the principal of any of said Bonds at par on any date when the interest shall become due thereon, beginning with the first day of June, 1900, from the proceeds derived from the assessments for lateral sewers upon the property benefited.

The Bonds so to be paid to be drawn by lot. The assessed valuation of Real Estate in said Borough in 1898 was \$1,375,000.

The present Bonded debt of said Borough is \$60,000, incurred for Road Improvement Bonds issued in 1897, and maturing \$2,000 on February 1st, 1902, and afterwards \$2,000 or \$3,000 each year until all are paid.

Each proposal must be accompanied by a certified check to the order of the Clerk of the Borough of Glen Ridge, N. J., to the amount of 5 per cent of the par value of the Bonds bid for, as a guaranty of the good faith of the bidder, and must be presented in a sealed envelope endorsed, "Bid for Glen Ridge, N. J. Sewer Bonds."

The Borough Council reserves the right to reject any or all bids.

Inquiries and proposals may be directed to the undersigned.

NATHAN RUSSELL, Borough Clerk,  
Glen Ridge, N. J., May 15, 1899.

## NEW LOANS.

\$250,000

### CITY of NORWALK 3½% GOLD BONDS.

Sealed proposals for the purchase of the whole or part of an issue of Two Hundred and Fifty \$1,000 Bonds to be issued by the City of Norwalk, to be paid in Gold Coin of the United States of the present weight and fineness; to bear 3½ per cent interest, payable in equal semi-annual payments, payable July 1st, A. D. 1929, and at the option of the City on any January 1st or July 1st after January 1st, 1919, upon giving three months' notice of intention to pay will be received by Mayor Charles L. Glover of the City of Norwalk until the 29th day of May, A. D. 1899, at 12 o'clock noon.

Said bonds are to pay a like amount of bonds now outstanding and payable July 1st, 1899. Two hundred thousand of which were for water-works construction and fifty thousand municipal expenses. The bonds will be dated July 1st, 1899, have interest coupons attached or be registered as purchasers shall elect, and are to be payable, both principal and interest, at the Fairfield County National Bank, in said city.

Proposals should state the number of bonds bid for, and must be accompanied by a certified check for one per cent of the amount par value of the bonds bid for. All bids will be opened by the City Council on June 1st, 1899, at 8 P. M. The right is reserved to reject any and all bids.

The City's Grand List is over \$5,000,000. Population is over 7,000. The income from water-works is several thousand in excess of all expenses and interest and is required by the charter to be applied to expense of construction, etc., of water-works.

OLIVER E. WILSON,  
GOOLD HOYT,  
A. H. HOYT,  
Finance Committee.

City of Norwalk, Conn., May 11th, 1899.

\$500,000

### STATE of NEW YORK Registered Bonds.

ALBANY, May 15, 1899.

Notice is hereby given that sealed proposals will be received at this office until the 25th day of May, inst., at noon, for the purchase of \$500,000 registered bonds of this State to be issued pursuant to the provisions of Chapter 672 of the Laws of 1898, and Chapter 493, Laws of 1899, for the payment of expenses of the National Guard and Naval Militia in the public defense.

The bonds will be dated May 1st, 1899, and will be of the denomination of \$5,000 00 each; will draw interest at the rate of 3½ per cent per annum, payable semi-annually, and will mature \$100,000 on May 1st in each of the years 1902, 1903, 1904, 1905 and 1906.

Principal and interest will be payable at the Bank of the Manhattan Company in the City of New York.

The Comptroller reserves the right to reject all bids which are not in his opinion advantageous to the interests of the State.

All proposals must be accompanied by a certified check, payable to the Comptroller, for one per cent of the amount of bonds bid for; and must be sealed and endorsed "Loan for the Public Defence," and directed to the Comptroller of the State of New York, Albany, N. Y.

WM. J. MORGAN,  
Comptroller.

## CALL FOR REDEMPTION.

### Franklin County, Ky., Bonds.

FRANKFORT, Ky., April 26, 1899.

Notice is hereby given to all concerned that Franklin County will avail herself of the option in the bonds to pay off the Kentucky Midland Railway bonds issued to the Kentucky Midland Railway Company as of date of July 1, 1889, ten years expiring July 1, 1899. On said date all outstanding bonds of said issue are called for redemption and they will be paid in full, both principal and interest, by presentation at Bank of America, New York City, New York. The County will not pay interest on said bonds after July 1, 1899.

This call is made by order of the Fiscal Court of Franklin County, State of Kentucky, this April 26, 1899.

J. D. MOORE, Judge,  
Franklin County Fiscal Court.

November 1. Principal will mature \$1,000 yearly on November 1 from 1899 to 1938, inclusive. A certified check for \$500 will be required with bids.

**Osage, Iowa.—Bond Sale.**—The Osage National Bank has been awarded \$10,000 4% water-works bonds and \$15,400 4% refunding bonds at 102. Bonds run on an average 10½ years.

**Ottawa County (P. O. Port Clinton), Ohio.—Bond Offering.**—Proposals will be received until 1 P. M. May 29, 1899, by E. A. Powers, County Auditor, for \$12,000 5% bonds. Securities are issued under authority of Section 871, Revised Statutes of Ohio. They are in denomination of \$500, dated June 2, 1899. Interest will be payable June 8 and December 8 at the County Treasurer's office. Principal will mature \$1,000 yearly on June 8 from 1907 to 1918, inclusive. An unconditional certified check or certificate of deposit on any banking company of Fremont, Sandusky, Oak Harbor, Elmore or Port Clinton, payable to E. A. Powers, County Auditor, in the sum of \$500, must accompany proposals.

**Owosso, Mich.—Bonds Awarded.**—In the CHRONICLE May 6, 1899, we stated that the highest bid received on April 25, 1899, for the \$15,000 4% paying bond was that of the Merchants' Loan & Trust Co., Chicago, at 101½. We are now advised that the bonds have since been awarded to the Citizens' Savings Bank of Owosso at par.

**Perth Amboy, N. J.—Bond Sale.**—This city has sold at private sale to the Middlesex County Bank, Perth Amboy, \$10,000 4% 20-year additional school bonds at 105 and accrued interest.

**Philadelphia, Pa.—Loan Authorized.**—The Common Council has authorized a temporary loan of \$759,200 for various purposes.

**Portsmouth, Va.—Bond Sale.**—On May 16, 1899, the \$25,000 5% coupon paying redemption bonds were awarded to the Merchants' & Mechanics' Savings Bank of Norfolk at 113½. Following are the bids:

Merch. & M. Sav. Bk., Norfolk.....113½	New Ist. Nat. Bk., Columbus.....107½

Penison, Prior & Co., Cleve.....9,468 00	John Davis (for \$5,100).....5,100 00
	J. R. Worth, Punxsutawney.....9,945 00

\* Bid withdrawn.  
**Put-in-Bay, Ohio.—Bond Offering.**—Proposals will be received until 7 P. M. June 3, 1899, by Geo. F. Miller, Corporation Clerk, for \$3,000 4% refunding bonds. Securities are issued pursuant to Section 2701, Revised Statutes of Ohio, and were authorized by the Village Council April 27, 1899. They are in denomination of \$1,000, dated June 3, 1899. Interest will be payable semi-annually and the principal will mature one bond on June 3 of the years 1920, 1922 and 1924. All bids must be unconditional. A deposit in cash or a certified check on some bank in Sandusky equal to the amount bid for the bonds must accompany proposals. The only other village debt is \$9,000 park bonds maturing from 1902 to 1918.

**Putnam County (Ind.), Warren and Jefferson Townships.—Bond Sale.**—Gravel road bonds to the amount of \$30,500, bearing 4% interest, have been sold to Zeller & Bidle, Brazil, at 101¼.

**Reno County (P. O. Hutchinson, Kan.) School District.—Bond Sale.**—This district has sold at par to the State School Fund Commissioners \$9,500 5% bonds. Securities mature July 1, 1903, but are subject to call at any interest-paying date.

**Renville County (P. O. Franklin), Minn., School District No. 96.—Bond Sale.**—On May 15, 1899, \$8,000 school bonds were awarded to the Trowbridge, MacDonald & Niver Co., Chicago, who took 4½% bonds.

**Rocky Mount, N. C.—Bond Offering.**—Proposals are asked by this town for the \$40,000 water-works bonds which were voted on May 1, 1899. Interest will be payable annually and the principal will mature 20 years from date of issue. Bonds

will be awarded to the person offering the lowest rate of interest at or above par value. No bid will be entertained at higher rate than  $4\frac{1}{2}\%$ .

**Seranton, Pa.—Bond Election Proposed.**—A resolution providing for an election to vote on the question of issuing about \$100,000 sewer bonds is being considered in the Select Council.

**Scottdale, Pa.—Bonds Voted.**—At a special election held May 6, 1899, it was voted to issue \$25,000 bonds for the paving of streets and the erection of a public building.

**Sharon Township, Richland county, Ohio.—Bond Offering.**—Proposals will be received until 3 p. m. June 3, 1899, by W. F. Sonnanstine, Township Clerk, for \$20,000 5% road-improvement bonds. Securities are in denomination of \$500, dated June 1, 1899. Interest will be payable June 1 and December 1. Principal will mature \$5,000 on June 1 of the years 1909, 1912, 1916 and 1920. All bids must be unconditional. A deposit in money or a certified check on some local bank of Shelby, payable to the Township Clerk, for \$200, must accompany proposals. Successful bidder will be required to furnish blank bonds.

**Shelby, Ohio.—Bond Offering.**—Proposals will be received until 12 m. June 3, 1899, by W. F. Sonnanstine, Village Clerk, for \$70,000 5% street improvement bonds as follows:

\$53,000 Main Street improvement bonds, maturing \$3,500 yearly on June 1 from 1900 to 1913, inclusive, and \$4,000 June 1, 1914.  
9,000 No. Gamble Street improvement bonds, maturing yearly on June 1 as follows: \$500 from 1900 to 1903, \$1,000 in 1904, \$500 from 1905 to 1908, \$1,000 in 1909, \$500 from 1910 to 1913, inclusive, and \$1,000 in 1914.  
8,000 Marion Avenue improvement bonds, maturing \$500 yearly on June 1 from 1900 to 1913, inclusive, and \$1,000 in 1914.

The above securities are in denomination of \$500, dated June 1, 1899. Interest will be payable semi-annually. A deposit of \$500 or a certified check for that amount on some local bank of Shelby, payable to the Village Clerk, will be required with bids. Successful bidder will be required to furnish blank bonds.

**Siskiyou County, Cal.—Bonds Authorized.**—The Board of Supervisors has ordered the issuance of \$7,500 8% school district bonds. Securities are in denomination of \$500 and \$1,000, and will mature one bond yearly on December 27.

**Snowden School District, Siskiyou County, Cal.—Bond Offering.**—Proposals will be received until 12 m. May 29, 1899, by R. H. Dewitt, County Treasurer, at Yreka, for \$500 7%

bonds. Securities are in denomination of \$100, and mature one bond yearly on July 1, from 1899 to 1903, inclusive.

**South Washington, Pa.—Bond Election.**—An election will be held in this borough on June 20, 1899, to vote on the question of issuing \$30,000 street-improvement bonds.

**Springfield, Ohio.—Bond Sale.**—On May 16, 1899, the \$3,000 5% bridge bonds were awarded to the Springfield Savings Bank at 107-538. Following are the bids:

Springfield Savings Bank.....	\$3,226 00	Dentson, Prior & Co., Cleve....	\$3,190 00
Feder, Helzman & Co., Cin.....	3,199 00	N. W. Harris & Co., Chicago....	3,120 00
R. Kleybolte & Co., Cincinnati....	3,165 00	S. A. Kean, Chicago.....	3,101 60

Bonds mature March 1, 1904.

**Starbuck, Minn.—Bonds Voted.**—On May 8, 1899, the issuance of \$4,500 water-works and electric-light plant bonds was authorized by a majority of about 2 to 1.

**Stewartville, (Minn.) School District.—Details of Bonds Voted.**—The \$15,000 school building bonds voted on May 2 will bear 4% interest, payable at place to suit purchaser. Principal will mature \$1,000 yearly from 1904 to 1908, inclusive, and \$2,000 yearly from 1909 to 1913, inclusive. Date of sale has not been determined upon, but we are advised that it will be prior to July 15, 1899. Ralph Whiting is clerk of the Board of Education.

**Syracuse, N. Y.—Loans Negotiated.**—On May 10, 1899, this city negotiated a loan of \$85,000 through Dunscomb & Jenkinson, New York, at 3-62%. Loan will mature October 6, 1899. A loan of \$91,000 has also been negotiated through Blake Bros. & Co., New York, at 3-20%, payable November 3, 1899. Both of these loans were made in anticipation of taxes.

**Toledo, Ohio.—Bond Sale.**—The Trustees of the Sinking Fund have taken \$36,800 street improvement bonds, according to local papers.

**Turner's Falls (Mass.) Fire District.—Loans Authorized.**—At the annual meeting of the fire district held May 15, 1899, the Treasurer was authorized to borrow \$6,000 in anticipation of the collection of taxes and \$7,500 for a new pump and engine. The latter loan will mature \$2,500 yearly on November 1 from 1900 to 1902, inclusive.

**Tusculum, Ala.—Bonds Authorized.**—The City Council has authorized the issuance of \$26,000 5% 20-year bonds for the purpose of refunding outstanding indebtedness and for the repair of streets.

Jose, Parker & Co., Boston.....103-517	Blake Bros. & Co., Boston.....103-59
Estabrook & Co., Boston.....103-41	

Securities are in denomination of \$1,000, dated June 1, 1899. Interest will be payable semi-annually in Boston and the principal will mature \$4,000 yearly on June 1 from 1900 to 1929, inclusive.

**Waverly School District, San Joaquin County, Cal.—Bond Election.**—An election will be held May 27, 1899, to vote on the question of issuing \$2,500 6% gold school bonds. Securities, if authorized, will be in denomination of \$250, and will mature one bond yearly.

**Wharton County, Texas.—Bond Sale.**—On May 10, 1899, the \$23,000 4½% funding bridge bonds were awarded to the Lamprecht Bros. Co., Cleveland, at 102-573. Principal matures May 30, 1939, subject to call after May 30, 1909. For further description of bonds see CHRONICLE, May 6, 1899, p. 593.

**White Plains, N. Y.—Bond Offering.**—Proposals will be received until 8 P. M. May 31, 1899, by the Board of Trustees for \$25,000 4% water bonds. Securities are in denomination of \$1,000. Interest will be payable semi-annually. Principal will mature \$4,000 June 1, 1926 and \$7,000 on June 1 from 1927 to 1929, inclusive. Bonds are issued under Chapter 769, Laws of 1896. A certified check for 10% of the face value of the bonds must accompany proposals. As stated last week these bonds were refused by E. H. Gay & Co., New York City, to whom they were awarded on April 17, on account of a technical error, and they are now re-advertised as above.

**Williamsport, Md.—Bonds Authorized.**—This place has authorized the issuance of \$6,500 electric-light plant bonds. Securities will be sold some time in June.

**Wilmington, N. C.—Bond Sale.**—On May 15, 1899, the \$150,000 4% 30-year coupon bonds were awarded to E. H. Rollins & Sons, Boston, at 101-466.

**Winthrop, Sibley County, Minn.—Bond Sale.**—On May 15, 1899, the \$1,400 5% refunding water-works and electric-light bonds were awarded to the Minnesota Scandia Relief Association of Redwing at 105-12. Following are the bids:

Minn. Scandia Relief Asso.....14,625 87	Trowbridge, MacDonald & Niver Co., Chicago.....4,481 00
Mason, Lewis & Co., Chicago.....4,625 60	First Nat. Bank, Barnesville.....4,455 00
Chas. H. Kidder & Co., Chlc.....4,510 44	F. H. Welcome, Minn.....4,450 00
Minn. Loan & Trust Co.....4,510 00	Chas. H. Coffin, Chicago.....4,411 00
C. F. Kiebal & Co., Chicago.....4,502 50	N. W. Harris & Co., Chicago.....4,400 00
J. D. Cleghorn & Co., Minn.....4,473 00	W. J. Hayes & Sons, Cleve.....4,400 00
Kane & Co., Minneapolis.....4,467 60	State Bank of Winthrop.....4,400 00
J. C. Norton, St. Paul.....4,450 00	
Denison, Prior & Co., Cleve.....4,454 60	

Bonds mature May 15, 1909, subject to call after May 15, 1904. For further description of bonds see CHRONICLE April 29, 1899.

Street Railway Supplement (Semi Annually)  
State and City Supplement (Semi Annually)

NO. 1770

POST OFFICE BOX 958. NEW YORK.

\* Not included in totals. † Publication discontinued. ‡ Cl. House discontinued.

*STREET RAILWAY SUPPLEMENT.*

A new number of our STREET RAILWAY SUPPLEMENT, revised to date, is sent to our subscribers to-day. The editorial discussions in the SUPPLEMENT embrace the following topics—

LOSS OF POWER IN OPERATING CARS.  
COMPRESSED-AIR STREET CARS  
STORAGE BATTERIES.  
TRACK CONSTRUCTION IN CITY STREETS.  
STREET RAILWAY LEGISLATION.  
FREIGHT SERVICE ON ELECTRIC ROADS.  
CAR-PLATFORM VESTIBULES.  
COPPER AND ALUMINUM AS CONDUCTORS.  
CAR-WHEEL MILEAGE.

*THE FINANCIAL SITUATION.*

The week opened with no important change in matters affecting Wall Street affairs, and yet the stock market was depressed and declining. This may have been due in some measure to the continued unfavorable reports respecting the winter-wheat crop. Aside, though, from those reports, an incident which had a tendency to produce the condition referred to was the extra session of the Legislature at Albany and the proclaimed object for which it met. No doubt the Ford bill has been a formidable obstacle to progress and enterprise, and to amend the bill so that it might be less obstructive was extremely desirable. Consequently the varying rumors afloat early in the week as to the probable course of the legislation, whether the action promised to be favorable or unfavorable, would be likely to exert a capricious influence on dealings and to keep the market unsettled. But later, although it looked as if any doubt as to the passage of the amendments had been removed, still the trend of prices, except for railroad investment stocks and bonds, continued downward. No one, of course, anticipated that the changes contemplated in the character of the Ford law would bring back Stock Exchange business to its former state of buoyancy. Even the repeal of the measure could not have caused such a complete restoration; for before its passage the public idea of values had already begun to contract and grow less sanguine, while since its passage the semi-panic of Saturday two weeks ago put it beyond the power of a large class of the more venturesome "to whoop it up" again. As soon, however, as the amended measure passed the Senate Thursday the market improved; later the bill passed the House and the Legislature adjourned. In its new form the franchise tax bill is very much less objectionable than the original proposal. What its effect will be when put in operation on the companies it reaches must depend largely upon how it is administered and upon the construction the courts may give its provisions. It is a fortunate escape that enterprise has not the original bill to contend with.

It is reported that the committee appointed at a caucus of the Republican members of the House of Representatives, held near the close of the last session, has agreed upon a currency measure, and that Senator Aldrich has called together the Finance Committee of the Senate to meet in this city June 9 for an informal conference with the House Committee and for the purpose of framing a general measure

of currency reform. As we look at the matter this opportunity for successfully pushing real currency reform is, for obvious reasons, more auspicious than any the country has ever experienced; that fact, too, serves to make the present effort to formulate a bill to be submitted by the party in power at the coming session the most important and critical work a Congressional committee ever undertook. We do not consider that our words exaggerate the situation in the least. For the power appears to rest with these two committees which are to meet on the 9th of June to secure a currency arrangement for the United States which will answer the needs of our people in every section, and be at all points thoroughly sound in principle. If that is done the currency can no longer disturb our industries, and an export of gold from New York will have no more effect on business interests than an export of gold from London would have on its affairs.

It is hardly fair to criticize the work of these committees until it is completed and known. And yet the occasion is so big with promise we cannot help urging those who have the matter in hand not to come short of the public's expectation and the country's needs. Statements have been published of what it is claimed the House Committee has agreed upon, and if they correctly represent the action taken, they certainly will fail to provide a cure for our currency weaknesses. We have no fear to-day because our gold reserve is safe-guarded by a large trade balance, because the country's currency needs are not taxed, and because confidence and not distrust is the prevailing sentiment. But there is no guaranty for the perpetuity of these conditions. They have existed before, and changed in a marvelously short time. What is required now is not a currency system to meet the surroundings of to-day; almost any patched-up affair would carry us through the remaining months of 1899. The demand is for a system which will successfully act when conditions the opposite of those ruling to-day shall prevail. It is against a coming loss of confidence, loss of gold and a possible panic we are to make provision.

The State of North Carolina has this week disposed of an issue of bonds on a very low interest basis. It has sold \$110,000 of 4 per cents at a premium of 9.275 per cent. At this figure the yield to maturity is only 2.924 per cent per annum. In the case of a Northern State or municipality such a small return to the investor would be by no means unusual. As a matter of fact, this very week the State of New York has placed a \$500,000 issue of bonds on a basis of only 2.826 per cent. But for a Southern State such a rate as that mentioned naturally attracts attention. The bonds went to a local institution, the Wachovia Loan & Trust Company of Winston, but there were no less than fifty-one bids from thirty-six bidders, including a number of leading dealers in municipal bonds in the North. There were some distinctive features about these bonds which may possibly have tended to enhance the price. Like the other North Carolina bonds outstanding, the new issue is exempt from all taxation, "State, county and municipal, general and special," and as in those cases, too, the coupons are to be receivable "in payment of all taxes, debts, dues, licenses, fines and demands due the State of North Carolina." But North Carolina's credit has

been good for some time, and except for that fact the issue could not have been disposed of on such favorable terms. Every one who has the interests of the South at heart will rejoice that one of her commonwealths should find it possible to borrow money so advantageously.

A very noteworthy feature in the existing situation is the uninterrupted way in which the earnings of our railroads are being enlarged. We are now comparing with heavy totals, and the grain movement is not anywhere near the proportions of that of last year, and yet further gains are being recorded in 1899 on top of the gains for 1898. For the second week of the month our compilation on another page shows 3.53 per cent improvement over the corresponding week in 1898; this follows no less than 16.64 per cent gain over the same week in 1897. For the third week of May a preliminary statement which we have prepared indicates 6.95 per cent increase. In 1898 our complete exhibit for that week recorded 14.99 per cent increase. The further additions the present year of course reflect the activity of trade, which operates to swell the general and miscellaneous freight of the roads, on which rates as a rule are good. In the case of some of the smaller roads the ratios of gain are exceptionally heavy. Thus, the New York Ontario & Western earned in the third week this year \$86,171, against only \$62,906 in the same week last year, an expansion of over one-third. Of course the Ontario & Western is now getting an increased tonnage in anthracite as a result of the additional coal lands recently purchased in its interest. But take a road in a totally different part of the country: the St. Louis Southwestern reports for the third week gross of \$89,000, against \$68,600, the latter being slightly below the figure for 1897. Here, too, therefore, the increase is not far from one-third. Some very good returns of net earnings for the month of April have also come to hand this week. Taking several of the roads at random, the Central of New Jersey for that month reports net of \$111,946, against \$298,035; the Southern Railway, \$528,505, against \$472,159; the Pittsburg Cincinnati Chicago & St. Louis, \$284,811, against \$215,835; the Chicago & Eastern Illinois, \$142,651, against \$100,712; the Hocking Valley Railway Company, \$69,139, against \$46,453; the Erie, \$612,035, against \$553,614; the Atchafalaya \$1,145,582, against \$798,434, and the Buffalo Rochester & Pittsburg, \$142,111, against \$109,441.

Last week's bank returns showed a reduction of \$7,243,900 in loans, while the specie was increased by \$6,539,300 and the gain in legal tenders was \$1,145,500. The specie at \$203,183,600 and the total reserve at \$260,213,000 were the highest on record. The deposits gained only \$763,609, standing at \$902,325,900, but this total is within \$12,484,400 of the largest ever reported. The surplus reserve increased \$7,493,900, to \$34,631,525, which is within \$4,600,500 of the maximum of the year, and there has been a gain in this item of \$15,279,575 since May 6. One notable feature of the detailed statement was the gain by the National City Bank of \$3,547,800 in loans, of \$8,900,500 in deposits and of \$4,751,100 in specie. This makes a gain by this bank, compared with the statement of April 29, of \$16,010,200 in loans, of \$34,484,300 in deposits and of \$17,153,400 in specie, reflecting in part the operations of the institu-

tion in connection with the payment of the Philippine indemnity of \$20,000,000. The deposits of the bank are \$145,478,200, the loans are \$97,562,300 and the specie holdings are \$48,573,100.

This plethoric condition of the associated banks as a whole has been reflected in the easier tone for money on call and on time this week. Not only has the City Bank loaned liberally, but all the banks in the association, as well as the trust companies, have been free lenders of money, resulting in low rates on call; and at the same time offerings of money for fixed periods, even for long dates, have been abundant. The tendency is not only downward, but there is a feeling in banking circles that low rates will continue for the remainder of the season. Among stock houses this feeling also prevails, and this is reflected in the comparatively light inquiry for short-time loans on Stock Exchange collateral, indicating that borrowers are content to supply their wants from day to day rather than to make engagements for fixed periods.

Money on call, representing bankers' balances, has loaned at 4 per cent and at 2 per cent during the week, averaging 3 per cent. On Monday loans were at 4 per cent and at 2½ per cent, with the bulk of the business at 3 per cent. On Tuesday and on Wednesday the transactions were at 3½ per cent and at 2½ per cent, with the majority at 3 per cent. On Thursday and on Friday loans were at 3 per cent and at 2 per cent, with the bulk of the business at 2½ per cent. The Stock Exchange will be closed on Monday and on Tuesday of next week, the last named being the Decoration Day holiday, and therefore the borrowing on Friday was until Wednesday of next week. Banks and trust companies quote 2½ per cent as the minimum, though the majority loan at 3 per cent. Time contracts on good mixed Stock Exchange collateral are quoted at 3 per cent for sixty days to four months and 3½ @ 4 per cent for longer periods. Loans have been made this week at 3½ per cent for six months on dividend-paying railroad stocks; at 3½ per cent for the same time on good mixed collateral, and at 3 per cent for four months on railroad bonds. A trust company is reported to have made a loan at 3½ per cent for seven months on dividend-paying railroad stocks. These rates would seem to indicate that 3½ per cent is really the maximum rate for time loans running to the end of the year, provided the collateral consists of an assortment of good railroad properties. Where the security embraces an admixture of good industrial stocks, loans can be made at 4 per cent for from three to six months. Collateral of a lower grade will naturally command a higher rate. The commercial paper market is insufficiently supplied and the offerings of dry goods paper are quite limited. At the same time there appears to be a fairly good supply of grocery paper. The demand for paper seems to be urgent in the city, and it is very good from out of town, Chicago and other Western cities bidding as low as 3½ per cent for four to six months' single names. Quotations are 3½ per cent for sixty to ninety-day endorsed bills receivable, 3½ @ 4½ per cent for prime and 4½ @ 5 per cent for good four to six months' single names. Banks having large correspondence report no specially new feature. Business conditions in almost all branches are good, money is plentiful and bank reserves are increasing. Some gold has been received from near-by cities.

There has been no feature of importance in the European political situation this week. The new Japanese loan, which will soon be floated in London, is for £10,000,000. It will bear 4 per cent interest and the issue price will be 90. A new Argentine loan, bearing 6 per cent interest, is expected to be issued soon. The Bank of England minimum rate of discount remains unchanged at 3 per cent. The cable reports discounts of sixty to ninety-day bank bills in London at  $2\frac{1}{2}$  @  $2\frac{1}{2}$  per cent. The open market rate at Paris is  $2\frac{1}{4}$  per cent and at Berlin and Frankfurt it is  $3\frac{1}{4}$  per cent. According to our special cable from London the Bank of England lost £484,515 bullion during the week and held £29,717,471 at the close of the week. Our correspondent further advises us that the loss was due to the import of £11,000 from Australia and to the shipments of £496,000 net sent to the interior of Great Britain.

The foreign exchange market was firm the first of the week but easier later. The feature of the week has been the absence of commercial bills. This has been in part due to the labor troubles at Buffalo, which have interfered with the movement of grain from that point. The strike ended on Wednesday, and exchange was easier and lower on that day and on Thursday. There was no apparent connection between the two movements except it might be a belief that the end of the strike would result in bringing a better supply of bills. The demand for remittance has been sufficient to absorb the offerings of bankers' bills, leaving the market quite bare. Much of the inquiry is due to mercantile remittances for manufactured goods and also for raw material, such as sugar, rubber and coffee. There is also an increasing demand for traveler's credits, and it is expected that the inquiry for these will be large next month. Receipts of gold at the Custom House during the week amounted to \$475,314, of which \$289,000 was from Europe.

The range for nominal rates for exchange has been from 4 86 to 4 86 $\frac{1}{2}$  for sixty-day and from 4 88 to 4 88 $\frac{1}{2}$  for sight during the entire week, nearly all of the drawers posting the higher figures after Wednesday. Rates for actual business opened on Monday at an advance, compared with those at the close on Friday of last week, of one-quarter of a cent, to 4 85 $\frac{1}{2}$  @ 4 85 $\frac{1}{2}$  for long, 4 87 $\frac{1}{2}$  @ 4 88 for short and 4 88 $\frac{1}{2}$  @ 4 88 $\frac{1}{2}$  for cables. The tone was strong with a good demand. On the following day rates for actual business in long sterling advanced one-quarter of a cent, to 4 85 $\frac{1}{2}$  @ 4 86, but no change was made either in short sterling or in cables, the tone for them being simply firm. On Wednesday the market grew easier in consequence of a lighter demand, and rates for actual business fell off one-quarter of a cent all around, to 4 85 $\frac{1}{2}$  @ 4 85 $\frac{1}{2}$  for long, 4 87 $\frac{1}{2}$  @ 4 87 $\frac{1}{2}$  for short and 4 88 @ 4 88 $\frac{1}{2}$  for cables. On Thursday there was a further reduction of one-quarter of a cent for long, to 4 85 $\frac{1}{2}$  @ 4 85 $\frac{1}{2}$ , while short and cables remained unchanged and the tone was easy, so continuing on the following day. The market closed easy on Friday, with rates for actual business 4 85 $\frac{1}{2}$  @ 4 85 $\frac{1}{2}$  for long, 4 87 $\frac{1}{2}$  @ 4 87 $\frac{1}{2}$  for short and 4 88 @ 4 88 $\frac{1}{2}$  for cables. Commercial on banks 4 85 @ 4 85 $\frac{1}{2}$  and documents for payment 4 84 $\frac{1}{2}$  @ 4 85 $\frac{1}{2}$ . Cotton for payment 4 84 $\frac{1}{2}$  @ 4 84 $\frac{1}{2}$ , cotton for acceptance 4 85 @ 4 85 $\frac{1}{2}$  and grain for payment 4 85 @ 4 85 $\frac{1}{2}$ . The following shows daily posted rates for exchange by some of the leading drawers.

DAILY POSTED RATES FOR FOREIGN EXCHANGE.

		FRI. May 10	MON. May 22	TUES. May 23	WED. May 24	THUR. May 25	FRI. May 26

The following statement gives the week's movement of money to and from the interior by the New York banks.

Week Ending May 26, 1899.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency.....	\$8,247,000	\$2,748,000	Gain, \$5,499,000
Sold.....	2,654,000	708,000	Gain, 1,946,000
Total gold and legal tenders.....	\$8,901,000	\$3,456,000	Gain, \$5,445,000

With the Sub-Treasury operations the result is as follows.

Week Ending May 26, 1899.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' interior movement, as above	\$8,901,000	\$3,456,000	Gain, \$5,445,000
Sub-Treasury operations.....	18,800,000	18,000,000	Loss, 1,200,000
Total gold and legal tenders.....	\$25,701,000	\$21,456,000	Gain, 4,245,000

The following table indicates the amount of bullion in the principal European banks.

Bank of	May 25, 1899.			May 26, 1899.		
	Gold.	Silver.	Total.	Gold.	Silver.	Total.
England.....	29,717,471		29,717,471	37,191,962		37,191,962

### THE CONFERENCE AT THE HAGUE.

We dare say that a good many readers of this week's despatches from the European Peace Conference have been disappointed at the meagre results attained or foreshadowed. The sessions of the Conference have not been public, and the delegates have taken some pains to prevent their full deliberations from being known. From what has been disclosed, however, it seems to be pretty generally agreed that the so-called disarmament plan will not succeed in attracting the joint approval of the various States.

At first sight it would appear from this that the Peace Conference had failed of its original purpose, even in advance of formal discussion. The Czar's diplomatic note, submitted last August to the foreign envoys at St. Petersburg, and used as the basis for the conference which assembled on the 18th of this month, dealt with no other subject than an international agreement to check the increase in modern armaments. The Czar declared, through his Minister, Count Muravieff, that under the present system of constantly increasing armaments "labor and capital are diverted from their natural application," and "national culture, economic progress and the production of wealth are either paralyzed or checked." The assembling of an international conference was proposed by the Czar "to put an end to these incessant armaments and to seek the means of warding off the

calamities now threatening the whole world;" and this he described as "the supreme duty to-day imposed upon all States."

Now this was quite distinct and intelligible, so far as concerned the ends and purposes of the conference; but it has hardly needed one week of discussion to show that the Czar's wish is not likely to be gratified. If the result, however, disappoints the intelligent observer, it will at least not surprise him. No arrangement of this nature would be feasible without the endorsement of at least the five important States of Europe. But as soon, last year, as the problem came to be practically discussed, it was apparent that few, if any, of these governments were willing to take the chance of an abandonment of the existing plan. Bismarck held that peace could be assured only by maintenance of an armament so formidable as to make attack by any other State too dangerous an experiment to be rashly tried. In applying the theory of the German statesman, each European government has carried his reasoning one step further, and has undertaken to maintain an armament actually stronger than that of any rival. Within the past three years Great Britain, long exempt by reason of its isolated position from competition of this sort, has entered the lists with the avowed determination to maintain a fleet as powerful as those of any two other States combined. This rise of the English armament has without question been the most important factor in the European politics of the day. On at least two occasions—in the early days of 1896 and in the Fashoda episode of a few months ago—it is altogether probable that England's show of naval supremacy turned the scales in a diplomatic crisis. Furthermore, the plan of an enormously increased sea armament was heartily approved by the British people. The very Finance Minister who had the most profuse apologies to make for the burdens of his budget took refuge in an appeal to the service done for English interests at a crisis by its increased sea power, and the excuse seems to have been accepted.

It was hardly, then, to be wondered at that the earliest and bluntest words of scepticism over the Czar's proposal last August should have come from English politicians. It is highly probable that the English delegates at The Hague are so restricted in power and discretion that their attitude fails to help even in a plan for limiting increase in the armaments. The German position has been indicated not only by inference in the Emperor's well-known sentiments, but in the open statements of German publicists against the feasibility of the plan. The attitude of the other powers is more uncertain; but since the project could obviously be carried out only through the unanimous endorsement and co-operation of the first-class States, it is plain that a negative from either of the Powers referred to would for the time make negotiations futile.

But we do not by any means infer from this fact that the philanthropic movement of the Czar is hopeless. On the contrary, we are inclined to think that some elements of promise may be found in the very fact that Great Britain is believed to stand at present in the negative. The most obvious difficulty in the way of any international treaty in this matter lies in the double doubt, justified or unjustified, first, over the purposes of the appeal for disarmament, and second over the possibility of enforcing the plan with mutual good faith. We do not yet know, and

possibly the English Government does not, what definite offers in its own behalf the Russian Government has to make. Until this is known; the skeptics who point out Russia's present unfavorable position in finance and industry as the motive for its international retrenchment plan are likely to get a hearing. Nor does any one seem yet to have proposed a feasible guaranty for international good faith in the execution of the plan. That a nation in Great Britain's somewhat peculiar situation should wait to make sure of Continental Europe's purposes before reversing absolutely its own policy is by no means a proof of hostility to the general plan. Certainly the English Government and people are not holding their present position for ambitious purposes. They are a peace-loving nation, a nation hostile to war, devoted to industry, and watchful beyond any other European Power of the strain upon their exchequer. Their devotion to the sea armament arises from an instinct of self-defense; from which it follows that if a practicable scheme for achieving the Czar's ideal can ever be contrived, such opposition as exists in England would certainly be removed. As we take it, English objections to the plan of disarmament rest not on the principles of the project, but on the feasibility of carrying it into execution.

Nor are we at all sure that either the English or the Continental delegates are taking an attitude of mere opposition. From the reports which have already circulated regarding the plans of the convention, it would seem that ground has been already broken in discussion on three highly important points, in all of which England is participating. First, it is stated that the question of international arbitration has come into serious consideration. Second, it appears that from some quarters influences are being brought to bear for the periodical re-assembling of the conference. Finally, the rules and practices of war, and the question of immunity for neutral territory and private property, are being taken earnestly in hand.

It is evident enough that serious practical difficulties will surround deliberations even on these points. The Arbitration Treaty of January 1897 between Great Britain and the United States is an obvious case in point. No two nations more naturally disposed to such a treaty could have been selected. Yet it was found impossible to frame an agreement which did not leave it optional for either State to withdraw from arbitration disputes which it deemed to affect the national honor, and even with these exceptions made the treaty, signed by the two executives, failed of ratification in our Senate, though indeed sustained by a majority. But we have never believed that the Anglo-American negotiations of three years ago were wasted. Something was gained—very much in our opinion—by the mere fact that such an arrangement could be discussed by practical statesmen. It appears to us that the advantage of a discussion on the same question between all the first-class Powers marks a much more distinct advance towards the ideal of civilization. No great and radical reform has ever been accomplished in a day, or from a single trial. In particular, every achievement in international provision for humane and decent intercourse in peace and war has been preceded by a dozen attempts and failures. So far from adopting the superficial view that an abortive discussion of such matters marks a

backward step, we are convinced that each such effort brings the nations nearer to the goal. Let it for a moment be considered how inconceivable, in 1871 or 1879, would have been, not merely an international agreement for arbitration, but even an international conference to discuss it. We greatly doubt if many people, after the failure of the Arbitration Treaty in the Senate vote of May 5, 1897, would have been bold enough to predict that only two years later a conference of all the nations, called at the instance of the nation most distrusted of all, in the hope for European peace, would be taking up again this very question. If the failure of the Anglo-American negotiations was so promptly followed by resumption of the discussion under so much more imposing auspices, what reason for discouragement could be found, even if the conference at The Hague were to leave the problem unsolved?

We have hitherto pointed out our reason for believing that the plan for averting war, and the burdens imposed by continual anticipation of war, could not be wholly abandoned, even if nothing were to be accomplished in this conference of 1899. It is in fact a problem which will not be dismissed. Let statesmen turn away indifferently; the problem will force itself to the front again in spite of them. For a season the familiar argument that diplomacy cannot reconstruct human nature may stifle the discussion; but the controversy which is abandoned in diplomatic gatherings will presently arise in the finance administration and at the polls. The fiscal problem, indeed, complex as it is from one point of view, is extremely simple from another. If the plan of annual and heavy increase in the war and navy budgets of the nations is to be pursued indefinitely, there is only one possible end. One nation may be driven to default on its national obligations, another may be forced to hard shrift among the money-lenders, while still another may suspend a fraction of its sinking fund, but all three incidents point in the same direction. Eventually the taxpayer must have the final word to say, and it is not the least striking fact of the present situation that the one European Power where the tax-payer has no voice in government is already committed to this international reform by its sovereign.

#### AMERICAN IRON AND STEEL DEVELOPMENT.

The annual pamphlet report of the American Iron & Steel Association, prepared by Mr. James M. Swank, has been issued this week. It contains the usual comprehensive statistics bearing on the iron and steel trades, and also Mr. Swank's review of prevailing conditions, which, as is his custom, he does not limit to the past calendar year but extends into the current calendar year down to the date of writing, in this case apparently about the 10th of the month. In 1893 the issue of the pamphlet was delayed until September on account of the extra labor entailed in getting out the Association's new "Directory to the Iron and Steel Works of the United States," but the present year it is issued a little in advance of the usual time. It comes at a moment when deep interest is felt in everything relating to the iron and steel industry.

We have often had occasion to commend the statistics and compilations prepared under Mr. Swank's direction. They are in keeping with the magnitude

and importance of the industry they undertake to cover. In practically all its branches the iron and steel trade of the United States now far outranks that of every other country. The excellence of the statistics, however, has not grown out of that fact. Even when the industry was still in its infancy, and no one dreamt of its attaining its present advanced position, Mr. Swank covered the ground in the same thorough-going and painstaking way. Fortunate it is, too, that we have these elaborate data, going back so many years, for they will furnish to the future historian abundant material for the study of what must without doubt be considered one of the most important features in the world's development. We think we are safe in affirming that in no other country are the iron and steel statistics collected with so much completeness and detail. Nor are they anywhere available in authentic form so promptly, Mr. Swank making it a practice to give the leading statistics to the press much in advance of the publication of the Association's pamphlet report. For example, the tables showing the country's make of iron in the late calendar year were published the latter part of last January, and we reviewed them at length in these columns in our issue of January 28.

As the figures in which the most interest is felt have already been given and commented upon by us, it will be unnecessary to repeat them here. Our purpose on this occasion is merely to make brief reference to Mr. Swank's analysis and narration of the year's events, and his conclusions regarding the immediate future. Mr. Swank is an ardent advocate of a protective policy, and his remarks are all considerably tinged with his belief in that doctrine, but he is nevertheless a close observer and undertakes to report all the facts. After noting that in 1898 we made more pig iron than in any previous year, more Bessemer steel and more open-hearth steel, and rolled more wire rods, more structural steel, more plates and sheets, and, with the single exception of the year 1887, more steel rails, he points to the familiar fact that we have attained this prominence in large part because of the great growth in our export trade. The low prices of our manufactured products which had prevailed for several years, coupled with the superior character of these products and the enterprise of our manufacturers, enabled us to send constantly increasing quantities of the same to foreign markets, iron and steel and manufactures of iron and steel being especially prominent in this respect. Co-incidentally the low prices reduced our imports.

We have often shown the manufactured exports as a whole, but the iron and steel figures by themselves make a decidedly striking record. In 1898 our exports of iron and steel and their products aggregated no less than \$32,771,550, which compares with \$62,737,250 in the calendar year 1897 and \$48,670,218 in 1896. Here, then, there has been an expansion of more than 70 per cent in two years. The totals given do not include the shipments of agricultural implements, which amounted for 1898 to \$9,073,384, against \$5,302,807 for 1897 and \$4,643,729 for 1896. Not less noteworthy is the contrast presented by the imports of iron and steel, though in this case the change began many years earlier. In 1898 our total imports of iron and steel and manufactures of the same amounted, foreign values, to only \$12,473,637, against \$13,836,204 in 1897, \$19,462,561 in 1896 and \$25,772,136 in 1895. But this is only half the story. Prior to

1895 our average annual importations of iron and steel from 1871, a period of 24 years, amounted to \$42,826,681. In 1880 these imports reached as much as \$80,443,362.

Mr. Swank refers to our conquests in the foreign markets, and particularly to the fact that our producers have been able to get so many orders in the United Kingdom. Only a few years ago this country was Great Britain's principal customer for iron and steel, but now, according to the statistics, we sell her virtually as much iron and steel as she sells to us. For the year ended June 30 1898 we imported from Great Britain of articles that are weighed 119,189 tons, whereas we exported thither 118,234 tons. Including articles where the weight is not given and taking values, the balance is in favor of the United States—that is to say, our imports of iron and steel and manufactures of the same from the United Kingdom in 1897-98 aggregated only \$8,369,866, whereas the exports to that country were valued at \$12,752,016. Some instances are given of orders that have recently been placed in this country from abroad. Not very long ago contracts were made here for sixty locomotives to be used on two of the great railways running from England to Scotland, namely the Midland and the Great Northern. In February last the English Government itself ordered a steel railroad bridge of American design and construction, consisting of seven spans of 150 feet each, to be built across the Atbara River in the Soudan country, south of Egypt. American steel rails and locomotives have recently been shipped to India and Australia. The owners of the Baldwin Locomotive Works of Philadelphia are now filling an order for forty-five locomotives for railroads in India. In the present month of May the Pennsylvania Steel Company has received a contract to construct a \$700,000 steel viaduct, 2,260 feet long and 320 feet high, over the Gokteik Gorge in India, and the Phoenix Bridge Company, of Phoenixville, Pa., has received a contract to build twelve steel railway bridges for the Russian Government.

Mr. Swank makes no specific attempt at analysis of our success in invading the British field as shown by these various illustrations. Lest it may be supposed, however, that this success is due entirely to the superiority of our product and the advantage of lower prices, it seems proper to point out that conditions in Great Britain during the last twelve or eighteen months have been in a measure exceptional. This has been repeatedly shown in the letters both of our Manchester and our London correspondents. The home trade in Great Britain during this period has been extraordinarily good. On account of this the demand has been so active that British productive capacity would in any event have been taxed to the utmost. As it happened, however, there were some serious and prolonged labor troubles which greatly curtailed production. The engineers' strike and the disturbing influence exerted by it will readily be recalled by the reader. In addition the strike of the Welsh coal miners, beginning on April 1 last year and lasting about five months, operated in the same direction. The result has been that the British manufacturer finds himself way in arrears in his orders, and is unable to fill new orders at any price where reasonably prompt delivery is expected.

Mr. Swank takes a hopeful view of the outlook for our export trade. He says the immediate future of

this trade need not cause apprehension, notwithstanding our enhanced prices. Under any circumstances we will continue to export large quantities of leading iron and steel products to Canada, Mexico, the West Indies and Central America, while the high prices for iron and steel that now prevail in European countries will help us to maintain our present advantage in all markets. The excellent quality of our iron and steel products and our proverbial promptness in filling orders will also, he declares, be powerful factors in enabling us to hold our present export trade in the cruder forms of iron and steel, as well as in locomotives and machinery generally. Nor is the day far distant, he thinks, when we will build iron and steel ships and naval vessels for all the maritime world. In the latter particular a good beginning has already been made in building first-class vessels for Russia and Japan.

In adverting to the numerous consolidations of firms and companies which have been going on in the iron and steel trades, and which seem destined to have a revolutionary effect, he takes pains to declare that these new corporations are not trusts in any sense and should not be referred to as trusts. They are new concerns with large capital and centralized management. In his review he dwells upon one other favorable feature in the state of the iron industry, namely the condition of labor. Under the rise in prices, and particularly after the advance last February, wages have been increased. The increase represents to-day an addition of at least 10 per cent to the wages previously paid. There has been no serious strike for higher wages in the iron trade, and there have been few strikes since 1892. For many years the best possible understanding has existed in this country between the large corporations that are engaged in the manufacture of iron and steel and their workmen. The day for serious trouble between employer and employed in the iron trade of this country, he thinks, has gone by.

#### MODERN ROLLING STOCK.

The story of the increase in size and capacity of railroad rolling stock and motive power has become familiar enough, but the rapidity with which the change has been made is not so well recognized. In less than ten years practically the whole rolling stock of the railroads has been replaced, and in view of the number of engines and cars owned and the heavy amount of capital invested in them, the short time in which this replacement has been accomplished is not the least remarkable feature of the transition. A peculiar coalition of circumstances has aided and hastened the change, which otherwise must have taken place very gradually. The fundamental cause of the speedy revolution undoubtedly lies in the need for lower cost of carriage due to the reduction of rates brought about by railroad commissioners and stress of competition; these agencies made it imperative to reduce the cost of transportation in every way possible. The improvement in bridge work, rails and track construction, the lowering of grades, etc., were also induced by the same influences and led the way for the heavier equipment which is now hauling trains of enormous tonnage.

The economy of the newer and larger cars and engines after trial became at once so apparent that old equipment was replaced long before it would have

been condemned if the equipment which was to take its place had been of the same size or style. The new engines could draw so much extra freight that many companies found it profitable to sell their old small locomotives as far as possible and lay up others, rather than keep them in service. The increased paying load carried by the new and larger-sized cars was so substantial, both actually and in the proportion to the total weight of the cars, that it became a matter of the truest economy to dispose of old cars long before the limit of their life would have been considered as reached under ordinary circumstances. Another important circumstance tending to the rapid replacement of equipment, has been in the matter of safety appliances on equipment; it was much better business policy to build new cars than to equip old rolling stock whose life would have been short, and by no means equal to that of the new brakes and couplers applied to them.

This quick doubling of the size of cars and hauling power of engines, beneficial as it has been on the financial side in reducing cost of transportation, has greatly simplified technical problems of railroads. Not so much is heard now-a-days of the "car famine" and of the inability of the railroads to move freight because the rush of traffic blocked the movement of cars on some yards or terminal tracks. These things occur, but there is more immunity from them than some years ago, and yet the growth in tonnage moved has been, if anything, more noteworthy than in the apparent capacity of the railroads to meet the large demands for transportation. Since 1886 the tonnage movement of this country has increased about 37 per cent; the mileage 38 per cent; the number of cars 33 per cent and the number of locomotives 27 per cent. If we could know the proportionate increase in the carrying capacity of cars and in the hauling power of locomotives the figures would be still more interesting.

We can expect that the percentage of increase in car and locomotive equipment, as measured either by the mileage or by the tonnage carried, will continue to fall, for there is nothing to indicate that the limit of weight and size of equipment has yet been reached. Locomotives of 100 tons and cars of 50 tons capacity are used where the track has been prepared for them, and their use is likely to be steadily extended. For by increasing the capacity of the equipment twice as many tons of freight are moved by the same number of trains, with the same crews; passed on the same sidings and switched in the yards without increasing the track room, so that the operating problem of moving a given number of tons over the road, whether it be a single or double track line, is greatly simplified. Moreover, the same round-houses accommodate the larger engines, and the same shop facilities answer all demands for repairs.

**SETTLEMENT OF THE LANCASHIRE WAGES  
DISPUTE—THE MANCHESTER COTTON GOODS  
MARKET—WHAT IS A HANK?—MR. CARNEGIE  
ON AMERICAN STEEL INDUSTRY.\***

MANCHESTER, May 17, 1899.

The settlement of the wages dispute in the Lancashire cotton-weaving industry, ratified eight days ago, has been heartily welcomed in every direction. An advance of  $2\frac{1}{2}$  per cent is to be given after the first week in July, the original claim having been for 5 per cent, subsequently increased to 10 per cent.

Steps are being taken for the formation of a conciliation board, with an independent chairman, to act in cases of dispute about which the existing Joint Committee of employers and employed are unable to arrive at an agreement. Thus the present conflict as well as that in the spinning branch, previously terminated, has resulted not merely in a peaceful end of the wages question immediately involved but also in sincere efforts to provide against suspensions of work arising out of future labor differences in the two halves of this great industry. It may, therefore, with some confidence, be assumed that the chances in favor of a pacific termination of any future questions arising between employers and employed in the English cotton trade have been greatly increased by the events of the last few months.

As soon as the wages agreement was assured the demand for cotton goods and yarns in Manchester became much more active, and a large business was done at steadily hardening prices. The volume of contracts in the hands of spinners and manufacturers, already in the aggregate by no means small, was substantially increased. The buying, too, was pretty general, although for some markets, even that of India, it was more or less speculative, as is evident from the fact that occasionally the prices paid here were rather above the equivalents current in these distant markets. Naturally, the greater activity in Manchester was followed for some days by heavier buying of cotton in Liverpool, spinners hastening to cover amply their new contracts, as well as to make good any deficiency in their previous provision of raw material as against goods and yarns sold forward. Within the last few days sales of yarns and goods have fallen off considerably, in consequence partly of the advance in quotations and partly of the liberality with which buyers had satisfied their requirements. Though quiet, however, the market is cheerful and steady, and the daily demand is quite strong enough to prevent actual dullness.

If any one engaged in the production or purchase or sale of cotton yarn in any part of the world were asked to define a "hank," he would reply that it consists of a definite length of 840 yards. The English system of notation of "counts" or fineness which prevails everywhere except in France is founded upon such definition. Thus "No. 40," or "40s," designates yarn of which 40 hanks or 40 times 840 yards, weigh one pound avoirdupois. In the French system no "hank" is known, but the "counts" are indicated by the number of thousands of metres weighing one half kilogramme. Thus "No. 40" in French notation, applied to describe a given yarn, means that 40,000 metres weigh half a kilo.

But an important case is about to be tried in the Sheriff's Court at Glasgow in which the essential question is, What is a hank of dyed cotton yarn? Within the last two or three years complaints have reached the Manchester Chamber of Commerce from Singapore to the effect that dyed cotton yarns were being exported thither from Scotland made up in hanks of from 500 to 600 yards. About a year ago two bales of this "short-reeled" yarn were forwarded to the Manchester Chamber by that of Singapore, and after full examination of their contents at its official testing house, the Manchester Chamber requested the Board of Trade in London to institute a prosecution of the dyers and exporters of the yarn, the chain of evidence necessary for the pur-

\* Communicated by our Special Correspondent at Manchester.

pose being supplied. After long delay the Board of Trade declined to undertake the prosecution on the ground that it would have to be carried on in a Scotch court where local evidence as to the length of the hank could not be adduced. The Manchester Chamber has consequently resolved to prosecute the alleged offenders. The case will certainly attract widespread interest, not only in this country but also abroad, especially in some Continental States where "short-reeling" is not an uncommon practice and in the markets where "short-reeled" yarn is sold. The importance of the case is enhanced in Manchester because, owing to the decisions of the local courts here against this practice, it is practically non-existent, no merchant daring to deal in, or export, defective hanks. If these local decisions had ever been the subject of appeal to the higher courts, the question at issue would have been settled for the whole of the United Kingdom. As the matter stands at present, the effect is the same as if two mutually contradictory laws were in force, one in England forbidding the production or trading in short hanks and one in Scotland permitting it. The interest of the forthcoming trial is enhanced by the fact that the defendants are very wealthy, and that the Manchester Chamber is backed by an ample guaranty fund, some of the subscribers being merchants who have lost very valuable business owing to the competition of the short-reeled yarn.

In the course of a prolonged conversation with a representative of the "Iron and Coal Trades Review"—probably Mr. J. S. Jeans, the experienced and well-informed editor of that journal—Mr. Carnegie, who has been in London during the last few days, expressed very freely his views upon the future of the great iron and steel industry of the United States. Referring to the recent gigantic consolidation of interests in that industry, he said he did not think there was much likelihood of the creation of fresh competing producers to any serious extent. These would have difficulty about their supplies of ore and coke. Nearly all the best mining properties on Lake Superior were already appropriated, and it was from that region and not from the South that new contributions of ore must come for the manufacture of cheap steel, both for home consumption and for export. He declined to say, however, that the low range of prices prevailing in the United States during the last two years might not be repeated. But the fact that most of the available mining properties were now in few hands made it probable that prices would be kept up. The ore problem, in short, must exercise an increasingly important influence. Still, the most favorably situated works would continue to produce iron and steel at a relatively low cost, and in his opinion Pittsburg would remain the best position.

Of shipbuilding in the United States, Mr. Carnegie said it was certain to become a great industry. The arrangements just made for the establishment of a new shipbuilding yard near Philadelphia were but the beginning of the movement. Of the requisite skilled labor there was an abundant supply, or the certainty that it would be forthcoming. Moreover, the American shipbuilder had command of plenty of cheap timber—a most important consideration—as well as of cheap iron and steel. With regard to the recent sale of his vast enterprises, Mr. Carnegie said he had nothing to do with any syndicate to which they might be transferred. He had simply disposed of his interest

in them to his partners, and had no intention of having any connection with the new proprietary. He had retired from business altogether and was now about to take up other matters in which he had long had an interest.

Commenting upon the change in the ownership of the Carnegie Steel Works, the editor of the "Iron and Coal Trades Review" says that the ability of the Carnegie Company to manufacture steel more cheaply than any other concern in the world is due to the business sagacity and administrative skill of its principals, and that this pre-eminent position is likely to be maintained for quite ten years to come, possibly for a longer period. Whether or not the management will remain as effective as hitherto remains to be seen.

#### ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S

—The largest sale of any single bank stock this week was of the Phenix National Bank, the amount being 100 shares, sold at the Stock Exchange at 114. It is not often that so large an amount is sold in one block. Usually the sales are only a fraction, and frequently only a small fraction, of a hundred shares. When a hundred or over a hundred shares of a single bank are reported sold in any one week, the total is generally made up of several smaller items. We mention this fact because it illustrates the well-known condition of the holdings of this class of securities, that is, the wide distribution of bank stocks and the small extent to which they are held by men of large capital. In view of that situation it is surprising why prejudice against banks should be largely felt. Perhaps it is because they are not charitable institutions; that is to say, because they do not lend money without security, and call for its payment when it is due. The total sales of bank stocks this week were 337 shares, of which 237 were sold at auction and 100 at the Stock Exchange. There were 175 shares of New York trust stocks and 48 Brooklyn trust stocks sold, all at auction. We subjoin our usual details of the week's sales.

\* Sale at the Stock Exchange.

—Mayor Quincy of Boston, Assistant Postmaster General Perry S. Heath and his brother Fletcher Heath, together with other capitalists identified with the Continental Tobacco Co., have bought a large block of the stock of the Seventh National Bank of this city. Though there will be no immediate change in the management of the bank, it is rumored that the President, Mr. McAnerny, will soon retire, in which case Mr. William H. Kimball, who, as was announced in this column last week, has been elected Vice-President, will take the presidency, and there will most likely be a reorganization of the board of directors. The capital of the bank is \$300,000, the surplus is \$187,900, and the deposits last week were \$3,431,900. The bank is the direct successor of the old Seventh Ward Bank, which was organized in 1833.

—The Trust Company of America is the somewhat comprehensive title of an institution incorporated this week with a capital of \$3,500,000 and a paid-up surplus of \$2,500,000. This is the largest capital of any trust company in the city, with the exception of the Title Guarantee & Trust Co., and only six of the twenty-five trust companies in New York have a larger surplus. The subscriptions to the stock were large, amounting to over \$8,000,000, and they were from nearly all the principal cities, indicating that quite general interest was taken in the new enterprise. This fact has given some color to the report that the company will take over similar concerns in other cities, but if such is the inten-

tion the purpose is not disclosed. The directors represent important and varied interests, such as banking, foreign and domestic; manufacturing, telephone and gas companies, and the President will be Mr. Ashbel P. Fitch, formerly Comptroller of the City of New York. The company will begin business on or about July 1. The following have been elected directors of the company: Ashbel P. Fitch, Col. William Barbour, of the Linen Thread Co.; Charles F. Cutler, President N. Y. Telephone Co.; John R. Hegeman, President Metropolitan Life Insurance Co.; H. O. Havemeyer, President American Sugar Refining Co.; Myron T. Herrick, President Society Savings Association, Cleveland, Ohio; Henry S. Manning, President Shaw Electric Crane Co.; Emerson McMillin, President Consolidated Gas Co.; E. C. Converse, President National Tube Co.; James M. Donald, Vice-President Hanover National Bank; Samuel A. Maxwell, Vice-President National Wall Paper Co.; Alvah Trowbridge, Vice-President National Bank of North America; J. William Clark, Clark's Cotton Thread; Joel F. Freeman, former Treasurer Standard Oil Co.; William E. Spier, capitalist; Anson R. Flower, of Flower & Co.; George Blumenthal, of Lazard Freres; Henry S. Redmond, of Redmond, Kerr & Co.; C. I. Hudson, banker; Philip Lehman, cotton; Edward F. Cragin, capitalist, and S. C. T. Dodd and Willard Brown, lawyers.

—Mr. S. D. Scudder, until recently Southern Manager of the Germania Fire Insurance Co. of this city, has been elected one of the Trustees and the Active Vice-President of the Produce Exchange Trust Company. Mr. Scudder had some banking experience before engaging in the business of fire underwriting, he having been in the New York office of the Bank of Montreal and later a banker in Minnesota. He has, however, been very successful in the management of the Germania's Southern business, and it is doubtless due to this fact, and also to the executive ability which he has displayed, that he has been selected for this important and responsible position. The President of the company is Mr. Turner A. Beall, and the Vice-Presidents are Mr. Timothy Hogan, of T. Hogan & Sons, shippers, and Mr. Thomas A. McIntyre, of McIntyre & Wardwell, grain merchants. The capital stock and the surplus of the company are \$500,000 each, the net profits, shown by the statement of May 10, are \$174,073, and the deposits are \$9,942,380.

—The cash balance at the New York Clearing House on Tuesday was \$19,340,997, the largest on record. It was chiefly due to the payment on Monday of the subscriptions to the Amalgamated Copper stock, which made the National City Bank's credit balance \$7,472,000, and there were other large credit balances—the Western National of \$4,139,000 and the Fourth National of \$2,481,000.

—Mr. Anthony N. Brady has been elected a director of the Corn Exchange Bank to fill the vacancy caused by the death of Ex-Governor Roswell P. Flower. Mr. Brady is closely identified with the Flower interests. He is Vice-President of the Peoples' Gas Company of Chicago and Chairman of the Executive Committee of the Brooklyn Rapid Transit Company.

—The Bank of British North America has received advices from Dawson City to the effect that the contents of the safes at the agency of the bank in that city were found intact after the fire of Saturday night, and that the loss to the bank will not exceed \$5,000, which amount is covered by insurance. The directors have authorized the Manager to distribute \$1,000 among the sufferers by the fire. The agency at Dawson of the Canadian Bank of Commerce sustained no damage, the office being located within the police enclosure, outside the closely-built portion of the town.

—It was expected early in the week that at the adjourned meeting of stockholders of the Franklin National Bank, to be held on Thursday, decisive action would be taken on the proposition to increase the capital from \$200,000 to \$500,000, and to provide a surplus of \$100,000. Indeed, it was stated by the chairman of the committee having the matter in charge that a large majority of the stockholders favored the proposition, and that the funds necessary to place the institution on such a basis as to attract large deposits and provide for future expenses had been assured. The meeting on Thursday was attended by a majority of the stockholders, and the question of continuing the business and providing the requisite capital was discussed. No conclusion was reached, however, and the meeting was adjourned until

June 8, when it is expected the matter will be definitely settled. The chairman of the stockholders' committee expressed the opinion that there was no doubt that the proposition to increase the capital would eventually be adopted. The bank has enough cash on hand to pay all depositors, but no new business is being done and the affairs of the bank are practically in a state of suspense pending the action of the stockholders.

—The next annual convention of the American Bankers' Association will be held at Cleveland, Ohio, on September 5th, 6th and 7th. The programme for the convention has not yet been arranged, and it has been only informally discussed, but it is understood that there will be few addresses and that the sessions will be principally devoted to business. The Association now has a membership of 3,700, including the largest banks of the country, with aggregate capital and deposits of about \$5,000,000,000. The President is Mr. George H. Russell, President of the State Savings Bank, Detroit, Mich.; the Vice-President is Mr. Walker Hill, President of the American Exchange Bank of St. Louis, Mo.; the Chairman of the Executive Council is Mr. Alvah Trowbridge, Vice-President of the National Bank of North America of this city, and the Secretary is Mr. James R. Branch.

—It is reported that five or six new trust companies are in process of organization in this city. Each, it is said, will represent distinct interests of greater or less importance which, it is urged, require special banking facilities peculiar to trust companies. Judging from the large over-subscriptions reported to have been made for the stock of recently organized trust companies and the eagerness with which the public is seeking investment in such enterprises, it is thought probable that the funds necessary for the projected institutions will be readily obtained.

—Bankers who are familiar with the operation of the country check collection system now in force by the Clearing House institutions in this city assert that the opposition to the system is now confined to comparatively few merchants and country banks, and that the plan is working with a minimum of friction. The withdrawal of deposits resulting from the enforcement of the rules has been comparatively small while the pecuniary advantages to the banks are in some cases strikingly manifest. The system has been in operation for so short a time, however, not quite two months, that it is too early to make an estimate of the results. It is thought that at the expiration of the three months of trial of the plan the Clearing House committee may recommend some modification of the rules and possibly an increase in the number of cities in which collection charges may be discretionary. It is quite probable, indeed, some bankers claim that it is almost certain, that the system of charges for country bank collections will be permanently established by the New York Clearing House institutions, and in that case it is likely that clearing house associations in other cities, who are awaiting the result of the New York experimental plan, will adopt a similar system.

—Mr. F. S. Bangs, the genial late President of the State Trust Co., has returned from abroad quite restored in his health. Mr. Bangs is a special partner in the Stock Exchange firm of Kingsley & Mabon, 41 Wall Street.

### IMPORTS AND EXPORTS OF GOLD AND SILVER AT SAN FRANCISCO

The Collector of Customs at San Francisco has furnished this week the details of imports and exports of gold and silver through that port for the month of April, and they are given below in conjunction with the figures for preceding months, thus completing the results for the ten months of the fiscal year 1898-99. The imports of gold, while of fair volume, are the smallest of any month since January 1898, the amount received reaching \$1,033,284, of which \$978,700 was in coin. Of silver there came in \$131,614, of which \$129,082 was bullion. During the ten months there has been received a total of \$38,981,958 gold and \$1,665,056 silver, which compared with \$19,423,434 gold and \$1,815,244 silver in 1897-98. The shipments of gold during April were \$54,580, almost wholly coin, and the exports of silver have been \$340,177, of which \$32,705 was coin. For the ten months the exports of gold have reached \$1,337,352, against \$1,109,123 in 1897-98, and \$4,395,400 silver has been sent out, against \$3,697,321 in

1897 98. The exhibit for April and the ten months is as follows:

NOTE.—Iron, woollens and cottons include all the branches of these main features; machinery includes implements and tools; lumber includes saw planing, mill and door mill, carpenters and joiners; clothing includes millinery and furnishing; hats and gloves include furs and skins; chemicals include drugs, paints, colors, pigments and oils; printing and books include engraving and maps; millinery includes hosiery; leather and shoes include makers of harness, saddlery, trunks and rubber goods; liquors include tobacco, wine, brewers and beer; glass includes earthenware, pottery, bricks, lime and cement; groceries include meats and fish; hotels include restaurants; dry goods include carpets and curtains; furniture includes crockery; hardware includes stoves and tools; and jewelry includes clocks and watches. Brokers include all real estate, note, insurance or produce dealers whose main business is not the handling of actual products and transporters include all express and incorporated railroad companies.

Monetary: Commercial English News

[From our own correspondent.]

LONDON, Saturday, May 13.

The fortnightly settlement on the Stock Exchange began here on Tuesday for mining securities and on Wednesday for other securities, and almost at once it became evident that there was a considerable short account open both in mining and in American securities. Immediately covering by the "bears" began and went on actively for some days. It seems clear from this that the chief "bear" operators were members of the Stock Exchange, although no doubt some outsiders participated. But the rapidity with which it was perceived that there was a "bear" account and that it was time to cover indicates that the chief operations took place within the Stock Exchange.

The truth is that so far as the American market is concerned the general public has not been buying very much for a considerable time past. It has neither been buying nor been selling. And the general public here did not under-

stand the significance of the decision of the Amalgamated Copper Co. of New Jersey to call up the whole of the capital of \$75,000,000 within ten days after the letters of allotment were sent out. Members of the Stock Exchange, however, both in New York and in London were more quick to perceive this and probably they sold largely upon it. At all events the turn was as quick almost in London as in New York, and the advance was very rapid and very marked.

In mining securities, on the other hand, a very large part of the fall was brought about by selling from Johannesburg. All through last week the telegrams privately received in London from Johannesburg were of an alarmist character. In many cases, no doubt, those who sent them were honestly frightened. It is suspected that, in many other cases, the desire was to knock down prices. Be that as it may, the telegrams from Johannesburg were very depressing last week. And as Johannesburg sold largely, the action was followed by the larger holders here, and the slump was very considerable. This week Johannesburg either has become encouraged or is satisfied with the result of last week's operations, for the telegrams have become singularly few and little sensational.

It is difficult for the public to follow the maneuvers that are going on in South Africa. There are, in the first place, negotiations between the holders of the dynamite monopoly and the great mining magnates. Mr. Lippert, who obtained the dynamite monopoly, and who is an exceedingly shrewd and far-seeing person, found out that he could maneuver against certain mining rights, and he plainly intimated to the heads of the mining industry that if they did not come to an arrangement with him, he would bid against them for the mining rights. One result was the beginning of negotiations with the Government, in which Mr. Lippert co-operated. But the negotiations broke down, because the chiefs of the mining industry wanted a Finance Supervisor appointed, either by themselves or by the British Government—in other words, a financial expert who would not be under the influence of the Boer Government. And the Boer Government stolidly refused to agree to this. Then the petition was presented and meetings began to be held at the different mines. The mine-owners, however, do not all look with much favor upon these meetings of white officials at the mines. For, they argue, that while it may be very convenient for the mine-owners just now to play off the whole of the white population of Johannesburg against the Boer Government, by-and-by these white officials will perfect their organization and possibly may turn that organization against their employers, especially if either questions of wages or of hours of working should arise.

Over and above all these currents and cross currents is the anger of President Kruger because he has not been admitted to the Peace Conference, and the determination of the British Government not to allow any longer the incessant attempts of the Boer Government to evade in every possible way the conditions of the London Convention. Just now it is believed that the President of the Orange Free State has become alarmed at the critical condition in which things have been allowed to drift and that he is arranging for a meeting at his capital between President Kruger and the British High Commissioner for South Africa. President Steyn is a man of great ability and high character, and his intervention is sincerely to be welcomed. He wishes to see peace and good neighborliness preserved in South Africa. And he wishes to act as a benevolent mediator between both sides. Sir Alfred Milner, the High Commissioner, is also a man of very great ability and the highest character. But whether President Kruger can be induced to recognize the necessity for making concessions remains to be seen.

Money is plentiful and easy and is likely to continue so for some months yet. The Imperial Bank of Germany on Tuesday reduced its rate of discount from 4½ per cent to 4 per cent. This has been foreseen for some time, for money has been growing comparatively abundant and cheap in Germany. As has been frequently pointed out in this correspondence, the banks have been putting pressure upon the customers to repay the loans outstanding, and banks in their turn have been reducing in many directions their commitments. Probably, therefore, money will continue easy until the beginning of August. But the harvesting requirements will then lead to large borrowings from the banks by the agricultural classes. In fact, the movement of the crops will then begin, and during August, September and October there is every probability that rates will be very stiff. The best opinion, however, is that there will not be such stringency as last year, because, as pointed out above, earnest efforts are being made, and have been made for months past, to reduce German commitment. A good deal of course will depend upon whether the United States will require to withdraw gold to any considerable amount from Germany, and furthermore whether the French banks will leave all the capital now invested in Germany. Assuming that there are no considerable withdrawals either by the United States or by France, the probability is that the stringency will be less than last year.

Here at home the course of the money market depends chiefly upon the course of events in the United States. If money should become so dear in the United States that a large amount of gold is shipped to New York, rates will jump up quickly here. Otherwise there will be a comparatively easy market unless the stringency in Germany is greater than is now thought probable.

The general expectation is that gold will not be shipped to any considerable amount to India. The Currency Commission will probably complete its report, or reports, in the course of June. It is doubted whether it will recommend a gold loan. In any case it is not probable that the Indian Government will borrow just at the beginning of the dearest period of the year. And although it is known that Japan is preparing for a loan, it does not seem likely that she will take much gold.

Meanwhile the India Council continues to sell its drafts very successfully. It offered for tender on Wednesday 40 lacs, and the applications amounted to 550½ lacs. The whole amount offered was sold at prices ranging from 1s. 4d. per rupee for bills to 1s. 4 1/32d. per rupee for telegraphic transfers.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

Messrs. Pixley & Abell write as follows under date of May 11:

Gold.—No orders have come to hand since our last, and excepting some amounts required for India all recent arrivals have gone to the Bank, which has received £303,000 in bars and coin, while £59,000 has been withdrawn, chiefly for the Cape. Arrivals: Bombay, £76,000; Australia, £76,000; Cape Town, £26,000; West Indies, £21,000; Total, £411,000. Shipments: Bombay, May 4: £80,000. For month of April arrival: Germany, £37,000; Holland, £143,000; Belgium, £32,000; France, £205,000. Shipments: Germany, £518,000; France, £83,000; Japan, £1,000; United States, £119,000.

Silver.—Toward the close of last week silver was offered so freely that the market gave way to 2-d. At this level India bought a few parcels and the price at once rebounded. With several concurrent orders for prompt delivery gradual rises took place until 28½ was touched, but since then, with free offers of the metal, the market has again given way. New York has offered comparatively little. Indian prices 1s. 2 per 100 tolas. Arrivals: New York, £120,000; West Indies, £28,000. Total, £148,000. Shipments: Bombay, May 4, £10,000; Hong Kong, £22,708. Total, £32,708. For month of April arrivals: Germany, £17,000; Belgium, £450,000; France, £3,000. Shipments: Germany, £31,000; Russia, £336,000; France, £53,000. Mexican Dollars.—There have been no dealings for some time in these coins.

The quotations for bullion are reported as follows:

CHANGES IN LEGAL TENDERS AND NATIONAL BANK NOTES TO MAY 1.—The Comptroller of the Currency has furnished us the following, showing the amounts of national bank notes April 1, together with the amounts outstanding May 1, and the increase or decrease during the month; also the changes in legal tenders held for the redemption of bank notes up to May 1.

National Bank Notes—		
Amount outstanding April 1, 1899.....	\$823,780	\$243,052,317
Amount issued during April.....	1,163,764	337,284
Amount retired during April.....	.....	.....
Amount outstanding May 1, 1899.....	.....	\$242,714,333
Legal Tender Notes—		
Amount on deposit to redeem national bank notes Apr. 1, 1899.....	.....	\$33,126,328
Amount deposited during April.....	\$2,676,491	.....
Am. released and bank notes retired in Apr	1,033,773	1,621,718
Amount on deposit to redeem national bank notes May 1, 1899.....	.....	\$34,748,046

According to the above the amount of legal tenders on deposit May 1 with the Treasurer of the United States to redeem national bank notes was \$34,748,046. The portion of this deposit made (1) by banks becoming insolvent, (2) by banks going into voluntary liquidation, and (3) by banks reducing or retiring their circulation, was as follows on the first of each of the last five months.

Deposits by—	Jan. 1.	Feb. 1.	Mar. 1.	Apr. 1.	May 1.
Insolvent banks	1,796,158	1,780,543	1,724,783	1,658,105	1,602,238
Liquidating banks	6,326,710	8,458,910	8,107,491	8,282,127	8,283,735
Retired in Apr	21,597,189	21,960,749	21,825,076	23,188,096	24,862,073
Total.	29,719,057	32,200,202	31,747,350	33,126,328	34,748,046

\* Act of June 20, 1874, and July 12, 1882

BONDS HELD BY NATIONAL BANKS.—The following interesting statement furnished by the Comptroller of the Currency shows the amount of each class of bonds held against national bank circulation and to secure public moneys in national bank depositories on April 30:

Description of Bonds.	U. S. Bonds Held Apr. 30, 1899, to Secure—		
	Public Deposits in Banks.	Bank Circulation.	Total Held.
5 p. cts., 1894, due 1904	88,453,000	\$13,998,000	\$22,451,000
4 p. cts., funded 1907	24,892,100	128,921,850	153,813,950
U. S. cts., 1895, due 1925	10,269,500	18,354,150	28,623,650
3 p. cts., due 1908-15	27,279,840	49,442,800	76,722,640
5 p. cts., funded 1891	1,514,000	21,450,150	22,964,150
Total.....	\$72,059,400	\$232,167,910	\$304,227,310

\* Redeemable at option of the United States.

WALL STREET, FRIDAY, MAY 26, 1899.—3 P. M.

**The Money Market and Financial Situation.**—An analysis of the security markets for the week suggests that some changes in that department are in progress. The smaller volume of business is evidence that parties who have been conspicuous in the activity of recent months are curtailing their operations, and also that the outside public is less interested in Wall Street than it recently was. Encouraged by these features and by unfavorable reports in regard to the winter-wheat crop, the bear element at the Stock Exchange has made repeated efforts to depress the market, with some degree of success.

On the other hand a much easier money market has prevented any considerable liquidation of stocks and has encouraged investment buying. As a consequence a large proportion of stock transactions has been of a professional character, and the market for Government and railway bonds has been continuously firm and relatively active. To-day the markets were irregular and unsteady in anticipation of a suspension of business from Saturday noon until Wednesday morning. Late reports of railway earnings in many cases have a tendency to strengthen the market for the securities directly affected, and of these St. Paul and Central of New Jersey are conspicuous in their respective groups. As noted above, the money market is decidedly easier, and rates are now the lowest that have been quoted for several months.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 2 to 4 per cent. To-day's rates on call were 2 to 3 per cent. Prime commercial paper quoted 3 1/4 to 4 1/4 per cent.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £494,513, and the percentage of reserve to liabilities was 39-90, against 39-35 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows an increase of 4,775,000 francs in gold and 3,725,000 francs in silver.

The New York City Clearing-House banks in their statement of May 20 showed an increase in the reserve held of \$7,634,800, and a surplus over the required reserve of \$34,631,525, against \$27,137,625 the previous week.

	1899 May 20	Difference Prev. week.	1898 May 21	1897 May 22.

**Foreign Exchange.**—The foreign exchange market was firm during the early part of the week, but began to grow easier on Wednesday and so continued to the close. Rates declined.

To-day's actual rates of exchange were as follows: Bankers' sixty days' sterling, 4 85 1/4 @ 85 1/4; demand, 4 87 1/4 @ 87 1/4; cables, 4 89 @ 88 1/4; prime commercial, sixty days, 4 85 @ 4 85 1/4; documentary commercial, sixty days, 4 84 1/4 @ 85 1/4; grain for payment, 4 85 @ 85 1/4; cotton for payment, 4 84 1/4 @ 84 1/4; cotton for acceptance, 4 85 @ 85 1/4.

Posted rates of leading bankers follow:

	May 26	Sixty days.	Demand.
Prime bankers' sterling bills on London.....	4 86 @ 86 1/4		4 89 @ 89 1/4
Prime commercial.....	4 85 @ 85 1/4		
Documentary commercial.....	4 84 @ 84 1/4		
Paris bankers' (francs).....	5 1 1/2 @ 1 1/2	5 1 1/2 @ 1 1/2	5 1 1/2 @ 1 1/2
Amsterdam (guilder) bankers.....	40 1 1/2 @ 40 1/4		40 1 1/2 @ 40 1/4
Frankforter Bremen (reichsmarks) bankers.....	94 1 1/2 @ 94 1/4		95 1/2 @ 95 1/4

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling 75c. per \$1,000 premium; Charleston buying par, selling 1/4 premium; New Orleans, bank,

\$1 00 premium; commercial, 50c. @ 75c. discount; Chicago, 10c. per \$1,000 premium; St. Louis, 20c. per \$1,000 premium.

**United States Bonds.**—Sales of Government bonds at the Board include \$3,000 4s. coup., 1895, at 130 3/8; \$10,000 4s. reg., 1925, at 130 3/8; \$23,300 4s. reg., 1907, at 112 1/2 to 113; \$92,500 3s. coup., at 108 1/2 to 109 1/8; \$1,500 ditto (small bonds), at 108 1/2 to 108 3/4, and \$10,000 3s. reg., at 112 1/2. The following are the daily closing quotations: for yearly range see seventh page following.

\* This is the price bid at the morning board; no sale was made.

**Coins.**—Following are the current quotations in gold for coins and bullion:

Sovereigns.....	\$4 86 @ 84 89	Fine silver bars.....	61 @ 62 1/2
Napoleons.....	2 86 @ 3 90	Five francs.....	93 @ 96
X & Reichsmarks.....	4 78 @ 4 82	Mexican dollars.....	47 1/2 @ 49
25 Pesetas.....	4 78 @ 4 81	Peruvian sols.....	43 @ 44
Span. Doubloons.....	15 50 @ 15 60	English silver.....	4 82 @ 4 86
Mex. Doubloons.....	15 50 @ 15 60	U. S. trade dollars.....	60 @ 70
Fine gold bars.....	par @ 1/4 prem.		

**State and Railroad Bonds.**—Sales of State bonds at the Board are limited to \$6,500 Virginia fund, debt 2-3s of 1891 at 85 and \$25,000 Virginia 6s deferred trust receipts at 8 1/2.

The sympathy usually existing between the market for railway bonds and the stock market is not apparent this week. Railway bonds have been in sufficient demand to hold the market firm, and in several cases quotations are notably higher than last week. Offerings of high-grade bonds were exceptionally limited and such increase in the volume of business as occurred on Thursday, when the transactions were fifty per cent larger than on Monday and Wednesday, was confined chiefly to speculative issues, including Atchafalpa, Baltimore & Ohio, Reading St. Louis Southwestern and Wisconsin Central. The last-named was one of several issues which advanced over a point, and Northern Pacific prior lien and Metropolitan West Side Elevated (Chicago) 4s advanced 2 points.

**Stock and Bond Sales.**—The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since January 1.

	Week ending May 26	Jan. 1 to May 26
<b>Stocks</b>

Friday.....	6,405	10,934
Total.....	42,025	54,769

**Railroad and Miscellaneous Stocks.**—The stock market has been irregular but generally weak in tone. Transactions were on a smaller scale than of late, the daily average being only a little over 400,000 shares, a large part of which may be attributed to professional operations. Standard railway shares were neglected and industrial and traction stocks conspicuous for activity. The anthracite coal issues were notably strong and made substantial advances. St. Paul was relatively firm on its excellent traffic report for the month of April, and this had a stimulating effect upon the entire granger group. Atchafalpa preferred was the most active of the railway list, being a favorite on the London Exchange. As usual, the local traction issues were irregular features. Metropolitan Street Railway fluctuated over a range of 1 1/2 points; Third Avenue, 5 1/2 points; Brooklyn Rapid Transit, 5 points, and Manhattan Elevated, 3 points.

While considerable attention has been directed to the newer iron and steel stocks, American Sugar Refining continues the favorite in certain speculative circles and has been by far the most active stock on the list, although its fluctuations were relatively narrow. For highly erratic movement, New York Air Brake was most conspicuous, selling on Tuesday 26 1/2 points above last week's closing price, a large part of which it has since lost.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every **TEAM** railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

ROADS.	Latest Gross Earnings.		Jan. 1 to Latest Date.

### STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

† These figures include results on Bridge Division.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of May 20, 1899. The next will appear in the issue of June 24, 1899.

## Ohio River Railroad.

(Report for the year ending December 31, 1898.)

President H. H. Rogers says:

Both gross and net earnings show a slight decrease as compared with the previous year, but in view of the fact that during part of March and April operations were entirely suspended on account of the unprecedented high water in the Ohio Valley, from which all railroads in that territory suffered, submerging 135 miles of the main line, and seriously impairing a large number of bridges, trestles, embankments, and also roadbed, the result cannot but be satisfactory, the cost of repairs having increased the operating expenses above what was anticipated in the early part of the year. These expenses were further increased by needed repairs to passenger equipment, and by the monthly charge on account of new freight equipment purchased to replace old cars condemned and destroyed.

## EARNINGS, EXPENSES AND CHARGES.

	1898.	1897.	1896.	1895.
<b>Earnings—</b>

## The St. Louis Terminal Cattle Station &amp; Property Co.

(For the Fiscal Year Ending May 1, 1899.)

The following is furnished to the CHRONICLE:

	1898-9.	1897-8.
Receipts from rent, etc.....	(\$12 Mos.) \$302,970	(\$13 1/2 Mos.) \$311,740
Expenses of every kind, including taxes.....	67,176	68,071
<b>Net earnings, exclusive of interest on bonds.....</b>	<b>\$235,794</b>	<b>\$243,669</b>
Interest on \$3,000,000 bonds at 4 1/2 per cent.....	135,000	151,875
<b>Net profits for the year.....</b>	<b>\$100,794</b>	<b>\$91,794</b>
5 p. c. on pref. stock and 2 p. c. on common, payable May 25, 1899.....	90,000	.....
<b>Balance to profit and loss.....</b>	<b>\$10,794</b>	.....

—V. 68, p. 626.

## Commonwealth Electric Co. of Chicago.

(Report for the year ending March 31, 1899.)

The annual statement is as below:

Gross earnings from electric current and merchandise sales.....	\$389,065
Operating, repairs and renewals and general expense.....	269,999
<b>Net income from all sources.....</b>	<b>\$129,066</b>
Deduct interest on bonds.....	103,910
<b>Balance.....</b>	<b>\$25,156</b>

The total net for year was \$129,066, being about \$4,000 in excess of what will be the full interest charge on the \$3,500,000 of 5 per cent bonds.

## BALANCE SHEET MARCH 31, 1899.

Assets—	Liabilities—
Plants and franchises.....\$7,323,323	Capital stock.....\$3,000,000

General Carriage.....	926, 976	United States Glue.....	979
Illinois Electric Vehicle Trac.....	927		
Manufactured Rubber.....	977		

**American Agricultural Chemical Co.—Stock Over-subscribed.**—Upwards of \$11,000,000 of the preferred stock of the American Agricultural Chemical Co. was subscribed for by the vendors of the constituent companies. The balance was largely over-subscribed and was allotted privately by the bankers, without public offering.—V. 68, p. 974.

**American Alkali Co.—On Unlisted in Philadelphia.**—Preferred stock to the amount of 120,000 shares, par value \$50, \$10 paid, has been placed in the unlisted department of the Philadelphia Stock Exchange; also 480,000 shares of common stock, par value \$50, full paid.—V. 68, p. 925.

**American Bicycle Co.—Extension of Options.**—An exchange says: "Manufacturers who have given options on their plants have been asked to extend them until August 1. There is some complaint from manufacturers who expected to be paid all in cash and who are offered half cash and half stock."—V. 68, p. 974.

**American Car & Foundry Co.—Listed.**—The New York Stock Exchange has listed \$29,090,000 non cumulative 7 per cent preferred stock and \$29,090,000 common stock of the American Car & Foundry Co. The statement submitted to the Stock Exchange with the application to list the stock furnishes much important information regarding the company. Extracts from the statement are given on page 1029 of the present issue of the CHRONICLE.—V. 68, p. 868.

**American Chicle Co.—Consolidated Gum Co.—Prospectus.**—Various facts regarding the pending consolidation of chewing gum companies were given in the CHRONICLE of May 6 and 13 on pages 871 and 926, under the title "Consolidated Gum Co." The prospectus confirms the names of the companies which are to be united (p. 871), but refers to the consolidated concern as the American Chicle Co., chicle being a Mexican product and the principal ingredient of chewing gum. Other facts from the prospectus follow:

The company will be organized under the laws of New Jersey with a capital of \$3,000,000 of 6 per cent cumulative preferred stock and \$9,000,000 of common stock. Of this amount, \$1,000,000 of preferred stock is to be offered for subscription at par accompanied by \$500,

000 of common stock. The Audit Co., of New York, certifies that during periods of from three to ten years the concerns show an aggregate annual profit in excess of \$500,000. This does not include the net earnings of S. T. Brille & Co. The average annual net earnings is more than sufficient to equal annually 6 per cent on the preferred and exceeding 6 per cent on the common. Subscriptions will be received by the Manufacturers' Trust Co., Brooklyn, or by Flint & Co., New York.

Thomas F. Harvey, of Chicago, proprietor of the International Confectionery Co., is promoting the enterprise, and Charles R. Flint, the largest importer of chocolate, is interested.—V. 68, p. 871, 926.

**American Ginning Co.—Incorporated.**—This company was incorporated at Trenton, N. J., on May 24, the capital stock being \$5,000,000, to control the manufacture of machinery for cotton ginning and wool burring. Incorporators:

Howard Sinn and Thomas W. Prior of Philadelphia, Mathew Prior, Watertown, Mass.; John R. Bennett, Hackettstown, N. J., and Charles B. Devos, Bayonne, N. J.

**American Palace Car.—Dispute as to Car Patents.**—At Trenton, N. J., on May 24, Judge Gray, in the United States Court, granted a temporary injunction, returnable June 6, restraining Hayward A. Harvey, Lawrence S. Mott, Herbert A. Tuttle, and others, from disposing of certain patent rights on combination parlor and sleeping cars. The suit is brought by Byron A. Eldred, Allie L. Lawrence. The bill of complaint states that the American Palace Car Co. of Maine was formed in 1892, with a capital stock of \$1,500,000. Considerable of this stock was given in exchange for letters patent granted to Charles J. Seymour for combination parlor and sleeping cars and \$25,000 in cash was spent in fitting up the car "Boston." The American Palace Car Co. of New Jersey was formed to take over the business of the Maine company, and this was accomplished by the defendants, it is charged, without the knowledge or consent of the plaintiffs. A plan embracing foreclosure is now afoot, say the plaintiffs, under which the New Jersey people expect to obtain legal title to all the assets of the Maine company, and relief is prayed that the scheme may be frustrated. The plan, it is stated, provides that the stockholders shall mortgage the property of the company and issue bonds; that \$50,000 of these bonds shall be subscribed for in cash or approved indebtedness of the company and that \$250,000 of bonds shall be sold for cash to furnish working capital for the company.—V. 65, p. 826.

**Anaconda Copper Co.—Amalgamated Copper Co.—Control Acquired.**—Control of the Anaconda Copper Co. has been turned over to the Amalgamated Copper Co., as majority stockholder, through the election of William Rockefeller, H. H. Rogers, William G. Rockefeller and A. C. Burrage as trustees.—V. 68, p. 523, 870.

**Atchison Topeka & Santa Fe Ry.—Atlantic & Pacific Suit.**—The suit of Alfred P. Lasher and others, which has long been in the Eastern courts without success, has been revived in Kansas. A complaint filed at Topeka this week alleges that Lasher owns and represents Atlantic & Pacific first mortgage bonds, guaranteed by the old Atchison Company, to the amount of \$200,000, and also \$7,000,000 of the income bonds. The suit seeks to establish the lien of these bonds upon the property of the new Atchison Company, and asks that the reorganization be declared invalid and void, and the sale under foreclosure be declared null and void. The officials of the Atchison Company say that they believe that the Atlantic & Pacific foreclosure was perfectly legal, and that the income bondholders can gain nothing by the attempt to intervene.—V. 68, p. 974.

**Atlantic Valdosta & Western RR.—Mortgage Filed.**—The company has filed a new mortgage to the Central Trust Co., as trustee, to secure \$5,000,000 bonds, to be used to take up the outstanding bonded indebtedness; to provide for the further extension of the road; for the construction of branches and to purchase terminal property in Jacksonville; also to purchase additional rolling stock. It is intended to extend the road from Valdosta to Albany, Ga., 75 miles, making a total main line of 180 miles.—V. 66, p. 753.

**Baltimore & Ohio RR.—Payment of Receivers' Certificates.**—The holders of the Pittsburg & Connellsville Receivers' certificates dated Jan. 1, 1897, are notified to present the same for payment at the office of the Mercantile Trust Co., in New York, or the Baltimore Trust & Guarantee Co. of Baltimore, on or before May 29, 1899. On that day interest on said certificates will cease.

Holders of Baltimore & Ohio RR. receivers' certificates secured on properties in the City of Baltimore, dated Dec. 1, 1896; receivers' certificates for steel rails, dated July 31, 1897, and receivers' certificates dated June 1, 1896, are notified to present the same for payment on or before May 25, 1899, at the Mercantile Trust Co. in New York, or, as to the certificates of Dec. 1, 1896, only, at the office of the Maryland Trust Co., Baltimore.

Holders of bonds of the Baltimore & Ohio Equipment Co. dated July 1, 1896, are notified to present the same for payment at the Mercantile Trust Co. in New York on or before May 29, 1899. On that day interest on said bonds will cease.

**Payment of Non Assenting Bonds.**—The Special Masters give notice that under decree of the United States Circuit Court, District of Maryland, entered May 15, 1899, every holder of the following bonds and coupons is notified to present the same for payment on or before June 17, 1899, at the office of the Receivers of the Baltimore & Ohio RR., Baltimore, Md., and that interest on the same will cease from and after June 17, 1899.

Baltimore & Ohio RR. 100-year 5 per cent consolidated mort. bonds of 1888.

Sterling 6 per cent loan of 1872.

Sterling 6 per cent loan of 1874.

Six per cent loan of 1879 (account of Parkersburg Branch).

Five per cent bonds, loan of 1885 (account of Pittsburg & Connellsville RR.).

Four and one-half per cent terminal mortgage bonds.

Sterling 4 1/2 per cent loan of 1883, Philadelphia Branch.

Sterling 5 per cent loan of 1877 (account Baltimore & Ohio & Chicago RR.).

Pittsburg & Connellsville RR. Co. 6 per cent consolidated mort. bonds.

**New Mortgages Filed.**—In the Superior Court at Baltimore on Tuesday the company filed its first mortgage for \$165,000, to the United States Trust Co. of New York as trustee, to secure 4 per cent gold bonds dated July 1, 1898, payable July 1, 1948, in denominations \$1,000 and \$500 each, and with interest payable Oct. 1 and April 1 of each year; also its prior lien mortgage for \$75,000,000 to the Mercantile Trust Co. of New York as trustee, to secure 3 1/2 per cent gold bonds due in 1925.—V. 68, p. 975.

**Boston Breweries Co.—Incorporated.**—This company was incorporated at Trenton, N. J., on May 23, with \$9,750,000 of capital stock, of which \$6,500,000 is to be preferred cumulative 7 per cent. The incorporators are Robert S. Jordan, Nelson R. Vanderhoff, George A. Maglone, James E. Weston and Charles N. King.—V. 68, p. 669.

**Brooklyn Ferry Co.—New Line.**—This company has purchased the East River water-front between 41st and 43d Streets from the Equitable Gas Co., with a view to operating a ferry between Broadway, Brooklyn, and the foot of East 42d Street, Manhattan. President Joseph J. O'Donohue says: "We do not intend to abandon the 23d Street Ferry, but are simply supplementing it with one which will enable Brooklynites to reach the Grand Central Station direct."—V. 67, p. 1206.

**Brooklyn Dock & Improvement Co.—New President.**—Silas B. Dutcher, President of the Hamilton Trust Co. of Brooklyn, has been elected President and James W. Hinkley, President of the United States Casualty Co., a Director.—V. 67, p. 481.

**Burlington (Ia.) Electric Ry. & Lighting Co.—Acquisition of Gas Plant.**—A press dispatch announces the purchase of the property and franchise of the Burlington Gas Light Co. by the Burlington Electric Railway & Lighting Co., the price paid being \$200,000.—V. 64, p. 753.

**Carnegie Steel Co.—Capitalization.**—H. C. Frick on Saturday last made the following statement: "To set at rest the many erroneous reports regarding the capitalization of the proposed new Carnegie Steel Co., I desire to say that it will be distinctly a home concern, embracing only the Carnegie, the Frick and their allied interests, and using a Pennsylvania charter. The capital will be \$250,000,000, and but one kind of stock will be issued, fixed upon an investment basis, so that the present management will take their holdings in the stock of the new company."

The Carnegie Steel Co. was incorporated in New Jersey May 4, but on May 8 application was also made by the Carnegie Company at Harrisburg, Pa., for a charter to be issued on May 29, the capital stock being nominally \$100,000. On May 24 this last-named company filed notice of an amendment of its title to the Carnegie Steel Co. Apparently the Pennsylvania charter will be the one to be utilized.—V. 68, p. 975.

**Central New England Ry.—Last Instalment of Assessment.**—The final instalment of 25 per cent of the assessment upon certificates of deposit of series A income bonds, series B income bonds, preferred stock and common stock of the Philadelphia Reading & New England (now Central New England) has been called, payment to be made on or before June 8.—V. 68, p. 822.

**Central RR. of New Jersey.—New Stock listed May 26.**—The New York Stock Exchange admitted the \$4,503,800 additional capital stock to dealings this week, instead of waiting till June 26, as previously agreed.—V. 68, p. 925.

**Chicago & Alton RR.—St. Louis Peoria & Northern Ry.—Control Acquired.**—Control of the St. Louis Peoria & Northern Ry. (St. Louis & Northern Short Line) has been acquired by the syndicate which owns the Chicago & Alton RR., thus removing from that company the danger of a new parallel line between Chicago and St. Louis.

An official circular to the subscribers to the bonds and stock of the St. Louis & Northern Short Line says, under date of May 25: "Recent changes in the railroad situation in Illinois have led the trustees under the stock trust agreement of Oct. 1, 1893, to entertain negotiations for the transfer of the control of this enterprise to Messrs E. H. Harriman, Jacob H. Schiff, James Stillman and George J. Gould. These negotiations have resulted in an agreement for the purchase by them of the capital stock of the St. Louis & Northern Short Line and of the Laclede Construction Co., as well as the certificates of subscription to the securities of the St. Louis & Northern Short Line under the \$13,000,000 subscription agreement of Sept. 26, 1898. The terms arranged are substantially as follows:

1. The capital stock of the Laclede Construction Co. to be purchased for a full paid amount of Chicago & Alton purchase money certificates at par.

2. The certificates of subscription to the securities of the St. Louis & Northern Short Line, on each of which \$3,200 has been paid, to be purchased for \$3,200 each, payable in full paid Chicago & Alton purchase money certificates at par. These certificates are to be part of the certificates originally issued by the United States Trust Company

under the Chicago & Alton syndicate agreement of March 2, 1899, and entitled to interest from March 15, 1899. The holders of subscription certificates will also be entitled to receive from the purchasers, in addition, \$1.05 in cash for each certificate.

"Payments of cash and deliveries of Chicago & Alton purchase money certificates will be made on the delivery of the certificates to Kuhn, Loeb & Co., 27 Pine Street, New York. The above terms are available only until June 5, 1899, inclusive. After June 5, 1899, cash only will be paid to the extent of \$100 for each share of Laclede Construction Company and \$3.27 for each certificate of subscription to the securities of the St. Louis & Northern Short Line, and these cash terms will expire June 20, 1899.

"The holders of a majority of the capital stock of the Laclede Construction Company, and a majority of the certificates of subscription to the securities of the St. Louis & Northern Short Line have accepted the above terms, and the control of the St. Louis & Northern Short Line enterprise now passes to Messrs. E. H. Harriman, Jacob H. Schiff, James Stillman and George J. Gould."

This transaction transfers to the new owners the contract made with the Chicago Terminal Transfer Co. for terminal facilities at Chicago.—V. 63, p. 976, 5.3.

**Chicago & West Michigan Ry.—Interest.**—The company will pay the full interest on the coupons due June 1, 1899, on the 5 per cent bonds. Last December full cash interest was paid, but a year ago \$20 was paid in cash and \$5 in 10-year coupon scrip.—V. 63, p. 976.

**Chicago Burlington & Quincy RR.—Purchase Authorized.**—The stockholders on May 30 voted to confirm the purchase of the following lines heretofore operated under lease:

Chicago Burlington & Northern RR. of Wisconsin and Minnesota, Chicago Burlington & Northern RR. of Illinois, American Central Ry. Co., Carthage & Burlington RR. Co., Chicago & Iowa RR. Co., Chicago & Rock River RR. Co., Dixon Peoria & Hannibal RR. Co., Dixon & Quincy RR. Co., Galesburg & Rio RR. Co., Ottawa Oswego & Fox River Valley, Peoria & Hannibal, Quincy & Warsaw, Quincy Alton & St. Louis and St. Louis Rock Island & Chicago.—V. 63, p. 975.

**Chicago Indianapolis & Louisville Ry.—Richmond Nicholasville Irvine & Beattyville RR.—Supreme Court Decision.**—At Washington on Monday Justice Brewer announced the decision of the United States Supreme Court, reopening the foreclosure proceedings against the Louisville New Albany & Chicago Ry. Co., the predecessor of the Chicago Indianapolis & Louisville Ry., in the suit of the Louisville Trust Co. to hold the property liable for the guaranty of the bonds of the Richmond Nicholasville Irvine & Beattyville RR. Justice Brewer said:

"We believe that under the circumstances as presented by this record there was error; that the charge alleged positively and supported by many circumstances of collusion between the stockholder and the bondholder, to prevent any beneficial result inuring by virtue of the decree of the Court of the Sixth Circuit in reference to the guaranty obligations of the New Albany Company, was one compelling investigation, and the order will therefore be that the decree of the Circuit Court and of the Court of Appeals be reversed, and the case remanded to the Circuit Court with instructions to set aside the confirmation of sale; to inquire whether it is true as alleged that the foreclosure proceedings were made in pursuance of an agreement between the bondholder and stockholder to preserve the rights of both and destroy the interests of unsecured creditors, and that if it shall appear that such was the agreement between these parties, to refuse to permit the confirmation of sale until the interests of unsecured creditors have been preserved."

Justice Peckham dissented from the judgment. It is claimed for the reorganized company that no evidence will be found to sustain the allegation as to an agreement between the bondholders and stockholders. In the bondholders' agreement with the reorganization committee it is simply provided that the stockholders may have preference until the time fixed, Jan. 1, 1897, to subscribe for the new stock of the new company. The provision of the agreement is that the committee will allow the holders of the old stock extinguished by the foreclosure the first opportunity to subscribe for the new stock. A significant fact is that only about one-half of the old stock subscribed, showing that the right was not generally considered valuable.

Under the decision just rendered it would appear that bondholders are prohibited making any agreement with stockholders. The effect of such a decision would be to prolong indefinitely foreclosure proceedings and to deprive a property of the support of those most likely to invest in its securities. As to the history of the case, see V. 63, p. 269; V. 62, p. 1179.—V. 63, p. 822, 873.

**Chicago Telephone Co.—New Stock.**—The directors have decided to sell 6,635 additional shares of stock, making the entire amount outstanding \$1,000,000, the full amount authorized. They have also, it is stated, decided to recommend that the capitalization be increased to \$15,000,000, the new stock to be offered to stockholders at par from time to time, as required for extensions and improvements.—V. 63, p. 2.9.

**Citizens' Street Ry. Co.—Indianapolis Street RR.—Exchange of Stock.**—Notice is given that for each twenty shares of Citizens stock deposited there will be delivered a \$1,000 four per cent general mortgage gold bond of the Indianapolis Street RR. Co. and \$200 stock of said Indianapolis Street RR. Co. The new securities are ready for delivery at the office of the Guarantee Trust & Safe Deposit Co., Philadelphia.

**On Philadelphia "Unlisted."**—The company's \$5,000,000 common stock and \$3,750,000 general gold 4s, due January, 1933, have been admitted to dealings on the unlisted department of the Philadelphia Stock Exchange.—V. 63, p. 927.

**Colorado & Southern Railway.—Listed.**—The New York Stock Exchange has listed \$17,500,000 first mortgage 4 per cent gold bonds of 1929 and voting trust certificates for

\$3,500,000 first preferred stock, \$3,500,000 second preferred stock and \$30,995,000 common stock. The official statement made to the Stock Exchange in connection with the listing of the securities will be found at length on a subsequent page. It sets forth very fully the facts regarding this reorganized property.—V. 63, p. 570.

**Colorado Fuel & Iron Co.—Projected Railroad.**—The Colorado & Wyoming Ry. Co., capital, \$100,000, has been incorporated by J. A. Kebler, John L. Jerome, D. C. Beaman, F. Wilde, Jr., and George W. Bowen, all officers of the Colorado Fuel & Iron Co. The new company will operate the railroads belonging to the Colorado Fuel & Iron Co., connecting its works about Pueblo. It will also build a piece of road about 16 miles in length from a point near Badger on the Colorado & Southern RR. to the iron mines near Hartsville, which the Colorado Fuel & Iron Co. has recently leased. No bonds will be issued.—V. 63, p. 925.

**Columbus Sandusky & Hocking RR.—Sale Set Aside.**—Judge Smalley at Bucyrus, Ohio, on May 20, set aside the sale of the road, which took place on Oct. 19, 1895, just prior to reorganization under the present title. The sale was asked to be annulled on the following grounds: (1) That of the purchase price of \$1,500,000 only part was paid; (2) that the Court confirming the sale had no jurisdiction over the Shawnee Branch, and (3) that the road as at present constituted is an unlawful combination of two lines that are separated by 20 miles of leased road. The case will be appealed.

**New Receiver.**—On Thursday Judge Smalley, in the State Court at Bucyrus, appointed Nicholas Monsarrat (President of the Hocking Valley Railway Co.) receiver of the Columbus Sandusky & Hocking RR. in place of S. M. Felton. The new appointee, however, was ordered by Judge Smalley to apply to Judge Taft in the Federal Court for possession, and it is expected that the question will come up next week.—V. 63, p. 771.

**Consolidated Gas Co. of New York.—Dividend Reduced.**—The company yesterday declared a quarterly dividend of 1½ per cent (payable June 15) in place of 2 per cent as heretofore. The reduction is explained as due partly to the gas war and partly to the Ford bill.—V. 63, p. 871.

**Denver City Tramway.—City Authorities Enjoined.**—Judge Hallett, of the United States Circuit Court, yesterday granted a temporary injunction on the application of the Mercantile Trust Co. of New York, mortgage trustee, restraining the Board of Supervisors of the City of Denver from voting on the ordinance, already passed by the Aldermen, repealing the company's perpetual blanket franchise. A motion to make the injunction permanent will be argued June 1.—V. 63, p. 473.

**Detroit Street Railways.—Report of Commission.**—The municipal street railway commission, appointed to purchase and operate all the street railways in the city, made its first report to the Common Council on May 23. The commission states that it deems it advisable to defer submission of the terms of the purchase to the Council and people until the suit now pending in the Supreme Court to test the validity of the law under which the purchase is contemplated is decided. A press despatch says:

The purchase price for the roads, as practically agreed upon, is reported as \$16,800,000 in bonds, \$100,000 in bonds to be turned back to the commission as a safety or working fund. A security franchise is proposed to be given the companies to run 30 years, with privilege of extension for not to exceed 15 years if the city has not been paid for the roads out of the earnings therefrom at three cent fares from the outset, the rates of fare under the security franchise to remain as at present both on three cent and five cent lines. The security franchise is to also provide for ten tickets for a quarter for school children.

The commissioners believe, however, that in case of an adverse decision by the Supreme Court, they have "a plan which, if acceptable to the owners of the railways and approved by the Common Council and electors, would enable the people of Detroit, even in advance of the decision of the Supreme Court, if desired, to avail themselves of such advantages under private ownership surrounded by such safeguards as will protect the people in their enjoyment until the power shall be secured to enter upon municipal ownership and operation if such power does not now exist. The plan is to have the commissioners organize a corporation to purchase the street railways on the terms agreed upon, and to manage the properties until the city can legally become the owner of the street railways. The plan is described as similar to that followed in the case of the Capital Electric Co. at Springfield, Ill., the laws of Illinois not permitting cities to conduct a commercial lighting business. V. 63, p. 926.

**Dominion Coal Co.—Called Bonds.**—The following 6 per cent first mortgage bonds due March 1 1913, have been drawn for payment, viz.: 51 bonds for \$1,000 each and 15 bonds for \$500 each. The said bonds will be paid at the office of the New England Trust Co. in Boston on presentation, at 110 and accrued interest, the interest to cease June 1 1899.—V. 63, p. 427.

**Erle Telegraph & Telephone Co.—Listed.**—The New York Stock Exchange has listed \$2,000,000 additional collateral trust 5 per cent gold debenture sinking fund coupon bonds of 1906, for \$1,000 each, making total amount listed to date, \$3,905,000 (\$95,000 bonds having been retired by sinking fund). Against the entire issue of \$4,000,000 bonds certified to, the Trustee holds as collateral \$1,195,100 Cleveland Telephone Co. stock, \$2,581,200 Northwestern Telephone Exchange Co. stock, \$2,223,700 Southwestern Telegraph &

Telephone Co. stock. The entire paid-up capital of the respective companies is at present as follows: Cleveland Telephone Co., \$2,400,000; Northwestern Telephone Exchange Co., \$3,700,000; Southwestern Telegraph & Telephone Co., \$4,429,000. The percentage of total capital stock of each sub-company owned by the Erie Telegraph & Telephone Co. is as follows: Cleveland Telephone Co., 70.83 per cent; Northwestern Telephone Exchange Co., 78.91 per cent; Southwestern Telegraph & Telephone Co., 70 per cent. All the subordinate companies are kept free from bonded debt as provided in the trust deed.—V. 68, p. 979.

**Flint & Pere Marquette RR.—Chicago & West Michigan Ry.—Detroit Grand Rapids & Western RR.—Consolidation.**—A plan for the consolidation of these companies has been formulated by a committee consisting of William W. Crapo, Mark T. Cox, John M. Graham, Charles M. Heald, Charles Merriam, Oliver W. Mink, Thomas F. Ryan and Nathaniel Thayer. The directors of the three companies have approved the plan and the committee has agreed to act in carrying it out. The plan provides that the new company shall be authorized to issue common stock, \$16,000,000; 4 per cent non-cumulative preferred stock (the issue to be subject to increase only with the consent of a majority of each class of stock), \$12,000,000. The \$24,811,465 existing bonds and \$533,000 equipment obligations of the three companies are not to be disturbed for the present. The company may, however, create a consolidated mortgage to secure an issue of 4 per cent bonds, and providing, among other things, for the ultimate retirement of part or all of the existing bonds and car-trust obligations. The amount of bonds which may be issued under such mortgage shall be fixed by the committee.

The shares of the old companies will receive:

Flint & Pere Marquette preferred, new preferred dollar for dollar.  
Flint & Pere Marquette common, \$125 new common for \$100 old.  
Detroit Grand Rapids & Western preferred, \$120 new preferred for \$100 old.

Detroit Grand Rapids & Western common, new common dollar for dollar.

Chicago & West Michigan stock, new common dollar for dollar.

The above exchange will require \$10,162,200 of the preferred and \$14,115,500 of the common stock of the new company, leaving to be sold or to remain in the treasury about \$1,837,800 new preferred and \$1,854,450 new common. The plan can be declared operative when a majority of the stock of each of the three companies has been deposited.

The shares of stock of the several companies must be deposited on or before June 20, after which date deposits will be received only subject to such terms as the committee may from time to time impose. See notice in another column.—V. 68, p. 976.

**Ford Franchise Tax Bill.—Substitute Bill Passed.**—On Thursday the New York Legislature, in special session assembled, passed the substitute proposed by Governor Roosevelt for the Ford Franchise Tax Bill. The new bill applies to the same class of companies as the original bill (see V. 68, p. 888), and like it taxes franchises as real estate. The later Act, however, provides that "the State Board of Tax Commissioners shall annually fix and determine the valuation of each special franchise subject to assessment." The new bill further makes allowance as follows for existing taxes on gross earnings, etc.:

If it shall appear that the person, copartnership, association, or corporation affected has paid to such city, town, or village for its exclusive use within the next preceding year, under any agreement therefor, or under any statute requiring the same, any sum based upon a percentage of gross earnings, or any other income, or any license fee, or any sum of money on account of such special franchise, granted to or possessed by such person, copartnership, association, or corporation, amounts so paid for the exclusive use of such city, town, or village, except money paid or expended for paying or repairing of pavement of any street, highway, or public place, shall be deducted from any tax based on the assessment made by the State Board of Tax Commissioners, for city, town, or village purposes, but not otherwise; and the remainder shall be the tax on such special franchise payable for city, town, or village purposes.

It is predicted that the revenue from the new Act will be from \$15,000,000 to \$17,000,000, as against \$23,000,000 which the original Ford bill would have produced. The Act will take effect on the 1st day of October, 1899. The Governor signed the bill yesterday.—V. 68, p. 871.

**General Electric Co.—Westinghouse Electric & Manufacturing Co.—Dividend on General Electric Common.**—The directors of the General Electric Co. on Monday declared a dividend of 1½ per cent on the common stock, payable July 15 to stockholders of record June 30. This is the first dividend declared on the common shares since the reduction of the capital stock from \$34,712,000 to \$20,827,200, of which \$18,276,100 is common stock.

**General Electric's Demurrer Sustained.**—At Utica on Monday Judge Cox filed his decision sustaining the demurrer of the General Electric Co. in the suit filed last March by the Westinghouse Company. Judge Cox says in part:

The contract provides for a broad interchange of licenses, carefully guarding, however, the vested rights of existing licensees. As to them the situation was delicate and complicated, and it was evidently deemed best to leave it precisely as it existed before the contract was signed. They gained no new rights and lost no existing rights by reason of the agreement between their principals. That the defendant could have sold the multiphase apparatus to its New York licensee prior to March 31, 1896, is beyond dispute. It can do so now will be recognized that it will not make such sales. The agreement prior to March 1, 1896, for such a covenant. In making the sale in suit, it takes the same risk now.

The Court understands that the complainant does not pretend that the contract contains an express covenant not to sell, but it is argued that this agreement may be implied. In order to reach such a con-

struction it is necessary to torture the provision that sales by defendant to the New York company of multiphase apparatus shall not be deemed to be authorized by the agreement, and the provision that such apparatus shall not be licensed under the Tesla patents into a positive covenant that defendant will not make such sales. No rule of interpretation familiar to the Court will permit this to be done. There is a vast difference between a provision which declines to sanction an act and one which forbids it. The one is passive and inert; the other active and enforceable.—V. 68, p. 571.

**Grand Rapids Belding & Saginaw RR.—New Mortgage.**—This company, which has acquired the Lowell & Hastings RR., extending from Lowell to Freeport, Mich., 18 miles, and proposes to extend the line from Lowell to Belding, Mich., 17 miles, has made a mortgage for \$260,000 to the International Trust Co. of Boston, as trustee.

**Houston & Texas Central Ry.—Purchase Authorized.**—Governor Sayers has authorized the company to purchase the property and franchises of the following companies:

Central Texas & Northwestern Ry., which is 12.31 miles in length, and has outstanding \$200,000 stock and \$180,000 bonds.

Fort Worth & New Orleans Ry., which is 10.0 miles long, and has outstanding \$300,000 stock and \$700,000 bonds.

Lancaster Gap RR., 4.76 miles in length.

Austin & North Western RR., which is 106.66 miles in length, and has outstanding \$1,016,000 stock and \$1,920,000 bonds.

Granite Mountain & Marble Falls RR., which is 6.69 miles in length and its stock, bonds and valuation are embraced in those of the Austin & Northwestern RR.

The aggregate length of all these railways is 171.37 miles. The aggregate amount of their stock and bonds is \$4,335,000. Their aggregate value, as fixed by the State Railroad Commission, is \$3,533,891. The Act provides that the Houston & Texas Central Ry. Co. may issue additional bonds to the amount of the value as so fixed.

A suit is pending in the State District Court at Austin to forfeit the charter of the Austin & North Western Railroad Company, on the ground that the road has been substantially consolidated by the Southern Pacific Company of Kentucky, which is the owner of nearly all of its stock, in violation of sections 5 and 6 of article 10 of the State Constitution. The act provides that if the Houston & Texas Central shall purchase the Austin & Northwestern, it shall do so subject to all the rights of the State as determined by said suit. The Act further authorizes the construction of a railroad from a connection with the Austin & Northwestern RR. in Burnet County to the town of Lampasas.—V. 68, p. 871.

**International Navigation Co.—New Directors.**—William L. Elkins and P. A. B. Widener of Philadelphia, have been elected directors of the company. They are said to have recently acquired a large block of the company's stock.—V. 68, p. 671.

**International Silver Co.—Purchase of Middletown Plate Co.**—The Middletown Plate Co., capitalized at \$250,000, has been purchased for cash by the International Silver Co. Coupons of the International Silver Company's 6 per cent gold mortgage bonds due June 1 will be paid on that date by Thomas & Post, 71 Broadway.—V. 68, p. 334.

**International Traction Co. of Buffalo, etc.—Official Statement.**—This company, recently organized, has acquired the Buffalo street railways, the railways leading from Buffalo to Niagara Falls and Lockport and the Niagara Falls Railway and Suspension bridges, as well as the Canadian trolley road. The capitalization of the company is to be \$5,000,000 4 per cent preferred stock and \$15,000,000 common. There will also be an issue of 4 per cent collateral trust bonds, but particulars are not yet available. The bond issues of the constituent companies are not to be disturbed at present. The following is a list of these constituent companies, with their outstanding securities:

Names of companies.		Existing bonds.	Existing stock.
<b>RUFFALO PROPERTIES—</b>			
Buffalo Railway Co.		\$1,083,500	\$3,370,500
Cross-town Street Ry Co. of Buffalo.		2,810,000	2,880,000
The Buffalo Traction Company		600,000	600,000
<b>INTER-URBAN PROPERTIES—</b>			
Buffalo Bellevue & Lancaster Ry. Co.		215,000	90,000
Buffalo & Niagara Falls Electric Ry.		8,600	1,250,000
Buffalo & Lockport Railway		500,000	1,000,000
Elmwood Ave. & Tonawanda Elec. Ry.			14,125
<b>TONAWANDA PROPERTY—</b>			
Buffalo Tonawanda & Niagara Falls Electric Railroad Company			1,500,000
<b>NIAGARA FALLS PROPERTIES—</b>			
Niagara Falls & Suspension Bridge Ry. Co.		518,000	600,000
Niagara Falls Whirlpool & North Ry.		2,250	50,000
<b>INTERNATIONAL BRIDGE PROPERTIES—</b>			
a. Niagara Falls Suspension Bridge Co.			
b. Clifton Suspension Bridge Co.		300,000	400,000
c. Lewiston Connecting Bridge Co.			
d. Queenston Heights Bridge Co.		125,000	400,000
<b>CANADIAN PROPERTY—</b>			
Niagara Falls Park & River Ry.		600,000	600,000

Total \$12,690,000 \$14,739,625

Officers—President, W. Cary Ely; Vice Pres., Daniel S. Lamont; Sec. and Treas., Richard F. Auking; Gen. Manager, Hurl Van Horn. Executive Committee—Chas. H. Coster, Francis Lynde Stetson, Daniel S. Lamont and Wm. B. Rankine of New York; W. Cary Ely and Hurl Van Horn of Buffalo; and T. De Witt Cuyler of Philadelphia.—V. 68, p. 524, 571.

**Kansas City Pittsburg & Gulf R.R.—Reorganization Notice.**—The committee of which William F. Harity is chairman makes the following announcement:

Your committee deems it essential for the preservation of the value of your securities—first, that the securities covering the main line and the Kansas City and Fort Arthur terminals be now merged and consolidated under one management; second, that such management be independent and in your interest alone. Your property is of great value. It has an assured and a very large earning power. In the consolidation we expect to receive the support of the foreign holders of all the securities affected. The foreign holders are, we are informed, a majority of the whole. Your committee asks the holders o

the securities of the main line and terminal companies to furnish their addresses and the amounts of their respective holdings to the chairman, care of Equitable Trust Company of Philadelphia. They will thereafter be promptly informed when the plan is ready for publication.—V. 68, p. 871.

**Lehigh Coal & Navigation Co.—Listed in Philadelphia.**—There have been listed on the Philadelphia Stock Exchange \$1,85,000 series "A" funding and improvement 4 per cent gold bonds due July 1 1948. Full particulars regarding the loan were in V. 66, p. 1189 (under Delaware Division Canal) and V. 67, p. 125. The proceeds of the bonds now listed, together with other moneys, were used in taking up \$480,000 Delaware Division Canal Co. first mortgage 6½ bonds maturing July 1, 1898, but extended to July 1, 1948, and deposited with the trustee as additional security for the funding and improvement loan; also, in taking up a mortgage of \$320,000 on coal lands west of the Little Schuylkill River, upon which coal lands the funding and improvement bonds are now a first lien; and to pay \$320,000 construction account due the Central Railroad Company of New Jersey for construction work prior to July 1, 1898. An additional \$1,000,000, Series "A," issued by the trustee, July 1, 1898, are reserved in the treasury to provide for floating debt and working capital.—V. 68, p. 565.

**Long Island R.R. Brooklyn Rapid Transit Co.—New Route to Jamaica.**—The new route to Jamaica over the Brooklyn Elevated and Long Island R.R. was to be opened on Tuesday, but the city authorities in charge of the bridge declined to allow the Long Island trains to cross the Brooklyn Bridge. It is believed the matter will shortly be arranged. During the rush hours express trains will be run from Jamaica to the Brooklyn Bridge on five minutes' headway, the running time being thirty minutes.

**Mortgage Filed.**—The Long Island R.R. Co. has filed its mortgage for \$45,000,000 in favor of the United States Mortgage & Trust Co. as trustee. See advertisement in last week's CHRONICLE.—V. 68, p. 975, 977.

**Manufactured Rubber Co.—On Unlisted in Philadelphia.**—The company's 20,000 shares of preferred stock, par \$50, \$10 paid, and 100,000 shares of its common stock, par \$50, full paid, have been admitted to the unlisted department of the Philadelphia Stock Exchange. The company's office is in the Drexel Building, Philadelphia. See last week's CHRONICLE.—V. 68, p. 977.

**Missouri Pacific Ry.—St. Louis Iron Mountain & Southern Ry.—Meeting to Authorize New Securities.**—The stockholders of the St. Louis Iron Mountain & Southern Ry. Co. will vote June 26 upon the following proposals: 1. To increase the capital stock by the amount of \$40,000,000. 2. To increase the bonded indebtedness by the amount of \$40,000,000 for the purpose of making provision for retiring the 5 per cent gold funding notes and the Iron Mountain Car Trust certificates of the company, and for acquiring the second mortgage bonds of the Texas & Pacific Railway, etc. The purposes to which the new loan will be applied were described at length in V. 63, p. 619.—V. 68, p. 824.

**National Light & Power Co.—Incorporated.**—This company was incorporated at Trenton, N. J., on May 3 with authorized capital stock of \$15,000,000. Incorporators: Karl Roswell Miner, of New York; Frederick L. Austin, of Jersey City, and Frank V. Dobbins, of Rahway, N. J. New Jersey address, 26 Washington St., Jersey City.

**National Tube Co.—Consolidation Practically Consummated.**—The consolidation of the tube and pipe manufacturers was virtually consummated on Thursday. The new company will be known as the National Tube Co. and will be authorized to issue: Seven per cent cumulative preferred stock, \$40,000,000; common stock, \$40,000,000. The quick assets, including cash, are reported as over \$14,000,000. The new company will include thirteen companies as follows:

National Tube Works Co.,  
Riverside Iron Works,  
Pennsylvania Tube Co.,  
American Tube and Iron Co.,  
National Galvanizing Co.,  
Chester Tube & Iron Co.,  
Old City Tube Co.,

Cochran Tube Works,  
Syracuse Tube Co.,  
Allison Manuf'g Co. (Tube Mills),  
Morris Tacker & Co. (Del. Iron Co.),  
Ohio Tube Co.,  
Oil Well Supply Co. (Contin'g T.W.).

The above properties are said to represent about 90 per cent of the entire industry in this country and to have an aggregate annual output of 1,200,000 tons. The officers elected Thursday are:

**Directors.**—Joshua Rhodes, J. J. Vandergrift, William B. Rhodes, F. J. Hearne, J. N. Vance, John Eaton, Francis L. Putta, F. R. Tobey, Jonathan Rowland, Daniel O'Day, A. S. Matheson, O. C. Barber, Henry Aird, John Don, Edmund C. Converse, Horace Crosby, Wm. Nelson Cromwell, D. W. Hitchcock, A. F. Luke, W. J. Curtis.

**Officers.**—President, Edmund C. Converse; Chairman of the Board, Joshua Rhodes; First Vice-President, F. J. Hearne; Second Vice-President, Horace Crosby; Third Vice-President, Francis L. Putta; General Manager, A. S. Matheson; Treasurer, New York (A. F. Luke of Boston is being urged to accept this place); Asst. Treasurer (Pittsburg), Wm. H. Latham; General Counsel, Sullivan & Cromwell.

The bankers financing the consolidation are J. P. Morgan & Co.—V. 68, p. 616.

**New Orleans Brewing Association.—Reorganization Plan.**—This company, whose \$1,600,000 of capital stock and \$1,600,000 of 6 per cent first mortgage bonds of 1890 are listed on the New Orleans Stock Exchange, is in default on its coupons. The following plan of reorganization was adopted at a meeting of the bondholders on May 8:

"The plant being offered for sale, we propose that the present bondholders pool their holdings and buy the plant, inviting both the stockholders and creditors to lend their cooperation. For each \$1,000 bond (with June coupon attached)

shall be given \$800 in preferred 5 per cent cumulative stock and \$200 in common stock. Shareholders and common creditors contributing \$10 per share or per \$100 claim to receive \$11 in preferred stock and \$30 in common stock; those contributing \$5 to receive \$5.50 in preferred stock and \$40 in common stock, and those contributing nothing, but who nevertheless join in the plan, to receive \$20 in common stock as a consideration for their friendship and good-will.

"Whatever money is required, to be procured by mortgage upon the plant, the maximum amount not to exceed \$600,000.

"The preferred stock is to be entitled to the selection of the majority of the board of directors, and in case of liquidation is to have a prior lien on the assets of the corporation to the extent of par, and any excess to go to the common stock until it also shall have received par, and anything remaining to be divided equally among all the stock. After the dividend on the preferred stock shall have been paid, before any dividend on the common stock can be declared a sinking fund of \$20,000 per annum is to be provided for the redemption of the bonded debt.

"Reorganization having taken place, the preferred stock will have the right to decide by a majority vote of three-fourths to sell the plant, and in case the net amount realized from said sale should be par or more of the total issue of the preferred stock, then the common stock is to receive one-eleventh of the amount so received; should the net amount realized be 90 per cent of the preferred stock two-twenty-fifths of said amount is to go to the common stock; and in case the net amount realized be 80 per cent or less of the preferred stock, then one-sixteenth of said amount is to go to the common stock; finally, should the net amount so realized exceed par of the preferred stock by 10 per cent or more, then the preferred stock is to receive par, the common stock 10 per cent and the remainder is to be divided equally among all the stock."

The plan is signed by George Q. Whitney, F. J. Gasquet, F. Vatter, M. Abascal, Chas. Hershheim, G. Ad. Blaffer and Fernand Lapeyre, ex officio.

**New York Electric Vehicle Transportation.—Installation.**—The second \$5 instalment on the outstanding shares of \$100 each was payable, it is stated, on May 8, making the shares 10 per cent paid. The authorized issue is \$25,000,000, of which \$15,000,000 is understood to be outstanding.—V. 68, p. 429.

**New York Gas & Electric Light Heat & Power Co.—Bonds Offered.**—The Central Trust Co., by advertisement on another page, invites subscriptions at 110½ and accrued interest from June 1 to \$5,000,000 of the company's \$15,000,000 first mortgage 50-year 5 per cent gold bonds. President Anthony N. Brady, of the New York Gas & Electric Light Heat & Power Co., says in substance:

"This company owns or controls the following companies, viz: The Mount Morris Electric Light Co., the North River Electric Light & Power Co., the New York Heat Light & Power Co., the Yonkers Electric Light & Power Co., the Borough of Manhattan Electric Co., the Block Lighting & Power Co. No. 1, the Manhattan Lighting Co., the Consolidated Telegraph & Electrical Subway Co., and the Edison Electric Illuminating Co. of New York. Its equity in the Edison Company over and above the purchase money mortgage given by it therefor is estimated at not less \$10,000,000.

By special act of the Legislature the business of transmitting all electric currents in the boroughs of Manhattan and the Bronx in the City of New York for light, heat and power, whether for commercial, domestic, or municipal purposes, is under a contract with the city, dated April 7, 1887, and which has been repeatedly ratified and confirmed by subsequent legislation, required to be carried on by means of conductors placed under ground in the subways of the Subway Company, of which this company owns nearly the entire capital stock. It now has in the Borough of Manhattan nearly 800 miles of subways for high-tension conductors, constructed at a cost of nearly \$6,500,000 (having an annual rental value of nearly \$750,000), through which the high-tension electrical business of the city is carried on by means of 750 miles of conductors placed therein; besides which the low-tension conductors of the Edison system have in active use nearly 250 miles of special tubing and cables. This company possesses in perpetuity virtually the exclusive right to carry the cables and wires used in all the electric lighting, heating, and power business of the city, which right becomes more valuable year after year as the demand for electricity, entering as it does into almost every branch of commercial life and industry, increases.

The property includes not merely valuable rights, franchises and contracts, but the good will of existing business, making immediate return certain, and which in the near future is capable of great and assured enlargement. By reason of the consolidation, marked economies and increased facilities in operation can be immediately effected and its revenues largely increased. The value of the consolidated properties we consider fully equal to the par value of the capital stock and of the bonds of this company, and their earning capacity will be more than sufficient for the payment of all its interest obligations.

The stocks, bonds and other property securing the company's issue of bonds were described in the CHRONICLE of April 22 and 29, pages 773 and 824.

The Central Trust Company announced yesterday that the subscriptions to the bonds had been closed, all the bonds having been subscribed for.—V. 68, p. 928.

**Norfolk & Western Ry.—Listed.**—The New York Stock Exchange has listed \$1,512,000 additional first consolidated mortgage 4 per cent gold bonds of 1896, making total amount listed to date \$24,828,600. The first consolidated mortgage of 1896 reserved \$9,690,511 of bonds to be issued for new construction and acquisitions and for betterments and improvements at a rate not exceeding \$1,000,000 per annum. The company, since Oct. 1st, 1898, has expended for rolling stock, replacing wooden trestles with steel structures, and other such purposes, an amount exceeding \$1,738,000, and has applied the proceeds from \$1,500,000 of the bonds now listed to reimbursement of the treasury for such expenditures. The company has no floating debt.—V. 68, p. 619.

**Northern Pacific Ry.—Listed.**—The New York Stock Exchange has listed \$1,151,000 additional prior lien 4 per cent bonds of 1897, making total amount listed to date \$58,921,000. Of the additional bonds \$1,000,000 are issued against part of the \$1,928,000 of general first mortgage bonds, drawn July 14, 1898, for the sinking fund, and \$151,000 were exchanged for \$131,000 par value of said general first mortgage bonds. There are \$5,375,000 of general first mortgage bonds now held by the public, exclusive of those called for redemption, up to and including May 15, 1899.—V. 68, p. 978.

**Oakland Transit Co.—New Bonds.**—E. H. Rollins & Co. are reported to have purchased nearly the entire issue of the company's \$1,400,000 six p. c. gold bonds.—V. 68, p. 673.

**Ogdensburg Transit Co.—Rutland RR.**—The committee representing the bondholders of the Ogdensburg Transit Co. announced under date of May 10 that it had accepted an offer of 70 and interest for the bonds on behalf of holders, who should present their bonds at the office of F. H. Prince & Co., Boston, Mass., on May 20. Those so presenting their bonds received 70 and accrued interest, less one per cent for expenses incurred by the committee. The offer was made in the interest of the Rutland RR., as stated last week.—V. 68, p. 978.

**Port Norfolk (Electric) Ry.—Securities Purchased.**—A Baltimore syndicate including, it is stated, stockholders of the Norfolk Street RR., has purchased a controlling interest in the road's \$110,000 stock and \$200,000 bonds. The property is in receiver's hands. The line, it is said, will be extended by the new owners.—V. 67, p. 957.

**Rapid Transit in New York City.—Mr. Orr Re-elected President.**—Alexander E. Orr was re-elected President of the Rapid Transit Commission on Tuesday, and on Wednesday sailed for Liverpool, to be gone until the middle of September. Before leaving he expressed the hope that all obstacles to the construction of the underground railway by the city would be removed. Mr. Claffin recently resigned from the Commission to make room for Mr. Orr. On Saturday last the Commission sent to Mayor Van Wyck a letter seeking to ascertain the attitude of the administration to the project, and urging that no other public work should be allowed to take precedence of it. After referring to the new assessment, the letter says:

"It is hoped that the constitutional amendment to be voted on by the people next November will still further reduce the existing city debt so as to make the debt limit no longer an obstruction to rapid transit or to any other municipal improvement. But whether that amendment shall be adopted or not, and whatever may be its effect if adopted, it seems to be clear, upon the information communicated to us by the Commissioner, that the new assessment, with the large annual income, now \$12,000,000 or \$13,000,000, from sinking fund, will enable the city to construct the rapid transit road without interfering with any other necessary improvement."—V. 68, p. 872.

**Rockaway Electric Ry.—Cross Country (Electric) RR.—Jamaica Bay Turnpike Co.—Incorporated.**—These three companies filed certificates of incorporation at Jamaica on Monday. The Rockaway Electric Ry. Co., with a capital of \$250,000, proposes to build a double-track road through Rockaway Beach, ending at Hammel's Station. The Cross Country RR., with a capital of \$250,000, intends to build a double-track road 15 miles in length, from Willett's Point through College Point and Flushing to Jamaica on the Brooklyn city line. The Jamaica Bay Turnpike Co., with a capital of \$100,000, will build a causeway seventy-five feet wide across Jamaica Bay from Rockaway Beach to "Old Mill Creek," near Aqueduct station, a distance of 4 miles, to accommodate a double track electric railroad, a driveway and a bicycle path.

**St. Louis Southwestern Ry.—Purchase of Tyler South-eastern Authorized.**—Governor Sayers of Texas has signed the bill authorizing the Texas company to purchase the subsidiary line known as the Tyler Southeastern Railway, extending from Tyler to near Lufkin, Texas, a distance of 88 miles. The stock and bonds of the Tyler & Southeastern are all owned by the consolidated St. Louis Southwestern.—V. 68, p. 573.

**Sandusky (O.) Gas & Electric Co.—Bonds Offered.**—Chas. D. Barry & Co. of Philadelphia offer for sale at par and interest \$400,000 of the company's first mortgage 5 per cent 30-year gold bonds, dated May 1, 1899, due May 1, 1929, interest payable May 1 and Nov. 1. State Trust Co. of New York mortgage trustee. A circular says:

The Sandusky Gas Light Co. (organized in 1854) absorbed in March, 1899; the Sandusky Electric Light Fuel Gas & Supply Co., which from 1896 had been conducting an electric business. In 1887 the North Western Ohio Natural Gas Co. installed an extensive system of mains, but the supply of natural gas having become exhausted, its mains have been idle since 1896. This issue of bonds is made to cover the consolidation of all the above properties, and to provide for betterments. It will be a first and only mortgage on the entire property. The gross earnings for the year ending April 1, 1899 were: Gas, \$31,834; electric, \$39,316; total, \$71,154; or an increase of about 16½ per cent over 1897-98; net earnings, \$31,377, or over 40 per cent more than the present interest charge. Price of gas \$1.25 for lighting purposes and but 80 cents for fuel. The addition of 3½ miles of natural gas mains, and about 2,400 existing services, to customers already educated to the use of fuel gas, will mean a great increase of business.

Of the new bonds \$100,000 are reserved for improvements and additions.

**Shelby Steel & Tube Co.—Purchase.**—The "Hartford Courant" on May 19 said, "The important announcement can be made this morning that the Shelby Steel & Tube Co.

has consummated the purchase of the Pope Tube Works of this city and the Albany, Ind., tube works. This gives the company thirteen tube plants and a complete monopoly of every seamless tube mill in the United States. The name of the Shelby Steel & Tube Co. will be continued. There are now about 300 men at work for the Pope Tube Co. The contract provides for the deal to go into effect on July 1."

The Shelby Steel & Tube Co. was incorporated under the laws of Pennsylvania on Oct. 28, 1897, with \$5,000,000 capital stock, and obtained control, it was said, of 87-90 per cent of the countries output.—V. 65, p. 1025.

**Sioux City O'Neill & Western Ry.—Foreclosure Sale.**—The sale is set for May 26 at South Sioux City.—V. 68, p. 674.

**Southern Railway.—Listed.**—The New York Stock Exchange has listed \$2,709,600 additional voting trustees' certificates for preferred stock, making total amount listed to date \$60,000,000, the full amount authorized. "Said shares have been issued to provide in part for the cost of \$3,505,700 capital stock [of the total issue of \$3,622,500] of the South Carolina & Georgia RR. Co., recently acquired by this company. The earnings of the South Carolina & Georgia Company in the fiscal year ended June 30, 1898, exceeded its fixed charges and rentals by about \$132,000."—V. 64, p. 979.

**Southern States Lumber Co.—Called Bonds.**—Fifteen first mortgage bonds numbered 9, 68, 69, 103, 142, 175, 219, 273, 276, 305, 367, 390, 430, 465 and 518 have been drawn for the sinking fund and will be paid at the rate of \$1.025 per bond with accrued interest, at the office of the Kuickerbocker Trust Co. on July 1st, 1899, after which date the bonds will cease to bear interest.—V. 67, p. 843.

**Standard Metal Co.—Consolidation.**—The company's prospectus was cited last week. The authorized capital stock will be \$5,200,000, of which \$1,800,000 will be 7 per cent cumulative preferred and \$3,400,000 will be common stock. Of the preferred \$50,000 will be held as treasury stock.—V. 68, p. 979.

**Terre Haute Electric Street Ry.—Foreclosure Sale June 21.**—The foreclosure sale is advertised for June 21. The property will be sold free of all incumbrances, except certain street assessments, receivers' certificates, and taxes. The advertisement says:

In the event the trustees in the mortgage of July 1, 1892, shall become the purchaser of the street railway system, they will be required to pay \$44,000 of their bid in cash. In the event the trustees in the mortgage of July 2, 1894, shall become the purchaser of the electric light and power and steam heating and power systems, they will be required to pay \$11,000 of their bid in cash.—V. 68, p. 929.

**Terre Haute (Ind.) Water Co.—Called Bonds.**—N. W. Harris & Company give notice that the Terre Haute Water Company has called for payment on June 1st next its entire outstanding issue of 6 per cent first mortgage bonds.

**Texas & New Orleans RR.—Consolidation.**—Gov. Sayers has signed the bill authorizing the acquisition by the company of the Louisiana Western Extension RR., extending from Orange to Sabine River, 67 miles, and also of the Sabine & East Texas Railway and the Texas Trunk RR., provided that within five years a connecting line shall be built to form with these last a continuous line of railroad from Dallas, Tex., to the present terminus of the Sabine & East Texas Ry. at or near Sabine Pass. The bill provides that the Texas & New Orleans RR. Co. may issue additional bonds to an amount equal to the value of the property and the franchises and appurtenances of said railroad as determined by the State Railroad Commission. The bill also provides that the several railways to be purchased, and the road to be built under its authority, shall not be subject to any mortgages heretofore executed by the Texas & New Orleans Company.—See V. 67, p. 1309.

**Third Avenue RR. of New York City.—New Stock.**—The company has under consideration a plan for issuing at par to its stockholders a large block of capital stock. Edward Lauterbach is quoted as saying that the new issue will probably amount to something like \$20,000,000, about \$10,000,000 cash being needed to make the change in motive power from the cable to electricity on the Third Avenue line and the other roads controlled, and a like amount to fund the debt on the Union Railway, the Dry Dock & Battery and Forty-second Street & St. Nicholas Avenue railroads. The plan has yet to be passed upon by the board of directors.—V. 63, p. 926, 929.

**Toledo Gas Works.—Bids Wanted for Operation of City Plant.**—The City Clerk of Toledo has been authorized to advertise for bids for the operation of the plant, the profits to be turned into the city treasury. It is reported that a syndicate stands ready to take the plant on these conditions for four years. The plant is valued at a million and a-half and, it is stated, has never paid.

**Trust Company of America, New York City.—New Company Organized.**—This new company was incorporated at Albany on Tuesday, with \$2,500,000 capital stock and \$2,500,000 surplus. The company's offices will be in the Singer Building, 149 Broadway. Other facts appear on a preceding page.

**United States Worsted Co.—Pending Consolidation.**—This company was incorporated in New Jersey in April, 1899, with \$70,000,000 of authorized capital stock, consisting of \$40,000,000 common and \$30,000,000 preferred. A report from Philadelphia says that nineteen worsted yarn spinners, including most of the largest spinners in the country, have agreed to enter the trust. Among those assenting to the plan of consolidation are said to be the following:

Thomas Wolstenholme Sons & Co., John Dearnly & Co., George Campbell & Co., Phoenix Mills Company, Yewdall & Jones Bros., and T. B. & B. W. Fleischer, all of Philadelphia; Griewold Worsted Company, of Darby, Pa., and W. H. Grundy & Co., of Bristol, Pa.—V. 68, p. 830.

**United Traction & Electric Co. (Providence, Etc.).—New Company.**—An Act was introduced in the Rhode Island Legislature on May 23 to incorporate the Rhode Island Suburban Railway Co. with a capital of \$3,500,000, to take over the rights acquired by the United Traction & Electric Co. in the Warwick & Oakland Beach Branch of the New York New Haven & Hartford RR. and to obtain similar rights on the Bristol branch. This is preparatory to operating electric railways on both sides of Narragansett Bay.—V. 68, p. 525.

**Washington (D. C.) Gas Co.—Offer Withdrawn.**—Owing to the opposition to the terms offered, the purchasing syndicate has notified the McLean committee that Mr. Gorham will not exercise the privilege to purchase the company's stock at \$60 per share. Stockholders who deposited their stock will have it returned to them, and the regular dividend will be paid.—V. 68, p. 930.

**Washington (D. C.) Traction & Electric Co.—City & Suburban Ry.—Consolidation.**—The "Washington Traction & Electric Co." is the name of the new company which will take over the various electric-light and street railway properties which have been acquired by the syndicate headed by the United States Mortgage & Trust Co. A press dispatch to the Philadelphia "Ledger" says: "It is understood that the negotiations for the purchase of the stock of the City & Suburban Railway Co. of Washington, D. C., have been consummated and that the stock is now being paid for at the rate of \$50 a share, which is par, by the syndicate which recently acquired the Metropolitan Street Railroad, Columbia Railway, Anacostia Railway, and all other lines in Washington except the Capital Traction Co. The syndicate controls two electric-light plants also and will shortly merge them into one company."

"The consolidated company [the Washington Traction & Electric Co.] will issue \$20,000,000 of 4½ per cent bonds and \$10,000,000 of stock. There will be reserved between \$7,000,000 and \$8,000,000 of the bonds to retire underlying liens as they mature, leaving between \$12,000,000 and \$13,000,000 to be floated. The securities have already been underwritten by a syndicate of Baltimore, Philadelphia and New York financial institutions and capitalists. It is understood that the consolidation will be effected within a few weeks."—V. 68, p. 824; V. 67, p. 633.

**Wheeling & Lake Erie RR.—Cleveland Canton & Southern Ry.—Proposed merger and new mortgage.**—A meeting of the Wheeling & Lake Erie stockholders will be held in June to approve of the purchase of the Cleveland Canton & Southern and the Cleveland Belt & Terminal, and to authorize a mortgage of \$15,000,000 to cover the combined properties. Under this mortgage it is proposed to issue four per cent bonds and to offer such terms to the present first mortgage W. & L. E. bonds as will induce the holders to exchange for the new issue. The disposition of the new bonds, it is learned officially, will be as follows:

To retire present first mortgage 5s.	\$8,400,000
To retire equipment trust and purchase new equipment.	1,200,000
For Cleveland Canton & Southern and Cleveland Belt and Terminal Co.	4,000,000
For extension of the Cleveland Belt & Terminal Company improvement of terminal in Cleveland, reducing grades and extending Wheeling & Lake Erie.	1,400,000
Reserve in treasury	2,000,000

Total issue.....\$15,000,000

By these acquisitions the Wheeling & Lake Erie RR. Co. secures an entrance of its own into Cleveland and important terminal facilities in that city. President Bickensderfer is quoted as saying:

There will be a great amount of improvement done during the next year. The directors have appropriated \$1,000,000 for this purpose, and the system will be put in first-class shape. The Wheeling has acquired by tail-purchase 201 miles of new road which will give us an outlet from the coal fields.

**Purpose of Meeting—Increase of Stock.**—The official advertisement gives the following as the propositions on which the stockholders of the Wheeling & Lake Erie RR. will vote on June 26:

1. The purchase of the railway and property recently owned by the Cleveland Canton & Southern Ry. Co. and recently sold at judicial sale, being a line of railway from Coshocton to Cleveland, Ohio, together with its equipment and branches, other than the Chagrin Falls branch, and all its rights, franchises and privileges.
2. The purchase of the property of the Cleveland Belt & Terminal Ry. Co., being a line of railroad in Cuyahoga County, Ohio, and all its equipment, rights, franchises and privileges, or a majority of the stocks and bonds of said company outstanding.
3. The refunding or payment of all outstanding bonds and indebtedness of or against the property of the Wheeling & Lake Erie RR. Co., including the bonded indebtedness against the Toledo Belt Railway property.
4. The purchase of new and additional equipment.
5. The improvement of the property of the company and the improvement, extension and completion of the properties so proposed to be purchased.
6. The increase of the capital stock of the Wheeling & Lake Erie RR. Co. from \$24,500,000 to \$37,500,000, which increased stock shall consist of \$3,000,000 of first preferred non-cumulative 4 per cent stock, \$5,000,000 second preferred non-cumulative 4 per cent stock and \$5,000,000 of common stock.
7. The issue of \$1,000,000 of gold bonds of the Wheeling & Lake Erie RR. Co., payable 85 days after date, bearing interest at the rate of 4 per cent per annum, payable semi-annually, and secured by mortgage upon all of the property, rights, franchises and privileges of said company, whether now owned or hereafter to be acquired.—V. 68, p. 571, p. 74.

For further Investment News see Page 1029.

## Reports and Documents.

### THE COLORADO & SOUTHERN RY. CO.

#### APPLICATION TO LIST THE NEW SECURITIES ON THE NEW YORK STOCK EXCHANGE.

NEW YORK, May 11, 1899.

The Colorado & Southern Railway Co. respectfully makes application to have placed on the regular list of the New York Stock Exchange \$17,500,000 of its First Mortgage Bonds, numbers 1 to 17,500, for \$1.00 each, in coupon form; and for the listing of Voting Trust Certificates for First Preferred Stock, \$3,500,000 (85,000 shares); Second Preferred Stock, \$4,500,000 (85,000 shares), and Common Stock, \$30,995,000 (309,950 shares).

The Colorado & Southern Railway Company was incorporated on December 19, 1898, by Certificate of Incorporation filed on that day in the office of the Secretary of State of Colorado, under the provisions of an Act to amend Chapter 19 of the General Statutes of Colorado, entitled "An Act to provide for the formation of corporations," approved April 7, 1885, and constituting Sections 614 and 615 of the General Statutes of Colorado.

The company was formed under and in pursuance of the Plan and Agreement of Reorganization of the Union Pacific Denver & Gulf Railway Company, dated September 29, 1898. A copy of such Plan and Agreement of Reorganization and a copy of the Certificate of Incorporation of the company are submitted herewith.

The Company has acquired in pursuance of said Plan and Agreement of Reorganization various lines of Railway formerly of the Union Pacific Denver & Gulf Railway Company (other than the Julesburg Branch), and the appurtenant franchises, and also the lines of railway and franchises formerly of the Denver Leadville & Gunnison Railway Company. The decree of foreclosure under which the properties of The Union Pacific Denver & Gulf Railway Company were sold was entered on September 13, 1898, and these properties were sold pursuant to the terms thereof on November 19, 1898, and the sale confirmed on November 21, 1898. The decree of foreclosure under which the properties of The Denver Leadville & Gunnison Railway Company were sold was entered on August 6, 1898, and the properties were sold pursuant to the terms thereof on November 18, 1898, and the sale confirmed on November 21, 1898.

The Colorado & Southern Railway Company took possession of these properties at midnight on January 11, 1899. The lines of railroad controlled by the new company are the following:

#### UNION PACIFIC DENVER & GULF LINES.

(Not including trackage over the Denver & Rio Grande lines, 58.65 miles.)

Denver to Greeley, via Boulder & Ft. Collins.....	98.73

1,085.61

The Julesburg Branch of the Union Pacific Denver & Gulf Railway has been sold to the Union Pacific Railroad Company and is now in possession of that company, which is operating the same. Provision has also been made in the First Mortgage hereinafter mentioned, that the Cheyenne & Northern line may be sold, the available proceeds, in the event of sale, to be applied towards the reduction of the new First Mortgage debt.

In accordance with the provisions of the Plan of Reorganization, The Colorado & Southern Railway Company has executed a Mortgage or Deed of Trust to Central Trust Company of New York, dated December 31, 1898, to secure an

issue of \$20,000,000 of bonds dated December 31, 1898, bearing interest from February 1, 1899, at the rate of Four per Cent per annum, maturing on February 1, 1929, both principal and interest payable in gold coin of the United States or equal to the present standard of weight and fineness. The bonds are in coupon form, for \$1,000 each, with the right of registration of principal. The coupons are payable August 1 and February 1 of each year at the office or agency of the company in the city of New York. The Transfer Agent for the registration of the bonds is Central Trust Company of New York, No. 51 Wall Street, New York.

This Mortgage is secured as a first lien on all the lines of The Colorado & Southern Railway Company and the appurtenant franchises and equipment, and is further secured by a lien on all other railroads which the company may acquire, subject to liens thereon at the time of such acquisition, and to purchase-money liens created in such acquisition, and on all lines of railroad and property that may thereafter be acquired by the use of First Mortgage Bonds.

Pending the completion of the reorganization, the entire issue of all outstanding Divisional Mortgage Bonds of the constituent companies entering into The Union Pacific Denver & Gulf Railway Company have been included in the First Mortgage and deposited with the Trustee of said First Mortgage, and the Mortgage provides (Article 6) in respect of the bonds so deposited with the Trustee, that whenever the Mortgagor shall, by proper resolution of its Board of Directors, so request, the Trustee shall cause such bonds to be canceled and any Mortgage securing the same to be satisfied of record.

These Divisional Mortgage Bonds are the following:

Company.	Description.	Amounts.
Colorado Central Railroad Co.....	First Mort. 7 per Cent..	\$4,723,000
Chicosa Canon Railway Co.....	" 5 " "	81,000
Canon de Agua Railroad Company.	" 5 " "	65,000
Georgetown Brock. & Lead. Ry. Co.	" 7 " "	127,000
Denver Marshall & Boulder Ry. Co.	" 5 " "	226,000
Greeley Salt Lake & Pacific Ry. Co.	" 7 " "	937,000
Cheyenne & Northern Railway Co.	" 5 " "	1,250,000

It is the purpose of the company, as soon as the necessary steps can be taken to accomplish this result, to have these bonds canceled by the Trustee, and the various Trust Deeds securing the same satisfied of record.

The total authorized issue of First Mortgage Bonds is \$20,000,000.

\$17,500,000 of said bonds have been issued and delivered to the Reorganization Committee, and have been distributed or are in course of distribution by said committee to the holders of Certificates of Deposit in respect of securities deposited under said Plan and Agreement of Reorganization, and to others who have become entitled thereto under contracts with the Reorganization Committee.

\$250,000 thereof are reserved to be issued upon the order of a majority of the members of the Reorganization Committee prior to January 1, 1900, but unless the issue shall be so ordered prior to January 1, 1900, these bonds are to be reserved and issued under the restrictions stated in the Mortgage for the purposes next hereinafter stated.

\$2,250,000 of said bonds are reserved to be certified, delivered and issued, under the restrictions stated in the First Mortgage, for new construction and acquisitions after January 1, 1900, and for other improvements and betterments after that date, and for the acquisition of coal properties; said bonds, except those used for the acquisition of coal properties, to be issued at a rate not exceeding \$300,000 in any year.

It is not anticipated that it will be necessary to issue for the purpose of reorganization the additional \$250,000 reserved for that purpose, and in that event the fixed charges of the Colorado & Southern Railway Company will be \$700,000.

The earnings of the Union Pacific Denver & Gulf lines and of The Denver Leadville & Gunnison lines for the year ending December 31, 1898, were:

Or as earnings (including Julesburg Branch).....	\$1,484,082 37
Net earnings (exclusive of Julesburg Branch, taxes deducted).....	980,013 49

Of the money raised under the Reorganization Plan, the Reorganization Committee holds, in cash, an amount sufficient to meet the expenditures necessary for the improvements, betterments and new construction contemplated by the plan. The company has no floating indebtedness or equipment or other obligations. A copy of the first balance sheet will be furnished as soon as possible.

The basis of exchange of securities under the Plan and Agreement of Reorganization is shown in the following table:

EXISTING BONDS, CERTIFICATES AND STOCK.				
Bonds and Funded Interest Certificates to bear all coupons maturing on and after November 1, 1899.	1st Mort. Bonds.	1st Pref. Stk. Tr. Certs.	2d Pref. Stk. Tr. Certs.	Com. Stk. Tr. Certs.
U. P. D. & G. Ry. Co. Cons. Mortgage Bonds.....	80%	30%	30%	.....
Denver Tex. & Gulf RR. Co.: First Mtg. Bonds.....	80%	55%	30%	.....
Den. Tex. & Ft. Worth RR. Co.: First Mtg. Bonds.....	80%	30%	30%	.....
Funded Interest Certificates..	.....	.....	100%	.....
U. P. D. & G. Ry. Co. Stock (privilege of purch. on payment of \$10 per share deposited)...	2 1/2%	5%	5%	100%
D. T. & Ft. W. RR. Co. Stock (priv. to purch. on payment of \$10 per share deposited)...	2 1/2%	5%	5%	100%

Percentages are based on the principal amount of the deposited Bonds and Funded Interest Certificates, and on the par of the deposited Stock. Scrip is issued for fractional amounts, but on conversion First Mortgage Bonds reserved against scrip will be delivered with unmatured coupons only, and on conversion Stock Trust Certificates reserved against scrip will not be entitled to dividends declared before conversion.

The Purchasing Committee acquired at the sale under the decree of foreclosure of the Union Pacific Denver & Gulf Railway 63,759 3/4 shares of the stock of the Fort Worth & Denver City Railway Company, a corporation of Texas operating a line extending from Texline to Fort Worth, Texas, about four hundred and fifty miles, the bonded indebtedness of which is \$8,176,000 First Mortgage Bonds and \$160,000 Equipment Trust Bonds, and the stamped stock of which is \$2,555,000. The Reorganization Committee will turn over to the new company, in addition to the improvement fund already mentioned, a substantial working capital.

The capital stock of the New Company is as follows:

\$8,500,000 First Preferred Four Per Cent Non-Cumulative.
\$8,500,000 Second Preferred Four Per Cent Non-Cumulative.
\$31,000,000 Common.

All the stock is divided into shares of \$100 each, and all classes of stock have the same voting power.

All the stock, including both classes of Preferred and the Common, except 50 shares of Common Stock, is held by Messrs. Grenville M. Dodge, Frederic P. Olcott, Harry Walters, Henry Budge and J. Kennedy Tod as Voting Trustees under an agreement dated December 31st, 1898, a copy of which is submitted herewith.

The Reorganization Agreement provided that as an additional protection to the new bonds all classes of the stock of the new company, except such shares as might be disposed of to qualify directors, should be vested in the Voting Trustees named, and should be held by them and their successors, jointly under a Trust Agreement which provides as follows:

"On the first day of January, 1904, if then, said the Colorado & Southern Railway Company shall have paid, for three consecutive years, a Four Per Cent cash dividend on its First Preferred stock, or if not, then as soon as such dividend shall, for three consecutive years, have been so paid, or whenever prior to such date or after such date and prior to such payment of dividend, the Voting Trustees shall decide to make delivery, the Voting Trustees, in exchange for or upon surrender of any Stock Trust Certificate then outstanding, will, in accordance with the terms hereof, deliver proper certificates of stock of said The Colorado & Southern Railway Company, and may require the holders of Stock Trust Certificates to exchange them for certificates of Capital Stock; subject, however, to the redemption at par of the First and Second Preferred Shares by said The Colorado & Southern Railway Company, at any time, if allowed by law."

And that until delivery of stock should be made by the Voting Trustees they should issue Certificates of Beneficial Interest, entitling registered holders to receive, at the time therein provided, stock certificates for the number of shares therein stated, and in the meanwhile to receive payments equal to the dividends collected by the Voting Trustees upon the number of shares therein stated, which shares, however, together with the absolute voting power thereunder, should be vested in the Voting Trustees until the stock became deliverable as provided in such Certificates of the Voting Trustees.

In further accordance with said Plan and Agreement of Reorganization, provision has been made that no additional Mortgage shall be put upon the property embraced in the First Mortgage of The Colorado & Southern Railway Company or the amount of the First Preferred Stock authorized under the Plan and Agreement be increased, except with the consent, in each instance, of the holders of a majority of the whole amount of the First Preferred Stock given at a meeting of the Stockholders called for that purpose; and by the Voting Trust Agreement the Voting Trustees agree, during the existence of the Voting Trust, not to vote on their said First Preferred Stock for the purposes indicated, without the consent of holders of a like amount of that class of Beneficial Certificates.

The company also, in accordance with the Plan and Agreement of Reorganization, has reserved the right, at any time, to redeem its Preferred Stock at par in cash if allowed by law.

The agents of the Voting Trustees for the issuing and transferring of these certificates are Messrs. Hallgarten & Co., 28 Broad Street, New York, all certificates being countersigned by the Central Trust Company of New York as Registrar.

The Officers of The Colorado & Southern Railway Company are as follows: Chairman of the Board of Directors, Grenville M. Dodge; President, Frank Trumbull; Vice-President, B. L. Winchell; Secretary and Treasurer, Charles Wheeler; Assistant Secretary and Assistant Treasurer, H. Bronner; General Auditor, A. D. Parker; General Counsel, E. C. Henderson; General Solicitor, E. E. Whitted.

The Directors of the new company are as follows: Grenville M. Dodge, New York; Henry Budge, New York; J. Kennedy Tod, New York; Luther Kountze, New York; Frederic P. Olcott, New York; Harry Walters, Baltimore, Md.; Oliver Ames, Boston, Mass.; Frank Trumbull, Denver, Col.; Norman B. Ream, Chicago, Ill.

Herewith are submitted six copies of this application; six copies of the Mortgage; copy of the Mortgage with the certificate of record properly endorsed thereon certified by the Trustee to be a true copy; certificates from Counsel of the Company as to the regularity of the foreclosure pro-

ceedings, the organization of the new Company and the validity of the Mortgage; certificate of the Trustee accepting the trust and giving the numbers and amounts of the bonds executed in accordance with the terms of the Mortgage; sample copy of Bond and Stock Trust Certificates; copy of Plan and Agreement of Reorganization, dated September 29th, 1898; copy of Articles of Association; six copies of Voting Trust Agreement.

#### THE COLORADO & SOUTHERN RAILWAY COMPANY. By HENRY BUDGE, Director.

The Committee recommended that the above-described \$17,500,000 First Mortgage Four per Cent Gold Coupon Bonds of 1929, for \$1,000 each, Nos. 1 to 17,500 inclusive; \$8,500,000 First Preferred Stock Voting Trust Certificates; \$8,500,000 Second Preferred Stock Voting Trust Certificates and \$30,995,000 Common Stock Voting Trust Certificates be admitted to the list.

*Adopted by the Governing Committee, May 24, 1899.*

#### AMERICAN CAR & FOUNDRY COMPANY.

##### EXTRACTS FROM THE APPLICATION TO LIST THE SECURITIES ON THE NEW YORK STOCK EXCHANGE.

NEW YORK, May 20, 1899.

The company was incorporated on the twentieth day of February, 1899, under the laws of the State of New Jersey. The company is authorized to manufacture and sell railway cars, both passenger and freight, and street cars, car trucks, car wheels and all parts of cars and accessories, of car equipments, appliances and specialties; the manufacture of products of steel, iron or other metals; to engage in mining; to operate lumber mills, establish and operate rolling mills.

The Articles of Incorporation further provide that—

The Board of Directors shall have power, without the assent or vote of the stockholders, to make, alter, amend and repeal the By-Laws of the corporation, to fix the amount to be reserved as working capital, to authorize and to cause to be executed mortgages or liens upon the real or personal property of the corporation; and from time to time to sell, assign, transfer or otherwise dispose of any and all of the property of the corporation; but no such sale of all of the property shall be made except pursuant to the vote of at least two thirds of the Board of Directors.

The By-laws of the company also provide:

The Directors shall have power to elect and appoint all necessary officers and committees, and generally to control all of the affairs of the corporation.

They may also by majority vote alter the number of Directors, and in the event of an increase in number, they shall have the power to elect such additional Directors forthwith, which Directors so elected may hold office until the next annual meeting of the Stockholders.

The authorized Capital Stock of this company is \$60,000,000, which is divided into 300,000 shares of Non-cumulative Seven per Cent Preferred Stock and 300,000 shares of Common Stock. The par value of each share is \$100. All of the shares excepting \$910,000 face value of Preferred, and the same amount of Common Stock, now in the treasury, have been issued and are full paid and non-assessable.

The duration of the corporation is unlimited. The Preferred Stock is entitled out of any and all surplus net profits, whenever declared by the Board of Directors, to non-cumulative dividends, at the rate not to exceed Seven per cent per annum for the fiscal year beginning the first day of March, 1899, and for each and every fiscal year thereafter, payable in preference and priority to any payment of any dividend on the Common Stock, for such fiscal year.

In the event of the dissolution of the corporation the holders of the Preferred Stock are entitled to receive the par value of their Preferred Stock out of the surplus funds of the corporation before any payment shall be made therefrom to the holders of the Common Stock.

The Common Stock is subject to the prior rights of the holders of the Preferred Stock, as above stated, and has equal voting powers with the Preferred Stock.

This company was formed for the purpose of purchasing certain plants named below, and for acquiring additional plants hereafter when deemed advisable or necessary.

The object in view in the acquisition of these properties was to reduce as far as possible the expenses of administration and of operation by the introduction of economies, mechanical and otherwise, and by concentration of management, thereby minimizing as far as possible the cost of the various products.

##### PLANTS ACQUIRED.

Michigan-Peninsular Car Company, Detroit, Mich.  
Missouri Car & Foundry Company, St. Louis, Mo.  
Jackson & Woodin Manufacturing Company, Berwick, Pa.  
Ohio Falls Car Manufacturing Company, Jeffersonville, Ind.  
Union Car Company, Depew, N. Y.  
St. Charles Company, St. Charles, Mo.  
The Wells & French Company, Chicago, Ill.  
Terre Haute Car & Manufacturing Company, Terre Haute, Ind.  
Buffalo Car Manufacturing Company, Buffalo, New York.  
Niagara Car Wheel Co., Buffalo, N. Y.  
Ensign Manufacturing Company, Huntington, W. Va.  
Pennock Brothers, Minerva, Ohio.  
Murray, Dougal & Company, Milton, Pa.

The aggregate number of men employed at the plants of the Company is approximately 26,000.

These plants control a very large part of the car business of the United States; most of them have been in active operation for many years, and all of them, except the Minerva Plant, which has not been operated since 1895, were doing a good business when acquired. The plants are equipped with modern machinery in first-class condition, and much of the machinery is of a costly description.

It is intended that annual reports shall be made which shall set forth the financial condition of the Company.

The plants named in our report are owned in fee and free from lien and incumbrance, with the exception of two. In regard to these the following are the facts:

The Michigan-Peninsular Car Company made a Deed of Trust for \$2,000,000 to secure Five per Cent Bonds to that amount. Of these bonds \$1,786,000 have been paid; \$214,000 in amount of these bonds are now outstanding. Under the terms of the Deed of Trust the payment of the principal of these last-named bonds has become due. They have been called, and the money to pay and retire these bonds has been deposited with the Guaranty Trust Company of New York.

The Ohio Falls Car Manufacturing Company issued Six per Cent Bonds to the amount of \$600,000. Of this amount \$585,000 has been paid, leaving \$15,000 in bonds still outstanding. The deposit of \$16,200 to redeem these outstanding bonds has been made with the Central Trust Company of New York.

##### BALANCE SHEET ON COMMENCEMENT OF BUSINESS MARCH 1, 1899.

<i>Assets—</i>	
Property account.....	\$12,822,097 13
Consisting of the real and personal property of the former owners of the properties above mentioned, including all appliances for the successful operation of the shops; also their patents and good will.	
Unissued Preferred Capital Stock.....	910,000 00
Unissued Common Capital Stock.....	910,000 00
Materials on hand to enter into the construction of cars for which orders have been received, but not built on March 1.....	5,292,720 76
Cash.....	240,182 11
	\$60,175,000 00
<i>Liabilities—</i>	
Preferred Capital Stock.....	\$30,000,000 00
Common Capital Stock.....	30,000,000 00
Accounts payable:	
Due on Milton Plant, payable in instalments covering period of twelve months if desired.....	175,000 00
	\$60,175,000 00

Four of the above-mentioned companies during the past year have made net earnings of not less than two million one hundred thousand dollars (\$2,100,000), and the balance of the companies, with the exception of Minerva, which was not in operation, have all made a profit during the past year in aggregate not less than eight hundred thousand dollars (\$800,000).

The Officers of the company are: William McMillan, Chairman of the Board and Treasurer, St. Louis, Mo.; W. K. Bixby, President, St. Louis, Mo.; Frederick H. Eaton, First Vice-President, New York; W. P. Coleman, Second Vice President, New York; Anthony Gref, Secretary, New York; Marc W. Comstock, Assistant Secretary, St. Louis, Mo.; W. J. McBride, Auditor, St. Louis, Mo.; J. M. Buick, Assistant Auditor, St. Louis, Mo.; E. R. Hoadley, First Assistant Treasurer, St. Louis, Mo.; William M. Hager, Second Assistant Treasurer, New York.

The Directors of the company are: Wm. McMillan, St. Louis, Mo.; W. K. Bixby, St. Louis, Mo.; Frederick H. Eaton, New York; George Coppel, New York; George Hargreaves, Detroit, Mich.; F. E. Canda, Huntington, W. Va.; C. W. Meysenburg, Chicago, Ill.; J. L. Snys-r, Jeffersonville, Ind.; Chester Griswold, New York; J. J. Albright, Buffalo, N. Y.; Lewis J. Cox, Terre Haute, Ind.; Charles T. Schoen, Pittsburgh, Pa.; E. N. Dickerson, New York; H. B. Denker, St. Charles, Mo.; Anthony Gref, South Orange, N. J.

The Registrar of the company is Central Trust Company of New York. The Transfer Agent of the company is Guaranty Trust Company of New York.

FRED'K H. EATON,

First Vice-President.

The Committee recommended that the above-described \$29,090,000 Non-Cumulative Seven per Cent Preferred Stock and \$29,090,000 Common Stock be admitted to the list.

*Adopted by the Governing Committee, May 24, 1899.*

**Wisconsin Central Co.—On Unlisted.**—The new securities, "deliverable when and as issued," were admitted to dealings on the unlisted department of the Stock Exchange on Wednesday. They have been actively dealt in there around 94 for the bonds, around 49 for the preferred stock and between 13 and 14 for the common stock.—V. 68, p. 979.

—Price, McCormick & Co. have issued a new edition of their circular devoted to unlisted securities, which can be had on application at their offices, 70 Broadway. This sheet is compiled under the direction of Mr. William G. Gallagher, in charge of their miscellaneous securities department, and the quotations and other information contained are full and reliable.

—Jacob Rubino, No. 3 Broad Street, offers for sale a block of \$300,000 People's Gas bonds, in amounts to suit, at a price to net 4½ per cent. The advertisement is on page x.

# The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, May 26, 1899.

The general business situation has undergone no changes of an important nature. There has continued a free movement of merchandises into consumption in the way of deliveries on contracts, and considering the season of the year the volume of new business transacted in most lines of trade has been referred to as satisfactory. Values in the main have been well maintained, and for hardware they have shown increased firmness, reflecting the advance in pig iron. Wheat values have further advanced, owing to less favorable crop accounts from the winter-wheat belt. State legislation has received some attention, the passage by the New York Legislature of the amended franchise tax bill and the signing of an anti-trust bill by the Governor of Texas being the principal features.

Lard on the spot in the local market has had only a small sale but at the West a fair export business had been done latterly; prices have been easier, closing at 5.27½c. for prime Western and 4.95c. for prime City. Refined lard has had only a jobbing sale and prices have weakened to 5.45c. for refined for the Continent. Speculation in lard for future delivery has been quiet and under moderate offerings, prompted by full receipts of swine, prices have declined, closing quiet.

### DAILY CLOSING PRICES OF LARD FUTURES.

May.....	Sat. 5-35	Mon. 5-37	Tues. 5-37	Wed. 5-32	Thurs. 5-27	Fri. 5-27
----------	-----------	-----------	------------	-----------	-------------	-----------

Pork has been in only limited demand and prices have declined, closing at \$8.87 75 for mess, \$10.25 @ 10.75 for family and \$11.25 @ 11.75 for short clear. Cnt meats have been quiet and slightly easier, closing at 4½c. for pickled shoulders, 8½c. for pickled hams, and 4½c. for pickled bellies, 14 to 10 lbs. average. Beef has been in moderate demand and steady at \$3.50 @ 9 for mess, \$9.50 @ 50 for packet, \$9.50 @ 10.50 for family and \$13.50 @ 14 for extra India mess in tcs. Tallow has advanced, closing firm at 4½c. bid. Oleo-stearine has been firmer, closing steady at 5½c. Lard stearine has been quiet, closing at 6c. Cotton seed oil has been in fair demand and steady at 25½c. @ 26c. for prime yellow. Butter has weakened slightly but the close was fairly active and firm at 15 @ 15c. for creamery. Cheese has been in moderate demand and steady, closing at 7½c. @ 9½c. for new State factory, full cream. Fresh eggs have advanced, closing steady at 15½c. for choice Western.

Brazil grades of coffee have been dull. The distributing business has been of decidedly limited proportions and both jobbers and roasters have been indifferent buyers. There has been, however, no attempt on the part of sellers to force sales, and values have held to a steady basis, closing at 6½c. for Rio No. 7. West India growths have sold slowly, but as there has been no pressure to sell, values have been unchanged and steady at 8½c. for good Cuentas. East India growths have been dull but steady at 25 @ 25½c. for standard Java. Speculation in the market for contracts has been dull, as both buyers and sellers have been disposed to hold off and await developments. Changes in prices have been unimportant. The close was easier.

The following are final asking prices:

May.....	5-00c.	Aug.....	5-10c.	Nov.....	5-30c.
June.....	5-00c.	Sept.....	5-2c.	Dec.....	5-55c.
July.....	5-05c.	Oct.....	5-30c.	Jan.....	5-70c.

Raw sugars have been in moderate demand and firm at 4½c. for centrifugals, 96-deg. test, and 4½c. for muscovado, 89 deg. test. Refined sugar has been in fair demand and firm, closing at 5½c. for granulated. Spices have been firm. Other groceries have been quiet but steady.

Kentucky tobacco has been firm but quiet. Bids will be received on June 10 by the lessees of the Spanish Government factories for about 10,000 hhd. of tobacco. Seed leaf tobacco has been fairly active and steady. Sales for the week were 2,200 cases as follows: 1,200 cases 1897 crop. Wisconsin Havana, at 9 to 10½c.; 250 cases 1898 crop. Wisconsin Havana, at 10 to 11c.; 150 cases 1898 crop. New England Havana, at 30 to 50c.; 200 cases 1897 crop. Zimmers, at 15 to 17c., and 400 cases 1896 crop. Pennsylvania seed leaf, at 12½ to 13½c.; also 850 bales of Havana, at 70 to 85c., in bond, and 170 bales Sumatra, at 85c. to \$1.75, in bond.

Straits tin has had a moderate sale. Arrivals have been limited and values have been well maintained, closing at 25.65 @ 25.75c. Ingot copper has been in only limited demand and prices have declined, closing at 18.18½c. for Lake Lead has had a limited sale at unchanged prices, closing at 4.45 @ 4.50c. for domestic. Spelter has weakened to 6½c. @ 6¾c. for domestic, closing quiet. Pig iron has been in fair demand and firm at \$14.50 @ 16.50 for domestic.

Refined petroleum has advanced, closing at 7.20c. in bbls., 4.70c. in bulk and 7.05c. in cases. Naphtha steady at 10c. Crude certificates have been steady, closing at \$1.13½; credit balances have been unchanged at \$1.13. Spirits turpentine has been in slightly better demand and firmer, closing at 42 @ 42½c. Rosins have been dull and easier, closing at \$1.40 for common and good strained. Hops have been in light supply and firmer. Wool has been in fairly active demand and firm.

## COTTON.

FRIDAY NIGHT, May 26, 1899.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 38,058 bales, against 59,949 bales last week and 62,818 bales the previous week, making the total receipts since the 1st of Sept., 1898, 8,155,194 bales, against 8,410,049 bales for the same period of 1897-8, showing a decrease since Sept. 1, 1898, of 234,855 bales.

Speculation in cotton for future delivery has been without animation, a dull, narrow and uninteresting market being experienced for the week, with the fluctuations in prices confined to a range of 5 to 6 points. Early in the week the absence of advices from the English markets, which were closed in observance of the Whitsuntide holidays, had a tendency to intensify the dullness. Weather conditions have been of a more favorable character, the fall of needed rains being reported in the Atlantic and Gulf States, and this prompted slightly increased offerings under which prices weakened a few points early in the week. Subsequently, however, steady foreign advices and limited buying by Liverpool of the summer months to undo straddles gave a steadier tone to the market, and what loss there was in values was recovered. To-day there was a dull and uninteresting market. The English markets were again closed, and in the absence of advices from abroad and no new developments locally, prices barely changed, until at the close when, under limited offerings by local traders, prompted by the favorable crop prospects, values weakened slightly, closing 103 points lower for the day. Cotton on the spot has been steady at 6 1/2c. for middling upland.

The rates on and off middling, as established Nov. 16, 1893, by the Revision Committee, at which grades other than middling may be delivered on contract, are as follows.

Fair.....	0. 14	on	Good Ordinary.....	0. 11	05
Middling Fair.....	7	on	Good Middling Tinged.....		Even
Strict Good Middling.....	5	on	Strict Middling Stained.....	7	05
Good Middling.....	4	on	Middling Stained.....	7	05
Strict Low Middling.....	3	05	Strict Low Mid. Stained.....	1	05
Low Middling.....	7	05	Low Middling Stained.....	1	05
Strict Good Ordinary.....	5	05			

On this basis the official prices for a few of the grades for the past week—May 20 to May 26—would be as follows.

[illegible]

The quotations for middling upland at New York on May 26 for each of the past 32 years have been as follows.

1999	6.64	1991	8.81	1983	6.10	1975	6.16
1998	7.74	1990	12.6	1982	12.4	1974	18.4
1997	7.74	1989	11.4	1981	10.1	1973	19.4
1996	8.14	1988	10.4	1980	10.1	1972	19.4
1995	7.74	1987	11.4	1979	13.4	1971	14.4
1994	7.74	1986	9.4	1978	11.4	1970	22.4
1993	7.11	1985	11.4	1977	11.4	1969	24.4
1992	7.74	1984	11.4	1976	11.4	1968	20.4

NOTE.—On Oct. 1, 1974, grades of cotton as quoted were changed. According to the new classification Middling was on that day quoted 2¢. lower than Middling of the old classification.

## MARKET AND SALES.

The total sales of cotton on the spot each day during the week are indicated in the following statement. For the convenience of the reader we also add columns which show at a glance how the market for spots and futures closed on same days.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all European figures are brought down to Thursday evening. But to make the total the complete figures for to-night (May 26), we add the item of exports from the United States, including in it the exports of Friday only.

☞ The imports into Continental ports the past week have been 86 000 bales.

The above figures indicate an increase in the cotton in sight to-night of 672,211 bales as compared with the same date of 1898, a gain of 1,185,038 bales over the corresponding date of 1897 and an excess of 1,070,203 bales over 1896.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1897-98—is set out in detail below.

TOWNS.	Receipts. This week.	Since Sept. 1, 1898.	Shipments. This week.	Stock May 26.	Receipts. This week.	Since Sept. 1, 1897.	Shipments. This week.	Stock May 27.

Inland, &c., from South.....	2,877	86,880	878	43,321
Total to be deducted.....	9,242	634,030	9,026	540,743
Leaving total net overland*.....	16,087	1,232,436	5,857	1,150,707

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 16,087 bales, against 5,857 bales for the week in 1898, and that for the season to date the aggregate net overland exhibits an excess over a year ago of 81,729 bales.

In Sight and Spinners' Takings.	1898-99.		1897-98.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Receipts at ports to May 26.....	38,058	8,155,104	39,038	8,440,049
Net overland to May 26.....	16,087	1,232,436	5,857	1,150,707
Southern consumption to May 26.....	26,000	998,000	21,000	846,000
Total marketed.....	80,145	10,385,540	65,895	10,437,756
Interior stocks in excess.....	10,805	273,511	13,172	179,150
Came into sight during week.....	69,340	.....	52,723	.....
Total in sight May 26.....	.....	106,59141	.....	106,15906
North's spinners takings to May 26.....	22,997	2,056,860	29,958	2,076,934

\* Decrease during week.

It will be seen by the above that there has come into sight during the week 69,340 bales, against 52,723 bales for the same week of 1898, and that the increase in amount in sight to-night as compared with last year is 43,235 bales.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.—Below are closing quotations of middling cotton at Southern and other principal cotton markets for each day of the week.

WEATHER REPORTS BY TELEGRAPH.—Telegraphic advices to us this evening are in the main of a more favorable nature. The temperature has in general favored the development of the plant, and at many points, where needed, beneficial rain has fallen. In the East coast district of Texas and in Southern Louisiana, however, dry weather has prevailed and moisture is desired.

Galveston, Texas.—There has been a trace of rain on one day of the past week. The thermometer has averaged 80, the highest being 84 and the lowest 75.

Palestine, Texas.—Dry weather has prevailed all the week. The thermometer has averaged 76, ranging from 60 to 92.

Huntsville, Texas.—We have had no rain the past week. The thermometer has ranged from 69 to 93, averaging 86.

Dallas, Texas.—It has rained on one day of the week, the rainfall reaching one inch and forty-three hundredths. Average thermometer 77, highest 93 and lowest 61.

San Antonio, Texas.—We have had rain on one day during the week, the precipitation reaching four hundredths of an inch. Minimum temperature 70.

Luling, Texas.—There has been no rain during the past week. The thermometer has averaged 87, ranging from 69 to 94.

Columbia, Texas.—Dry weather has prevailed all the week. The thermometer has ranged from 65 to 98, averaging 78.

Cuero, Texas.—There has been no rain the past week. Average thermometer 86, highest 94 and lowest 63.

Brenham, Texas.—We have had rain on one day during the week, the precipitation being forty-eight hundredths of an inch. The thermometer has averaged 86, the highest being 94, and the lowest 68.

Corpus Christi, Texas.—We have had rain on one day of the week, the precipitation being too small to measure. The thermometer has ranged from 74 to 82, averaging 78.

Weatherford, Texas.—There has been rain on two days of the week, the rainfall reaching one inch and ten hundredths. Average thermometer 77, highest 93 and lowest 61.

New Orleans, Louisiana.—Dry weather has prevailed all the week. The thermometer has averaged 79.

Shreveport, Louisiana.—The week's rainfall has been fifteen hundredths of an inch on one day. The thermometer has averaged 77, ranging from 61 to 90.

Columbus, Mississippi.—The week's rainfall has been one inch and sixty-three hundredths, on one day. The thermometer has ranged from 54 to 90, averaging 76.

Leland, Mississippi.—There has been rain during the week to the extent of fifty-two hundredths of an inch. Average thermometer 70.9, highest 85, lowest 60.

Vicksburg, Mississippi.—It has rained on one day of the past week, the rainfall reaching twenty-four hundredths of an inch. The thermometer has averaged 76, the highest being 89 and the lowest 61.

Greenville, Mississippi.—The weather is clear and warm.

Meridian, Mississippi.—The crop is clean and growing well, but much cotton is later than usual.

Little Rock, Arkansas.—Rain has fallen on two days of the week, to the extent of one inch and thirty-eight hundredths. The thermometer has ranged from 56 to 86, averaging 71.

Helena, Arkansas.—The crop has been improved by the rain. Rain has fallen on one day of the week to the extent of twenty-six hundredths of an inch. Average thermometer 68.5, highest 81, lowest 55.

Memphis, Tennessee.—With the exception of rather cool nights towards the close the weather the past week has been favorable for the growth of cotton. Replanting is active.

We have had rain on two days, to the extent of forty-seven hundredths of an inch. The thermometer has averaged 70.8, the highest being 85.6 and the lowest 57.7.

Montgomery, Alabama.—Crops are improving since timely moisture came. It has rained on two days of the week, the precipitation being one inch and twenty-nine hundredths. Average thermometer 74, highest 94 and lowest 55.

Selma, Alabama.—We have had rain on one day of the past week, the rainfall being one inch and fifty hundredths. The thermometer has averaged 77, the highest being 95 and the lowest 55.

**Mobile, Alabama.**—Reports indicate that good rains have fallen in the Northern part of the Mobile district, but there has been very little moisture in the Southern portion. There has been rain on one day the past week, the rainfall reaching thirty-two hundredths of an inch. The thermometer has averaged 77, ranging from 64 to 88.

**Madison, Florida.**—The week's rainfall has been one inch and seventy hundredths, on three days. The thermometer has averaged 80, ranging from 62 to 96.

**Savannah, Georgia.**—We have had rain on four days of the week, the precipitation reaching seventeen hundredths of an inch. The thermometer has ranged from 53 to 93, averaging 75.

**Augusta, Georgia.**—There has been rain on one day during the week, to the extent of one inch and seventy-one hundredths. Average thermometer 72, highest 92, lowest 54.

**Charleston, South Carolina.**—It has rained on four days of the past week, the rainfall reaching one inch and thirty-seven hundredths. The thermometer has averaged 72, the highest being 90 and the lowest 58.

**Stateburg, South Carolina.**—Cotton is in fine condition, the moisture having been very beneficial. It is a little too cool just now. Rain fell on Monday last to the extent of seventy hundredths of an inch. It was a thunderstorm with brisk hail, but only slight damage, if any. The thermometer has averaged 71.3, ranging from 51 to 90.

**Greenwood, South Carolina.**—We have had rain on one day during the week, the rainfall being thirty-five hundredths of an inch. The thermometer has ranged from 57 to 88, averaging 70.

**Wilson, North Carolina.**—Rain has fallen on one day of the week, to the extent of sixty-eight hundredths of an inch. Average thermometer 64, highest 76, lowest 48.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 8 o'clock May 25, 1899, and May 26, 1898.

	May 25, '99.	May 26, '98.

**OUR COTTON ACREAGE REPORT.**—Our cotton acreage report will probably be ready about the 8th of June. Parties desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible, to ensure early delivery.

**GOVERNMENT WEEKLY COTTON REPORT.**—Mr. James Berry, Chief of the Climate and Crop Bureau of the Agricultural Department, made public on Tuesday the following telegraphic reports on the crops in the Southern States for the week ending May 22:

**VIRGINIA.**—Week, except fore part, not entirely favorable to crop progress.

**NORTH CAROLINA.**—Favorable warm, dry weather, followed by showers with local hailstorms; week closed too cool for cotton; planting nearing completion; good stands of cotton; crops growing rapidly and cultivation general.

**SOUTH CAROLINA.**—Light scattered showers, insufficient to relieve drought; cotton being cultivated and chopped, where up general condition good, some yet to be planted.

**GEORGIA.**—Warm and dry most of week; scattered showers have done good, but general rains needed; cotton clean, well worked and doing fairly well.

**FLORIDA.**—Unfavorable week, temperature above normal; severe drought over large section, retarding growth of cotton; crops free from grass and well worked.

**ALABAMA.**—Only a few scattered showers in central and eastern counties; drought becoming serious in south portion; cotton small, condition fairly good, but being seriously damaged by cut worms and grasshoppers.

**MISSISSIPPI.**—Showers Thursday improved crops in northern and middle sections; moisture still deficient in southern section, which is badly in need of rain; temperature above normal, nights warm and sunshine abundant; cotton first planted being chopped out, some hoed, much late planted not up and many plowing up and replanting, seed scarce and poor, stands fair where up.

**LOUISIANA.**—Except small area in northern portion of State, where good rains fell on 12th and 13th, drought continues; in southern portion cotton has good color, but growing slowly; in central portion cotton suffering for rain.

**TEXAS.**—Clear, warm week, splendid for killing grass and weeds, and very favorable for crop growth, except over east coast, where drought is doing serious damage; cotton in good condition in southern portion, some early planted forming squares; planting not completed in northern portion, but bulk of crop chopped to stands and in good state of cultivation, except some lowland still in grass.

**ARKANSAS.**—Owing to rain very little farm work was done; crops growing well, but need dry weather, sunshine and cultivation; cotton only fair, owing to faulty seed and cutworms, but plant looks healthy.

**OKLAHOMA.**—Warm, dry weather, followed Thursday by rain and cooler, made conditions fairly favorable, but cool nights favored depredations of cutworms and other insects on cotton, which is considerably injured; much replanting necessary; it is, however, growing and well cultivated.

**OKLAHOMA.**—Cotton planting completed, farm work under favorable conditions rapidly advanced.

These reports on cotton are summarized by the Department as follows:

Cotton is doing fairly well in the Carolinas, Georgia and Texas, being clean and well cultivated. Over the central portion of the cotton belt insects have caused serious damage, and over the Southern portions of the Gulf States and Florida rain is much needed.

**SETTLEMENT OF THE LANCASHIRE COTTON WEAVERS' WAGES DISPUTE.**—In our editorial columns to day, under the above caption, will be found an interesting article by our special Manchester correspondent.

**EGYPTIAN CROP.**—The report of the Alexandria General Produce Association on the cotton crop of Egypt for April is as follows:

Cotton sowing commenced earlier this year than last. Generally it is finished, except in the northern districts of lower Egypt, where sowing continues. The cool and bad weather of the end of March and first days of April was unfavorable to the sprouting of the plants and a large proportion had in consequence to be re-sown. In spite of this the young plants are now in a healthy and normal state, having profited by the favorable temperature of the second half of April. They are not, however, in advance of last year, when they were really already rather backward. The acreage under cotton, we are informed, is equal to that of 1898. In some provinces a slight increase is noted. The cultivation of Miftah has further extended to the detriment of Abbaad, which cultivators have greatly diminished and almost abandoned altogether in the provinces of Charkieh, Gharbiah and Behara. Water is more abundant than in 1898, and irrigation takes place with sufficient facility. In upper Egypt and the Fayoum sowing took place at the usual season. Here Ashmouni only is sown. On an average the acreage under cotton in the provinces of upper Egypt shows a slight diminution upon last year. The plants are in good condition and irrigation takes place easily.

Cable advices to Mr. Fr. Jac Andres, of date Alexandria, May 11, state:

Some complaints are being received of the low state of the Nile, but as yet there can be no danger to the growing crop. The temperature during April has been too cold, which necessitated replanting in some districts. The area planted is expected to be fully equal to last season.

**NEW ENGLAND MILLS SITUATION.**—It is reported that the American Thread Co. has acquired possession of the Cohasset and Nemasket, of Taunton, Mass.; Globe and Sanford, of

## BREADSTUFFS.

FRIDAY, May 26, 1899.

Only a limited volume of business has been transacted in the market for wheat flour, as buyers and sellers have been apart in their ideas of values. Owing to the crop damage reports and the advance in the grain, sellers have held for higher prices. Buyers in some instances have advanced their bids, but not to the extent of the rise asked; consequently the sales made have been confined to peddling lots. The export business has also been quiet, as shippers have done practically nothing. The demand for rye flour has been quiet, but prices have been unchanged and steady. Corn meal has had a slightly better sale for export; prices have been unchanged and steady.

Speculation in wheat for future delivery has broadened somewhat, there being more activity to the trading, and the tendency of values has continued towards a higher basis. The principal strengthening features have been the reports of shortage in the winter-wheat crop and damage by insects. European crop accounts also have been less favorable, reports of damage in Russian and Danubian provinces by rust being received. Saturday there was a slight weakening of prices under improved weather conditions. Monday the market was again stronger and locally prices advanced  $\frac{1}{4}$  to  $\frac{1}{2}$ ¢ on reports of damage to the crop by insects and buying by the Southwest. Tuesday, under realizing sales, there was a slight reaction in prices, although crop accounts continued unfavorable. Wednesday the market was easier early in the day under aggressive operations by bear operators. Subsequently, however, on continued unfavorable crop accounts the market turned stronger and the loss was more than recovered. Thursday there was a fairly active and higher market, prices advancing  $\frac{1}{4}$  to  $\frac{1}{2}$ ¢ on general buying stimulated by poor crop accounts from the West, stronger foreign advices and less favorable crop accounts from abroad. Business in the spot market has been rather quiet, the settlement of the strike at Buffalo failing to stimulate the demand from exporters to any material extent; prices have advanced with futures. To-day the market was easier in response to weaker foreign advices and under realizing sales by longs. A full movement of the crop in the Northwest also was against an improvement in values. The spot market was moderately active, the sales for export here and at outports amounting to 128,000 bushels.

Indian corn futures have received only a very moderate amount of attention, and despite the advance in wheat values there has been a slight weakening in prices. Early in the week the market held steady on reports of unfavorable weather conditions and delayed seeding. Subsequently, however, under improved weather conditions, increased offerings from the country and liquidating sales, there developed an easier tone and prices weakened slightly. Business in the spot market has been fairly active, as exporters have been buyers and prices have followed the course of futures. To-day there was a further slight decline in prices under limited offerings. The spot market was fairly active, the sales for export here and at outports amounting to 550,000 bushels.

Oats for future delivery at the Western market have been quiet, and there has been a gradual sagging of prices, the decline being most pronounced for this month's delivery. A heavy movement of the crop has relieved the threatened squeeze in this month, and this, together with favorable crop prospects, have been the depressing factors. Business in the spot market has been quiet, as exporters have not been buyers, and prices have declined. To-day the market was weak and lower under free offerings. The spot market was more active at lower prices; sales for export were 105,000 bushels.

GOVERNMENT WEEKLY GRAIN REPORT.—Mr. James Berry, Chief of the Climate and Crop Bureau of the Agricultural Department, made public on Tuesday the telegraphic reports on the grain crops in the various States for the week ending May 22 as follows:

WEATHER.—Except in the Southern States the week ending May 22 1899, has been unseasonably cool and unfavorable for germination and growth, and while the week has been much warmer than usual in the Southern States, the continued absence of rain over a large part of that section is proving very unfavorable. Too much rain in the western portion of Kentucky and portions of Missouri and Arkansas has retarded cultivation of crops. Frosts occurred in the Central Rocky Mountain regions and in localities in the more northerly districts east of the Rocky Mountains, causing only slight damage.

CORN.—Northward of the Missouri and Ohio rivers and in the Middle Atlantic States and New England the week has been much too cool for corn, retarding its germination and growth. In the more southerly districts the temperature conditions have been more favorable, but in portions of the South Atlantic and Gulf States the crop is suffering for rain and is being damaged by insects. In Texas, Oklahoma, Arkansas and Kansas corn has done well. Planting is in progress in the southern portion of North Dakota and in Minnesota and northern New England, and is well advanced in other Northern States, although retarded in South Dakota, Iowa and New York.

WINTER WHEAT.—Winter wheat is reported as having been considerably damaged by insects in the central valleys and Middle Atlantic States, and on the whole the prospect in the States east of the Rocky Mountains is less encouraging than at the close of the previous week. It is generally heading low. In California, while rains would prove beneficial in the southern part of the State, the outlook favors a large crop. Owing to the unseasonably low temperature for several weeks the growth of wheat in Oregon and Washington has been very slow, but the crop in these States looks well. Harvesting has begun in Texas and Alabama.

SPRING WHEAT.—Spring wheat seeding will be finished in the Red River Valley by May 25; it is now practically completed in North Dakota, but has been delayed in Oregon. Over the southern portions of the spring-wheat region the condition of the crop is promising, no material damage having resulted from recent frosts.

OATS.—The general condition of the oats crop is promising. In portions of the Southern States, however, it has suffered from drouth, and in South Dakota and Washington from frost. Harvest has begun in the South Atlantic and East Gulf States.

The movement of breadstuffs to market as indicated in the statements below is prepared by us from the figures collected by the New York Produce Exchange. The receipts at Western lake and river ports for the week ending May 20, and since Aug. 1, for each of the last three years, have been:

Receipts at—	Flour.	Wheat.	Corn.	Oats.	Barley.	Rye.
	Bbls. 100 lbs.	Bush. 60 lbs.	Bush. 60 lbs.	Bush. 32 lbs.	Bush. 48 lbs.	Bush. 60 lbs.

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., May 26, 1899.

There has been no diminution of strength in the cotton goods division of the market, but the volume of business transacted shows some falling away compared with last week. This has been quite as much due to the conditions with sellers in several departments as to an indisposition on the part of buyers to follow recent advances in others. In the one division a considerable amount of business has been turned down day by day, owing to scarcity of ready supplies; in the other purchases have been moderated by the higher range of prices reached, particularly in bleached cottons. The market is still in an extraordinarily clean condition in such plain goods as brown and gray cottons. The production of these is on an unusually large scale, but it is so well taken care of by existing contracts that even moderate current buying is sufficient to prevent any accumulation of stocks. In addition to reports of many mills running over-time there are others coming to hand showing renewed activity in mill enterprises in the South, but few, if any, of the new projects can be carried through in time to be a factor in the situation this year, and the outlook is for a firm market for some months to come. The woolen goods division is steady and silks are firm. Collections good.

WOOLEN GOODS.—There has been a better demand this week for men's-wear heavy-weight fabrics, to which worsteds, plain and fancy, have chiefly contributed. Fine grades of fancy worsteds have sold better than for some time past. Clay worsteds and serges are well situated and further advances in prices are looked for in the near future. Business in heavy-weight woolens has been fair in piece dyes, but in the lower grades of fancies of indifferent proportions. The tone is steady and prices without change. The demand for kerseys has again been the chief feature in the overcoatings division and prices on these tend against buyers. Cloakings are quiet throughout. Woolen and worsted dress goods are quiet. Staple lines in both woolen and worsted makes are

firm in price. There is but an indifferent demand for flannels and blankets and no change in prices.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending May 22 were 19,127 packages, valued at \$654,796, their destination being to the points specified in the tables below:

NEW YORK TO MAY 22	1899.		1898.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	22	913	82	1,549
Other European.....	2	448	15	525
China.....	16,356	107,355	8	61,131
India.....	.....	1,494	875	6,955
Arabia.....	529	21,398	1,760	17,092
Africa.....	535	6,177	85	6,230
West Indies.....	778	12,180	118	5,587
Mexico.....	68	1,981	151	1,924

Total.....	19,127	180,418	6,986	134,279
China, via Vancouver.....	.....	6,742	.....	1,700
Total.....	19,127	187,160	6,986	135,979

\* From New England mill points direct.

The value of the New York exports for the year to date has been \$6,318,416 in 1899, against \$4,661,606 in 1898.

The demand from both home trade and exporters for heavy brown cottons has been in excess of available supplies, and the tendency of prices is upwards. Business has been done for export in shipments as far off as November and December. Fine gray goods are well sold ahead and very firm in price. Business in ducks and osenaburgs quiet, but prices well maintained. There have been further advances reported in bleached cottons, chiefly in the medium grades. The demand has fallen off to some extent and the market is quiet but firm at the advance. Wide sheetings are generally 5 per cent higher. Cotton flannels and blankets in quiet re-order demand at firm prices. Sales of denims, ticks, plaids and other coarse colored cottons are moderate, but stocks are in good shape and prices firm. Kid finished cambrics quiet and unchanged. Light fancy prints are scarce, new dark fancies in good request. Indigo blue prints and some makes of mourning and shirting prints are advanced  $\frac{1}{4}$  c. per yard. There is no change in the gingham situation; demand moderate but supplies scanty and prices firmly upheld. Print cloths inactive at  $\frac{3}{4}$  c. for regulars. Odd goods in moderate request at firm prices.

FOREIGN DRY GOODS.—The market is very firm on dress goods and tending upwards, with moderate orders coming to hand. Silks quiet but steady. Linens are dull. Ribbons are irregular. Burlaps dull but steady.

## IMPORTATIONS AND WAREHOUSE WITHDRAWALS OF DRY GOODS

The importations and warehouse withdrawals of dry goods at this port for the week ending May 25, 1899, and since January 1, 1899, and for the corresponding periods of last year are as follows:

IMPORTS ENTERED FOR CONSUMPTION FOR THE WEEK ENDING MAY 25, 1899.									
WEEK ENDING MAY 25, 1899.				SHOE JAN. 1, 1898.				WEEK ENDING MAY 25, 1899.	
								SHOE JAN. 1, 1898.	

## STATE AND CITY DEPARTMENT.

## News Items.

**Boston, Mass.—Sewer Tax Law Declared Unconstitutional.**—The State Supreme Court, by a unanimous decision, on May 18, 1899, declared unconstitutional the sewer assessment statute, Chapter 426, Sections 7 and 8, Acts of 1897. This statute provides that the Board of Street Commissioners, with the approval of the Mayor, shall annually determine the sewerage charges to be paid for the construction, maintenance and operation of the sewerage works. The decision is a lengthy one, and substantially declares that the cost of maintenance and operation of sewers is not a proper subject for a special tax or assessment, but is the subject for general taxation only, and that the assessment fixed by the Act cannot stand as a general tax for the reason that it is not proportional and equal.

It is stated that this decision will cause a loss to the city of Boston of about \$300,000, including some \$300,000 or \$400,000 already collected from the taxpayers.

**Council Bluffs, Iowa.—Decision in Warrant Suit.**—On May 8, 1899, Judge Walter I. Smith, in the District Court, handed down a decision in a suit brought to determine the question whether the warrants issued for the current expenses of the municipality should be paid prior to the old warrants of previous years yet outstanding. The Judge held that the law providing for the payment of current warrants out of current revenues did not apply to Council Bluffs, as that city was organized subsequent to 1881, and that the warrants should be paid in the order of presentation. An appeal, it is stated, will be taken at once to the State Supreme Court.

**Hughes County, S. Dak.—Bonds Valid.**—We take the following dispatch from Pierre, S. Dak., dated May 17, 1899, from the Omaha "Bee": "Judge Carland in the United States Court to-day granted judgment for \$5,000 interest coupons on Hughes County bonds in the case of Livingston against Hughes County. This decision sustains the validity of \$112,000 Hughes County refunding bonds issued in 1889."

**Melrose, Mass.—Votes to Become a City.**—This town on May 8, 1899, by a vote of 526 to 218, accepted the Act of the State Legislature making it a city. The Act takes effect Jan. 1, 1900.

**New York City.—List of Long Island City Bonds Recently Declared Legal.**—We give below a full list of the bonds issued by Long Island City prior to consolidation, and which were recently passed upon favorably by the Corporation Counsel, John Whalen:

GENERAL IMPROVEMENT BONDS OF LONG ISLAND CITY ISSUED UNDER CHAPTER 644 OF THE LAWS OF 1893.

Broadway and Newtown Road, Series 3, grading, etc.	Dec. 10, 1894.	50,000	
Total.		\$1,254,500	

**New York State.—Legislature Adjourns.—Ford Franchise Tax Bill Amended.**—The special session of the State Legislature which convened on May 22, 1899, adjourned May 25. The most important legislation accomplished was the passage of a substitute bill for the Ford Franchise Tax Bill now in the hands of the Governor. One change from the first bill transfers the power of assessing franchisees from local boards to the State Board of Tax Commissioners. Another amendment provides for certain deductions, as follows:

If, when the tax assessed on any special franchise is due and payable under the provisions of law applicable to the city, town or village in which the taxable property is located, it shall appear that the person, partnership, association or corporation affected has paid to such city, town or village for its exclusive use within the next preceding year, under any agreement, therefor or under any statute requiring the same, any sum based upon a percentage of gross earnings, or any other income, or any license fee, or any sum of money on account of such special franchise granted to or possessed by such person, partnership, association or corporation, amounts so paid for the exclusive use of such city, town or village, except money paid or expended for paving or repaving of pavement of any street, highway or public place, shall be deducted from any tax based on the assessment, made by the State Board of Tax Commissioners for such city, town or village purposes, but not otherwise, and the remainder shall be the tax on such special franchise payable for city, town or village purposes.

The Governor signed the substitute bill at noon May 26, 1899, and it will be known as Chapter 712.

## Bond Calls and Redemptions.

**Anderson County, Kan.—Bond Call.**—J. W. Shields, County Treasurer, has called for payment July 1, 1899, at

the State's fiscal agency in New York City, the National Bank of the Republic, the following bonds: Forty-five \$1,000 bonds, dated April 22, 1881, and numbered from 14 to 58, inclusive, and known as "Series A." Also seventeen \$500 bonds, dated April 22, 1881, and numbered from 59 to 75, inclusive, and known as "Series B."

The official notice of this bond call will be found among the advertisements elsewhere in this Department.

**Boone, Iowa.—Bond Call.**—C. S. Hazlett, City Treasurer, has called for payment June 1, 1899, the following bonds: Fourteen water bonds dated November 1, 1880, for \$500 each, numbered from 51 to 64, inclusive, and payable at the Bank of Farson, Leach & Co. in New York City; five water bonds dated February 1, 1892, for \$500 each, numbered from 65 to 69, inclusive, and payable at the National Bank of the Republic in New York City; seven water bonds dated August 1, 1892, for \$500 each, numbered from 70 to 76, inclusive, and payable at the First National Bank, in Boone, Iowa; and forty-one refunding bonds dated May 1, 1894, for \$500 each, numbered from 1 to 41, inclusive, and payable at the Chemical National Bank in New York City; being all the outstanding bonds issued by the City of Boone, Iowa, prior to June 1, 1895.

**Corvallis, Ore.—Warrant Call.**—The City Treasurer has called for payment all warrants issued prior to March 10, 1897.

**Council Bluffs, Iowa.—Bond Call.**—City Treasurer W. B. Reed has called for payment at Kounze Bros., Bankers, New York City, the following bonds:

Intersection paving bonds, issued Jan. 1, 1887, Nos. 149 to 157, inclusive, \$500 each, will be paid July 1, 1899.  
Intersection paving bonds, issued Dec. 12, 1887, Nos. 158 to 166, inclusive, \$500 each, will be paid June 12, 1899.  
Intersection sewer bonds, issued Dec. 12, 1887, Nos. 68 to 71, inclusive, \$500 each, will be paid June 12, 1899.  
Intersection sewer bonds, issued Dec. 19, 1887, Nos. 72 to 79, inclusive, \$500 each, will be paid June 19, 1899.  
Intersection sewer bonds, issued Dec. 4, 1888, Nos. 95 to 96, inclusive, \$500 each, will be paid June 4, 1899.  
Intersection sewer bonds, issued Jan. 7, 1888, Nos. 97 to 101, inclusive, \$500 each, will be paid July 7, 1899.

**Lewis County (Mo.), Highland Township.—Bond Call.**—Bonds Nos. 43, 44 and 45, each for \$500, and dated Jan. 1, 1892, have been called for payment May 15, 1899. Rate of interest was 5%.

**Pierce County, Wash.—Warrant Call.**—Stephen Judson, County Treasurer, called for payment May 23, 1899, at his office in Tacoma, all road and bridge-fund warrants issued in 1899 up to and including No. 3,609.

**Plattsmouth, Neb.—Bond Call.**—John P. Sattler, President of Council, has given notice that on June 1, 1899, the following bonds will be payable at the State's Fiscal Agency in New York City:

\$53,000 high school refunding bonds, dated Aug. 1, 1885, and due Aug. 1, 1905.  
19,000 intersection paving bonds, dated Oct. 1, 1888, and maturing Oct. 1, 1907.  
10,000 storm-water sewer bonds, dated May 1, 1888, and maturing May 1, 1908.

The above bonds are now subject to call and interest will cease on June 1, 1899.

The official notice of this bond call will be found elsewhere in this Department.

**Red River County, Texas.—Bond Redeemed.**—This county has redeemed \$6,000 court-house bonds from funds on hand accumulated for that purpose.

**Renovo, Pa.—Bond Call.**—P. A. Kinsley, Clerk of Council, has called for payment June 1, 1899, at the office of the Borough Treasurer, \$500 bonds Nos. 63 to 66, inclusive, bearing date July 1, 1896.

**Tampa, Fla.—Bond Call.**—This city has called for payment June 1, 1899 (after which date all interest will cease), at the American Exchange National Bank, New York City, \$100,000 bonds, issued under Ordinance No. 33.

The official notice of this bond call will be found among the advertisements elsewhere in this Department.

**Taney County, Mo.—Bond Call.**—Interest will cease on May 21, 1899, on the 6% bond of this county numbered 19 and dated Nov. 13, 1883. Denomination of bond is \$1,000.

**Tipton County, Tenn.—Bond Call.**—Mr. John Craig, Chairman of the County Court, has called for payment at the Union & Planters' Bank, Memphis, on June 5, 1899, after which date all interest will cease, bonds Nos. 54 to 59, inclusive, of Series "C," and Nos. 1 and 2 of Series "D."

**Toledo, Ohio.—Bond Call.**—G. U. Bonlet, City Auditor, called for payment April 1, 1899 (on which date interest ceased), at the Importers' & Traders' National Bank, New York City, \$250,000 5% bridge bonds. Securities are numbered from 1 to 225, dated Oct. 1, 1883, and from 226 to 250, dated Oct. 1, 1884.

The official notice of this bond call will be found among the advertisements elsewhere in this Department.

**Bond Proposals and Negotiations** this week have been as follows:

**Akron (Ohio) School District.—Bond Sale.**—On May 20, 1899, the \$5,000 4% refunding bonds were awarded to Briggs, Todd & Co., Cincinnati, at 102 77. Following are the bids:

Briggs, Todd & Co., Cincinnati \$5,128 50  
C. F. Kimball & Co., Chicago 5,144 44  
New Lat. Nat. Bk., Columbus 5,140 00  
Seaton & Mayer, Cincinnati 5,128 20  
R. Kleybolte & Co., Cincinnati 5,127 50  
Mayer & Kiser, Indianapolis 5,130 01

Croghan Bank of Fremont 5,125 00  
Lamprecht Bros. Co., Cleveland 5,122 50  
W. J. Hayes & Sons, Cleveland 5,112 00  
Denison, Prior & Co., Cleveland 5,101 00  
Jas. S. Benner, Akron 5,060 00  
People's Sav. Bank, Akron 5,010 00

Bonds mature May 23, 1904. For full description of bonds see CHRONICLE May 18, 1899, 938.

**Albuquerque, Bernalillo County, N. Mex.—Bond Offering.**—Proposals will be received until 8 p. m. June 5, 1899, by C. W. Medler, City Clerk, for \$33,000 gold refunding bonds and \$65,000 gold funding bonds. The refunding bonds are issued under an Act of the Territorial Assembly approved March 10, 1899, and interest will not exceed 4%. The funding bonds are issued under authority of an Act of Congress approved March 3, 1899, and will retire a like amount of warrants. Interest must not exceed 5%. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable January 1 and July 1 and the principal will mature 30 years from date of issue, subject to call after 20 years.

**Antelope School District No. 50, Wasco County, Ore.—Bond Offering.**—Proposals will be received until 2 p. m. June 15, 1899, by C. L. Phillips, Treasurer (P. O. The Dalles), for \$3,000 10-20-year (optional) school bonds. Securities will be in denomination of \$500, and a certified check for 5% of bid must accompany proposals.

**An Gres (Mich.) School District.—Bond Offering.**—We are advised that the \$2,000 5% 10-year school bonds recently voted will be disposed of at private sale.

**Barbour County (P. O. Eufaula), Ala.—Bond Offering.**—Proposals will be received until 12 m. May 31, 1899, by A. H. Merrill, County Commissioner, for \$85,000 5% 30-year gold refunding bonds.

**Bayonne, N. J.—Bond Sale.**—On May 23, 1899, the \$50,000 4% 6-year gold improvement bonds and \$100,000 4% 10-year gold tax bonds were awarded to E. D. Shepard & Co., New York, at 102 7/8 and 104 1/8 respectively. Following are the bids:

	\$50,000 6-yr. Bonds.	\$100,000 10-yr. Bonds.	Both Issues.
F. D. Shepard & Co., New York	102 7/8	104 1/8	102 5/8
L. W. Morrison, New York	102 7/8	104 1/8	102 5/8
G. M. Hann, New York	102 7/8	104 1/8	102 5/8
Price, McCormick & Co., New York	102 7/8	104 1/8	102 5/8
E. C. Jones & Co., New York	101 1/8	101 1/8	101 7/8
G. B. Hughes, New York	101 7/8	101 7/8	101 7/8
J. D. Everett & Co., New York	101 7/8	101 7/8	101 7/8
Mason, Lewis & Co., Chicago	101 7/8	101 7/8	101 7/8
N. W. Harris & Co., New York	101 7/8	101 7/8	101 7/8
Walter Stanton & Co., New York	101 7/8	101 7/8	101 7/8
President Nat. Bk. of Savings, Jersey City	100 3/8	100 3/8	100 3/8
Denison, Prior & Co., Cleveland	100 3/8	100 3/8	100 3/8
C. H. White & Co., New York	100 25	100 25	100 25
E. H. Gay & Co., New York	100 25	100 25	100 25
Farnon, Leach & Co., New York	100 20	100 25	100 25
W. J. Hayes & Sons, Cleveland	100 20	100 25	100 25

**Beltrami County School District No. 22 (P. O. Bagley), Minn.—Bonds Not Sold.**—On May 1, 1899, the following bids were received for the \$1,200 bonds advertised for sale on that day: C. C. Gowran & Co., Grand Forks, 6 1/2% bond at par; Kane & Co., Minneapolis, 102 08 for a 7% bond; James F. McDonald, Niagara Falls, 102 08 and blanks for a 7% bond, and John Nuven & Co., Chicago, par and blanks for a 7% bond.

The bid of C. C. Gowran & Co. was accepted at the time, but since then it has been discovered that the notice for the special meeting had not been posted ten days as required. Accordingly the bonds have not been issued. The District Clerk writes us that they will now most likely borrow the amount from the State after the valuation of the district has been equalized for the assessment of 1899.

**Berryvale School District, Siskiyou County, Cal.—Bond Offering.**—Proposals will be received until 12 m. June 5, 1899, by R. H. De Witt, County Treasurer, at Yreka, for \$7,500 8% bonds. Securities are in denominations of \$500 and \$1,000. Interest will be payable annually. Principal will mature \$500 December 27, 1899, and \$1,000 yearly thereafter.

**Hiloxi, Miss.—Bond Offering.**—Proposals will be received until 12 m. June 15, 1899, by the Finance Committee, D. A. Mash, President, for \$25,000 5% 5-20-year street improvement bonds and \$15,000 5% 5-20-year bridge bonds. Interest will be payable semi-annually at the office of the City Treasurer. Certified checks payable to the City Treasurer for \$1,250 for the improvement bonds and \$750 for the bridge bonds must accompany proposals.

**Birmingham, Ala.—Bond Sale.—Bond Offering.**—We are advised that the \$25,000 6% improvement bonds for which proposals were asked until May 3, 1899, were awarded on May 17 to W. C. Shackelford at 102, his being the only bid received. Principal matures 10 years from date of issue. Proposals are now asked for \$20,000 more bonds.

**Buone, Iowa.—Bond Sale.**—This city sold early this month at private sale \$33,500 3 1/4% refunding bonds. Securities are in denominations of \$500, dated June 1, 1899. Interest will be payable June 1 and December 1 at the office of the City Treasurer. Principal will mature June 1, 1919, subject to call after June 1, 1904.

**Bradner (Village), Wood County, Ohio.—Bond Offering.**—Proposals will be received until 7:30 p. m. June 14, 1899, by O. N. Furbush, Village Clerk, for \$3,000 6% improvement bonds. Securities will be in denomination of \$200; interest will be payable semi-annually. Principal will mature \$200 yearly on September 1 from 1899 to 1913, inclusive, and will be payable at the First National Bank, Toledo, Ohio. Bonds are issued pursuant to sections 2935 and 2937 of Revised Statutes of Ohio and a village ordinance passed April 19, 1899. Proposals must be accompanied by a sum of money or a certified check equal to 5% of the amount of bonds bid for.

**Brockton, Mass.—Bond Sale.**—On May 25, 1899, the \$50,000 3 1/4% 1-20-year street-improvement, the \$33,000 3 1/4% 1-20-year school-house, the \$10,000 3 1/4% 1-20-year sewerage and the \$5,000 3 1/4% 1-5-year surface drainage loans were awarded to Rudolph Kleybolte & Co., New York, at 103 1/8. For description of bonds see CHRONICLE May 20, 1899, p. 988.

**Brookfield, Mo.—Bond Sale.**—This city has sold \$13,500 5% sewer bonds to the First National Bank, Chicago, at 107 1/4.

**Burlington Junction School District No. 1, Nodaway County, Mo.—Bond Offering.**—Proposals will be received until 12 m. June 15, 1899, by A. S. Bollinger, Clerk, for the \$6,000 4% school bonds voted at the election held May 2, 1899. Securities are in denomination of \$100 and will mature \$500 yearly on May 1 from 1901 to 1906 inclusive and \$600 yearly from May 1, 1907, to May 1, 1911, inclusive. Interest will be payable annually on May 1 at the District Treasurer's office. A certified check for \$200, payable to the school district, must accompany the proposals. The district has no indebtedness at present, and the assessed valuation is \$135,000. The population is about 1,200.

**Butler County (P. O. Hamilton), Ohio.—Bond Offering.**—Proposals will be received until 11 a. m. June 6, 1899, by the Board of Commissioners for \$21,000 4 1/2% bridge bonds. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable January 1 and July 1, at the office of the County Treasurer. Principal will mature \$7,000 on July 1 of the years 1902, 1905 and 1908. A certified check for \$500 must accompany proposals. H. C. Gray is the County Auditor.

**Central City, Neb.—Bond Offering.**—Proposals will be received until June 12, 1899, by L. G. Comstock, City Treasurer, for \$25,000 4% refunding bonds. Securities are in denomination of \$500 and will mature 20 years from date of issue, \$10,000 being subject to call after 5 years and \$15,000 after 10 years.

**Charlotte, N. Y.—Bond Sale.**—On May 17, 1899, the \$6,000 5 1/8 year incandescent-light bonds were awarded to W. J. Hayes & Sons, Cleveland, at 101 for a 3 1/2% bond. The only other bid was that of Isaac W. Sherrill, Poughkeepsie, who bid 100 1/8 and blank bonds for 3 1/2 per cents.

**Chester, Pa.—Bond Sale.**—On May 25, 1899, the \$180,000 3 1/2% 30-year coupon bonds were awarded to Dick Bros. & Co., Philadelphia, at 108 1/4. Following are the bids.

Dick Bros. & Co., Philadelphia	108 1/4	Denison, Prior & Co., Cleveland	108 5/8
Sailer & Stevenson, Phila.	105 01	N. W. Harris & Co., New York	105 3/8
Lamprecht Bros. Co., Phila.	107 81	W. J. Hayes & Sons, Cleveland	105 07
Farnon, Leach & Co., N. Y.	107 53	Briggs, Todd & Co., Cincinnati	105 02
Graham, Kerr & Co., Phila.	107 07	Fidelity Ins. & Tr. Co., Phila.	105 00
E. H. Rollins & Sons, Boston	107 77	Chester National Bank	102 3/4

For description of bonds see CHRONICLE last week p. 988.

**Chilcopee, Mass.—Bond Sale.**—On May 25, 1899, the \$23,000 3 1/2% gold school bonds were awarded to Blodgett, Merritt & Co., Boston, at 103 1/8. Following are the bids:

Blodgett, Merritt & Co., Boston	103 1/8	Jose, Parker & Co., Boston	102 81/4
E. H. Rollins & Sons, Boston	103 07 3/8	Blake Bros. & Co., Boston	102 80
Adams & Co., Boston	103 3/8	Parkinson & Burr, Boston	102 63
Perry, Coffin & Burr, Boston	103 01	W. Holman Cary & Co., Boston	102 63
Estabrook & Co., Boston	102 94 1/2	E. H. Gay & Co., Boston	102 59
Rines & Cummings, Boston	102 89	R. Kleybolte & Co., N. Y.	102 00
N. W. Harris & Co., Boston	102 87	Fall River Sinking Fund	101 89

Bonds mature June 1, 1909. For further description of securities see CHRONICLE last week, p. 988.

**Clay County, Ind.—Bond Sale.**—On May 18, 1899, this county sold at public auction \$16,200 6% ditch bonds to the New First National Bank of Columbus at 107 1/2. Principal will mature \$1,620 yearly beginning June 1, 1901.

**Cleveland, Ohio.—Bonds Authorized.**—The City Council has passed a number of ordinances authorizing the issuance of \$155,000 sewer bonds for improvements in various sewer districts.

**Cohoes, N. Y.—Bond Sale.**—On May 24, 1899, the \$6,000 4% bonds were sold at public auction to the Cohoes Savings Institution, at 103 1/8. Other bidders were Isaac W. Sherrill of Poughkeepsie and the Cohoes Mechanics' Saving Bank. Bonds mature \$2,000 yearly on July 1 from 1902 to 1904, inclusive. For further description of bonds see CHRONICLE, May 20, 1899, p. 988.

**Columbus, Ohio.—Bonds Authorized.**—The City Council has authorized the issuance of \$7,500 4% Grant-Street improvement bonds.

**Crow Wing County (P. O. Bruinerd), Minn.—Bond Offering.**—Proposals will be received until 2 p. m. May 29, 1899, by the Board of County Commissioners for \$55,000 4% funding bonds. Securities are dated June 20, 1899. Interest will be payable annually, and the principal will mature June 20, 1919. Bonds are issued pursuant with Chapter 259, Laws of 1899. A certified check for 10% of the gross amount of the bonds bid for, payable to A. Mahlum, County Auditor, must accompany proposals.

**Dunville, Va.—Bonds Voted.**—At the special election held May 18, 1899, the issuance of \$100,000 4% street-improvement bonds was authorized by a vote of 1,306 to 56.

**Deposit (Village), Broome and Delaware Counties, N. Y.—Bond Offering.**—Proposals will be received until 7 p. m. June 7, 1899, by C. Onderdonk, Village Clerk, for the \$3,000 bonds which were voted on May 2, 1899, for the purpose of purchasing a site and erecting a suitable building for necessary village purposes. Securities will be in denomination of \$1,000; interest at not more than 4% (to be named by the purchaser) will be payable semi-annually. Principal will mature \$1,000 yearly from 1904 to 1911, inclusive.

**Door County, Wis.—Bonds Proposed.**—This county is considering the issuance of \$60,000 refunding railroad-aid bonds, but as yet nothing definite has been done in the matter.

**Duluth, Minn.—Bond Offering.**—Proposals will be received until June 19, 1899, for \$500,000 4½% gold 15-year funding bonds. Securities will be in denomination of \$1,000 unless otherwise specified in bid, but if so desired, and it is so specified in bid, they may be issued in denominations of \$1,000, \$500, \$100 or \$50. A certified check, a certificate of deposit or approved bond for 1% of the face value of bonds bid for must accompany proposals. All bids are to be unconditional, except that they may be conditioned on the favorable opinion of Messrs. Dillon & Hubbard or other attorneys of note. H. W. Sheadle is the City Clerk. The official notice of this bond offering will be found among the advertisements in this Department.

**Eagle County, Col.—Bond Sale.**—The \$103,000 5% refunding bonds have been awarded to The Bellan-Price Investment Co., Denver. These bonds were not awarded on February 13, 1899, the day upon which they were offered for sale, because the refunding could not be legally accomplished without legislative action. The enabling act has now been passed by the Legislature and signed by the Governor, and the bonds disposed of as above.

**East Grand Forks, Minn.—Bonds Authorized.**—The City Council has authorized the issuance of \$35,000 water and light bonds. Securities will bear interest at not more than 5%, payable annually on July 1 at the Chase National Bank, New York City. They are in denomination of \$500, dated July 1, 1899, and will mature July 1, 1929. Bonds are issued pursuant to Section 6, Chapter 8, Laws of 1895.

**Ellwood City (Borough), Lawrence County, Pa.—Bond Sale.**—On May 18, 1899, the \$3,000 4½% sewer bonds were awarded to W. J. Hayes & Sons, Cleveland, at 103½. Other bidders were The Lamprecht Bros. Co., Cleveland, at 103¼, and Denison, Prior & Co., Cleveland, at 101-2625. Principal will mature April 1, 1919, subject to call after April 1, 1904. For further description of bonds see CHRONICLE May 6, 1899, p. 889.

**Elyria, Ohio.—Bond Sale.**—The highest bid received on May 20, 1899, for the \$3,000 6% sewer bonds was that of Feder, Holzman & Co., Cincinnati, at 107-233. Following are the bids:

Feder, Holzman & Co., Cin.,	\$3,287 00	New Nat. Bk., Columbus,	\$3,172 50
C. F. Kimball & Co., Chicago,	3,204 67	M. Kleybolte & Co., Cin.,	3,151 00
Seaton & Mayer, Cin.,	3,197 00	Bridge, Todd & Co., Cin.,	3,140 00
W. J. Hayes & Sons, Cleve.,	3,196 00	Denison, Prior & Co., Cleve.,	3,140 00
Lamprecht Bros. Co., Cleve.,	3,181 00		

Bonds mature \$500 yearly on May 1 from 1900 to 1903, inclusive, and \$1,000 in 1905. For further description of bonds see CHRONICLE April 22, 1899, p. 787.

**Fond du Lac, Wis.—Loan Negotiated.**—We are advised by Chas. Kummerow, City Treasurer, that the \$15,000 loan recently authorized by the City Council has been taken by local parties, lodges, societies, etc., in small amounts from \$100 to \$500, at 4%.

**Fort Wayne, Ind.—Bond Offering.**—Proposals will be received until 1 p. m. June 3, 1899, by Henry C. Berghoff, City Comptroller, for \$330,000 3½% coupon refunding bonds, as follows:

\$240,000 Series "A" refunding water-works bonds, maturing May 15, 1919.
30,000 Series "B" refunding water-works bonds, maturing May 15, 1900.
60,000 refunding bonds, maturing \$5,000 yearly on May 15 from 1900 to 1909 inclusive.

All of the above securities will be in denomination of \$1,000, dated May 15, 1899; interest will be payable May 15 and November 15 at the United States Mortgage & Trust Co., New York City. One hundred thousand dollars of Series "A" bonds are to be delivered on Nov. 15, 1899, and \$140,000 on Jan. 2, 1900; the \$30,000 Series "B" bonds will also be delivered on Jan. 2, 1900, and the \$50,000 refunding bonds on Oct. 15, 1899, all at the office of the United States Mortgage & Trust Company or any other responsible bank in the city of New York, as designated in contract. Each bid must be accompanied by a certified check for 1% of the face value of bonds bid for upon some responsible bank in the city of New York or the city of Fort Wayne. The award of these bonds will be made on June 7, 1899.

**Fort Worth, Tex.—Refunding Bonds Proposed.**—On May 20, 1899, a despatch to the Dallas "News" from Fort Worth stated that at the City Council meeting held May 19 a resolution was adopted that a refunding of the city's bonded debt was imperative at a rate not to exceed 4 per cent; that the City Auditor be requested to prepare a complete statement of the financial resources and indebtedness of the city to be submitted to the bondholders, and that the Mayor and City Auditor be directed to open up negotiations with the bondholders looking to refunding of the bonds at not exceeding the rate of interest mentioned.

**Fostoria, Ohio.—Bond Offering.**—Proposals will be received until 1 p. m. June 12, 1899, by J. M. Schatzel, City Clerk, for \$50,000 4% refunding bonds. Securities are issued pursuant with Title 12, Chapter 2, Section 1701, Revised Statutes of Ohio. They are in denomination of \$1,000 and will bear date of sale. Interest will be payable March 1 and September 1 at the Chase National Bank, New York City. Principal will mature September 1, 1919. A certified check, without qualification, for \$1,000 must accompany proposals.

**Glen Ridge, N. J.—Bond Sale.**—On May 22, 1899, the \$37,000 4% sewer bonds and \$40,000 5% sewer bonds were awarded to the Howard Savings Institution of Newark at 107 625 and 104 49, respectively. Following are the bids:

	\$37,000 4%	\$40,000 5%
Howard Savings Institution, Newark,	Bonds,	Bonds,
Walter Stanton & Co., New York,	107 625	104 49
Parson, Leach & Co., New York,	107 19	
Price, McCormick & Co., New York,	106 70	101 505
E. C. Jones & Co., New York,	106 515	
E. H. Gay & Co., New York,	105 07	100 50
E. D. Shepard & Co., New York,	104 55	104 11
G. M. Hahn, New York,	103 02	
Spitzer & Co., New York,	103 00	
N. W. Harris & Co., New York,	102 28	100 135
John D. Everett & Co., New York,	102 25	100 025
Franklin Savings Bank, Newark,		104 00

The Bank of Montclair bid 104 50 for the entire \$77,000 bonds. The \$37,000 issue will mature \$2,000 yearly, beginning June 1, 1909. The \$40,000 issue will mature June 1, 1914, subject to call after June 1, 1900. For full description of bonds see CHRONICLE May 18, 1899, p. 929.

**Gloucester, Mass.—Bids.**—Following are the bids received May 18, 1899, for the \$30,000 3½% school bonds:

Jose, Parker & Co., Boston,	102 912	N. W. Harris & Co., Boston,	102 375
R. H. Rollins & Sons, Boston,	102 777	W. Holman Cary & Co., Boston,	102 287
W. J. Hayes & Sons, Boston,	102 69	Cape Ann Nat. Bk., Gloucester,	102 29
H. L. Day & Co., Boston,	102 48	R. L. Day & Co., Boston,	102 47
C. P. Phelps & Co., Boston,	102 379	Rhodget, Merritt & Co., Boston,	102 04
Adams & Co., Boston,	102 42	Parkinson & Burr, Boston,	102 08
Mines & Cummings, Boston,	102 30	Denison, Prior & Co., Boston,	101 89

As stated last week, bonds were awarded to Jose, Parker & Co., Boston, at 102 9125.

**Grand Island (Neb.) School District.—Bond Offering.**—Proposals will be received until June 10, 1899, by L. F. Farnsworth, Chairman Finance Committee of the Board of Education, for \$24,000 5% 5-20-year (optional) refunding bonds. Securities are issued to refund \$25,000 6% bonds now subject to call, of which issue \$1,000 will be paid out of the sinking fund. They will be in denomination of \$500, dated July 1, 1899. Interest will be payable semi annually at the State Fiscal Agency in New York City. The bonded indebtedness of the district is \$17,500.

**Grand Rapids, Mich.—Bond Offering.**—Proposals are asked for until 5 p. m. to-day (May 27, 1899,) by I. F. Lamoignon, City Clerk, for \$200,000 4% coupon street-improvement bonds. Securities will be in denomination of \$1,000, dated May 1, 1899; interest will be payable May 1 and November 1 in the city of Grand Rapids. Principal will mature \$40,000 yearly on May 1 from 1900 to 1904, inclusive. Proposals must be accompanied by an unconditional certified check for \$5,000, made payable to the City Treasurer. Bonds are issued pursuant to a resolution of the Common Council unanimously adopted May 8, 1899.

**Greensburg, Pa.—Bond Offering.**—Proposals will be received until 8 p. m. June 5, 1899, by Ira C. Snyder, Borough Clerk, for \$32,000 4% refunding bonds. These bonds were sold on April 10, 1899, as 3½ per cents. We have not been officially informed as to the reason for the re-sale.

**Hastings (Minn.) School District.—Bond Offering.**—Proposals will be received until June 1, 1899, for the \$30,000 4% school-building bonds voted on May 18, 1899. Securities will be in denomination of \$500, dated July 1, 1899. Place for payment of interest is not yet decided upon. Principal will mature \$1,000 yearly on July 1 from 1909 to 1918, inclusive, and \$20,000 in 1919.

**Helena, Mont.—Bond Sale.**—It is reported that the \$130,000 refunding bonds advertised for sale on May 25, 1899, have been awarded to the Lamprecht Bros. Co., Cleveland, at 101 35. For description of bonds see CHRONICLE April 29, 1899, p. 839.

**Herkimer (Village), N. Y.—Bonds Defeated.**—At a special election held May 23, 1899, the proposition to issue \$4,000 bonds to build an embankment to prevent the annual overflow of the West Canada Creek was defeated by a vote of 147 to 108.

**Holland, Mich.—Bond Sale.**—On May 16, 1899, the \$2,500 5% fire department bonds were awarded to C. J. De Roo, Holland, at 112-29. Following are the bids:

C. J. De Roo, Holland,	\$2,507 25	C. F. Kimball & Co., Chicago,	\$2,585 00
A. A. Keen, Chicago,	2,741 25	First Nat. Bk., Barnesville,	2,546 00
Seaton & Mayer, Cin.,	2,704 65	Raymond F. Bush, Detroit,	2,576 25
Chas. B. Kildner, Chicago,	2,643 70	W. J. Hayes & Sons, Cleve.,	2,618 00
N. W. Harris & Co., Chicago,	2,650 00	C. H. Coffin, Chicago,	2,515 00
Chas. E. Temple, Gr. Rapids,	2,641 00		

Bonds mature Feb. 1, 1909. For further description of bonds see CHRONICLE April 29, 1899, p. 839.

**Indianapolis (Ind.) School District.—Bond Offering.**—Proposals will be received until 12 m. June 16, 1899, by the Board of School Commissioners for \$500,000 4% funding bonds. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable January 1 and July 1 at the banking house of Winslow, Lanier & Co., New York City. Principal will mature yearly (except in 1911) on July 1 as follows: \$15,000 in 19 3, \$11,000 from 1904 to 1909, inc., \$7,000 in 1910, \$22,000 in 1912 and 1913, \$4,000 in 1914, \$26,000 in 1915, 1916 and 1917, \$18,000 in 1918, \$26,000 in 1919, \$29,000 in 1920, \$3,000 in 1921, \$35,000 in 1922, 1923 and 1924, \$39,000 in 1925 and \$40,000 in 1926. Bids will be opened at 8 p. m. June 16, 1899. A check, certified by an Indianapolis bank, payable to "Geo. W. Sloan, Treasurer," for at least 2½% of the face value of bonds bid for, must accompany proposals. \$440,000 of the above bonds will be delivered July 1, 1899, and \$60,000 on September 29, 1899.

**Ionia, Mich.—Bonds Authorized.**—The Common Council has authorized the issuance of \$30,000 refunding bonds.

**Ithaca, N. Y.—Bond Issue.**—Mr. C. C. Platt, City Clerk, advises us that the amount of paving bonds recently issued by this city is \$6 448. Interest is at the rate of 4%. Principal matures one-fourth yearly from 1900 to 1903. They are dated May 6, 1899.

**Jennings, La.—Bonds Proposed.**—Citizens of this place, in mass meeting assembled, passed a resolution requesting the City Council to call a special election to vote on the question of levying a special tax for an electric-light and water works system.

**Joplin (Mo.) School District.—Bond Sale.**—On May 22, 1899, the \$20,000 4½ 5-20-year school bonds were awarded to L. L. Doubleday, Columbus, Kansas, at 101-87½. A list of the bids considered will be given next week. For description of bonds see CHRONICLE last week, p. 989.

**Lake County (P. O. Crown Point), Ind.—Bond Offering.**—On June 1, 1899, at 11 A. M., the following bonds will be offered for sale by John W. Dyer, County Treasurer, at his office in Crown Point:

\$167,500 Center and St. Johns townships (joint) 200 bonds—160 for \$1,000 each and 40 for \$187.50 each. Four \$1,000 bonds and one \$187.50 bond will fall due each six months, commencing Nov. 15, 1899. Bonds are issued to raise money for constructing 49 miles of road and were authorized at the joint election held March 14, 1899, by a vote of 505 for to 199 against. Assessed valuation, 1898, was \$347,457.

\$1,495 bonds of Hous Township. Forty bonds are in denomination of \$1,000 and forty of \$757.38 each. Principal will mature \$1,757.38 each six months, commencing May 15, 1904. Bonds are issued to construct 32 miles of road and were voted at an election held March 14, 1899, by a vote of 219 to 95. The assessed valuation is \$1,294,730.

The above bonds will all carry 4½ interest, payable semi-annually at the office of the County Treasurer. Bonds are issued under an Act of the General Assembly approved March 3, 1893, amended March 7, 1895, and Feb. 28, 1899, and by order of the full Board of Commissioners in session April 13, 1899. The \$167,500 issue was offered for sale on May 15, 1899, but were not sold at that time.

**Bond Sale.**—On May 15, 1899, the \$12,900 4½ Center Township road-improvement bonds were awarded to Feder, Holzman & Co., Cincinnati, at 103-86.

**Lauslingburg, N. Y.—Bond Offering.**—Proposals will be received until 8 P. M., May 31, 1899, by Geo. E. Skillman, Village President, for \$63,000 street improvement bonds. Securities are issued in accordance with Chapter 160, Laws of 1895. They are in denomination of \$500, dated June 1, 1899. Principal will mature June 1, 1904. Interest will be payable semi-annually at the office of the Village Treasurer. "Bonds will be sold to the person who will take them at the lowest rate of interest." These bonds were originally awarded to Allen, Sand & Co., on May 10, 1899, but owing to an error in the advertisement the bonds will be resold on the above date.

**La Plata County (P. O. Durango, Col.) School District No. 9.—Bids.**—Following are the bids received May 10, 1899, for the \$36,000 5% 10-20-year and \$12,000 5% 5-15-year bonds:

Parkinson & Burr, Boston.....176,802 50	come.....50,000 Jan. 1, '01.....60,205 00
S. A. Kean, Chicago.....175,437 50	

Principal matures yearly on January 1, \$50,000 from 1901 to 1903 inclusive, and \$25,000 in 1904.

**Montgomery, Ala.—Bond Offering.**—Proposals will be received until 12 M. June 12, 1899, by R. H. Sommerville, City Treasurer, for \$35,000 4½ 30-year school-building bonds and \$20,000 4½ sewer bonds. All bids, which must be unconditional, must be accompanied by a certified check for \$500.

The official notice of this bond offering will be found among the advertisements elsewhere in this Department.

**Morton, Renville County, Minn.—Bond Offering.**—Proposals will be received until 2 P. M. June 19, 1899, by the Village Council, at the office of W. W. McGowan, Village Recorder, for \$7,000 5% 3-8-year (serial) bonds. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable annually.

**New Britain, Conn.—Bonds Authorized.**—At a meeting of the City Council held May 24, 1899, the issuance of \$150,000 sewer bonds was authorized.

**New Castle County (P. O. Wilmington), Del.—Bonds Authorized.**—The County Court has authorized the issuance of \$69,000 4% bonds to refund a like amount of 4½ court house bonds maturing July 1, 1899.

**New London, Conn.—Bond Sale.**—On May 18, 1899, the \$20,000 3½ sewer bonds were awarded to the Savings Bank of New London at 105. Following are the bids:

Savings Bank of New London.....105-00	Blodgett, Merritt & Co., Boston.....103-88
Parkinson & Burr, Boston.....104-91	E. H. Hollins & Sons, Boston.....103-13
Perry, Coffin & Burr, Boston.....104-75	Street, Wykes & Co., N. Y.....103-69
W. J. Hayes & Sons, Boston.....104-69	N. W. Harris & Co., Boston.....103-319
E. C. Stanwood & Co., Boston.....104-50	Edw. C. Jones & Co., New York.....102-55
C. P. Phelps & Co., Boston.....104-439	Allen, Sand & Co., New York.....102-53
Denison, Prior & Co., Cleveland.....104-29	Mariners' Savings Bank of New London.....100-50
R. L. Day & Co., Boston.....103-997	Middletown Savings Bank.....100-00
Jose, Parker & Co., Boston.....103-912	

Bonds mature July 1, 1919. For further description of bonds see CHRONICLE May 13, 1899, p. 940.

**New Madrid County (P. O. New Madrid), Mo.—Bond Offering.**—Proposals will be received until 12 M. June 5, 1899, by L. C. Phillips, County Clerk, for the following ditch bonds:

\$56,323 86 bonds of Drainage District No. 1. Eighty-six bonds are in denomination of \$1,000 and one of \$23 86, dated May 1, 1899. Interest will be payable annually at the American Exchange National Bank, New York City. Principal will mature yearly on March 1 as follows: \$1,000 in 1902 and 1903, \$5,000 in 1904 and 1905, \$5,000 in 1906 and 1907, \$7,000 in 1908 and 1909, \$9,000 in 1910 and 1911, \$11,000 in 1912 and 1913 and \$13,323 86 in 1914.

\$1,400 6% bonds of Drainage District No. 2. Securities are dated May 1, 1899, and mature one bond yearly on May 1 as follows: \$1,000 from 1902 to 1908, inclusive, \$300 in 1909, and \$400 in 1910. Interest will be payable annually at the office of the County Treasurer.

**New Paris, Ohio.—No Bonds Voted.**—Some of the papers recently stated that this village had voted to issue \$3,000 steam-heating plant bonds. Upon inquiry the Corporation Treasurer advises us that no bond issue of any description is being contemplated by either the corporation, the school district or the township.

**New York City.—Bonds Proposed.**—The Board of Estimate has approved of the issuance of \$500,000 bonds for the New East River Bridge and \$572,770 corporate stock for streets and parks.

**Bonds Not Yet Issued.**—No further action has yet been taken regarding the issuance of the \$500,000 Library site bonds which we stated in the CHRONICLE last week had been authorized by the Municipal Assembly. We are advised, however, that the bonds will probably be taken by the sinking fund, and will therefore be issued in small amounts as the money may be needed.

**New York State.—Bond Sale.**—On May 25, 1899, the \$50,000 3½ registered bonds were awarded to Kountze Bros., New York City, at 103-125, an income basis of but 2-82½. Following are the bids:

Kountze Bros., New York.....103-125	1902 bonds.....101-672
Joe. E. Gavin, Buffalo.....1-3-006	1903 bonds.....102-213
Harvey Fisk & Sons, New York.....102-9	1904 bonds.....102-756
Blodgett, Merritt & Co., Boston.....102-89	1905 bonds.....103-254
Produce Ex. Tr. Co., New York.....102-81	1906 bonds.....103-755

Bonds mature \$100,000 yearly on May 1, from 1902 to 1906, inclusive. For further description of securities see CHRONICLE last week, page 990.

**North Adams, Mass.—Temporary Loan.**—The City Treasurer has negotiated a 3-2% loan of \$43,500 for public improvements.

**North Carolina.—Bond Sale.**—On May 22, 1899, the \$110,000 4% bonds were awarded to the Wachovia Loan & Trust Co. of Winston, N. C., at 109-275 on a basis of but 2-924½. Following are the bids, fifty-one in number, made by thirty-six different bidders:

For the Entire Issue	
Wachovia Loan & Trust Co., Raleigh.....109-275	W. J. Hayes & Sons, Cleveland.....105-58
Commer. & Farm. Bk., Raleigh.....108-67	Joseph E. Gavin, Buffalo.....105-545
R. J. Reedels, Winston.....108-37	Feder, Holzman & Co., Cin.....105-351
Bank of Commerce, Norfolk.....108-08	Seasonsood & Mayer, Cincinnati.....105-286
Lamprecht Bros. Co., Cleveland.....107-47	Geo. M. Hahn, New York.....105-17

10,000 @ 108-00	C. T. Bailey, Raleigh.....100 @ 104-50
10,000 @ 108-00	
500 @ 107-50	

Bonds mature Jan. 1, 1909. For further description of securities see CHRONICLE April 22, 1899, p. 788.

**North Dakota.—Bonds Not Sold.**—No bids were received on May 15, 1899, for the \$50,000 certificates of indebtedness advertised for sale on that day. The State Treasurer has since been authorized to negotiate the certificates at private sale.

**Nurwalk, Huron County, Ohio.—Bond Offering.**—Proposals will be received until 12 M June 17, 1899, by T. P. Kellogg, City Clerk, for \$11,000 5% bridge bonds. Securities will be in denomination of \$500, dated May 1, 1899. Interest will be payable semi-annually at the City Treasurer's office. Principal will mature \$500 each March 1 and September 1 from March 1, 1904, to Sept. 1, 1914. Each bid must be unconditional and must be accompanied by a certified check for \$500, payable to the City Clerk.

**Norwood, Ohio.—Bond Sale.**—On May 19, 1899, the \$36,382 70 4 1/2% bonds were awarded to Briggs, Todd & Co., Cincinnati, at 105 1/2. Following are the bids:

Premium.		Premium.	
Briggs, Todd & Co., Cin.	\$1,343 75	Feder, Holman & Co., Cin.	\$4,533 14
W. J. Hayes & Sons, Cleve.	4,775 75	German Nat. Bank, Cin.	4,119 50
Kuhn & Sons, Cincinnati	6,358 06	R. Klaybolte & Co., Cin.	4,119 50
Lamprecht Bros. Co., Cleve.	4,561 31	Seasongood & Mayer, Cin.	3,990 59
Atlas Nat. Bank and Western		C. F. Kemble & Co., Chicago	10 01
German Bank, Cincinnati	4,261 31		

Bonds mature one-tenth annually. For further description of this issue see CHRONICLE April 29, 1899, p. 841.

**Ohio State University.—Bond Sale.**—On May 21, 1899, the \$10,000 4 1/2% refunding bonds were awarded to Feder, Holman & Co., Cincinnati, at 107 1/2. Following are the bids:

Feder, Holman & Co., Cin.	\$10,787 75	Briggs, Todd & Co., Cin.	\$10,645 00
Ohio Nat. Bank, Columbus	10,780 25	Seasongood & Mayer, Cin.	10,654 80
New Nat. Bk., Columbus	10,712 00	Lamprecht Bros. Co., Cleve.	10,677 00
R. Klaybolte & Co., Cin.	10,697 75	Second Nat. Bk., Sandusky	10,637 00

Bonds mature \$5,000 Dec. 1, 1904, and \$5,000 Dec. 1, 1905. For further description of bonds see CHRONICLE May 6, 1899, p. 890.

**Oronogo (Mo.) School District.—Bond Sale.**—On May 20, 1899, \$5,250 6% 10-20-year (optional) school bonds were awarded to T. B. Potter, Chicago, at 110 4/8. Following are the bids:

T. B. Potter, Chicago	\$5,810	Noel-Young Bond & Stock Co., St. Louis	\$5,600
W. J. Hayes & Sons, Cleveland	5,775	Giesler & Krausnick	5,600

**Pawnee City (Neb.) School District.—Bond Offering.**—Proposals will be received until 5 P. M. June 15, 1899, by the Board of Education—Frank A. Barton, Secretary—for the \$10,000 5% bonds voted on April 4, 1899. Securities will be in denomination of \$500, dated May 1, 1899; interest will be payable semi-annually at the office of the County Treasurer in Pawnee City. Principal will mature May 1, 1914, subject to call after May 1, 1904. Bonds are issued in accordance with sub-divisions 14 and 15 of Chapter 79, Compiled Statutes of Nebraska of 1897. Proposals must be accompanied by a certified check for \$200, payable to the order of the School District of Pawnee City. The official circular states that no previous issues of bonds of this district have ever been contested, nor have any of such bonds been defaulted as to payment of either principal or interest. "No litigation is pending or threatened concerning the validity of these bonds." Assessed valuation, \$309,000; estimated real valuation, \$1,545,000; estimated total population, 3,300; bonded debt, including this issue, \$12,500.

**Pelican Rapids (Minn.) Independent School District No. 10.—Bond Sale.**—On May 15, 1899, the \$6,000 5% 10-15-year (serial) bonds were awarded to R. L. Frazee, Pelican Rapids, at 109 1/2. Following are the bids:

R. L. Frazee, Pelican Rapids	\$6,560 00	J. D. Cleghorn & Co., Minn.	\$6,587 00
C. C. Gowan & Co., Gr. Forks, N. Dak.	6,505 00	Mason, Lewis & Co., Chicago	6,554 00
Kass & Co., Minneapolis	6,590 00	Denison, Prior & Co., Cleve.	6,578 50
W. J. Hayes & Sons, Cleve.	6,527 00	Stoddard, Nye & Co., Minn.	6,550 00
Trowbridge, Macdonald & Niver Co., Chicago	6,417 00	Chas. H. Coffin, Chicago	6,501 00
Chas. S. Kidder & Co., Chic.	6,403 81	C. F. Kimball & Co., Chicago	6,075 00
		N. W. Harris & Co., Chicago	6,000 00

All bids included accrued interest and blank bonds. The bid of R. L. Frazee provided for the delivery of the bonds in such amounts and at such times as money may be needed by the School Board and also for the payment of principal and interest at Pelican Rapids. This was considered the best bid and was therefore accepted. For description of bonds see CHRONICLE May 6, 1899, p. 891.

**Pendleton, Ore.—Bond Offering.**—Proposals will be received until 7 P. M. June 14, 1899, by J. E. Beam, City Recorder, for \$150,000 5% gold coupon bonds, dated July 1, 1899. Interest will be payable January 1 and July 1 at New York City or at any city in the United States, at buyer's option, and the principal will mature July 1, 1929, subject to call after July 1, 1919. Bonds are issued in accordance with an

\$250,000

### CITY of NORWALK 3 1/2% GOLD BONDS.

Sealed proposals for the purchase of the whole or part of an issue of Two Hundred and Fifty \$1,000 Bonds to be issued by the City of Norwalk, to be paid in Gold Coin of the United States of the present weight and fineness; to bear 3 1/2 per cent interest, payable in equal semi-annual payments, payable July 1st, A. D. 1900, and at the option of the City on any January 1st or July 1st after January 1st, 1910, upon giving three months' notice of intention to pay will be received by Mayor Charles L. Glover of the City of Norwalk until the 29th day of May, A. D. 1899, at 12 o'clock noon.

Said bonds are to pay a like amount of bonds now outstanding and payable July 1st, 1899. Two hundred thousand of which were for water-works construction and fifty thousand municipal expenses. The bonds will be dated July 1st, 1899, have interest coupons attached or be registered as purchasers shall elect, and are to be payable, both principal and interest, at the Fairfield County National Bank, in said city.

Proposals should state the number of bonds bid for, and must be accompanied by a certified check for one per cent of the amount par value of the bonds bid for. All bids will be opened by the City Council on June 1st, 1899, at 8 P. M. The right is reserved to reject any and all bids.

The City's Grand List is over \$5,000,000. Population is over 8,000. The income from water-works is several thousand in excess of all expenses and interest and is required by the charter to be applied to expense of construction, etc., of water works.

BOND CALL.

### CITY OF TAMPA, FLA.

To all holders of the Bonds of the City of Tampa, issued under Ordinance No. 38, of said City.

You will TAKE NOTICE: That the City of Tampa will exercise its option given in Section One of said Ordinance No. 38, and will, on the 1st day of June, A. D. 1900, take up, pay off and cancel all Bonds issued under said Ordinance No. 38, with all interest due thereon on said date.

The money amounting to \$100,000 the amount of the outstanding Bonds issued under Ordinance No. 38, and a sufficient amount to pay all accrued interest, will be placed with the American Exchange National Bank of the City of New York, State of New York, on or before the 1st day of June, A. D. 1899, with instructions that said Bonds are to be taken up when presented and payment made therefor. This notice is given as required by Ordinance No. 38 of the City of Tampa, to the said American Exchange National Bank of New York, where said bonds are made payable.

After the 1st day of June, A. D. 1900, all interest on said bonds shall cease and the City of Tampa will not be liable for same.

Signed  
F. C. BOWTER,  
Mayor of the City of Tampa.  
FRANK BRUEN,  
President of the City Council.

Attested  
JNO. M. HENDERSON,  
City Clerk.

Approved,  
JNO. A. WELLER,  
City Auditor.  
Dated at Tampa, Florida, 18th May, 1899.

\$55,000

### City of Montgomery, Ala. 4 1/2% Bonds.

Bids will be received by City of Montgomery, Ala., until 12 M June 15th, prox., for 30-year 4 1/2% Bonds, \$35,000 for building School Houses.

\$20,000 for constructing Sanitary Sewers. The bids must be unconditional, investigation as to their legality to be made before proposals, and every bid accompanied by certified check of five hundred dollars.

The City reserves the right to reject any and all bids.

R. H. SOMMERVILLE, Treas.

## NEW LOANS.

\$103,000

### City of Plattsmouth, Neb., BONDS.

TO WHOM IT MAY CONCERN:

The owners and holders of the following described bonds of the City of Plattsmouth, Cass County Nebraska, to-wit:

High School Refunding Bonds dated August 1st, 1895, issued to the amount of \$53,000, due August 1st, 1905.

Intersection Paying Bonds, dated October 1st, 1897, issued to the amount of \$10,000, due October 1st, 1897.

Storm Water Sewer Bonds (General) dated May 1st, 1898, issued to the amount of \$40,000, due May 1st, 1898.

All of said bonds being payable at the Fiscal Agency of the State of Nebraska in New York City.

Are hereby notified that the said City of Plattsmouth, by action of its Mayor and City Council, has decided and elected to exercise its option to pay and redeem said bonds. Now, therefore, the owners and holders of the said bonds above described are hereby notified to present said bonds at their place of payment, viz: The Fiscal Agency of the State of Nebraska, in the City of New York, on the 1st day of June, 1899, for redemption and payment.

This notice is given in pursuance of the order of the Mayor and Council of said City of Plattsmouth.

In witness whereof the said City of Plattsmouth has caused this notice to be signed by its Mayor and attested by the City Clerk, and the seal of said City of Plattsmouth to be affixed this 22nd day of May, A. D. 1899

JOHN P. SATTLER,  
President of the Council.

Attest  
R. C. KEHR,  
City Clerk.

## CAUTION.

### STOLEN BONDS.

In a recent mail robbery at Butte, Montana, there were stolen 14 coupon bonds issued by the County of Jefferson, Montana, of \$500 each, issue of 1887, No. 100 to No. 113 inclusive.

All persons are warned against purchasing these bonds. Any one having information concerning same will please report to

CHUBB & SON,  
Fuller Building, Jersey City, N. J.

If you wish to buy or sell Municipal or other Securities, please write or call.

S. A. KEAN, 132 La Salle St., Chicago.

Act of the Legislature of the State of Oregon approved Feb. 15, 1899, and are authorized for the following purposes:

- 1—\$15,000 for constructing or repairing and maintaining the present system of water works.
- 2—\$30,000 for the purpose of refunding the water bonds of the city.
- 3—\$15,000 for the purpose of paying the unbonded or floating indebtedness.
- 4—\$30,000 for the purpose of refunding the levee bonds of the city.

The bidders for the levee bonds will be required to secure at their own trouble and expense the outstanding levee bonds, amounting to \$40,000, having eight years to run. Bids, however, will be received and considered for the purposes mentioned above, numbered 1, 2 and 3 (making a total of \$120,000), only if made. The denominations of the bonds may be \$100, \$500 and \$1,000. Successful bidders shall at their own expense furnish all necessary bonds and coupons and make examinations of all records; the city is not to furnish any copy of any record, but all bidders shall have free access to its records. Bidders must satisfy themselves of the city's right to issue bonds before bidding. Proposals must be accompanied by a certified check for 2% of the amount bid, payable to F. W. Vincent, Mayor.

**Petoskey, Emmet County Mich.—Bond Sale.**—The \$12,000 4% 10-20-year (optional) electric-light bonds were awarded on May 3, 1899, to Raymond A. Baby of Detroit at 101.666. See CHRONICLE April 29, p. 841.

**Providence, R. I.—Loan Authorized.**—The City Treasurer has been authorized to borrow \$35,000 for school purposes. Loan will be paid out of tax receipts in October, 1899.

**Puassutawney, Pa.—No Bond Election.**—It was originally proposed to hold an election on May 23, 1899, to vote on the question of issuing \$35,000 water bonds, but we are advised the ordinance was recalled and tabled indefinitely.

**Quincy, Mass.—Bond Sale.**—On May 25, 1899, \$30,000 3½% 1-30-year water bonds were awarded to E. H. Rollins & Sons, Boston, at 104.337. Following are the bids:

E. H. Rollins & Sons, Boston.....	104.337	Rines & Cummings, Boston.....	103.79
N. W. Harris & Co., Boston.....	104.187	Adams & Co., Boston.....	103.543

Hodgset, Merritt & Co., Boston.....	103.823	Parkinson & Burr, Boston.....	102.85
W. J. Hayes & Sons, Boston.....	103.808		

**Red Wing, Minn.—Bond Offering.**—Proposals will be received until 7:30 P. M. June 2, 1899, by W. E. Taylor, City Clerk, for \$5,000 4% railroad-aid refunding bonds. Securities

will bear date of July 1, 1899. Interest will be payable January 1 and July 1, and the principal will mature July 1, 1919. The original bonds were issued in 1883 at 6 per cents to the Minnesota Central Railroad Company.

**Rockwell, Iowa.—Bonds Voted.**—This place has voted to issue \$5,000 4% 20-year water-works bonds. Full details and date of sale of these bonds have not yet been determined upon.

**Rocky Mount, N. C.—Bond Offering.**—Bids for the \$40,000 water-works bonds will be received until 4 P. M. June 6, 1899, by T. T. Thorne, City Clerk. Interest will be at the rate of 4%, payable annually on January 2. Bonds are in denomination of \$100, dated June 2, 1899. Principal will mature June 2, 1919. A certified check for \$1,000, payable to C. C. Cooper, City Treasurer, must accompany proposals.

**Rushville, Ind.—Bonds Proposed.**—The School Board of the City desires the City Council to issue \$50,000 bonds for new school houses.

**Sac County, Iowa.—Bond Sale.**—On May 17, 1899, this county sold \$27,000 refunding bonds to the First National Bank, Chicago, at par for a 3½% bond. Principal will mature fifteen years from date of issue, subject to call after five years. For further description of bonds see CHRONICLE, April 29, 1899, p. 842.

**St. Joseph (Mo.) School District.—Bond Sale.**—On May 22, 1899, the \$50,000 4% 10-20-year (optional) school-house bonds were awarded to L. L. Doubleday, Columbus, Kan., at 105.655. Following are the bids:

L. S. Doubleday, Columbus.....	\$52,827 50	N. W. Harris & Co., Chicago.....	\$52,085 00
T. B. Potter, Chicago.....	52,677 00	Jose, Parker & Co., Boston.....	52,029 50

**Sedalia (Mo.) School District.**—*Details of Bonds Sold.*—We noted in the CHRONICLE May 13, 1899, that this district had sold \$30,000 20-year funding bonds to Rudolph Kleybolte & Co., Chicago, at 106-68 for 4 per cents. We are now advised that the \$17,000 funding bonds, also referred to, were sold to the same firm at par. Securities are in denomination of \$1,000, with the option of the district to pay \$3,000 of the \$17,000 issue in 1900, 1901, 1903 and 1905, and \$4,000 in 1902 and 1904. The \$30,000 issue will be dated June 1, 1899, the \$17,000 issue not later than July 1, 1899.

**Somerset (Borough), Pa.**—*Bond Offering.*—Proposals will be received until 7:30 P. M. June 1, 1899, by the Town Council, R. E. Meyers, Clerk, for \$20,000 3½% refunding water-works bonds. Securities are in denomination of \$500. Principal will mature in 1911, \$7,000 being optional after one year and \$13,000 after five years. Proposals are also asked for the above bonds bearing 4½% interest.

**Somerville, Mass.**—*Bond Sale.*—Proposals will be received until 8 P. M. June 8, 1899, by the Committee on Finance, care of John F. Cole, City Treasurer, for \$110,000 4½% city loan bonds. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable semi-annually at the National Security Bank, Boston. Principal will mature yearly on July 1 as follows: \$3,000 from 1900 to 1905; \$7,000 from 1906 to 1909; \$4,000 from 1910 to 1914; \$3,000 from 1915 to 1918, and \$2,000 in 1919, all dates inclusive. Bids must be for the whole issue, and those contemplating any conditions, other than the usual provision that the bonds must be legally issued, will not be considered.

**South Omaha, Neb.**—*Bonds Re-sold.*—The \$70,000 refunding bonds sold early this month at private sale to F. J. Moriarty, Cashier Packers' National Bank of South Omaha, at 100-50, were re-sold on May 22, 1899, at public auction to the same party at 101-25. The first sale was not allowed to stand owing to the objection made to the bonds being sold at private sale.

**Spirit Lake (Iowa) Independent School District.**—*Bond Offering.*—Proposals will be received until June 5, 1899, by C. E. Abbott, Secretary, for \$4,500 4½% school-building bonds and \$2,500 4½% refunding bonds. Securities are in denomination of \$500, dated June 15, 1899. Principal will mature June 15, 1909, subject to call after June 15, 1904.

**Springfield, Ohio.**—*Bond Offering.*—Proposals will be received until 8 P. M. June 20, 1899, by Philip Hoonker, city clerk, for \$6,526 35 (which amount may be reduced) 6½-15 year street improvement bonds. Bonds are dated June 1, 1899; interest will be payable March 1 and September 1, at the Importers' & Traders' National Bank, New York City.

**Sullivan, Ill.**—*Bonds Voted.*—At the election held May 20, 1899, the issuance of bonds was authorized for the purpose of improving the water supply, for a cemetery, and for the extension of the sewerage system.

**Toledo, Ohio.**—*Bond Sale.*—On May 24, 1899, the \$150,000 4½% park improvement bonds were awarded to the Northern National Bank of Toledo, at 111-333. Bonds mature April 1, 1929, subject to call after April 1, 1919. For further description of bonds see CHRONICLE April 29, 1899, p. 842.

**Topeka, Kan.**—*Bond Sale—Bond Offering.*—We are advised by J. H. Squires, City Clerk, that the \$2,670 4½% improvement bonds referred to last week have been sold; also that "the amount of bonds to pay for the creation of Sewer District No. 13 will probably be \$40,000 or more, and bids will likely be received up to June 1, 1899."

**Uhrichsville (Ohio) School District.**—*Bids.*—Following are the bids received on May 17, 1899, for the \$20,000 4½% bonds awarded (as stated last week) to Rudolph Kleybolte & Co., Cincinnati, at 116 5625:

R. Kleybolte & Co., Cin.	\$21,312 50	S. A. Kean, Chicago	\$20,676 00
First Nat. Bank, Circleville	21,262 00	Feder, Holzman & Co., Cin.	20,652 00
Bridge, Todd & Co., Cin.	21,255 75	Denison, Prior & Co., Cleve.	20,441 00
Sessongood & Mayer, Cin.	21,062 75	First Nat. Bank, Columbus	20,356 00
Atlas Nat. Bank, Cin.	21,005 75	Meyer & Keiser, Ind'apolis	20,308 01
Lamprecht Bros. Co., Cleve	20,879 00		

**Unlontown, Pa.**—*Bonds Authorized.*—On May 22, 1899, the Council passed an ordinance providing for the refunding of the borough's debt.

**Utica, N. Y.**—*Bond Offering.*—John A. Cantwell, City Clerk, will sell at public auction at 12 M. June 1, 1899, the following bonds:

\$40,000 00 4½% free academy building bonds, issued pursuant with Chapter 122 Laws of 1899. Principal will mature \$2,000 yearly on January 1 from 1900 to 1919, inclusive.

20,000 00 4½% school-building bonds, issued pursuant with Chapter 129, Laws of 1899, and maturing \$1,000 yearly on January 1 from 1900 to 1919, inclusive.

505 01 4½ 1-6-year Liberty Street bonds, dated March 17, 1899.

1,608 30 4½ 1-6-year West Street bonds, dated April 7, 1899.

824 57 4½ 1-6-year Genesee St. bridge approach bonds, dated April 7, 1899.

1,059 12 4½ 1-6-year Court Street bonds, dated April 21, 1899.

4,139 57 4½ 1-6-year Sunset Street bonds, dated April 21, 1899.

The street bonds mentioned above are issued in pursuance with subdivision 1 of Section 99, Charter of Utica, as amended by Chapter 337, Laws of 1894.

**Valdosta, Ga.—Bonds Voted.**—At the election held May 20, 1899, the issuance of \$35,000 5% 30-year sewer bonds was authorized.

**Valley Falls (Kan.) School District No. 16.—Bonds Voted.**—This district recently voted to issue \$10,800 high school bonds.

**Victoria, Texas.—Bonds Proposed.**—The City Council has under consideration the issuance of bonds for street improvements.

**Warren (Ohio) School District.—Bond Sale.**—On May 22, 1899, \$30,000 4% school bonds were awarded to the Lamprecht Bros. Co., Cleveland, at 109 075.

**Washington, Wilkes County, Ga.—Bond Offering.**—Proposals will be received until June 12, 1899, for the \$30,000 5% gold water-works, electric-light and sewer bonds recently voted. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable January 1 and July 1 at the office of the City Treasurer. Principal will mature one bond yearly.

**Watertown, Mass.—Loan Offering.**—Proposals will be received by Chas. W. Stone, Town Treasurer, until May 29, 1899, for a loan of \$50,000 in anticipation of the collection of taxes. Loan will mature October 1, 1899.

**West Point, Neb.—Bond Sale.**—On May 19, 1899, the \$23,900 4½% 10-20 year (optional) refunding bonds were awarded to Chas. S. Kidder & Co., Chicago, at 100 941.

**West Unity (Ohio) School District.—Bond Election Proposed.**—The calling of a special election to vote on the question of issuing \$5,000 bonds for school purposes is being considered.

**Wharton (Texas) School District.—Bond Sale.**—The Attorney-General has approved an issue of \$8,000 6% 20-year school bonds. The bonds were sold on May 21, 1899.

**Winnebago County (P. O. Oshkosh), Wis.—Note Offering.**—Proposals will be received until 12 m. May 31, 1899, by J. M. Rounds County Treasurer, for \$22,000 of the \$25,000 notes which we recently reported as having been authorized for the purpose of erecting a county jail and a Sheriff's residence. Securities will be issued in denominations to suit

the lender, dated July 1, 1899; interest will be payable April 1 at the County Treasury or county depository. "Principal will mature as nearly as may be as follows: \$2,000 on April 1, 1900, and \$5,000 yearly on April 1, from 1901 to 1904, inclusive." Notes will be issued pursuant to a resolution of the County Board duly adopted on May 2, 1899. "A proposition to let the county have the money as needed between July 1, 1899, and November 1, 1899, the shorter notes to be issued first, interest being equal, will be considered more favorable." At like rates of interest Winnebago County bidders will be preferred.

**Woodsville (N. H.) School District.—Loan Authorized.**—At a meeting held May 20, 1899, the issuance of \$20,000 school-house notes was authorized.

**Worcester, Mass.—Bonds Proposed.**—The State Senate has under consideration a bill permitting this city to borrow \$700,000 for the payment of Kettle Brook damages.

**Youngstown, Ohio.—Bond Sale.**—On May 22, 1899, the \$5,000 5% sidewalk bonds and the \$6,250 5% Himrod Avenue bonds were awarded to the Dollar Savings & Trust Co. of Youngstown at 105-23 and 105-24, respectively. Following are the bids:

*THE FINANCIAL SITUATION.*

Wall Street business only began this week with Wednesday. Neither sentiment nor conditions improved during the holidays. When the Exchange opened the Ford bill looked just as formidable as when it closed the previous week; the anti-trust legislation and agitation in so many States exhibited the same animus against industrial combinations; while a reported worse state of the crops, the higher rates for foreign exchange, some less favorable returns of railroad earnings and a case of yellow fever in the South all tended to encourage forebodings. Under such surroundings, out of which more or less could be extracted to the disadvantage of almost every class of security, what could be more natural than the heavy declines in the market? Evidently the field was ripe for short sales, and the bears held carnival.

But at the same time there was another possible interpretation to the outlook. What we have named were in part surface indications, of temporary influence. Underneath these were industrial conditions of unusual strength. A few short months or even weeks ago sentiment was swayed by the latter wholly, excluding every unfavorable contingency. They gained partial recognition again Friday in the reaction of that day. At present, though, they are in good measure held in suspense. Some of the influences we have mentioned have such a tendency—as for instance the higher rates for foreign exchange, followed as they were on Thursday by the announcement that the National City Bank would ship \$1,000,000 gold by the *Lucania* sailing to-day; the Ford bill with its possibilities of oppressive execution; and the crops subject to so many casualties all through the summer and early fall during the process of making. There are likewise others. The chief among these has arisen out of the fact that in the buoyant period the price of securities was so high that the best bonds and dividend-paying stocks earned little more than 3 per cent on the purchase, and a large class, with an outlook of promise—though the earning power of which was still undemonstrated—followed not far behind. It is no wonder that Europe, preferring home investments paying about the same rate, gave us our best stocks and bonds and some of our reorganized properties in large quantities, while even American capital in considerable amounts found quasi fixed forms of lodgment at London and Berlin. All this transpired too while industrial securities were being multiplied in large numbers and marketed at home. It is not so much a question whether these new issues are good or not and whether those that have been returned to us from foreign holders are still selling at too high a figure. The problem before us is to permanently place those that have been issued or returned, and that effort has for many weeks involved continued liquidation, resulting in successive declines in prices, striking a lower level after each reaction.

It is getting to be quite a serious question, why it is that the cycles of buoyancy in this country must be so extreme and so short. Some claim that they are the necessary belongings of a vigorous youthful nation with large resources; that youth is always discounting the future in an over-sanguine way. No doubt the experience had would in the absence of any

other explanation favor such a solution; and yet we think few will be willing to accept as conclusive that interpretation. The fact that we quickly overdo every combination of favorable conditions and then have to suffer a period of retribution for our temerity cannot be denied. This has become obvious through the many reverses of recent years. We need go back no further than 1879 for a series of instructive illustrations. Study, for example, 1881-82; study again 1884-85; then again 1888-89; and again 1892, etc.; finally, study the current developments. No other nation has such a financial history; the course of the malady seems to be a short, feverish excitement, then quickly following this is a corresponding reaction. In Great Britain and elsewhere among the leading nations there are to be sure times of liquidation, but they are much less frequent and very seldom if ever so extreme. We only began our present cycle of buoyancy last autumn and the movement did not get well under way until about six months ago. The financial condition of the country was then more flattering than almost ever before in our history, and still we are now struggling under a severe interruption to our prosperity. There is no industrial reverse or bankruptcy present or pending, and the period of the reaction promises to be a comparatively short one. But long or short, it is real, and has an inciting cause; one too which we believe can be cured.

Some disappointment has been expressed because several returns of railway earnings received this week for the month of April have shown a quite heavy augmentation in expenses, thus wiping out considerable gains in gross receipts. This has been treated as if it were a general condition, and all sorts of arguments have been advanced to account for it, some writers suggesting as a possible explanation that freight rates must have been seriously cut, when, as a matter of fact, rates have not been so well maintained, taking the country as a whole, for years. The truth is, the cases where there have been heavy increases in expenses are very few, comprising not more than a half-dozen companies all told, and in these instances the augmentation has been so very decided as to suggest a special cause in each case to explain it. Moreover, large numbers of roads have revealed precisely the opposite state of things. On the Pennsylvania Railroad the addition to expense accounts has not been so moderate for months. The Louisville & Nashville, with \$144,095 increase in gross has added only \$26,223 to expenses; the New York Ontario & Western earned \$99,294 more gross, with an additional outlay of only \$26,490; the Central of Georgia enlarged its operating expenditures only \$30,520 while increasing its gross receipts \$76,742; the Norfolk & Western, while gaining \$72,092 in gross, has actually managed to reduce expenses \$9,317, and the Cleveland Cincinnati Chicago & St. Louis has also reduced its expenses. What is surprising is not that operating outlays are growing, but that the addition has thus far (outside of a few special roads) been on the whole so moderate. It is well to remember that a gradual expansion in this particular can hardly be permanently avoided. The roads are doing a much larger volume of business. Besides this, steel rails (where delivered on new contracts) cost more than a short while ago, and many other

items of materials and supplies that enter into the operating accounts are also higher.

While the Stock Exchange markets continue depressed, industrial affairs remain in a satisfactory state and business is large and active. The trade records for the month just past furnish new illustrations of the truth of this statement. We have compiled our tables of bank clearings for May, and they show a ratio of gain over last year almost as large as that in the phenomenal record for the previous month. Taking the country as a whole, the total of the bank exchanges for May 1899 is 8,328 million dollars, against 5,339 millions in May 1898, an expansion of 56 per cent; for April the amount was 8,279 millions, against 4,976 millions, an increase of 66 per cent. Of course the activity of Stock Exchange speculation here in New York accounts very largely for these exceptionally heavy ratios of increase, and for May the volume of business on the Exchange was not quite so large as for April. But even outside of New York, where stock speculation does not count for much in the results, and where also financial transactions do not play the prominent part they do here, the ratio of gain is very large. For the last three months the percentages of addition have been: May, 27.8 per cent; April, 28.2 per cent; March, 26.7 per cent. There was an advantage in May the present year in the fact that there was one more business day (the month having contained only four Sundays against five last year), but on the other hand the increase of 27.8 per cent in that month came on top of 18.9 per cent increase in the same month last year, whereas the 28.2 per cent gain in April followed only 13.3 per cent gain in 1898.

The satisfactory state of trade is also strikingly shown in the steady dwindling of mercantile failures. High prices and a large volume of business naturally diminish the commercial rate of mortality. The monthly record of failures which Col. W. M. Grosvenor prepares for Dun's Review is very instructive just now as indicating how notably favorable the situation has become in this particular. In reviewing the results for April, we pointed out that the failures for that month had been for the amount of only \$5,790,096, being the smallest total of any month of any year since the monthly records were begun in 1893. But for May Colonel Grosvenor now finds an aggregate of but \$3,820,686, this comparing with a total of \$11,130,079 in May 1898, \$11,319,389 in 1897 and \$12,296,348 in 1896. In number the disasters were only 531, as against 955 in the corresponding month of 1898, 936 in 1897 and 917 in 1896. Colonel Grosvenor says a good many people watch these returns with only languid interest, as if they concerned only the accidents of commerce. But business has two poles, payments and failures to pay. When the proportion of payments is small, it does not matter so much what else is prosperous or promising. But when engagements are large, and are met \$99.95 in every \$100 of solvent payments, the conditions existing are not only rare and fine for the present, but full of assurance for the future. It is at such times that men can take large matters in hand with the utmost confidence. We have reached one of those exceptional periods in business, he points out, which scarcely come in twenty

years, when the chances of disaster are reduced almost to the vanishing point.

We have referred above to the fact that the Pennsylvania Railroad shows this time only a moderate increase in expenses. The company's statement is all through very favorable. On the lines directly operated east of Pittsburg and Erie there is \$303,200 increase in gross and \$107,100 increase in net, while on the lines west of Pittsburg and Erie there is \$194,600 gain in gross and \$162,600 gain in net. For the combined system, therefore, the improvement amounts to \$497,800 in gross and to \$269,700 in net. Bearing in mind that this follows \$820,800 gain in gross and \$69,900 gain in net in the same month last year, it is evident that the Pennsylvania is getting its share of the advantages resulting from the revival of business and the buoyancy of the iron trade. In the following we compare the gross and net earnings of the Eastern lines for a series of years past.

LINES EAST OF PITTSBURG.	1899.	1898	1897.	1896	1895.	1894.
April.						
Gross earnings....	5,661,572	5,754,174	5,011,913	5,132,472	5,305,472	4,764,016
Operating expenses...	4,630,064	3,833,964	3,500,644	3,798,494	3,694,064	3,366,187

Net earnings...	5,798,439	5,675,059	8,610,819	5,006,319	7,874,139	4,794,800

Money on call, representing bankers' balances, has loaned at  $1\frac{1}{4}$  per cent and at 3 per cent during the week, averaging about  $2\frac{1}{2}$  per cent. There was no market on Monday or Tuesday. On Wednesday and on Thursday the range was from 2 per cent to 3 per cent, with the bulk of the business at  $2\frac{1}{4}$  per cent. On Friday the transactions were at  $1\frac{1}{4}$  per cent and  $2\frac{1}{4}$  per cent, with the majority at  $2\frac{1}{4}$  per cent. Banks and trust companies quote 3 per cent as the minimum, some of the latter, however, loaning at  $2\frac{1}{4}$  per cent. Time money is in plentiful supply, with a good demand for long periods. Quotations are 3 per cent for sixty days to four months and  $3\frac{1}{4}$  per cent for five to six months, or even for longer dates, on good mixed Stock Exchange collateral. Loans on a fair admixture of railroad properties and interest-paying listed industrial stocks can be readily made at 4 per cent for four to six months. The offerings of commercial paper are only moderate and some banks report that rarely have they seen so little dry goods paper in the market. The demand is excellent not only from city but from out-of-town buyers, and it has been notably good from the East this week. Rates are  $3\frac{1}{4}$  to  $3\frac{1}{2}$  per cent for sixty to ninety day endorsed bills receivable,  $3\frac{1}{2}$  to 4 per cent for prime and 4 to 5 per cent for good four to six months' single names. Some choice single name paper maturing at the end of the year has sold at  $3\frac{1}{2}$  per cent. The banks report a little more currency moving in this direction from near-by points; otherwise the movement is not important. Institutions with large correspondence note an inquiry, preliminary to borrowing in the near future, from distant Western points, but as a rule the interior banks, especially in large cities, seem to be well supplied with funds.

The European political situation remains unchanged. The Bank of England minimum rate of discount is unaltered at 3 per cent. The cable reports dis-

counts of sixty to ninety-day bank bills in London  $2\frac{1}{2}$ @ $2\frac{1}{2}$  per cent. The open market rate at Paris is  $2\frac{1}{2}$  per cent and at Berlin and Frankfort it is  $3\frac{1}{2}$ @ $3\frac{1}{2}$  per cent. According to our special cable from London the Bank of England gained £423,385 bullion during the week and held £30,140,856 at the close of the week. Our correspondent further advises us that the gain was due to the import of £13,000 from Australia, to receipts of £430,000 *net* from the interior of Great Britain and to the export of £20,000 to various countries.

A sharp advance in foreign exchange on Monday and the strong tone on Wednesday gave some color to reports that gold exports were imminent. There were various estimates regarding the gold-exporting point, but the consensus of opinion seemed to be that gold could not be exported at a profit below 4 89 for demand sterling, and some bankers were inclined to the view that even at that figure the export movement would not be profitable unless, indeed, the price of gold at London and the open market rate of discount should advance under such conditions as to indicate more or less permanency. Both the price of gold and the London discount rate were therefore watched with some degree of interest by dealers in exchange and with some anxiety by those holders of securities who were fearful that gold exports would imperil their interests in the stock market. Suspense was ended on Thursday afternoon when it was announced that the National City Bank would ship \$1,000,000 gold by the *Lucania* sailing to-day (Saturday). The tone of the market grew easier after this announcement, indicating that the urgency of the demand for remittance had at least been partially satisfied. Rates were not quotably lower, however, but on Friday they fell off.

The advance in the exchange market early in the week was due to a variety of causes, chief among which was the limited supply of bills. Part of the demand was distinctly traceable to remittances for rubber and other raw material, contracts for the payment for which were maturing. Bankers report comparatively small offerings of commercial bills, even at the high prices now ruling. There are, however, fairly large offerings of long sterling, which is drawn in expectation of covering with cotton bills later in the season, and it is probable that these offerings will increase in the near future.

Nominal rates for exchange were 4 86 to 4 86½ for sixty day and from 4 88 to 4 88½ for sight on Monday, but on Wednesday and thereafter they were from 4 86½ to 4 87 for the former and from 4 88½ to 4 89 for the latter. Rates for actual business opened on Monday at an advance of half a cent, compared with those on Friday of last week, to 4 85½@4 86 for long, 4 88@4 88½ for short and 4 88½@4 83½ for cables. The tone was strong and it so opened on Wednesday (Tuesday being a holiday), but the inquiry was not so urgent for long and for short as it was for cables. The demand for the latter, in connection with the semi-monthly settlement in London, caused an advance of one-quarter of a cent, to 4 88½@4 89, but sixty-day and sight remained unchanged. On Thursday the market was easier, though not quotably lower. On Friday the tone was still easier and rates fell off one-quarter of a cent. The following shows

daily posted rates for exchange by some of the leading drawers.

DAILY POSTED RATES FOR FOREIGN EXCHANGE.

	FRI May 26	MON May 29	TUES May 30	WED. May 31	THUR. June 1	FRI. June 2
Brown Bros.....	4 86½	86½	86½	86½	86½	86½
Barings.....	4 86½	86½	86½	86½	86½	86½
Magoun & Co.....	4 86½	86½	86½	86½	86½	86½
Bank British No. America.....	4 86½	86½	86½	86½	86½	86½
Bank of Montreal.....	4 86½	86½	86½	86½	86½	86½
Canadian Bank of Commerce.....	4 86½	86½	86½	86½	86½	86½
Heidelbach, Loh- elheimer & Co.....	4 86½	86½	86½	86½	86½	86½
Lasard Freres.....	4 86½	86½	86½	86½	86½	86½
Merchants' Bk. of Canada.....	4 86½	86½	86½	86½	86½	86½

The market closed easy on Friday at 4 85½@4 85½ for long, 4 87½@4 88 for short and 4 88½@4 88½ for cables. Commercial on banks 4 85@4 85½ and documents for payment 4 84½@4 85½. Cotton for payment 4 84½@4 84½, cotton for acceptance 4 85@4 85½ and grain for payment 4 85½@4 85½.

The following statement gives the week's movement of money to and from the interior by the New York banks.

Week Ending June 2, 1899.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency.....	\$5,849,000	\$3,163,000	Gain, \$2,486,000
Gold.....	1,897,000	879,000	Gain, 1,318,000
Total gold and legal tenders.....	\$7,546,000	\$3,842,000	Gain, \$3,704,000

With the Sub-Treasury operations the result is as follows.

Week Ending June 2, 1899.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' interior movement, as above.....	\$7,546,000	\$3,842,000	Gain, \$3,704,000
Sub-Treasury operations.....	12,900,000	14,700,000	Loss, 1,800,000
Total gold and legal tenders.....	\$20,446,000	\$18,542,000	Gain, 1,904,000

The following table indicates the amount of bullion in the principal European banks.

Bank of	June 1, 1899.			June 2, 1899.

### CLOSING CHAPTER OF THE DREYFUS CASE.

The earlier stages of the extraordinary "affaire Dreyfus" were characterized in such degree by melodramatic and sensational exhibitions on the part of the chief actors in the scene that the cold, calm and impassive procedure in the final review before the higher court comes as a welcome relief.

Looking back over the shifting phases of this strange imbroglio, it is difficult to suppress the feeling of disgust at the succession of fantastic figures: the "General Staff" on the witness stand in military uniform browbeating court and counsel at the Zola trial; the scoundrel Esterhazy peddling his "confession" from one London newspaper to another; the forger Henry, exposed only through the interposition of foreigners, after deluding his own court-martial and nation with his transparent frauds; the infatuated "anti-Dreyfusards" collecting funds for a monument to celebrate the dead

forger's crime; Drumont, Déroulède and Rochefort, with their fanatical band of agitators raising almost daily uproar against the courts and Government in the Paris streets; the mock court-martial, convened to acquit a guilty man; a President of France virtually forced to resign through his discovery that his subordinates had forged the name of a friendly sovereign; the judge of a higher court tossing aside the ermine, to reappear as a blatant demagogue and agitator; the press of a great city uniting to suppress all news throwing light on the case of an innocent victim—this extraordinary panorama of the last five years has all the aspect of a nightmare as hideous as it was unreal. It is only now, when France is awakening from its troubled dreams, that either the nation or its neighbors can realize what it has escaped. That it has awakened to soberness and sanity it owes first to the instinct of justice and respect for law which no community altogether loses, even in a moment of delirium; next to the courageous self-sacrifice of one man of letters who accepted exile rather than silence, two or three statesmen who chose political ruin when the alternative was acquiescence in a great wrong, and one Paris newspaper which told the truth with a mob at its doors. Finally, it owes its escape to the vigor with which the pressure of enlightened public opinion throughout the world was brought to bear on the Dreyfus controversy.

We do not know any surer proof of the fact that the Dreyfus case has now passed out of the domain of political madness than the absence even of an excited public in the court-room as the re-hearing draws to a close. This week's proceedings of the Court of Cassation are conducted with the calm and dignity appropriate to a high bench of justice. The presentation of the case for the defense is such as should be expected in a nation where personal rights and liberty are respected by government and people. This prompt return to civilized procedure shows, what had been doubted at some junctures of the past few years, that the established forms of justice in France are adequate for the protection of its citizens. No system of government or of legal procedure can provide such protection for a day unless it is intelligently administered. The Court of Assizes into whose hands Zola fell a year ago is part of the same judicial system to which the Court of Cassation belongs. The extraordinary difference between the two episodes reflects, we think, quite as much a change in the public temper as a change in the methods of the courts.

We cannot help thinking, after the experiences of the past few months, that the French Government and French people will be the stronger for having passed through this strange ordeal. An episode of this sort, judged in the light of its final results, is the strongest possible test of the really dominant influences in a community. It is not strange that foreign nations should have begun to distrust the permanency of French institutions when the Dreyfus imbroglio was in its worst stage. The French people themselves were beginning to express such distrust. At present the intimations of the foreign newspapers a year ago, that a new "St. Bartholomew massacre" of the Jews in Paris was possible, read like the effusions of an excited imagination; yet it must not be forgotten that precisely such threats were openly made in Paris. Some of the English papers even this year have carried to an absurd extreme their predictions of an impending French revolution; yet the

fanatics in Paris were laying plans for precisely such a *coup d'état*.

The important point to notice is that as soon as the French people were brought face to face with a real crisis, where prompt decision was imperative, public opinion turned out to be sound. The "St. Bartholomew" rumor was quickly traced down to the wretched Esterhazy and the half-crazy scribbler who has been on trial this week for attempting to incite the army. The people took no interest in the rumor. The exiled pretender to the French throne appeared on the frontier, with a bombastic appeal to the passions of the hour, and was laughed at for his pains. On the very heels of the published prediction that France was on the verge of the abyss of anarchy and revolution, the opportunity most of all to be desired by a strong revolutionary party arose, yet Loubet was elected in the place of Faure as quietly and regularly as any predecessor in the presidency had been chosen. Not once, but a score of times, despatches have confidently predicted that, when this or that decision should be made by courts or ministry, there would be a "popular outbreak" in Paris. Yet there has been no popular outbreak; the demonstrations at such times as the Zola trial, the funeral of M. Faure, and the decision of the higher court, testifying by their very absurdity to the total lack of popular sympathy with the inciters of disorder.

It may perhaps be suggested that the people were kept down by the careful preparations of the War Office and the presence of the military. But even supposing this to have been the true explanation, elements of the greatest possible reassurance might be found in that very fact. Not least among the pessimistic predictions of the period have been those which assumed that the army would rally to the support of the cabal in the General Staff and establish a virtual dictatorship. But the assertion of the anti-Dreyfus party that "l'armée, c'est la France," has turned out to be true in a rather different sense from that intended by its authors. It is obvious enough that, under the existing military system the army really represents a good part of the active citizenship of France. But it very soon appeared, in the progress of this remarkable case, that the significance of a citizen soldiery as an institution lay in the fact that the interests of France as a nation could readily tip the scales against the imagined interests of the army as an organization. We cannot doubt that if army opinion had stood solidly behind the Merciers and De Boiadeffres and Pellieux and Gonses, there would at least have been some formidable outbreak on the part of the military cabal.

But there has been no sign of such a thing; no one has heard of a military "ovation" to these officers, even at the moment of their triumph. It may at least be imagined, from such facts, that the French army is sound in its general character, precisely as the citizenship of France is sound. If France itself were not convinced of this, it does not seem to us that the constant tributes to the army by the public would be possible. The enthusiastic and excited greeting of the French people to Major Marchand on his return from Africa was obviously the more spontaneous in that it gave recognition to an army officer whose personal honor was untarnished, and who had really achieved something for his country without resorting to the intrigue of the War Office. There are unquestionably in the

army other officers of equal capacity and integrity. It is only fair for critics of French institutions to remember that if the army produced a Henry and an Esterhazy, it also produced a Picquart.

This view of the case appears to us to be a matter of high importance; for if the army were honey-combed with imbecillity and treason, as the Secret Service and the General Staff have seemed to be, there would be little hope for the maintenance of France's defensive organization. It would seem that the course of justice can hardly stop with the return of Captain Dreyfus, the release and reinstatement of Picquart and the exoneration of Zola. There must be penalty as well as indemnity in a matter of this sort, and the arrest of Colonel Du Paty de Clam last Thursday, the chief agent if not the prime mover in this military conspiracy, indicates that the Government is mindful of such secondary duties. The further procedure of the law in this regard may provide another test for the firmness of the present French Government and the intelligence of its people. For ourselves, we do not anticipate serious trouble in the matter. The sentiment of the French people is bound to react with a violence proportioned to its earlier movement under the lead of the conspirators. Now that the people have learned the truth, we suspect that the time is not far off when the Government will have to exert itself quite as much to protect the culprits from excessive punishment as it might have to labor, under other circumstances, in bringing them to justice.

#### ADVANTAGES AND DISADVANTAGES OF INDUSTRIAL COMBINATIONS.

Mr. Charles R. Flint of this city has delivered an excellent discourse on the subject of industrial combinations. The occasion of the speech was the dinner given last week in his honor at the Union Club in Boston by Mr. William M. Wood of that city, when Mr. Flint was asked to speak on the subject of "Industrials." Mr. Flint is not only broad-minded and conservative, but has a wide practical knowledge of the workings and nature of these creations of modern times, he having been active in the formation of several such combinations, and being prominently identified at present with a number of them. No one was better fitted to deal with the subject in a rational and intelligent way.

Mr. Flint well says that the organization of large industrial corporations is the most prominent feature of the present revival of prosperity. The time has gone by, he contends, when it is necessary to argue as to the right of large aggregations of capital for the purpose of industrial development to exist. Every great movement in the world's progress has been opposed. Machinery has done more to benefit labor than all the acts of reformers and governments, yet originally the class most benefited endeavored to prevent its use. But while combinations of wealth, of judgment, of experience, and of executive ability, are now generally recognized as a natural evolution in industrial development, all reflective men appreciate that, as mistakes have been made in the development of other great institutions, in the State and even in the Church, so mistakes have been and will be made in the organization and management of industrial enterprises. Accordingly he thinks it important at the present time, when so many industrial corporations are being

organized, to compare views with the purpose of minimizing mistakes.

Mr. Flint finds a favorable feature in the fact that (to quote his exact words): "the capitalizations of most of the industrial corporations which have recently been formed have been clearly defined and have been based principally upon the earnings for the past five years, during the greater part of which time 'America has been wearing her old clothes.'" We do not understand Mr. Flint to mean by this that, taking the low earnings of the last five years as a basis, the capitalization of the new companies has been kept at a point where these small earnings will suffice to pay a full return on it. If that were the meaning, we should hardly be prepared to endorse the statement. For there can be no doubt that some of the new concerns have been capitalized on an inflated basis, and even under the most propitious circumstances they will find it difficult to earn a return on this capital, not to speak of the restricted profits of the years of depression. The thought which Mr. Flint obviously had in mind was that, having only the contracted earnings of recent lean years to work on, over-capitalization has been kept within much narrower bounds than would otherwise have been the case; accordingly, that the possibility of danger and disaster is correspondingly lessened.

The caution he utters against banking on expectations of the permanence of the existing large earnings is very timely. He says that in his judgment the danger point will be reached when new capitalization is created based upon the abnormally large earnings of the prevailing period of prosperity, and an undue advance in the quotations of outstanding securities takes place in consequence of unexpectedly favorable statements of profits. Business is active to-day and promises to be more so to-morrow. Profits are, and for the near future must continue to be, large. Add to this the advantages which will accrue from economies and other benefits secured by consolidation, and statements of profits will be rendered which will have a tendency, he thinks, to turn men's heads. This is certainly a danger to be guarded against, and Mr. Flint suggests some useful precautions. He says wise managers of large industrial corporations will charge off substantial amounts for depreciation and increase the surplus out of the unusual profits resulting from the augmented demand and the decreased cost of production. Industrial corporations, properly organized and well managed, have an inevitable and a necessary advantage in the world's markets. But there will ultimately be a reaction from the present period of unusual business activity. The vital point is to see that industrial corporations are organized and managed upon sound business principles, and do not rush into over-production, and thus help create the conditions of inflation which result in reaction and panic. What should be preached, Mr. Flint says, is the gospel of steadiness, and the new corporations are large enough and controllable enough, he declares, to make for steadiness in a way that would have been impossible under the old conditions.

In this last circumstance, that is in the fact that more ready control is exercised over production, there is, according to the speaker, a considerable element of strength. The severest test of a business system is in times of adversity. But given concentrated control there is the possibility of modifying if not

eliminating some of the most serious features of it as experienced in the past. Under the conditions which prevailed before these large aggregations of wealth and intelligence came into being, each manufacturer in times of depression rushed in to secure as much as possible of the reduced business; the result was demoralization. Under industrial combination, however, each concern obtains its fair share of the reduced volume of business at fair prices, and the contraction of business is conducted with the orderliness of a retreat of a well-disciplined army. It is pointed out that nothing in the past has more demoralized industries than overproduction in periods of prosperity and the scramble for a market in times of adversity, resulting in the cutting of prices to such an extent as to necessitate the reduction of wages and the manufacture of inferior—one might say counterfeit—goods. Such competition instead of being the life of trade is the death of trade, resulting in failures among jobbers, manufacturers and suppliers of raw material, and even affecting adversely the bankers.

Industrial combinations are also necessary. Mr. Flint argues, in order to enable us to maintain our hold on the export trade. He asserts that over 90 per cent of our exports of manufactured goods is being produced by such organizations; and the only way in which the United States can extend and hold its position in the world's markets for manufactured goods is by securing the advantages of highly-developed special machinery, which is only possible through centralized manufacture and aggregated capital. Subsidy seekers claim, says Mr. Flint, that "trade follows the flag;" merchants know that trade follows the price and the flag follows the trade. The wars of to-day are industrial wars; wealth is secured by production instead of by plunder; diplomats devote most of their time to studying trade conditions for the benefit of their home industries, and the most valuable treaties are those of reciprocity and commerce. Not only are we dependent for our position in the world's markets upon the existence of large industrial corporations, but the wages of the American workmen can be sustained only by our keeping in the lead in the development of labor-saving machinery through centralized manufacture. To-day the productive capacity of the labor-saving machinery of the United States more than equals that of 400,000,000 of people not using labor-saving devices.

It will thus be seen that Mr. Flint is a careful student as well as a practical man of affairs. There can be no doubt that much anxiety has latterly been felt owing to the rapid multiplication of these industrial combinations, their tendency to create fictitious capitalization, and the reckless speculation which has been engendered in their securities. Mr. Flint touches on the other side of the picture and presents to view some of the manifest advantages and benefits resulting from the unification of interests. Moreover, the words of warning and precaution which he utters should, if heeded, remove the danger of serious disaster and collapse a few years hence when perchance business prosperity shall give place to business adversity. What Mr. Flint says regarding the improvement in the condition of the working classes as the result of the introduction of labor-saving implements and devices, which industrial combinations so strongly facilitate, is worth quoting entire: "Man power, under these conditions, has given place

to machine power, and the man, instead of being a machine, a mere hand worker, daily becomes more and more a brain worker and more and more a man. This, more than any other single fact, accounts for the increased prosperity of our people, their larger leisure, larger liberty, and larger enjoyment of life. Compare their condition with that which prevailed before the aggregation of wealth and intelligence in the development of industries, when wealth was obtained by conquest, not by production: when the masses had meat but once a week; when their houses were without chimneys and without windows; when their clothing and surroundings were filthy; when the death rate was double what it is to-day—and you go back to a time when the nobility knew less of the world than the laboring man of to-day; when the present necessities of the masses were luxuries only for the rich; and you realize that the emancipation proclamations were written by Watt and Arkwright, Stephenson and Fulton, Franklin and Morse, Bessemer, and the great organizers who have applied their discoveries and distributed the benefits of their inventions to the whole world.'

#### THE MICHIGAN CONSOLIDATION.

The proposed union of the Flint & Pere Marquette RR., the Chicago & West Michigan and the Detroit Grand Rapids & Western illustrates anew the tendency towards the consolidation of railroad properties in this country and the gradual absorption or yielding up of the identity of the smaller roads. It also shows how, under the stress of necessity, this action is being forced step by step; for we may assume that as far as the two roads last mentioned, namely the Chicago & West Michigan and the Detroit Grand Rapids & Western, are concerned, some such merger was inevitable if the interests of the security holders were to be a controlling consideration.

Of the three roads to be combined, the Flint & Pere Marquette is decidedly the strongest. This is so not only because it is larger in point of mileage, but also because it earns nearly as much, both gross and net, as the other two combined. Furthermore, it established a much better record for itself during the recent years of depression. The personnel of the Flint board of directors comprises such strong and well-known names as George Coppel, Oliver W. Mink and Wm. W. Crapo and others of like character. The Chicago & West Michigan and the Detroit Grand Rapids & Western have long been controlled by identical people, and are known as the Thayer-Merriam roads, because Mr. Charles Merriam and Mr. E. V. R. Thayer have been the guiding spirits in their affairs.

The Thayer-Merriam roads have had a hard time of it in the peculiar situation of affairs which has existed in Michigan in recent years. Formerly enjoying a high reputation and ranking as dividend payers, their course grew more and more unfavorable with the lapse of time. In the case of the Chicago & West Michigan, bondholders were obliged to forego a part of their cash interest for several successive years; and it is only recently that full interest in cash has been resumed. The Detroit Grand Rapids & Western, or rather the Detroit Lansing & Northern which was its former name, did even worse. It went to default and was foreclosed, the common stock of the Lansing & Northern being entirely wiped out. The fault was in the conditions, not in the management, and most of

the other Michigan roads suffered from the same circumstances, even if in less degree.

An important change has been going on during the last decade in the traffic of the Michigan roads. Formerly the lumber traffic was their principal source of revenue. But latterly the supply of timber has been steadily falling off. The growth in other lines of local traffic kept up, but this was not sufficient to counterbalance the loss in lumber. The development of business depression in 1893 and succeeding years tended to accentuate this situation. Furthermore, owing to the building of new mileage there are more lines among which to divide what business there is. The Thayer-Merriam people recognized the necessity for developing some new sources of traffic as far as both their roads are concerned, and the latter part of 1897 they established a car ferry line across Lake Michigan, running from Muskegon, Mich., to Milwaukee, Wis. This move was made with the view to securing for the roads a share of the through traffic to and from the Northwest for which, (owing to the location of the roads and the limitations to which they are subjected by the connecting systems) they were previously unable to compete. The entrance into the Northwest, thus gained through the car ferry, opened up a field from which a considerable tonnage in grain, flour and other products can be drawn, besides which some return tonnage from the East in the shape of structural iron, merchandise, etc., is secured.

The Flint & Pere Marquette about the same time also undertook to develop a water route of this kind, running a car ferry from Ludington and Manistee to Milwaukee and Manitowoc, &c. The union of this road with the Merriam roads ought, therefore, to place the consolidated system in excellent position for commanding and developing this class of traffic. It should also strengthen the properties locally.

The system will be quite an extensive one. The Flint & Pere Marquette comprises 704 miles, the Chicago & West Michigan 614 miles and the Detroit Grand Rapids & Western 451 miles, making together over 1,750 miles. If we add the mileage in spurs on the Flint road, the total will fall not far short of two thousand miles. The system, moreover, seems compact and homogeneous. With its western rail termini on Lake Michigan, at Manistee, Ludington, Pentwater, Muskegon and Chicago, and eastern termini at Port Huron, Detroit, and Toledo, it thoroughly grids irons Central Michigan, and has besides a line extending almost to the extreme northern end of the Southern Peninsula of Michigan. The combined system will have, roughly, 25½ million dollars of funded debt, this being the aggregate amount of the outstanding bonds and equipment obligations of the existing companies, which bonds and obligations are not to be disturbed for the present. The aggregate of the stock issues of the constituent companies, common and preferred, now is \$22,846,500. The merger provides for the issue of \$28,000,000 of stock, \$12,000,000 being preferred and \$16,000,000 common; but \$1,837,800 of preferred and \$1,854,450 of common are to be reserved for future requirements.

All three of the constituent companies have been showing improved results latterly under the revival in business activity and the new connections opened. The Flint in February 1899 paid one per cent on its \$6,342,000 of preferred stock, after a lapse of some years; the Chicago & West Michigan is again meeting all its coupons in full in cash, and the Detroit

Grand Rapids & Western, after its drastic reorganization, paid in March 1899 a first dividend of 3 per cent on the new issue of preferred stock. The earnings of the three companies in the late calendar year are shown in the following.

Calendar year 1898.	Gross earnings.	Operating expenses and taxes.	Net earnings.
Flint & Pere Marquette....	\$3,063,209	\$2,279,029 (74%)	\$784,180
Chicago & West Michigan..	1,983,350	1,548,177 (78%)	435,173
Detroit Gr. Rapids & West.	1,538,688	1,170,585 (76%)	368,103
	\$6,585,247	\$4,997,791	\$1,587,456

It will be observed that the three companies combined earned \$6,585,247 gross in 1898 and \$1,587,456 net. The ratio of expenses to earnings was high for all the lines, but especially so for the Merriam roads, it costing 78 per cent to operate the Chicago & West Michigan. Under the consolidated management there will doubtless be some saving in this particular.

#### AIR BRAKE POWER ON LARGE CARS.

The use of freight cars with a loading capacity of fifty and fifty-five tons, of which the number in service is constantly growing, has already introduced a number of problems of operation as well as of constructional details. So long as solid trains of the 100,000-pound cars are made up, the train handling questions are not prominent or so pressing as where the characteristics of the traffic do not admit of this plan being strictly adhered to. These very large cars will find their chief use, for the present at least, in special traffic where they can be operated in entire trains; but with the gradual additions to their number now going on, this condition cannot last long, and they must be increasingly used with smaller cars. This has already happened often enough to bring forward several problems, of which perhaps the question of brake applications is the most important. The brake apparatus is now perfectly adjusted to 40,000-lb. and 60,000-lb. cars, and engine and train men have been carefully schooled to get the best results on such cars.

The braking force which will safely and properly handle a train made up entirely of 30 and 40-ton cars will not be safe for a train made up of these and 50-ton cars. The braking power for freight trains is practically everywhere accepted as 70 per cent of the light-weight of the cars; and there has been no need to change this rule with the increase of car capacity from 40,000 lbs. to 60,000 lbs., now the standard size built. With the further increase to 100,000 lbs. the old rule as to braking force becomes inadequate. The dead-weight of a 20-ton car is about 20,000 lbs. and of a 30-ton car, 29,000 lbs. Now, allowing 70 per cent of the light-weight of these cars as the maximum braking power to be used, would make the braking power of the smaller car 25 per cent of its total loaded weight, while for the 30-ton car practically the same ratio is maintained, the actual figure being 23 per cent of the total. So far, then, as braking power is concerned, the same rule is as applicable to the 60,000 lb. car as to a 40,000-lb. car. With 50-ton cars a different state of affairs exists. The dead-weight of such a car may be taken as about 23 per cent of the total weight, against about 35½ per cent in the smaller cars. The bearing of this saving in the proportion of dead-weight to the total weight of the car has an obvious effect in reducing the ratio of braking force available for these cars, as now calculated.

While, as we have pointed out, the rule for a braking power equal to 70 per cent of the light-weight of the car applies equally well to 20 and 30-ton cars, it gives a braking force of only 16 per cent of the loaded weight of a 100,000-lb. car, instead of about 25 per cent. This reduces the ratio to an inadequate and unsafe figure. Where the 50-ton cars are run in entire trains the braking force is easily adjusted, but when placed in trains with smaller cars a uniform air pressure is necessary, and this must be governed by the safe allowable braking force for the 30 ton cars; otherwise wheels would be skidded, the train stopped on the road, the cars damaged, and various inconveniences brought about. But a car or train is not safely operated with a braking pressure of only 16 per cent. The trouble has been gotten over on some roads by increasing the air-brake reservoir pressure and then cutting out the brake on the empty cars in the train, so that in stopping they are applied only on the loaded cars. In other instances two pressure regulators are provided, one set at 70 and the other at 100 lbs. to the square inch. With a loaded train the latter pressure is maintained, but when running with a train of empty cars, the 100-lb. regulator is cut out by turning a cock, so that the pressure of the reservoir and in the train pipes is governed by the low pressure regulator. Where traffic is all one way this method may serve well enough, but it is hardly applicable to general traffic, where trains are made up of empty and loaded cars going in both directions.

#### COTTON CONSUMPTION AND OVERLAND MOVEMENT TO JUNE 1.

The marketing of cotton during May has been very free for so late in the season, and exceeding in volume, as did April, the result for the similar period in any previous year. There has come into sight during the month 315,959 bales, against 217,161 bales in May of 1898 and 183,218 bales in 1897. The aggregate amount of the crop of 1898-99 now visible is 10,697,045 bales, against 10,639,341 bales on June 1 1898. Spinners' takings have been greater during the month than in 1898, and their aggregate takings for the eight months show a gain over the same period of last year of 3,249 bales.

#### OVERLAND MOVEMENT TO JUNE 1.

The gross movement overland in May has been 91,294 bales, which compares with 80,970 bales last year and 51,382 bales in 1897. The excess over a year ago in the total for the season to date is now 167,779 bales, and contrasted with 1896-97 the increase is 683,589 bales. The net for the month has reached 45,879 bales, or a gain over 1898 of 3,963 bales, the total then being 41,916 bales. In 1897 the net was 37,157 bales. The aggregate for the eight months records an increase over last year of 72,633 bales.

#### OVERLAND FROM SEPT. 1 TO MAY 31.

Leaving total net overland.....	1,242,935	1,174,306	846,463

\* This total includes shipments to Canada by rail, which since September 1, 1898, amounted to 89,041 bales, in 1897-98, were 106,841 bales and in 1896-97 were 68,149 bales.

#### RECEIPTS, EXPORTS AND SPINNERS' TAKINGS.

The net receipts of cotton at the outports have been heavier than in the same month of 1898, the total for 1899 having been 230,180 bales, whereas last year it was only 172,245 bales. The aggregate for the eight months is 282,929 bales less than that of last year and 1,547,327 bales in excess of 1896-97. The exports to foreign ports have been less free than in May of last year, the shipments for the month this year being but 312,478 bales, against 378,755 bales in 1898 and 273,568 bales in 1897. For the season to date the total exports are 283,041 bales below those for 1897-98 and exhibit an excess of 1,057,244 bales over 1896-97.

Movement from Sept. 1, 1898, to May 31, 1899.	Receipts since Sept. 1, 1898.	Receipts since Sept. 1, 1897.	EXPORTS SINCE SEPT. 1, 1898 TO—	Stocks May 31.

Total 1896-97.....	8,029,782	2,967,463	681,003	174,118

\* Great Britain exports include to the Channel.

Using the facts disclosed by the foregoing statements, we shall find that the portion of the crop which has reached a market through the outports and overland, and the Southern consumption, since September 1 this year and the two previous years, is as follows:

	1898-99	1897-98	1896-97.
Receipts at the ports to June 1.....bales	8,177,110	8,460,685	6,629,782
Net shipments overland during same time	1,243,935	1,174,306	846,463
Total receipts.....	9,421,045	9,634,991	7,476,245
Southern consumption since September 1	1,016,000	856,000	766,000
Total to June 1.....bales	10,437,045	10,490,991	8,242,245

The amount of cotton marketed since September 1 in 1898-99 is thus seen to be 50,296 bales less than in 1897-98 and 2,194,799 bales more than for 1896-97. To determine the portion which has gone into the hands of Northern spinners during the same period we have prepared the following:

Total receipts to May 31, 1899, as above.....bales	10,437,045
Stock on hand commencement of year (Sept. 1 1898) —	
At Northern ports.....	61,054
At Southern ports.....	114,932—
At Northern interior markets.....	10,260—
Total supply to May 31, 1899.....	10,623,317

Of this supply there has been exported  
to foreign ports since Sept. 1, 1898. 6,808,040  
Less foreign cotton included ..bales. 71,897-0,786,143  
Sent to Canada direct from West..... 89,041  
Burnt North and South..... 727  
Stock on hand end of month (May 31, 1899)-  
At Northern ports..... 218,097  
At Southern ports..... 467,429- 635,526  
At Northern interior markets..... 9,917-7,521,854

Total takings by spinners since Sept. 1, 1898..... 3,101,963  
Taken by Southern spinners..... 1,016,000  
Taken by Northern spinners since September 1, 1898..... 2,085,963  
Taken by Northern spinners same time in 1897-98..... 2,082,714

Increase in takings by Northern spinners this year..bales 8,249

The above indicates that Northern spinners had up to May 31 taken 2,085,963 bales, an increase over the corresponding period of 1897-98 of 3,249 bales and an excess over the same time of 1896-97 of 491,866 bales.

#### AMOUNT OF CROP NOW IN SIGHT.

In the foregoing we have the number of bales which has already been marketed this year and the two previous seasons. An additional fact of interest is the total of the crop which was in sight on June 1 compared with previous years. We reach that point by adding to the above the stock remaining at that date at the interior towns less stock held by them at the beginning of the season. In this manner we find the result for the three years on June 1 to be as follows:

	1898-99	1897-98	1896-97
Total marketed, as above.....bales.	10,437,045	10,487,341	8,242,246
Interior stocks in excess of Sept. 1.	260,000	172,000	21,000
Total in sight.....bales.	10,697,045	10,659,341	8,221,246

\* Less than Sept. 1.

This indicates that the movement up to June 1 of the present year is 37,704 bales more than in 1897-98 and 2,475,799 bales greater than in 1896-97.

As it will interest the reader to see what has come into sight each month of the season during this and previous years, we have prepared the following, which shows the movement for the last four seasons.

Months.	1898-99.	1897-98	1896-97.	1895-96.
September.....	982,766	1,069,800	1,222,287	542,394
October.....	2,293,606	1,871,654	1,891,562	1,722,122
November.....	2,353,000	2,337,112	1,634,210	1,321,097
December.....	2,089,594	1,950,210	1,549,705	1,336,080
January.....	1,101,499	1,342,945	680,513	617,924

#### WEIGHT OF BALES.

To furnish a more exact measure of the receipts up to May 31 we give below our usual table of the weight of bales. We give for comparison the figures for the same time in the two previous years.

	Nine Months End. May 31, 1899.		Same period 1897-98.		Same period 1896-97.	
	Number of Bales.	Weight in Pounds.	Average Weight.	Average Weight.	Average Weight.	Average Weight.
Texas.....	2,304,456	1,202,781,371	534.06	529.62	528.51	
Louisiana.....	2,150,908	1,117,408,211	519.53	510.09	507.21	
Alabama.....	247,072	120,284,784	522.00	511.00	505.00	
Georgia.....	1,549,380	770,229,405	500.83	495.85	487.85	
South Carolina.....	387,997	192,058,515	495.00	491.00	485.40

Total.....	10,437,045	5,337,802,011	510.47	508.88	502.70	

\* Including Florida

It will be noticed that the movement up to May 31 shows an increase in the average weight as compared with the same period of last year, the average this year being 510.47 lbs. per bale, against 506.88

lbs. per bale for the same time in 1897-98 and 502.79 lbs. in 1896-97.

#### DRY GOODS TRADE IN MAY.

The most important event of the month was the sale on May 6 of 1,250,000 pieces of print cloths, on the basis of 2½c. for regular 64 squares, to a syndicate of printers and Fall River manufacturers guaranteeing to maintain that price up to October 1. This transaction had a good general influence over the cotton goods situation. In brown and bleached cottons the sales for the month have been on a liberal scale. In the former there have been occasional advances of ¼c. and in the latter a general rise of ¼c. to ½c. per yard. Prints have also advanced ¼c. in a number of staple lines. Production has been on an unusually large scale in heavy brown cottons and grey goods, but the demand has been sufficient to keep the market short of ready supplies and well sold ahead. Buying for export has been good for distant shipments in brown sheetings at full current prices.

MAY.	1899.					1898.				
	Oot'n low mid-ling.	Print-ing cloths, 64x64.	Sheet-ings, stand-ard.	Lan-caster ging-hams.	5th'n sheet-ings.	Oot'n low mid-ling.	Print-ing cloths, 64x64.	Sheet-ings, stand-ard.	Lan-caster ging-hams.	5th'n sheet-ings.

25	Produce Exchange Trust Co.....	240	Apr. '99—280

\* Sale at the Stock Exchange.

—The National Bank of Commerce of New York appears to be passing into new control. Since Mr. Sherman's resignation was tendered, to take effect July 1, as announced in this column some weeks since, there has been much interest manifested in banking circles regarding the appointment of his successor. The capital is large—\$5,000,000; indeed, with the single exception of the American Exchange National Bank, which has the same capital, it is the largest in the country. The surplus of the Commerce is \$3,636,500, while that of the American Exchange is \$2,673,921. Therefore, including capital and surplus, the Commerce stands first among the banking institutions in the United States. It has had a long and honorable record; it has been well and

conservatively managed, and it is a bank which one would naturally conclude would easily command the services of the highest financial talent in the country. Hence the interest which is felt concerning the new incumbent of the Presidency. It is rumored that the managers have been seeking for some man of superior financial ability and national reputation to take the position. It is also rumored that the executive staff of the bank will be increased by the election of an Active Vice-President. Should this rumor prove true there will be two positions to be filled on the retirement of Mr. Sherman. It is essential that the Active Vice-President shall be of decided executive ability. Indeed, he should be a man who has had such experience in banking as to demonstrate beyond question his fitness for the position. Such men are presumably already holding places in banking institutions where their services are appreciated, and therefore it may be difficult to induce them to make a change, even such a tempting change as the Active Vice-Presidency of the National Bank of Commerce offers.

The large capital and surplus of the Commerce doubtless would be regarded as an obstacle rather than an advantage by those to whom the offer of the position of President and Acting Vice-President have been made. When, years ago, the banking business was greatly profitable by reason of high rates of interest, moderate taxes and ordinary competition, large capitals were not detrimental but advantageous. Now, however, when rates of interest under normal conditions are low, and when taxes are high and increasing almost year by year under adverse legislation, large capitals and surplus are likely to hinder the successful operation of banking institutions unless the business can be increased so as to give full and constantly active employment to their resources. Such considerations as these doubtless have much weight with those whose services are being sought by the management of the Bank of Commerce. Should, however, the managers be able to give assurances of a prospective increase of business sufficient in volume and of such a permanent character as practically to guarantee success with the existing capital and surplus, the objection above noted would doubtless be overruled, and there would probably be little difficulty in obtaining the services of men of a high degree of talent and of superior executive ability for the positions of President and Active Vice President.

It is reported that, with a view to the more or less permanent increase of the business of the Bank of Commerce, there have been admitted to the board of directors three representatives of the Mutual Life Insurance Company. The importance this movement has lies in the presumption that the bank will thereby secure a large share of the business resulting from the varied and extensive operations of the insurance company. Assuming that to be true, the new officers of the bank would have little reason to question their ability to maintain its prestige as one of the foremost banks of the country.

—Important changes in the management of the North American Trust Company are announced. Col. W. L. Trenholm, formerly Comptroller of the Currency, has retired from the Presidency of the company and been succeeded by Alvah Trowbridge; and Charlton T. Lewis has been elected a director to fill the vacancy caused by the resignation of Adlai E. Stevenson. It is understood that other changes will soon be made in the board of directors and also in the Vice-Presidents, representatives of the new parties in control of the company, who it is rumored are Messrs. Whitney and Ryan, displacing some of the present incumbents. It has been decided to increase the capital from \$1,000,000 to \$2,000,000, and the surplus from \$300,000 to \$1,000,000. The success of the company since its organization has been largely due to the efforts of Col. Trenholm, and his resignation elicited expressions of regret from every member of the board. The directors who have served with Col. Trenholm are John G. Carlisle, ex-Secretary of the Treasury; Roland R. Conklin and Samuel M. Jarvis, who are also Vice-Presidents; C. W. Drake, Treasurer of the Rio Grande Western Railroad Co. and A. Marcus, Treasurer of the Oregon Railroad & Navigation Co. and Gen. Wager Swayne.

—J. Frederick Sweesy, formerly Cashier of the Third National Bank (in liquidation), has been appointed Assistant Cashier of the National Bank of North America. Henry Chapin, Jr., the Cashier of the bank, now has two assistants,

Col. Heman Dowd and Mr. Sweesy, as above noted, and, therefore it is felt that there is really no necessity for the services of a Vice-President to fill the vacancy caused by the resignation of Alvah Trowbridge. William F. Havemeyer is the remaining Vice President. It was recently announced in this column that a proposition had been made to the stockholders to increase the par of the stock of the bank from \$70 to \$100 by the declaration of a cash dividend of \$30 per share out of undivided profits, thereby increasing the capital from \$700,000 to \$1,000,000. The proposition will undoubtedly be acceded to at the called meeting of the stockholders June 14, for holders of three-fourths of the stock have already expressed their intention of voting for the measure.

—Mr. Herbert Coppel, a son of Mr. George Coppel, was, on June first, admitted to membership in the firm of Maitland, Coppel & Co.

—The plan for the establishment of a Sub-Clearing House in Boston for the collection of country checks has been revived since the scheme was first considered, and a committee has been appointed, of which Mr. Francis B. Sears of the Third National Bank of Boston is Chairman, to arrange the details of the plan. It is proposed to limit the operation of the system to the State of Massachusetts for the present, and the committee will endeavor to secure the co-operation of country banks by offering liberal inducements.

—The Bank of Commerce of Louisville, Ky., is reported to have made a proposition to the stockholders to reduce the capital of \$500,000 to \$400,000 by declaring a 50 per cent dividend out of the surplus of the bank, retiring a similar amount of stock. The State and local taxes are very burdensome, amounting to about 2½ per cent, and this is the principal reason for reducing the capital.

—The banking firm of Morton, Bliss & Co. will shortly dissolve as a firm for the purpose of transferring the business to an incorporation. The firm consists of ex-Vice-President and ex-Governor Levi P. Morton, George T. Bliss, Richard J. Cross, William M. Grinnell and W. R. Cross. The details of the plan for incorporation are being arranged, and it is probable that nearly all the partners will be stockholders in the new corporation.

—The vacancy in the position of National Bank Examiner, caused by the resignation of Mr. William H. Kimball, who, as previously announced in this column, has accepted the office of Active Vice-President of the Seventh National Bank, has not yet been filled. The position is a very desirable one, and there appears to be considerable competition for it among those having the requisite knowledge of the banking business. Comptroller Dawes is, however, apparently desirous of securing the best available talent for the place, and as there seems to be no special urgency, the selection may be delayed for a few weeks. It is thought probable, however, that the appointment will be made before the close of the fiscal year. The compensation of the Bank Examiner is regulated by the national banking law, and in this city it will net about \$7,000 per annum—the official paying the expenses of the office out of the receipts.

—Mr. George Blumenthal, of the well-known banking firm of Lazard Freres, returned a few days ago from a brief trip to Europe, much benefited by his visit.

—Mr. Albert H. Wiggin, who, as was recently announced in this column, was elected one of the Vice Presidents of the National Park Bank, assumed the duties of his new position on Monday.

—The new branch bank of the Hamilton Bank, on Amsterdam Avenue between One hundred and forty-fourth and One hundred and forty-fifth streets, is being fitted up for banking purposes in an attractive manner, and it will be opened for business about the middle of this month. The Hamilton Bank is, as has been stated in this column, a State institution located on One hundred and twenty-fifth street near Seventh Avenue, and it is practically controlled by the Mercantile National Bank.

—Mr. Anson R. Flower, of the banking house of Flower & Co., has been elected a director of the National Bank of the Republic, taking the place on the board made vacant by the death of Vice-President Eugene H. Pullen. The Vice-Presidency of the bank is still vacant.

—The Flatbush Trust Company has been organized with a capital of \$100,000 and a paid-up surplus of \$50,000, to do business in that part of Brooklyn formerly known as the Town of Flatbush. The section is being rapidly built up, and the projectors of the company feel that there is room for a financial institution of this character.

—The establishment of a branch of the Colonial Bank is contemplated. This is a State institution, with a capital of \$100,000 and a surplus of \$79,300, located at 480 Columbus Avenue. It is proposed to open a branch bank at Columbus Avenue and One Hundred and Fourth Street. The stockholders have given their consent to the plan and the Executive Committee of the directors have the details under consideration.

—The controlling interest in the Spokane (Wash.) Exchange National Bank was purchased May 23 by the firm of Clark & Sweeny, which firm is composed of F. Lewis Clark, who came to Spokane about twelve years ago from Bangor, Me., where his father now resides. Mr. Clark is one of the solid and conservative men of the State of Washington. Charles Sweeny, the other member of the firm, has lived in the Northwest longer than Mr. Clark. He has been principally identified with large mining interests, and has made a great success out of his undertakings. The present Cashier of the bank, Mr. E. J. Dyer, will continue as Cashier, and is the principal managing spirit of the institution. He has been identified with the bank from its beginning.

**Clearings by Telegraph.—Sales of Stocks, Bonds, &c.**—The subjoined table, covering clearings for the current week, usually appears on the first page of the CHRONICLE, but on account of the length of the other tables is crowded out once a month. The figures are received by telegraph from the leading cities. It will be observed that as compared with the corresponding week of 1893 there is an increase in the aggregate of 26.9 per cent. So far as the individual cities are concerned, New York exhibits an increase of 27.7 per cent, and the gains at other points are: Boston 30.7 per cent, Philadelphia 20.0 per cent, Baltimore 13.6 per cent, St. Louis 1.7 per cent, New Orleans records a loss of 6.5 per cent and Chicago 3.2 per cent.

CLEARINGS. Returns by Telegraph.	Week ending June 3.		
	1899.	1898.	Per Cent.
New York.....	\$740,319,540	\$578,840,872	+27.7

DEBT STATEMENT MAY 31 1899.

The following statement of the public debt of the United States on May 31 1899 is made up from official figures issued on that day. Further on we give an interesting exhibit of the Treasury cash holdings of the same date.

INTEREST-BEARING DEBT MAY 31, 1899.

Title of Loan.	Interest payable.	Amount issued.	Amount Outstanding.		Total.
			Registered.	Coupon.	
4 1/2% Fund. loan, 1891.	Q-M.	250,000,000			
Continued at 2 p. c.			25,364,500		25,364,500
4% Fund. loan, 1897.	Q-M.	740,913,600	491,311,900	68,340,350	559,652,250
4% Refund. certifies.	Q-J.	40,012,750			40,012,750
5% Loan of 1891.	Q-F.	100,000,000	87,661,060	32,444,250	120,105,310
4% Loan of 1893.	Q-F.	192,315,400	119,958,450	48,961,260	168,919,710
3% of 1898-1918.	Q-F.	193,678,720	94,222,610	104,456,180	198,678,720

Total, excluding Pacific Railroad Bonds.....\$1,491,920,470 792,407,440 253,603,430 1,045,048,730

NOTE.—The denominations of bonds are as follows: Two per cent (registered only), \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, \$20,000, \$50,000; 4% of 1897, registered, \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, \$20,000, \$50,000, coupon, \$50, \$100, \$500, \$1,000; 4% refunding certificates, \$1; 4% of 1894, registered, \$50, \$100, \$1,000, \$10,000, coupon, \$50, \$100, \$1,000; 4% of 1893, registered, \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, coupon, \$50, \$100, \$500, \$1,000; 3% of 1898-1918, registered, \$20, \$100, \$500, \$1,000, \$5,000, \$10,000, coupon, \$20, \$100, \$500, \$1,000.

DEBT ON WHICH INTEREST HAS CEASED SINCE MATURITY.

Funded Loan of 1891, matured September 2, 1891.	April 20, 1899.		May 31, 1899.
	Interest.	Principal.	
Old debt matured prior and subsequent to Jan. 1, '91	\$112,350 00	1,105,540 28	\$1,217,890 28
Debt on which interest has ceased	\$1,218,390 26		\$1,218,390 26
Bond issued to Pacific railroads matured but not yet presented.			
Union Pacific, \$25,000; Central Pacific, \$40,000; Kansas Pacific, \$7,000; total.....			\$55,000 00

DEBT BEARING NO INTEREST.

United States notes.....	\$340,681,016 00
Old demand notes.....	53,997 50
National bank notes—Redemption account.....	\$5,911,064 00
Fractional currency.....	\$15,254,278 66
Less amount estimated as lost or destroyed.....	8,375,834 00
Total.....	\$394,342 66

Aggregate of debt bearing no interest.....\$394,342 66

RECAPITULATION.

Classification of Debt.	May 31, 1899.		Increase or Decrease.
	1899.	1898.	
Interest-bearing debt.....	\$1,446,018,730 00	1,046,048,680 00	Inc. \$400,000,000
Debt on which interest has ceased.....	1,218,390 26	1,218,390 26	Dec. 00
Debt bearing no interest.....	394,342 66	388,147,787 10	Inc. 7,000,000
Total gross debt.....	\$1,447,631,462 92	\$1,446,048,680 00	Inc. 1,582,782 92
Cash balance in Treasury.....	207,634,093 93	263,127,533 05	Inc. 4,493,439 12
Total net debt.....	\$1,239,997,368 99	\$1,182,921,146 95	Inc. 57,076,222 04

The foregoing figures show a gross debt on May 31, 1899, (interest-bearing and non-interest-bearing) of \$1,436,475,500 42 and a net debt (gross debt less net cash in the Treasury) of \$1,163,891,406 44.

PACIFIC RAILROAD DEBT.—These bonds are never included in the official total of the Government debt. To show their present status we have made the following compilation:

UNLIQUIDATED BONDS ISSUED TO PACIFIC RAILROADS—THEIR STATUS JUNE 1, 1899.

Name of Railway	Railroad Liabilities		Repaid by Companies.			Balance Due U. S.
	Bonds Issued by Gov't.	Net Paid by Gov't.	Through Sinking Fund.	Settlement with Government.	Total.	
Central Pacific	\$1,866,120	\$6,604,326	0,100,452	\$3,350,953	\$8,460,505	
Kansas Pacific	6,303,000	8,697,458		12,910,458	19,910,458	
Union Pacific	27,394,512	\$1,211,712	19,194,618	40,253,906	\$4,419,721	
Cent. Br. U. Pac.	1,600,000	2,163,171				3,763,171
West. Pacific	1,970,500	2,453,103		5,423,601	5,423,601	
St. Louis C. & Pac.	1,023,330	2,566,924				1,216,943
Total	\$1,623,519	\$2,429,451	\$7,799,070	\$11,976,780	\$19,271,550	7,980,119

\* Government accepted principal of bonds—\$4,908,000—in full payment of all indebtedness.

**TREASURY CASH AND DEMAND LIABILITIES.**—The cash holdings of the Government as the items stood May 31 we take from the Treasury statement of that date. The net cash balance given below is the same as deducted above in reaching the net debt.

CASH IN THE TREASURY.

Gold—Coin	\$139,459,974 34
Bars	121,743,352 58
Silver—Dollars	\$15,607,941 00
Subsidiary coin	8,468,353 40
Paper—United States notes	\$5,909,975 64
Treasury notes of 1890	35,840,192 10
Gold certificates	924,494 00
Silver certificates	1,649,540 00
Certificates of deposit (Act June 8, 1875)	9,802 00
National bank notes	160,000 00
Other—Bonds, interest and coupons paid, awaiting reimbursement	4,029,191 21
Minor coin and fractional currency	75,015 79
Deposits in national bank depositories—general acc't.	\$11,946 70
Disbursing officers' balances	73,225,983 85
Aggregate	\$2,149,891 05

DEMAND LIABILITIES.

Gold certificates	\$31,431,923 00
Silver certificates	\$24,154,154 00
Certificates of deposit (Act June 8, 1875)	21,800,000 00
Treasury notes of 1890	\$1,985,780 00
Fund for redemption of uncurrent national bank notes	9,157,737 51
Outstanding checks and drafts	4,707,094 51
Disbursing officers' balances	\$3,634,949 55
Agency accounts, &c.	7,143,962 90
Gold reserve	\$100,000,000 00
Net cash balance	\$17,564,993 84
Aggregate	\$267,544,093 86
Net cash balance in the Treasury April 30, 1899	\$263,127,583 05
Net cash balance in the Treasury May 31, 1899	\$261,544,093 86
Increase during the month	\$1,436,510 81

FAILURES BY BRANCHES OF TRADE.

We take from Dan's Review the following statement showing the failures in the United States by branches of trade for the month of May in each of the last three years:

FAILURES BY BRANCHES OF BUSINESS.

	May.		
	1899.	1898.	1897.
	No. Liabilities.	No. Liabilities.	No. Liabilities.
<b>Manufacturers.</b>			
Iron, foundries and mills	4 14,601	1 75,000	7 619,408
Machinery and tools	4 60,094	26 634,351	8 94,709

Total commercial	551 2,464,717	744 5,841,984	732 5,839,344

NOTE.—Iron, woollens and cottons include all the branches of these manufactures; machinery includes implements and tools; lumber includes saw plants, cash and door mills, carpenters and coopers; clothing includes millinery and furnishings; hats include furs and gloves; chemicals include drugs, fertilizers, paints and oils; printing and books include engraving and maps; millinery includes baling; leather and shoes include makers of harness, saddlery, trunks and rubber goods; liquors include tobacco, wines, brewers and beer; glass includes earthenware, pottery, brick, lime and cement; groceries include meats and fish; hotels include restaurants; dry goods include carpets and curtains; furniture includes crockery; hardware includes stoves and tools; and jewelry includes clocks and watches. Brokers include all real estate, note, insurance or produce dealers whose main business is not the handling of actual products and transporters include all express incorporated railway companies.

Monetary Commercial English News

(From our own correspondent.)

LONDON, Saturday, May 20, 1899.

While trade continues to expand in every direction, business upon the Stock Exchange is rather slack. In trade proper there never perhaps has been a time in which activity has been more general. In the iron trade consumption is so immense that great fears are entertained that the

supply of iron ore will give out, and that the prices of all iron manufactures may therefore be raised so much that the demand will be greatly reduced. But though prices have risen they still are moderate enough, and there does not seem much sign yet of any falling off in orders.

Abroad, too, there is an improvement in business. For a long time trade has been very active both in Germany and in Belgium. Now there are signs of improvement even in France, though as yet the signs are not very considerable, except the eagerness in buying raw wool.

The meeting of the Peace Conference this week attracts very little attention in London. Few hope much from it. The utmost that is expected is that the different Powers represented will pledge themselves to consider whether any quarrels arising between them may not be submitted to arbitration before actual war breaks out, and that various plans will be adopted for lessening the horrors of war. But that any real check to the growth of armaments will be adopted is greatly doubted.

In France the hope is growing that the Court of Cassation will very soon now decide either for the revision of the Dreyfus case or the quashing of the judgment altogether. A little while ago grave fears were entertained that the General Staff might be able to stir up disturbances and thus to protect itself from punishment. But now the impression is gaining ground that the new President is strong enough to enforce the law, and that the members of the General Staff, who have been guilty of so much infamy, will be brought to well merited punishment. The return of Major Marchand is exciting some uneasiness. But it is not thought probable that he will set up to be a Boulangist. Still, there is the danger in any case, if the present distracted state of France continues, that the Exhibition next year will be gravely compromised. And the fear that it may be spoiled altogether no doubt will exercise a great influence upon public opinion in France and indeed is exercising a great influence already.

In Germany the liquidation of bad business is going on. But operators are beginning to recover courage, and there is more buying this week of American securities than there has been for some time past.

At home there is very little doing. Even investment is on a restricted scale. The truth appears to be that the demand for money for trade purposes is so great that the larger capitalists are employing the money in that way rather than upon the Stock Exchange, and the small investors are engaging in mining or industrial securities or ventures in China and elsewhere.

The great public has not taken much part in the American market for a long time, and it did not suffer, therefore, from the drop that occurred on the death of Mr. Flower. There has been more buying here this week, but largely it is by professional operators.

In the industrial market there is a pause. And there is likewise a pause in the mining market. In Western Australia there has been very active buying in some securities. But in South Africa the uncertain relations between the Boers and the Uitlanders deters people from engaging in new risks. The market here was surprised on Wednesday morning by a telegram stating that half a dozen British officers had been arrested for high treason in Johannesburg, and taken at once to Pretoria. Neither the Colonial Secretary nor the great mining magnates had any information on the subject, and the names of the prisoners were quite obscure.

The general impression here is that the conspiracy, if indeed there has been a conspiracy, is a "got up" job, the secret agents of the Boer Government organizing it for their own purpose. It is certain that the Uitlanders are unarmed, and that neither arms nor ammunition can be brought in from abroad. And therefore it is not believed that any sane men have engaged in a serious conspiracy. But of course all that remains to be seen. The fact, however, that the arrests have been made is calculated to prevent people from engaging in new risks.

Money continues easy and abundant. The four millions sterling paid by the United States Government to Spain is lodged to the credit of the latter country in London and Paris, and is helping to make money here very abundant and cheap. It is not thought probable that gold will go from here either to Paris or to Madrid. The general expectation is that the money will be left in London and Paris to meet future engagements.

Meantime it looks as if we were about to have a considerable number of new issues that will take away more or less gold. The Japanese Government has arranged with a powerful group of banks in London for a loan of 10 millions sterling, bearing 4 per cent interest, the issue price to be 90. The loan is for the purpose of completing the naval and military preparations and for public works. But it is not thought probable that very much will be taken in the form of gold, for some time at all events. Japan has to pay for the ships and munitions of war she has ordered in such large numbers; and the greater part of the money, therefore, will be retained at the Bank of England and will be only gradually expended. But some of it, no doubt, will go to Japan.

The Argentine Government is again negotiating for a loan of six millions sterling. It has tried likewise in Paris and Berlin. The loan is required to fund the floating debt which was incurred during the war preparations against Chili.

Now that a peaceful arrangement has been made with Chili, the Government is naturally anxious to reduce the heavy charge of this floating debt, and to fund the debt once for all. But Argentina has been paying the full interest on its debt for so very short a time that the public here is not quite convinced that its finances are yet in a satisfactory state. And it is doubtful, therefore, whether the loan will be very freely subscribed for.

The Russian Government, moreover, is very anxious to borrow here. The French are not willing to lend much more. The Germans need all their capital for their own purposes. Russia, therefore, is not able to borrow, and she is very anxious to get admission once more to the London market. Whether it will be possible to raise a large Russian loan here remains to be seen.

There are a number of small issues likewise impending for the colonies and for smaller foreign governments, all of which will, by giving a power over the money market, tend to make that market more sensitive, and probably to raise rates very considerably in the autumn.

Meantime the India Council continues to sell its drafts very well. It offered for tender on Wednesday 40 lacs, and the total applications were more than ten times as much. The whole amount was allotted at prices ranging from 1s. 3 3/4 to 3 3/4 p. rupees to a little over 1s. 4d. per rupee.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

	1899. May 17.	1898. May 18.	1897. May 20.	1896. May 21.

Messrs. Pixley & Abell write as follows under date of May 18:

Gold.—Until the end of last week the Bank received all the arrivals, but since then there has been sufficient Continental demand to absorb the open market supplies, which have been rather small. The Bank has received £76,000 in bars and coin. Arrivals: Cape Town, £330,000. Shipments, May 10: Bombay, £65,000; Calcutta, £10,000. Total, £75,000.

Silver.—After falling rapidly to 2s. 2d. India came in as a buyer of both cash and forward. The price at once rose to 28 1/2d. forward, silver being 1 1/4d. below spot. With America somewhat inclined to sell, although not heavily, most of the advances has since been lost and closed a weak at 2s. 1 1/4d. Last Indian price Rs. 7 1/4 per 100 Tola. Arrivals: New York, £141,000; Chile, £12,000. Total, £153,000. Shipments, May 10: Bombay, £33,000; Calcutta, £17,500. Total, £50,500.

Mexican Dollars—These coin continue without feature and are entirely nominal.

The quotations for bullion are reported as follows:

#### Commercial and Miscellaneous News

NATIONAL BANKS.—The following information regarding national banks is from the Treasury Department.

##### NATIONAL BANKS ORGANIZED.

- 5,188.—The Citizens' National Bank of Alton, Ill. Capital, \$100,000. August Schlafley, President; Charles F. Stelzel, Cashier. Certificate issued April 24, 1899.
- 5,189.—The First National Bank of Genoa, Nebraska. Capital, \$50,000. O. E. Green, President; W. J. Stewart, Cashier. Certificate issued April 27, 1899.
- 5,190.—The Citizens' National Bank of Navasota, Texas. Capital, \$50,000. W. R. Howell, President. Certificate issued April 29, 1899.
- 5,191.—The Coal & Iron National Bank of Cleveland, Ohio. Capital, \$500,000. Joseph C. Gilchrist, President; Alexander B. Marshall, Cashier. Certificate issued May 13, 1899.
- 5,192.—Grayson County National Bank of Sherman, Texas. Capital, \$100,000. John P. Withers, President; J. W. Blake, Cashier. Certificate issued May 15, 1899.
- 5,193.—The First National Bank of Rantoul, Illinois. Capital, \$50,000. Herbert West, President; Edward B. Rogers, Cashier. Certificate issued May 20, 1899.
- 5,194.—The Bank of Commerce National Association of Cleveland, Ohio. Capital, \$2,000,000. George A. Garretson, President; Samuel Mather, Vice-President; J. H. Wade, Second Vice-President; George S. Russell, Cashier; G. F. Clewell, Assistant Cashier. Certificate issued May 22, 1899.
- 5,195.—The Southern National Bank of Louisville, Kentucky. Capital, \$250,000. W. J. Thomas, President; J. W. Nichols, Cashier. Certificate issued May 25, 1899.

##### LIQUIDATION.

- 1,477.—The Thompson National Bank of Putnam, Connecticut, has gone into voluntary liquidation by resolution of its stockholders, dated April 24, 1899, to take effect immediately.
- 2,939.—The People's National Bank of Americus, Georgia, has gone into voluntary liquidation by resolution of its stockholders, dated April 15, 1899, to take effect immediately.
- 4,307.—The Continental National Bank of Memphis, Tennessee, has gone into voluntary liquidation by resolution of its stockholders, dated April 8, 1899, to take effect April 25, 1899.
- 4,038.—The First National Bank of Pana, Illinois, has gone into voluntary liquidation by resolution of its stockholders, dated March 15, 1899, to take effect March 16, 1899.
- 3,999.—The First National Bank of Elm Creek, Nebraska, has gone into voluntary liquidation by resolution of its stockholders, dated March 29, 1899, to take effect May 15, 1899.
- 1,252.—The National Farmers' and Planters' Bank of Baltimore, Maryland, has gone into voluntary liquidation by resolution of its stockholders dated May 16, 1899, to take effect immediately.

##### INSOLVENT.

- 2,030.—The Citizens' National Bank of Hillsborough, Ohio. John Hult appointed Receiver, in place of Robert M. Ditley, resigned, to take effect April 27, 1899.

##### RESERVE CITY.

The city of Indianapolis, Indiana, was on May 11, 1899, approved as a reserve city, upon application of all national banks therein.

IMPORTS AND EXPORTS FOR THE WEEK.—The following are the imports at New York for the week ending for dry goods May 25 and for the week ending for general merchandise May 26; also totals since the beginning of the first week in January.

##### FOREIGN IMPORTS AT NEW YORK.

WALL STREET, FRIDAY, JUNE 3, 1899.—3 P. M.

**The Money Market and Financial Situation.**—Conditions in Wall Street have been somewhat abnormal this week, and therefore the character of the security markets does not accurately reflect the sentiment which generally prevails in industrial and financial circles. Following the protracted holiday at the Stock Exchange—from Friday until Wednesday—came reports of the appearance of yellow fever at New Orleans, a firmer foreign exchange market, the cause of which was not generally understood, uncertainty as to the possible effect of the new franchise tax law and an advance in the price of wheat. These circumstances enabled the aggressive element, whose interest would be favored by lower prices, to depress the market to a degree which, in the minds of some, the facts did not warrant; an opinion which to-day's buoyant market fully confirms.

Later reports from New Orleans are to the effect that only one case of yellow fever is known to have existed there, and the authorities do not apprehend any further development of it. The firmness of the foreign exchange market may have been due in part to a demand incident to June 1 settlements; but however that may be, the market is now easier and rates are below the gold-exporting point. The fact that \$1,000,000 is to be shipped to-morrow is claimed to have little significance, as it is a special transaction due to higher interest rates at Berlin. As to the wheat market, that has been more or less unsteady for some time past, as is often the case at this season of the year. Other conditions which affect security values continue for the most part favorable. The heavy June 1st disbursements of interest and dividends leave the money market in an easier condition, and while there has been no material change in rates the tendency is downward.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 1½ to 3 per cent. To-day's rates on call were 1½ to 2½ per cent. Prime commercial paper quoted 3½ to 4 per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £423,383, and the percentage of reserve to liabilities was 38.78, against 38.90 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows an increase of 3,550,000 francs in gold and 3,150,000 francs in silver.

The New York City Clearing-House banks in their statement of May 27 showed an increase in the reserve held of \$5,147,000, and a surplus over the required reserve of \$13,933,725, against \$34,631,525 the previous week.

	1899. May 27.	Difference Prev. week.	1898. May 28.	1897. May 29.

\* This is the price bid at the morning board; no sale was made.

**State and Railroad Bonds.**—Sales of State bonds at the Board include \$2,000 Alabama class A at 113 and \$20,000 Virginia 6s deferred trust receipts at 8.

The market for railway bonds has been somewhat irregular but stronger than the market for stocks. The volume of business differed widely, being over \$4,000,000 par value on Wednesday and less than half that amount on Thursday and to-day. There were sharp declines in a few issues, mostly those of Southwestern systems, due no doubt to uncertainty in regard to the development of yellow fever at Southern ports. Such declines were offset in part by advances in other issues, which amount to a point or more in Denver & Rio Grande 4s, Baltimore & Ohio 4s and to substantial fractions in Atchafson, Erie and some less active issues. There was no perceptible increase in the offerings of high-grade bonds, and a large proportion of the transactions was in Atchafson, Baltimore & Ohio, Central Pacific, Erie, Reading, St. Louis Southwestern, Union Pacific and Wisconsin Central bonds.

**Stock and Bond Sales.**—The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since January 1.

	Week ending June 2.	Jan 1 to June 2.
N. Y. Stock Exch.	1899.	1898.
Government bonds	\$104,800	\$57,000
State bonds	22,000	10,000
R.R. & misc. bonds	11,074,000	17,473,000
Total.....	\$11,201,600	\$17,540,000
Stocks—No. shares	5,100,116	5,189,980
Par value.....	\$204,602,900	\$200,109,500
Banks & misc. par value	4,300	1,000
Total.....	\$204,607,200	\$200,110,500

We add the following daily record of the transactions:

Week ending June 2, 1899.	Shares.	Par value.	Railroad, Ac.	State Bonds.	U. S. Bonds.

Total.....	163,060	74,927	254,167	54,008	70,785	516,800

**Railroad and Miscellaneous Stocks.**—Under persistent efforts of bear operators and the absence of any considerable investment demand, the stock market was weak during Wednesday and the greater part of Thursday. The tone improved towards the close on Thursday and there was some recovery from the decline which averaged about 3 points for the active railway list and in some cases covered a much wider range. To-day's market, although less active, was strong and the decline noted above was in many cases fully recovered.

The anthracite coal stocks were notable exceptions, and were strong throughout the week. Local traction issues proved most susceptible to bear raids, and at the lowest prices recorded Metropolitan Street Railway showed a decline of 2½ points from our last quotations, Third Avenue 15 points, Brooklyn Rapid Transit 8½ points and Manhattan Elevated 6½ points. Naturally the reaction in these issues to-day was most conspicuous.

The average decline and subsequent recovery of miscellaneous stocks was somewhat more than that of the railway list, American Sugar Refining, New York Air Brake, American Tobacco, Anaconda Copper, Consolidated Tobacco, International Paper and Federal Steel leading in the movements.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every **STREAM** railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

Total (78 roads)	8,056,064	7,603,445	552,076	99,459
Net increase (5.95 p.c.)			452,619	

**Net Earnings Monthly to Latest Dates.**—The table following shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of May 20, 1899. The next will appear in the issue of June 24, 1899.

## STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

† These figures include results on Bridge Division.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of May 20, 1899. The next will appear in the issue of June 24, 1899.

Roads.	Gross Earnings.		Net Earnings.

## ANNUAL REPORTS.

**Annual Reports.**—The following is an index to all annual reports of steam railroads, street railways and miscellaneous companies which have been published since the last editions of the INVESTORS' and STREET RAILWAY SUPPLEMENTS.

This index does not include reports in to-day's CHRONICLE.

## Chicago &amp; North Western Railway Co.

(Advance report for the fiscal year ended May 31, 1899.)

The advance statement for the late fiscal year is reported by telegraph as follows:

	1899.	1898.	Changes.
Gross earnings.....	\$37,933,299	\$36,050,561	Inc. \$1,882,738
Operating expenses.....	23,592,382	22,043,879	Inc. 948,503
Taxes.....	1,168,971	1,102,606	Inc. 66,365
Net earnings.....	\$13,171,946	\$12,804,076	Inc. \$367,870
Interest on bonds.....	6,232,495	6,488,605	Dec. 256,110
Sinking fund.....	202,000	197,260	Inc. 4,740
Balance.....	\$6,737,451	\$5,618,211	Inc. \$1,119,240
Int. paid in advance.....	138,745	320,000	Dec. 181,255
Total net.....	\$6,597,706	\$5,298,211	Inc. \$1,300,495
Other income.....	543,977	456,935	Inc. 87,042
Total net income.....	\$7,142,683	\$5,755,146	Inc. \$1,387,537
Dividends.....	3,523,270	3,519,823	Inc. 3,447
Surplus.....	\$3,619,413	\$2,235,323	Inc. \$1,384,090

The above surplus does not include land income. A large proportion of the surplus for the year has been expended on account of track elevation in the City of Chicago and for other important works of construction. The percentage of operating expenses, excluding taxes, to earnings, was 62.19. The percentage of operating expenses, including taxes, to earnings was 65.28.—V. 68, p. 231.

## Cleveland &amp; Marietta Railway.

(Report for the year ending Dec. 31, 1898.)

## Cincinnati &amp; Muskingum Valley Railroad.

(Report for the year ending Dec. 31, 1898.)

**President James McCrea says:**  
The trade conditions throughout the year were of a most favorable character, and the result is manifested in an increase in gross earnings for the old and new companies of \$45,519, or 10 per cent. The property was again visited by severe floods which interrupted traffic for almost a week, beginning March 23d, but which, fortunately, were not so disastrous in effect as in previous years, the approximate loss being \$18,500.

**Earnings, Etc.**—The earnings, charges, etc., have been:

## Pacific Mail Steamship Company.

(Advance Report for the year ending April 30th, 1899.)

President C. P. Huntington says: "Compared with the results for the preceding year the gross receipts increased \$76,493, expenses decreased \$119,299, and receipts over expenses increased, after deducting the loss of the SS. Starbuck, \$197,780. There was paid on June 1, 1898, a dividend of 1 per cent (\$200,000), and on Dec. 1, 1898, a dividend of 1½ per cent (\$300,000) on the capital stock. Although \$349,330 is charged to the year's expenses for 'general and extraordinary repairs of steamers,' there remained at the close of the year an unexpended balance to the credit of this fund of \$214,874.

"To meet the demands of the steadily increasing traffic of the Trans-Pacific Line, two steel steamships have been ordered, to be delivered in December, 1900, and March, 1901. These vessels have a gross tonnage of 10,000 tons, are to be 350 feet in length, are to have a speed of 18 knots an hour and accommodation for 143 first-class and 1,230 steerage passengers. There has been paid for account of the construction of these steamers \$320,000. The company has expended \$129,478 U. S. currency, during the year, in the purchase of a controlling interest in the lighterage companies at the ports of Acapulco, Salvador and San Jose de Guatemala, in Guatemala. These acquisitions will enable the company to handle its business at said ports with much greater promptness and economy than was heretofore practicable, and the investment will yield a fair return upon its cost.

"The company is free from all indebtedness, except for current expenses, and had cash on hand in New York, San Francisco and London, April 30, 1899, of \$1,142,807."

*Statistics.*—Earnings, expenses, charges, etc., have been as follows:

Profit and loss account, balance at credit	1,003,682	624,636	
Total	\$7,566,782	\$7,037,523	

\*After deducting treasury bonds of \$412,700 in 1898 and \$342,700 in 1897.

The bonds are secured by mortgage for \$1,600,000 to the Northern Trust Co. of Chicago as trustee. The main office is in Chicago.—V. 68, p. 821.

## Wm. Cramp &amp; Sons' Ship &amp; Engine Building Co.

(Statement for year ending April 30, 1899.)

The figures presented at the annual meeting last week permit the following comparisons with previous years:

	1898-98.	1897-98.	1896-97.
Business on books end of year	\$12,400,000	\$10,000,000	
Floating debt end of year	58,000	623,000	\$1,050,000
Gross earnings, about	5,300,000	3,892,872	4,500,000
Net earnings	707,832	573,841	(1)
Interest and other deductions	307,765	29,841	340,000
Net applicable to dividends	\$400,067	\$275,000	\$430,000
Dividends	(2½%) 121,200	None	None
Balance	\$278,867	\$275,000	\$430,000
Includes general expenses, repairs, salaries, interest, taxes, insurance, new machinery, etc.			
Includes bond and mortgage, \$300,000, which may or may not be now outstanding.			

The old directors were re-elected, except Mr. Thalmann, who was succeeded by Edwin S. Cramp. The company has purchased from the Lehigh Valley R.R. Co. ten acres of land adjoining the company's present plant, nearly doubling its water front. No reference was made at the meeting to the pending negotiations with Vickers Sons & Maxim.—V. 68, p. 383.

## Lamson Consolidated Store Service Co.

(Report for year ending March 31, 1899.)

The annual report says in substance:

The business of the past year has been profitable, the net earnings being \$276,917, as against \$202,751 for the year previous. Two dividends at the rate of 8 per cent per annum, amounting to \$131,354, have been earned and paid, and after having set aside \$15,000 to guaranty account, \$130,563 has been placed to the credit of the profit and loss account. All patent expenses for the year have been charged to expense.

The annual payment on account of the sinking fund for the redemption of bonds amounted to \$38,293, this with accumulated interest making a total deposit to date for this purpose of \$77,951; \$100,000 of our bonds still remain in the treasury. Several patents have been issued to the company during the past year and applications for others are now pending. There are no suits pending against the company for infringement. Several new styles of carriers have been brought out and important improvements on those previously in use has resulted in raising the standard of our devices to an excellence never before reached. The cost of manufacture and installation on the other hand has been materially reduced. Orders on hand call for above one thousand stations, and the outlook for new business is most excellent for the coming year.

The report makes the following comparisons:

	1898-9.	1897-8.	1896-7.
Gross earnings	\$437,194	\$409,938	\$338,961
<b>Expenses—</b>			
Construction account	\$78,131	\$63,737	\$78,451
Insurance and taxes	16,135	20,552	12,806

**Akron Bedford & Cleveland RR.—Akron Traction & Electric Co.—Consolidation.**—The stockholders of the Akron Bedford & Cleveland RR. will vote July 3, 1899, on a proposition to ratify the "agreement of consolidation heretofore entered into by and between the Akron Traction & Electric Co. and the Akron Bedford & Cleveland RR. Co. under date of May 26, 1899," and to appoint a time for the election of the directors and other officers of the consolidated company. The consolidation, it is understood, will be effected under the name of the Northern Ohio Traction Co., with a capital stock of \$3,000,000.—V. 68, p. 425, 869.

**Amasa Lyon Umbrella Co.—New Stock.**—A block of \$200,000 treasury stock is offered at par to supply additional working capital with which to enlarge the business. The capital stock is \$500,000; par \$50. "The business has been established a quarter of a century, and has at times exceeded \$700,000 per annum, at an approximate net profit of 10 per cent, or \$70,000; it is expected that with the increased capital a business of \$1,000,000 per annum will be done."

**American Brick Co.—Officers.—Status.**—This company, organized to control and operate the leading brick-making plants along the Hudson River, is engaged in a careful investigation, by borings and otherwise, to determine the value of the several plants on which it has options. In the meantime, and probably for the remainder of the present calendar year, the corporate existence of the various companies eventually to be consolidated will be maintained. The new company has elected officers and directors as follows:

President, Oakleigh Thorne; Vice-President, Robert Main; Secretary-Treasurer, Edwin Thorne.

Directors.—Samuel Thorne, President of the Pennsylvania Coal Co.; Grant B. Schley, of Moore & Schley; Daniel S. Lamont, Vice-President of the Northern Pacific Ry.; R. Somers Haas, President of the St. Paul & Duluth Ry.; Oakleigh Thorne, Edwin Thorne, Aaron E. Aldridge and Robert Main.

The capital of the company was recently increased to \$15,000,000, of which \$7,500,000 is to be 7 per cent non-cumulative preferred.—V. 68, p. 925.

**American Car & Foundry Co.—First Dividend.**—The company has declared a dividend of  $\frac{1}{4}$  per cent on its preferred stock, payable July 1 at the office of the Guaranty Trust Co. of New York. For the quarter ended May 31 the business included: Freight cars, 15,245; passenger cars, 48; car wheels, 176,193; castings, 17,743 tons; bar iron, 15,000 tons; axles, 3,600 tons; cast-iron pipe, 1,600 tons.—V. 68, p. 1021, 1029.

**American Woolen Co.—Purchased.**—The company, it is reported, has bought the mills of the Mascoma Flannel Co. and Riverside Woolen Co. of Lebanon. The Mascoma mills have been idle for more than six months.—V. 68, p. 770.

**Baltimore & Ohio Southwestern Ry.—Foreclosure Sale.**—Judge Thompson, of the United States Court, at Cincinnati on May 27 issued an order of sale for the property. Gen. B. R. Cowen, of Cincinnati, is made master commissioner to make the sale, and is directed to give four weeks' notice of the day, to be selected by himself. The sale will be at Cincinnati. The property is to be offered in parcels and as an entirety. The lowest bid to be received as an entirety is \$3,500,000.—V. 68, p. 378.

**Baltimore & Ohio RR.—Meeting to Authorize New Stock and to carry out B. & O. Southwestern Reorganization.**—The holders of trust certificates issued for the preferred and common stock pursuant to the voting trust agreement of June 22, 1898, are notified that a meeting will be held at the office of the company, No. 2 Wall Street, New York, on June 26, 1899, for the purpose of authorizing the issue of \$20,000,000 additional preferred stock and \$10,000,000 additional common stock, in order to carry out the plan for the reorganization of the Baltimore & Ohio Southwestern Railway Co., dated Dec. 15, 1898. The stock itself will vote on the same proposition on June 28.—V. 68, p. 1022.

**Barrett Manufacturing Co.—Bonds Offered.**—George A. Hubn & Sons of Philadelphia have received subscriptions at par and interest to \$541,000 five per cent first mortgage gold bonds, due 1939, the unsold balance of a total issue of \$2,500,000. The right is reserved to call the bonds in 1919 at 110 and interest, while no prior mortgage, it is provided, shall

be created without the consent of a majority of the issue. The company, which has regularly paid dividends of 8 per cent on its capital stock of \$3,000,000, is a distiller of coal tar, manufactures roofing and paving materials and coal tar products, imports and refines Trinidad asphalt, etc. It owns properties in eighteen of the large cities of the country. Geo. W. Elkins is President and George D. Widener a director.

**Boston & Maine RR.—Purchase Approved.**—The stockholders on May 24 ratified the purchase of the Eastern RR. of New Hampshire by a vote of 119,576 to 1.—V. 68, p. 925.

**Boston Breweries Co.—Bonds Offered.**—The Produce Exchange Trust Co., New York; the International Trust Co., Boston, and the Industrial Trust Co., Providence, offered this week for subscription at 103 \$3,500,000 of the Boston Breweries Company's \$6,250,000 first mortgage six per cent 30-year sinking fund gold bonds, dated June 1, 1899, maturing June 1, 1929, interest payable June and December; International Trust Co., of Boston, Trustee. Of the authorized issue \$2,750,000 had previously been taken by the vendors and by private subscription. The prospectus says:

The company has been incorporated under the laws of New Jersey for the purpose of acquiring ownership of the following ale and beer brewery properties, situated in the city of Boston, viz.:

American Brewing Co.	Puritan Brewing Co.
Alley Brewing Company.	Star Brewing Co.
Hanley & Casey Brewery Co.	Park Brewery.
McCormick Brewery Co.	Franklin Brewing Co.
Union Brewing Company.	Hub Brewing Co.

And also a controlling interest in the stock of the Boston Beer Co., which was specially chartered by Massachusetts in 1828. The possession of this special charter is of great value to the consolidated company. The average annual output of these breweries (exclusive of the Hub, which, being entirely new, has only recently started operations) for two and a half years ending with 1898 was 505,000 bbls. The combined establishments have a total capacity of over 1,000,000 bbls. The value of the above plants has been appraised at \$9,333,000, exclusive of personal assets or working capital. The company will begin business with an active working capital (consisting of cash, bills receivable, supplies, etc.) of about \$1,100,000, which is ample for successful operation, and with no obligations beyond the above issue of bonds.

The company will issue 7 per cent preferred stock, \$3,500,000; common stock, \$3,250,000; first mortgage, 6 per cent, 30-year sinking fund gold bonds, \$6,250,000. The average annual net earnings of ten companies, as certified by the accountants, is \$638,303; add net earnings of the Hub Brewing Company, \$50,000; add one-half of expected savings and economies, \$200,000; total, \$888,308. The 6 per cent interest on \$6,250,000 bonds calls for \$375,000.

Officers.—President, Harrison W. Huguley, President of the Boston Brewers' Board of Trade; Vice-Presidents, William A. Miller, James D. Casey, Thomas McCormick; Secretary and Treasurer, Frederick J. Alley.

Directors.—Harrison W. Huguley, James D. Casey, William A. Miller, Thomas McCormick, Frederick J. Alley, James W. Kenney, Daniel Shea, John J. Collins, Nelson J. Waterbury, David Murdock, Charles N. King.

Provision is made in the mortgage for the payment (after 1901) of \$50,000 per year, which, with the accumulations of the sinking fund, will be employed in purchasing bonds for that fund. If the bonds cannot be bought in the open market at less than 110 and interest, they may be drawn by lot at that price.—V. 68, p. 1022.

**Butte City Water Co.—Receiver.**—On May 26 the company was placed in the hands of a receiver by Judge Knowles, on the application of the Massachusetts Loan & Trust Co., trustee under a mortgage securing \$2,000,000 bonds, interest on which is in default. It is reported that the reorganized property will be controlled by the Amalgamated Copper Co.

**Calumet Electric Street Ry. of Chicago.—Receiver's Certificates.**—At Chicago, on May 26, Judge Kohlsaat, in the United States Circuit Court, authorized the issue of \$850,000 5 per cent receiver's certificates, due in or before 1904. Part of the issue is to be used to pay off indebtedness of \$368,200, and the rest for necessary improvements, etc. The liabilities are as follows: First mortgage bonds issued Sept. 1, 1892, for \$51,000; receiver's certificates, dated June 1, 1897, for \$200,000; special receiver's certificates, dated Nov. 16, 1898, for \$1,700; receiver's promissory notes, dated Jan. 9, 1899, for \$54,500; order of court for improvement of road for \$58,000.—V. 67, p. 1002.

**Carnegie Steel Co.—Output.**—The Pittsburg Chamber of Commerce, in its year book just issued, gives the production of the Carnegie Steel Co. in 1898 as 2,063,466 gross tons of pig iron, ferromanganese and other blast furnace products, while 2,171,225 gross tons of steel ingots were rolled into finished products. The company also produced 55,154 gross tons of finished castings.—V. 68, p. 1022.

**Chicago & Harlem Railway—Lake Street Elevated RR.—New Mortgage.**—The Chicago & Harlem Railway Co., successor of the Chicago & Harlem Railroad Co., has executed a mortgage to the Equitable Trust Co. of Chicago, as trustee, to secure 5 per cent gold bonds due May 1, 1939, interest payable May 1 and November 1. The first \$1,000,000 bonds are to be certified from time to time to pay for constructing and equipping the road described in the mortgage; additional bonds to an unlimited amount may be issued to cover 75 per cent of the actual cost of the following:

Building railroad additional to that authorized by the aforesaid ordinance; acquiring right of way; acquiring other railroads by purchase, lease or otherwise; completing, finishing, improving, maintaining and operating its railroad other than that specified in the aforesaid ordinance, and acquiring terminal facilities.

The mortgage made by the railroad company in 1898 will be discharged of record.—V. 66, p. 759; V. 68, p. 128.

**Chicago Burlington & Quincy RR.—Bonds a Legal Investment for Massachusetts Savings Banks.**—In Massachusetts, recently, Attorney-General Knowlton rendered a decision

ion affirming that the bonds of the company are legal investments for Massachusetts savings banks.—V. 68, p. 1023.

**Chicago Laundry Co.—Consolidation—Stock Offering.**—Subscriptions were opened in Chicago on May 24 at the Little Guarantee & Trust Co., 108 La Salle St., and W. B. Doods & Co., 503 Chicago Stock Exchange Building for \$1,500,000 of this new company's preferred stock at par with a bonus of 100 per cent in common stock. The company is organized to acquire about 90 per cent of the laundry business of Chicago, the concerns to be taken over numbering about seventy-five and leaving unacquired only about twenty-five, all of the latter, it is said, being of small importance. The authorized capital stock will be as follows: Preferred stock, 7 per cent cumulative, \$3,000,000; common stock, \$4,000,000. With the proceeds of the \$1,500,000 preferred shares offered to the public it is proposed to provide \$250,000 cash working capital and to apply the remainder to the purchase of the properties acquired. The vendors agree to take in stock \$1,500,000 of preferred and a like amount of common, leaving \$1,000,000 of common stock for other purposes.

**Chicago Union Traction Co.—West Chicago Street RR.—North Chicago Street RR.—Leases Ratified.**—At Chicago yesterday the stockholders of the North and West Chicago Street RR. companies voted to lease the systems to the Chicago Union Traction Co. President Charles T. Yerkes will also retire as an active official of the Chicago Street RR.—V. 68, p. 976.

**Cleveland Akron & Columbus Ry.—Lake Erie & Western RR.—Pennsylvania RR.—Transfer of Control.**—The Lake Erie & Western has sold to the Pennsylvania RR. Co. its holding of a controlling interest in the stock of the Cleveland Akron & Columbus, this holding amounting to \$2,237,500 of the total share capital of \$4,000,000. The transfer was made June 1. It is supposed that the C. A. & C. second mortgage bonds will be redeemed at par Aug. 1, 1900, under the provision in the mortgage. No provision was made in the sale just made for the minority interest in the stock.—V. 68, p. 925; V. 68, p. 719; V. 68, p. 825.

**Concord & Montreal RR.—Extension and New Bonds.**—On May 24 the stockholders voted to authorize "the building of a branch railroad from some convenient point on the line of the Manchester & North Weare RR. in the city of Manchester, or Goffstown, west of the Merrimac River, to some convenient point in the town of Milford; said branch to be built as a permanent addition to the Concord & Montreal RR., under provisions of the lease to the Boston & Maine RR. dated June 29, 1895, and that the bonds of the corporation be increased to such an amount, not exceeding \$300,000, as may be necessary for the building of such branch road."—V. 68, p. 26.

**Connecticut Lighting & Power Co.—Pending Merger.**—A. M. Young, of Waterbury, A. M. Paige, of Bridgeport, and a syndicate of New York capitalists, it is reported, are planning to unite under this title various Connecticut trolley roads, including the Central Railway & Electric Co. of New Britain, Norwalk Street Railway Co., Waterbury Traction Co., Norwalk Tramway, Bridgeport Traction Co., Westport & Sauganck, Winchester Avenue RR. of New Haven, Derby Street RR., Bristol & Plainville and the Shelton Street Railway Co. The plan is said to be to construct extensions so as to form a through line from Waterbury to New Haven and from New Haven to Stamford.

**Consolidated Lake Superior Co.—Michigan Lake Superior Power Co.—Lake Superior Power Co.—New Company to Develop Sault Ste. Marie Water-Power, Etc.**—The Consolidated Lake Superior Co., incorporated by Special Act of the Legislature of Connecticut, has been organized by Philadelphia parties to acquire and develop the already partially developed water-power, estimated at 200,000 hydraulic horse-power, at Sault Ste. Marie, Michigan and Ontario, to acquire, develop and utilize large mineral deposits—nickel, copper and iron—found in this section, and for the refining of which a portion of the electrical energy created will be used; also to utilize the timber resources of the adjacent country. The company has excellent facilities for shipment by water to all Lake ports, and also owns a belt line railway, extending through its properties on either side of the river, affording the best of connections for rail shipments. The capital stock of the following companies, now operating at Sault Ste. Marie, is to be acquired: Lake Superior Power Co.; Michigan Lake Superior Power Co.; Sault Ste. Marie Pulp and Paper Co., and the Tagona Water & Light Co. The prospectus says that through the acquisition of the capital stock of said companies, together with other properties, rights and franchises now being acquired, the new company will become possessed of the following assets:

(1) Lands and water-power rights at Sault Ste. Marie, Michigan (Michigan Lake Superior Power Co.), sufficient for development of 60,000 H.P. The hydraulic canal, power station, and installation of hydraulic machinery are now under construction, and will be completed in April of next year. An issue of \$3,500,000, five per cent fifty-year bonds, secured only on this development of 60,000 H.P. on the Michigan side (the proceeds of which will fully complete the same), has been subscribed for, and one-half of this horse power has been leased for a period of 25 years to the Union Carbide Co. of New York and Chicago, at an annual rental of \$200,000, which will suffice to pay the interest on the entire bond issue and operating expenses. The resulting revenue arising from the sale of the remaining power of this 60,000 H.P. development, to tenants now applying for same to this company, should equal \$250,000 per annum.

(2) Lands and water-power rights at Sault Ste. Marie, Ontario (Lake Superior Power Co.), controlling the development of 100,000 H.P., of which about 20,000 H.P. has been developed by means of a

substantial power canal and stone power station. This canal is being employed, to the extent of about three-fourths of its capacity, in operating the mills of the Sault Ste. Marie Pulp & Paper Co., leaving about 5,000 H.P. now available, and to be first used in the nickel steel and reduction works now being established. The remaining 80,000 H.P. on the Canadian side is susceptible of the most economical development, which it is proposed to proceed with at once.

(3) Pulp Mills. These mills are among the largest of their kind in the world, and are yielding an annual net profit of about \$150,000.

(4) Machine Shops and Foundry. These works are new and of the most modern design, and equipped for manufacture of pulp and paper mill, hydraulic, mining, smelting and electrical machinery. The net revenue of these works for the year 1898 was \$35,000 and the business is increasing.

(5) Forests. By a contract with the Province of Ontario, this company owns a grant of timber from Government lands, equivalent to the growth upon 1,000 square miles of virgin forest, situated north and west of the company's works, and so located as to insure an inexhaustible supply of pulpwood and timber at lowest possible cost.

(6) Nickel Steel. The nickel mines of the company are located in the celebrated Sudbury Nickel Range in Canada, and include an area upwards of 500 acres, and are estimated to be capable of an output of several thousand tons daily. The new process, nickel steel, of the company is the result of some years of scientific research and experiment at the works of the Lake Superior Power Co., at Sault Ste. Marie, Ontario. The company has agreed to sell to the Krupp Works at Essen, Germany, all the nickel steel it can produce for a term of five years, up to 250 tons daily.

The authorized capital stock is \$20,000,000, consisting of 400,000 shares, \$50 each, viz.: 120,000 shares, 7 per cent non-cumulative preferred stock and 280,000 shares common stock. Of these, 30,000 shares preferred and 235,000 common are issued for properties acquired, and 90,000 shares preferred, \$5 called, are offered for subscription, with 45,000 shares of full paid common as bonus. The next instalment of \$5 per share on the preferred stock, it is understood, will be payable July 1, after which it is expected no further call will be made this year. "There will be available as required, for construction and working capital, the sum of \$4,500,000 in cash."

The directors are as follows:

E. V. Douglas, President Consolidated Lake Superior Co., Philadelphia; W. P. Douglas, Secretary Consolidated Lake Superior Co., Philadelphia; T. C. Search, Treasurer John H. Stetson Co., Harry A. Berwind, Berwind-White Coal Mining Co.; John Pittsair, President Pittsburgh Plate Glass Co.; James Butterworth, President H. W. Butterworth & Sons Co.; Samuel R. Shipley, President Provident Life & Trust Co.; James S. Swartz, Treasurer International Navigation Co.; Hon. Lynde Harrison, Attorney-at-law, New Haven, Conn.; F. S. Lewis, Treasurer Pennsylvania & Northwestern RR.; F. H. Clerque, President Sault Ste. Marie Pulp & Paper Co.

**Continental Cotton Oil Co.—New Project.**—The "Manufacturers' Record" has the following regarding this new company, which C. L. Rathborne & Co. are financing:

It is expected that subscriptions to the stock will be received in a few days. Options have been taken on seven of the largest plants in the South, all of which, with one exception, are located west of the Mississippi River. The companies of the new combine are Parle Oil & Cotton Co., Paris, Texas; Corsicana Cotton Oil Co., Corsicana, Central Texas Cotton Oil Co., Temple, Texas; Waxahatchie Cotton Oil Co., Waxahatchie, Ladonia Cotton Oil Co., Ladonia, Shreveport Cotton Oil Co., Shreveport, La., and Jackson Cotton Oil Co., Jackson, Miss. The crushing capacity of the new company is about 1,000 tons per day. The financial plan divides the stock into \$3,000,000 common and \$3,000,000 preferred, the latter being 7 per cent cumulative.

The plan provides that a sum not less than \$1,250,000 shall be retained in the treasury for enlarging the business, acquiring new property and building new plants.—V. 68, p. 670.

**Diamond Match Co.—Continental Match Co.—Purchased New Stock.**—The Diamond Match Co., it is announced, has arranged to purchase from Edwin Gould control of his Continental Match Co., whose plants are situated at Passaic, N. J., Ogdensburg, N. Y., and Kankakee, Ill. To effect the purchase the Diamond Match Co. will issue \$1,000,000 new stock, part of an additional \$3,000,000 or \$4,000,000 new stock which it is proposed to create. From the balance of the new shares the intention is to acquire several independent factories on which the Diamond Match Co. has options, and which will give it practical control of the output of matches in the United States. A portion at least of the new stock, it is expected, will be sold at par to the company's stockholders. Mr. Gould, it is reported, will become a director of the Diamond Match Co.—V. 68, p. 976.

**Electric Co. of America.—Purchase.**—It is reported that the company has acquired control of the Wheeling, W. Va., electric-light plant. The Atlantic City Electric Light Co., which is owned by the Electric Company of America is engaged in a contest with the Atlantic City Gas & Water Co., which also supplies electric lights.—V. 68, p. 822.

**Elyton Company.—Reorganization Plan.**—A plan for the reorganization of the company under agreement dated Oct. 4, 1898, has been prepared and adopted by the committee, consisting of William Hall, Jr., Chairman; Augustus W. Kelley, Alexander D. Seymour, Thomas G. Jones and William T. Hardie. Copies of the plan have been lodged with the depositories named in the agreement, viz.: Union Trust Co. of New York, Birmingham Trust & Savings Company, Birmingham, Ala., and Whitney National Bank, New Orleans. The plan will be binding upon all the security holders, who shall not withdraw stock or bonds represented by certificates on or before June 20, 1899.—V. 67, p. 935.

**Erie RR.—New Castle & Shenango Valley RR.—Control of Stock.**—A controlling interest in the capital stock of the New Castle & Shenango Valley RR. has been acquired in the interest of the Erie RR. through the purchase of the stock of George W. Johnson and others. The line has been operated by the Erie under lease.—V. 68, p. 976.

**Exeter Hampton & Amesbury St. Ry.—Consolidation.—New Securities.**—This company having acquired all the property, assets and franchises of the Exeter Street Ry., the

Hampton & Amesbury Street railroad and the Rockingham Electric Co. of Exeter has applied to the New Hampshire State Railroad Commissioners for authority to issue \$235,000 each of capital stock and first mortgage bonds.—V. 63, p. 379.

**Flemington Coal & Coke.—Re-incorporated.**—This company, whose stock is traded in among the "outside" securities of the New York market, was re-incorporated recently under the laws of West Virginia. Its authorized capital stock is \$2,500,000, par value \$100. The property is situated near Grafton, W. Va., on the B. & O. R.R. Its output, at present 1,500 tons a day, will shortly, it is said, be increased to 3,000 tons. The company reports the orders and contracts on its books as upwards of 1,000,000 tons. The coal is similar to the Pocahontas coal. The directors and officers are:

S. L. Simpson, F. J. Dunham, H. Dowd, J. J. Bennett, C. A. Campbell, A. N. Parlin, O. G. Cornell, Col. J. McNaught, General J. R. O'Beirne, A. R. Piek, H. H. Melville, H. W. Rusk and M. E. Brennan. President, S. L. Simpson, 32 Broadway, New York; Treasurer, Chas. G. Cornell; Secretary, R. E. Leavitt.

The company was organized with \$1,000,000 capital, under the laws of New York State about five years ago, and the present re-incorporation is merely an enlargement of the old concern. The property consists of 2,500 acres of bituminous coal land.

**Federal Sewer Pipe Co.—Subscriptions Called.**—P. J. Goodhart & Co. and Simon Borg & Co. have sent out notices calling in the cash subscriptions to the Federal Sewer Pipe Co. This company was incorporated under the laws of Delaware, with a capital of \$25,000,000, controlling about forty-three plants throughout the country.—V. 63, p. 926.

**Gas & Electric Co. of Bergen County, N. J.—Consolidation.**—A press despatch from Hackensack, N. J., says that the Hackensack Gas & Electric Co. has absorbed the lighting companies of Eaglewood, Rutherford and Ridgewood, under the title of the Gas & Electric Company of Bergen County, with \$2,000,000 capital. Frank B. Poor will be President, the controlling interest remaining in his hands.

**Grand Trunk Ry.—Central Vermont Ry.—Agreement Ratified.**—In London, on May 29, the shareholders of the Grand Trunk Ry. unanimously approved the agreement dated May 1, 1899, for the interchange of traffic with the Central Vermont Ry. Co., the agreement to continue during the currency of the 4 per cent mortgage bonds of the Central Vermont. The Grand Trunk Company undertakes in the event of the net receipts of the Central Vermont Company, as defined in the agreement, being in any year insufficient to meet the interest on such bonds, to contribute an amount sufficient to make good such deficiency, provided that the Grand Trunk liability on account of such interest payable in any calendar year shall not exceed 30 per cent of its share of the gross earnings from traffic interchanged between the two companies.

The Grand Trunk Ry. Co., as part of the settlement, receives \$2,180,000 of the \$3,000,000 capital stock of the new Central Vermont Ry. Co., and of the latter's \$12,000,000 new 4 per cent bonds (present issue \$11,000,000) it acquires \$1,186,000, viz.: \$435,000 in payment of that amount of traffic balances due by the Central Vermont R.R. Co. at the date of the receivership, and the remaining \$751,000 on account of investments made by the Grand Trunk Company in the securities of the Central Vermont R.R. Co. The \$1,000,000 bonds unissued will be set apart and applied as required for improvements, etc., on the Central Vermont.

General Manager Hays of the Grand Trunk says:

The new Central Vermont takes possession of the road without a dollar of indebtedness, and with money in the treasury. During the receivership the earnings have been expended in betterments and improvements to the property. With the new rails bought by the receivers this spring we will have all the main lines laid with the heavy rail, and all the important bridges have been rebuilt and brought up to the present standard; so that we consider the securities of the company a first-class investment, and we hope to make them rank in value with those of any other Vermont railroad property. Our idea in making the directorate so largely Vermont in its character is to correct any impression that might exist that the road was to be managed by what has been called an "alien" corporation. No radical change will be made in the existing order of affairs so far as pertains to the operation of the road.

The new Central Vermont Ry. Co. took possession of its property May 1.—V. 63, p. 871, 975.

**Gulf Beaumont & Kansas City Ry.—Extension.**—Governor Joseph D. Sayers, of Texas, has signed the bill regarding the extension of this company's line. The purpose of the bill is described as follows:

The Gulf Beaumont & Kansas City Railway is built and in operation from Beaumont north to Newtonville, a distance of about 60 miles. It is chartered to run to the northern boundary of the State. The Gulf Beaumont & Northern Ry. is chartered to run through substantially the same territory, but as yet has completed no part of its road. This bill authorizes the Gulf Beaumont & Kansas City Ry. Co. to purchase the line authorized to be built under the charter of the Gulf Beaumont & Northern Railway Co., and provides that in case of this purchase the bonds of the new-built road shall be issued by the Gulf Beaumont & Kansas City Railway Co. in the name of the Gulf Beaumont & Northern Railway, in amount equal to the value of the property so purchased, and as fixed by the Railroad Commission under the stock and bond law; all existing bonds on said Gulf Beaumont & Northern Railway to be canceled. At present there are no such bonds.—V. 63, p. 880.

**Homestake Mining Co.—Consolidation—Increase of Stock.**—A meeting of the stockholders is called for July 18, 1899, at San Francisco, to vote on a proposition to increase the capital stock of the company from \$12,500,000 to \$21,000,000. "With this increased capital of \$8,500,000, represented by 85,000 shares, it is proposed to purchase other dividend-paying properties of great use and advantage to the Homestake Mining Company, as follows:

For 37,500 shares. All the properties or the entire capital stock of the Highland Mining Co.  
For 37,500 shares. All the properties or the entire capital stock of the Black Hills Canal & Water Co.  
For 10,000 shares. All the capital stock of the Black Hills & Fort Pierre R.R. Co.

It is also proposed to increase the number of directors of the Homestake Mining Co. from the present number of five to seven."

The companies above named are already controlled in the interest of the Homestake Company, but it is thought best that this control should be vested directly in that company so as to ensure the permanence of the existing friendly relations beyond the possibility of outside parties gaining control upon the death of the present majority stockholders. The water company, especially, is said to be absolutely essential to the operations of the Homestake property. The new issue of stock will not, the insiders say, necessitate a reduction in the dividend rate.

**Hudson Tunnel Ry.—Adjourned.**—The foreclosure sale was again postponed on Thursday by Master in Chancery Randolph Parmy until June 15 and 16. It is thought this will be the last postponement.—V. 63, p. 871.

**International Express Co.—In Operation.**—This company, organized a few months ago (V. 63, p. 232), is now doing business as general forwarder to all parts of the world. The general offices are at 52 Broadway, New York. Money orders, letters of credit, bills of exchange, etc., are furnished. The company has established its principal clearing house for the port of New York at 136 and 138 Franklin St., "where a staff of customs experts is employed in the handling of export and import express and freight shipments." The directors are:

Thomas A. McIntyre, of McIntyre & Wardwell, bankers and brokers; Alfred R. Whitney, of Alfred R. Whitney & Co. (Carnegie Steel); Lewis H. Spence, of Simpson, Spence & Young; Edward G. Burgess, President International Elevating Co.; Timothy Hogan, of T. Hogan & Sons; Turner A. Beall, President Produce Exchange Trust Co.; Henry P. Booth, President New York & Cuba Mail S. S. Co. (Ward Line); Edward R. Ladew, of Fayerweather & Ladew; Frederic J. Middlebrook, of Bowers & Sands; Edward O.'Brien, ex-President Board of Docks of New York; Walter E. Ogilvie.

E. C. O'Brien is President and General Manager.—V. 63, p. 232.

**International Navigation Co.—Official Statement as to New Loan.**—The new mortgage is for \$20,000,000, securing an issue of 5 per cent gold bonds which are due Feb. 1, 1929, but subject to call in whole or in part at par and interest at any time after Feb. 1, 1909. All bonds of prior issues have been retired and canceled with the exception of 130, which, under the terms of the mortgage, matured and ceased to bear interest on March 31, 1899. Money for the payment of the old issue still outstanding is on deposit with the trustee. The old mortgages, dated respectively Feb. 1st, 1894, and Oct. 1st, 1895, each to secure the payment of \$6,000,000 of bonds, have been discharged and satisfied of record. The new \$20,000,000 mortgage is therefore a first lien on all the property described therein, and it will also cover all property purchased with the proceeds of, say, \$8,250,000 of the new issue. The amount of the loan now outstanding is \$11,657,000. The sinking fund provision is as follows:

"On the first day of May, 1905, and annually thereafter on the first day of May in each and every year (the company will) pay unto the trustee the net earnings which remain after the payment of all fixed charges for the preceding calendar year up to the sum of \$250,000, or 20 per cent of the said net earnings for the preceding calendar year, when such percentage thereof shall exceed the said sum of \$250,000. Provided that the Navigation Company shall not be required hereby or by any other provision of this mortgage to pay to the said sinking fund in any one year more than \$500,000 as a part of the said net earnings or otherwise."

There has been no change in the capital stock, which is as follows: Preferred, authorized, \$10,000,000; issued, \$9,205,000; common authorized, \$5,000,000; issued, \$5,000,000.—V. 63, p. 1024.

**Johnstown Electric Light & Power.—Change of Control.**—A majority of the stock of this company as also of the G oversville Electric Co. is reported to have been transferred to the Brady-Widener syndicate at New York.

**Kansas City Bonner Springs & Topeka (Electric) Ry.—New Electric Railway Project—Bonds Offered.**—The American Equipment Co. (James L. Brown, President.) has taken the contract to build this electric railway from Kansas City to Topeka, a distance of 63 miles, for an average price of \$24,000 per mile, including bridges, and has agreed to accept in payment therefor two thousand acres of land, together with the stock of the Railway Company, and its first mortgage gold bonds, issued not to exceed \$15,000 per mile. The road is to carry heavy freight traffic as well as passengers, and is under contract to be completed by Nov. 1, 1899. The St. Louis Trust Co. is the mortgage trustee. The amount of the mortgage is not to exceed \$2,000,000, which provides for a double track, also any extensions necessary, the bonds to be issuable at not exceeding \$15,000 of road actually completed. The first issue of \$750,000 five per cent first mortgage gold bonds, payable in the year 1929 at par, or redeemable upon previous notice from the company in May or November in any year at the price of \$525 for each \$500 bond in New York, is now offered at \$475 for a \$500 bond. John W. McDaniel is President of the new railway company.

**Kern Incandescent Gaslight Co.—Officers.**—The officers are: President, Harry Keene; Vice-President, F. S. Hastings; Treasurer, Casimir Tag, and General Counsel, Conder Brothers.—V. 63, p. 927.

**Lexington (Ky.) Railway.—New Securities.**—R. Lancaster Williams, of Richmond, Va., has been elected President and J. William Middendorf and S. Davies Warfield, of Baltimore, directors of this company owning the electric-light plant and street railways of Lexington, Ky. The other members of the board are Lexington people. The company, it is learned, will issue \$800,000 stock and \$830,000 of 5 per cent gold bonds, the Continental Trust Co., of Baltimore, being mortgage trustee. Of the \$830,000 new bonds \$138,000 will be reserved to retire a like amount of old bonds outstanding. Middendorf, Oliver & Co. and the International Trust Company, of Baltimore, and John L. Williams & Sons, of Richmond, Va., recently acquired control of the property.—V. 68, p. 977.

**Little Falls & Dolgeville RR.—Receiver.**—On May 24th an application for a receiver was made by the Manhattan Life Insurance Co., New York, which holds \$5,000 bonds. The order is returnable at Syracuse to-day.—V. 67, p. 126.

**Metropolitan Street Railway (New York).—Quarterly.** Earnings for the quarter and the nine months ending March:

3 mos. end'g	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
March 31.					
1898.....	\$2,849,904	\$1,402,267	\$173,700	\$1,068,416	\$507,551
1899.....	2,423,254	1,088,302	147,950	812,294	423,958
9 months—					
1898-9.....	\$8,850,222	\$4,468,364	\$530,627	\$3,212,322	\$1,786,669
1897-8.....	7,024,634	3,186,581	463,255	2,395,092	1,344,744

—V. 68, p. 928.

**Monongahela River Consolidated Coal & Coke.—Application for Charter.**—Application was made to the State Department at Harrisburg on May 23 for a charter for this company, which will carry out the consolidation of the Monongahela coal interests that Whitney & Stephenson of Pittsburgh have been arranging. The new company, besides the coal properties, it is stated, will own steamboats and barges and the wharves and landings as far south as New Orleans. The capitalization, it is now said, may be \$25,000,000. A few weeks ago it was expected to be \$30,000,000, when \$15,000,000 of it was to be common stock, \$7,500,000 preferred stock and \$7,500,000 bonds.

**National Electric Co. of Philadelphia.—Southern Electric Co. Acquired.**—The National Electric Co. has obtained control of the Southern Electric Light, Heat & Power Co. of Philadelphia, and will therefore hereafter be able to furnish electric light, heat and power in Philadelphia south of South Street. Wm. F. Harrity says:

It is quite true that the National Electric Co. has contracted for the purchase of the absolute control of the Southern Electric Co. A substantial payment has been made on account of the purchase and the necessary arrangements to finance the transaction to the end. The property has been taken over on a basis that will result in a satisfactory return to the stockholders of the National Electric Co.

A meeting of the stockholders of the Southern Company was called for Nov. 23, 1898, to increase the capital stock from \$400,000 to \$2,000,000, but of this, it is stated, only \$500,000 in all is now outstanding. One report says the purchase price was \$2,500,000 in cash.

**New Stock.**—The directors on Wednesday authorized the issue of 175,000 shares of capital stock, additional to the 175,000 shares already issued, \$10 per share to be paid thereon. The right to subscribe for the additional stock at \$10 per share is offered to stockholders as of record on June 7, 1899. The Philadelphia Stock Exchange recently admitted to quotation on the unlisted department 150,000 shares, \$10 paid per share. Notice was received this week of the sale of a further block of 25,000 shares, making 175,000 shares issued to date. The company's total authorized issue of stock is \$25,000,000, consisting of 600,000 shares of \$50 each. Of these 350,000 shares, upon which an aggregate sum of \$3,500,000 will have been paid, will be outstanding on completion of the present subscription.—V. 68, p. 978.

**Newport News Abattoir Co.—Prospectus.**—The authorized capital stock is \$1,500,000, consisting of 60,000 shares, par value \$25 per share, viz.: 30,000 shares 7 per cent preferred stock and 30,000 shares common stock. Common stock full paid and non-assessable. The company's prospectus says:

This company will do a general abattoir, cold storage and provision business for both domestic and foreign trade, utilizing the by-products from the same in the manufacturing of lard, lard oil, neatfoot oil, oleo-butterine, etc. The company has secured at Newport News, Va., a large and valuable tract of land, located on the line of the Chesapeake & Ohio RR., and in connection with the wharves of the Chesapeake & Ohio Steamship Co. The works will have ample capacity for the slaughter of 1,000 head of cattle, 1,000 head of sheep, and 1,000 head of hogs per day, with the refrigerating facilities equal to the storage of three times the above amount. Assuming that we will slaughter and manufacture the products of 250,000 head of cattle, 300,000 head of sheep, and 200,000 head of hogs the first year, the company will be able to pay the dividend of 7 per cent on the preferred stock and at least 10 per cent on the common stock.

The company offered for subscription the preferred stock, with a bonus of 50 per cent of common stock on the following terms: 20 per cent, or \$5 per share, payable upon call; 20 per cent, or \$5 per share, payable upon not less than thirty days' written notice, and the balance in instalments of 20 per cent upon thirty days' written or published notice. The office of the company is 550 Drexel Building, Philadelphia.—V. 68, p. 978.

**Niagara Falls & Lewiston (Electric) RR.—Niagara Gorge RR. Co.—Sold.**—The Niagara Falls & Lewiston RR. was sold by the Sheriff on May 23 to Herbert P. Bissell of

Buffalo for \$6,154, subject to a mortgage of \$1,000,000 held by the Knickerbocker Trust Co. The sale has been duly confirmed. The successor company, it is stated, will be the Niagara Gorge RR. Co.—V. 68, p. 332.

**Northern Electric Railway of Chicago.—Cleveland Interests in Control.**—The report that a controlling interest has been bought by Cleveland men is confirmed. The officers are as follows: President, B. Mahler; Secretary, G. W. McKisson; Treasurer, Edward Moore. The main office is in the Title & Trust building. The company has now about five miles of track in operation, by trolley, running from the Northwestern tracks near the corner of Lake and Forty-Seventh streets to Cragin. It is the intention to extend to Franklin Park before long.—"Chicago Economist."

**Pittsburg Cincinnati Chicago & St. Louis Ry.—Pennsylvania Company.—Bonds Sold.**—The Pennsylvania RR. Co. announces that it has sold to Kuhn, Loeb & Co. and Speyer & Co. \$8,200,000 3½ per cent Pittsburg Cincinnati Chicago & St. Louis fifty-year gold bonds, to be issued in place of maturing bonds. The new 3½ per cent bonds are issued under the same mortgage as the existing 4½ per cent and 4 per cent bonds of the Pittsburg Cincinnati Chicago & St. Louis Ry. Company, and are guaranteed by the Pennsylvania Company. The old bonds to be refunded by the new issue include \$6,863,000 first consol. 7s of the Pittsburg Cincinnati & St. Louis due Aug. 1, 1900, and also \$1,400,000 Indianapolis & Vincennes second mortgage 6s due May 1, 1900.—V. 68, p. 615, 621, 825.

**Port Arthur Duluth & Western Ry.—Ontario & Rainy River RR.—Sale.**—Bids will be opened at 11 A. M. on Aug. 4 by the Master-in Ordinary at Osgoode Hall, Toronto, Ont., for the purchase of the Port Arthur Duluth & Western Ry., which extends from Port Arthur, Ont., to the international boundary line at Gun Flint Narrows, 83½ miles. The terms of sale are 10 per cent on acceptance of tender and the balance within one month thereafter without interest.

The Ontario & Rainy River RR., it is said, will make application to the Legislature at its present session for an act authorizing this company to acquire the property of the Port Arthur Duluth & Western, which would naturally form a part of the projected line of the Ontario & Rainy River from Port Arthur to Fort St. Francis, on the Rainy River, about 245 miles.—V. 67, p. 483.

**Port Chester Electric Ry.—Increase of Stock.**—A meeting of the stockholders will be held on June 6 to consider the question of increasing the capital stock from \$100,000 to \$300,000. The motion for an injunction to prevent the company from extending its line through the village of Rye to Rye Beach has been denied by Supreme Court Justice Jenks.

**Quebec Central Railway.—Readjustment.**—A circular states that the company has recently obtained an Act from the Legislature of the Province of Quebec, enabling it, with the consent of the bond and share holders, respectively, to re-arrange its bonded debt. The Act authorizes the creation of a first debenture stock, bearing interest not exceeding 1 per cent per annum, the total interest upon which shall not exceed an annual sum of £20,000. The principal of the first debenture stock will only become payable after the company is six months in default in payment of interest thereon, or in the event of the liquidation of the company; but it may be redeemed at 110 any time after the expiration of 20 years from the date of issue, upon six months' notice. It is proposed to offer now to the holders for their 5 per cent prior lien bonds 4 per cent first debenture stock at par, exchangeable up to August 1, 1899, and to pay in cash £3 as a bonus, besides £3 10s. for the half-yearly coupon due on that date. The bond and share holders will be asked to authorize the readjustment on June 5, 1899.

The present capitalization is as follows: Capital stock, \$3,381,603; prior lien, 5 per cent bonds, £350,000; income 5 per cent bonds, £676,000. The company operates 218½ miles of track, including main line, Sherbrooke to Harlaka, Que., 137½ miles.

**Quicksilver Mining Co.—Financial Status.**—On May 5 this company paid a dividend to its preferred stockholders of a half of one per cent. This is the first distribution the stock has received since 1891 and the management think another distribution of a like amount can be made in the fall. The assets as of June 1 are cash \$30,500 and stock of quicksilver \$51,075; total assets \$81,575. There is no debt. The above amount is after paying the dividend, which called for \$21,456. The last printed pamphlet report of the company was for the year ending April 30, 1896.—V. 68, p. 724.

**Richmond Standard Steel Spike & Iron Co.—Mortgage.**—This company, of which J. Fred. Pierson of New York is President, has recorded a mortgage on its plant in Richmond, Va., to the City Trust Co. of New York, as trustee, for \$1,500,000. The company was recently chartered and purchased the Richmond Standard Spike & Iron Mills.

**Rubber Goods Manufacturing Co.—First Dividend.**—The directors have declared a quarterly dividend of profits of 1¼ per cent on the preferred stock, payable at the office of Baring, Magonn & Co., the transfer agents, on June 15, 1899.—V. 68, p. 189.

**Schoenhofen Brewing Co.—To Wind up English Company.**—The board of directors has come to the conclusion that it is desirable to take every possible step to re-

duce the expenses of the company, and, with this object in view, they have decided to recommend: "That the present (English) company be wound up voluntarily and a new company organized under the laws of the State of Illinois, having a similar capital and a similar debenture debt; and that there be issued to each debenture-holder and to each shareholder in the present company a holding of the same character and value in the proposed American company." The last report is on a preceding page.—V. 68, p. 475.

**Seattle Street Railways.—Pending Negotiations.**—Stone & Webster, 4 Post Office Square, Boston, are engaged in an endeavor to consolidate the various street railways of Seattle, and it now looks as if six of the roads would be united, viz.: Seattle Traction Co., Madison Street Cable Railway Co., Union Trunk Line, Front Street Cable Railway Co., Third Street & Suburban Ry. Co., West Street & North End Ry. Co. It is too early to state whether the consolidation will take effect as outlined or what the name of the new company will be.—V. 67, p. 321.

**Sebastocook & Moosehead.—Receiver.**—W. J. Hayes & Son, of Cleveland, O., as holders of first mortgage bonds, have filed a bill in equity in the Supreme Court at Augusta, Me., asking for a receiver. The road runs from Pittsfield, Me., to Hartland, eight miles. Its capital stock is \$180,000; first mortgage 5s of 1895 authorized \$250,000, issued to June 30, 1898, \$100,000.

**Sioux City O'Neill & Western RR.—Sioux City & Western.**—*Sold.*—At the foreclosure sale on May 26 the property was bid in by J. L. Webster, of Omaha, representative of William S. and Robert E. Tod, for \$1,750,000. The property will be reorganized under the name of the Sioux City & Western and operated independently.—V. 68, p. 1026.

**Southern Ry.—Georgia Pacific Equipment Bonds Called.**—Forty of the Georgia Pacific Railway Co. equipment mortgage bonds, dated July 17, 1889, have been drawn for the sinking fund, and with the coupons maturing Aug. 1, 1899, will be paid by the Central Trust Co. on or after Aug. 1, 1899, at par.—V. 68, p. 1026.

**Spartanburg (S. C.) Water-Works Co.—Foreclosure.**—The foreclosure sale is set for Oct. 2. At last accounts the capital stock was \$100,000; the funded debt \$85,000.

**Susquehanna Iron & Steel Co.—Prospectus.**—Toland Bros. & Co., of 104 South Fifth Street, Philadelphia, have received subscriptions to this company's \$3,000,000 capital stock, divided into 300,000 shares of \$10 each, on which \$5 is now to be called. The new company will take over the following properties, free of incumbrances, at a cost of \$1,182,500, leaving \$317,500 available from the first call of \$5 per share for general expenses and working capital:

Columbia Rolling Mill Co., Columbia, Lancaster County, Pa., 7½ acres, with rolling mill and equipment complete, etc.; an annual capacity of 20,000 tons of finished grooved skelp and bar iron.

Vesta Furnace, at Watts Station, Lancaster County, Pa., 12 acres, with modern blast furnace and equipments, etc.; annual capacity 25,000 tons pig iron.

Columbia Iron Co., Columbia, Pa., 1½ acres, with rolling mill and equipment complete; annual capacity 12,000 tons of bar iron.

Susquehanna Iron Co., Columbia, Pa., 7 acres of land, rolling mill and equipment complete; annual capacity 10,000 tons of bar iron.

York Rolling Mills, of York, Pa., 7½ acres, with rolling mill and equipment complete; annual capacity 10,000 tons of finished sheered skelp and plate iron.

Aurora Furnace property at Wrightsville, York County, Pa., 14 acres, with modern blast furnace and equipments complete; annual capacity 25,000 tons of pig iron.

"These properties are located on the Pennsylvania and Reading railroads and have direct connections with the Western Maryland and Baltimore & Ohio railroads. The mills and one furnace are in operation and in a high state of efficiency, and there will be no necessity for extensive renewals or reconstruction. The remaining furnace will be in blast about the 1st of July, 1899. It is estimated that the net earnings of the Susquehanna Iron & Steel Co. during the first year of its operation will exceed \$400,000."

**Tennessee Coal Iron & RR.—Louisville & Nashville RR.—Southern Ry.—Railroad Property Transferred.**—On May 26 the Tennessee Coal, Iron & RR. Co. formally transferred to the Louisville & Nashville RR. and the Southern Ry. companies the 25 miles of railroad in the vicinity of Birmingham, Ala., which were recently sold to those companies for \$1,100,000. The purchase money is to be paid July 1, and it is stated will be applied to payment of floating debt and as working capital. The railroads of the Tennessee Coal Iron & RR. Co. are described in the Official Guide as aggregating 102 miles.—V. 68, p. 774; V. 68, p. 928; V. 68, p. 1026.

**Terre Haute Electric Street Ry.—First Mortgage Agreement Terminated.**—The committee, consisting of Wm. H. Henkle, Chairman; Moses L. Scudder and Demas Deming, gives notice to holders of certificates issued by the Illinois Trust & Savings Bank of Chicago for first mortgage bonds of the Terre Haute Street Railway Co., that the committee has elected to terminate the agreement of Aug. 5, 1898, and that the bondholders are entitled to a return of their securities upon payment of their proportion of the expenses incurred and moneys borrowed by the committee.—V. 68, p. 1026.

**Toledo St. Louis & Kansas City RR.—Question as to Value of Trust Co. Receipts.**—The Continental Trust Co. is seeking to obtain the views of the holders of certificates of deposit of the first mortgage bonds of the Toledo St. Louis & Kansas City as to what would be an acceptable price for

the same. Under the bondholders' agreement the authority is given to sell only at par and 6 per cent interest, which would now amount to about 139 for the bonds, a figure which would appear to be in excess of any probable offer.

**United Fruit Co.—Options Dropped.**—The company, it is stated, has dropped its options on the Bluefields Banana Co. and two Mobile companies.—V. 68, p. 979.

**United Power & Transportation Co.—Electric Light Company Acquired.**—The company has acquired nearly all of the \$255,000 capital stock of the Wilmington City Electric Co., which controls the electric-lighting in Wilmington, Del. John A. Rigg, of Reading, Pa., has been elected President of the electric company and also of the Wilmington City Railway Co. According to a press despatch from Lebanon, Pa., the United Power & Transportation Co. has secured control also of the Edison Electric Illuminating Co. of that city.—V. 68, p. 929.

**United Railways and Electric Co. of Baltimore.—Income Interest and Dividend.**—The directors on May 26 declared interest of one-half of one per cent on the income bonds and a dividend of one-half of one per cent on the preferred stock for the three months ending May 31, 1899. The interest on income bonds will be paid free of all State, city and county taxes. From the dividend the proportion of taxes for such period—one-fourth of one per cent—will be deducted. Both interest and dividend will be paid on and after June 15, 1899. Interest on income bonds is payable at the office of Messrs. Alexander Brown & Sons. Dividend checks will be mailed to the stockholders of record of June 1, 1899.—V. 68, p. 725.

**United States Plate Glass Co.—Incorporated.**—This company was incorporated at Trenton, N. J., May 6, with a capital stock of \$1,000,000. Incorporators: William H. Brearley, Frederick B. Hyde and Kenneth K. McLaren.

**United States Pneumatic Horse Collar.—New Stock.**—The stockholders will vote July 6 on a proposition to increase the stock from \$1,000,000 to \$5,000,000, for the purpose of acquiring additional rights, and declaring a stock dividend of an additional four shares for each one held by stockholders of record at the date of the closing of the books, after the confirmation by the stockholders of the action of the board. The officers state that the new factory at Orange, N. J., will very shortly be so equipped as to enable the company to fill the many back orders now on hand. The officers are:

Officers—F. R. Brooke, President and Manager; James Forsyth, Treasurer; C. J. Marsh, Secretary; C. O. Hoge, Counsel for company. Directors—James H. Welch, C. J. Marsh, Charles Powell, C. C. Hoge, F. R. Brooke.

The office is at 52 Broadway, N. Y. City.—V. 68, p. 930.

**Wisconsin Central RR.—Wisconsin Central Railway Co.—Foreclosure Sole July 7.**—The foreclosure sale has been set for July 7, when the Reorganization Committee will buy in the property and re-incorporate it as the Wisconsin Central Railway Co. All the intervening petitions filed by the Central Car Company, the improvement bondholders, the income bondholders and Mark T. Cox, in the suit to foreclose the Wisconsin Central Company mortgage, pending in the Circuit Court of the United States for the Eastern District of Wisconsin, were withdrawn on May 30, the opposing interests having accepted the plan of reorganization prepared by the New York Committee. The time to deposit securities called for deposit under the plan expires to-day; see advertisement on another page. Nearly all the securities called for deposit under the plan are in, as well as those which the Reorganization Committee have offered to purchase.—V. 68, p. 1029.

**Wisconsin Telephone Co.—\$1,800,000 New Stock.**—The stockholders will vote June 19 on a proposition to increase the capital stock from \$1,200,000 to \$3,000,000 to provide means for the extension and improvement of the company's system, etc. Charles J. Glidden is quoted as saying:

"We have acquired a very valuable territory by securing the controlling interest in the Wisconsin Co., which has some 15,000 subscribers and upwards of 7,500 miles of long distance lines, nearly all of which are built of copper. Our plans are to extend the system in Wisconsin on much the same lines as laid out for Michigan, and the work of re-equipment of that plant will be pushed forward as rapidly as possible. A large number of new lines will be built, and the facilities on existing lines will be greatly increased."—V. 68, p. 979.

—The Savannah Florida & Western Railway Co. (Plant System) guarantees to pay in gold the principal and interest of the first mortgage 4 per cent gold bonds issued by the Silver Springs Ocala & Gulf RR. Co., \$900,000 of which are now offered by Edward C. Jones & Co., New York and Philadelphia, Townsend Whelen & Co., Philadelphia, and the Mercantile Trust & Deposit Co. of Baltimore, at 91 and interest, netting about 4½ p. c. to investor. The average net earnings of this road for the past 3½ years are reported as almost two and one-half times the total interest on bonds, while the earnings for the half-year ending Dec. 31, 1898, it is stated were nearly twice the bond interest, thus making a profitable investment independent of the additional security furnished by the guaranty.

—Messrs. Deloitte, Dever, Griffiths & Co., chartered accountants, 69 Wall Street, New York, have opened branch offices at 742 and 743 Monadnock Block, Chicago, Ill.

—Messrs. Geo. B. Hill & Co., Pittsburg, dealers in stocks and bonds, announce their removal on June 1 to new offices at 244 Fourth Avenue, Tradesmen's Building.

## The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, June 2, 1899.

The observance of a holiday on Tuesday and the fact that some of the local exchanges adjourned from Saturday until Wednesday has made a short business week. Trade conditions, however, have been generally satisfactory and in some lines of seasonable goods a larger run of new orders has been experienced. The movement of merchandise on old contracts has continued fairly free, the trade in general taking supplies as fast as they are due. Reports from the wheat belt have continued to report damage to crop by insects, and the tendency of values for the grain has continued upward.

Lard on the spot has had only a light sale locally, but at the West a moderate export business has been transacted at steady prices, closing at 5-25c. for prime Western and 4-90c. for prime City. Refined lard has been dull, but the close was steady at 5-40c. for refined for the Continent. Speculation in lard for future delivery has been moderately active. Early in the week, under liquidation by longs, prices weakened. The close, however, was steadier on smaller receipts of swine.

## DAILY CLOSING PRICES OF LARD FUTURES.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
May.....	5-30	HOLIDAYS.	5-22	5-25	5-25	
June.....						

Pork has had a fair sale at slightly lower prices, closing at \$7 87½@8 50 for mess. Cut meats have been quiet and values have been barely maintained. Tallow has been firm but quiet at 4½c. Cotton seed oil has been dull but steady at 25½@26c. for prime yellow. Butter has been in fairly full supply and steady. Cheese has been quiet. Fresh eggs have declined.

Brazil grades of coffee have been quiet, and under increased pressure to sell prices have declined, closing at 6 3-16c. for Rio No. 7. West India growths have been in only limited demand and prices have weakened slightly, closing at 8@8½c. for good Cuentra. Speculation in the market for contracts has been moderately active. Tired holders have been sellers to liquidate their accounts. The close was steadier.

The following are final asking prices:

June.....	4 85c.	Sept.....	5 05c.	Dec.....	5 40c.
July.....	4 90c.	Oct.....	5 10c.	Jan.....	5 45c.
Aug.....	5 00c.	Nov.....	5 15c.	Feb.....	5 60c.

Raw sugars have been in fairly active demand and firm, closing at 4½c. for centrifugals, 90-deg. test, and 4¼c. for muscovado, 80 deg. test. Refined sugar has been in more active demand and firm, closing at 5½c. for granulated. Other groceries have been steady to firm.

Kentucky tobacco has been in moderate demand and firm. Seed leaf tobacco has had a fairly large sale at full values. Sales for the week were 3,675 cases, as follows: 600 cases 1898 crop, New England seed leaf, 8, 12, 23 and 50c.; 150 cases 1899 crop, New England Havana seed, forced sweat, 20@60c.; 350 cases 1897 crop, Zimmers, 15@16½c.; 300 cases 1897 crop, Pennsylvania seed leaf, 11@12c.; 300 cases 1896 crop, Pennsylvania seed leaf, 12@13c.; 700 cases 1896 crop, Wisconsin Havana, 10½@12½c.; 575 cases 1897 crop, Wisconsin Havana, 9@10c.; and 160 cases 1897 crop, Dutch, 13@14c.; also 650 bales Havana at 70@95c. in bond, and 200 bales Sumatra at 85c.@\$1 65 in bond.

Straits tin was steadier early in the week, but at the close there was a reaction, closing quiet at 25-55@25-65c. Ingot copper has been in only very moderate demand, but prices have held fairly steady at 18@18½c. for lake. Lead has had only a limited sale, but values have held steady at 4-45@4-50c. for domestic. Spelter has been quiet and unchanged at 6½c. for domestic. Pig iron has been in fairly active demand and higher at \$15@17 25 for domestic.

Refined petroleum has been firm, closing at 7-20c. in bbls., 4-70c. in bulk and 8-20c. in cases. Naphtha steady at 10c. Crude certificates have been neglected, credit balances have been unchanged at \$1 13. Spirits turpentine has been dull and lower, closing weak at 40@40½c. Rosins have been quiet and easy, closing at \$1 40 for common and good strained. Wool has been in fair demand and firm. Hops have had a fair sale at firm prices.

## COTTON.

FRIDAY NIGHT, June 2, 1899.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 32,269 bales, against 38,058 bales last week and 59,949 bales the previous week, making the total receipts since the 1st of Sept., 1898, 8,187,463 bales, against 8,474,303 bales for the same period of 1897-8, showing a decrease since Sept. 1, 1898, of 286,840 bales.

one day during the week. The thermometer has ranged from 68 to 93, averaging 80.

**Columbus, Mississippi.**—We have had rain on three days during the past week, the rainfall being ninety-three hundredths of an inch. Average thermometer 80, highest 91 and lowest 64. Rainfall for the month of May four inches and fifty-six hundredths.

**Leland, Mississippi.**—We have had no rain during the week. The thermometer has averaged 74, the highest being 87 and the lowest 60.

**Vicksburg, Miss.**—Crops are backward and a poor stand. Rain is much needed in some localities. Rain has fallen on one day of the week, the precipitation reaching seventy-eight hundredths of an inch. The thermometer has averaged 79, ranging from 65 to 90.

**Greenville, Mississippi.**—The weather has been hot during the week, but with very little rainfall.

**Little Rock, Arkansas.**—We have had rain on one day of the week, the rainfall reaching one inch and seventy six hundredths. Average thermometer 75, highest 90, lowest 60.

**Helena, Arkansas.**—The weather has been hot and satisfactory for crops, which are growing finely. We have had heavy rain on one day of the week, to the extent of one inch and five hundredths. The thermometer has averaged 74, the highest being 84 and the lowest 62. May rainfall three inches and ninety-five hundredths.

**Memphis, Tennessee.**—The weather has been favorable for the growth of young crops. There has been rain on two days of the week, to the extent of one 'nch and forty-one hundredths. The thermometer has averaged 77.6, ranging from 65.3 to 87.1. May rainfall five inches and eighteen hundredths, in ten days.

**Nashville, Tennessee.**—There has been rain during the week to the extent of four hundredths of an inch. The thermometer has ranged from 58 to 90, averaging 74.

**Mobila, Alabama.**—Crop reports are irregular and conflicting. In some sections cotton is not up and in others not yet planted. Early cotton is doing fairly well but is two to three weeks late, and general rains are badly needed. It has rained on two days of the week, the rainfall being sixty-eight hundredths of an inch. Average thermometer 77, highest 84 and lowest 62. May rainfall one inch.

**Montgomery, Alabama.**—Crops are doing very well. We have had rain on one day of the past week, the rainfall being twenty-two hundredths of an inch. The thermometer has averaged 74, the highest being 93 and the lowest 55. May rainfall one inch and seventy-three hundredths.

**Madison, Florida.**—We have had no rain the past week. The thermometer has ranged from 68 to 95, averaging 82.

**Savannah, Georgia.**—The week's rainfall has been twelve hundredths of an inch, on two days. Average thermometer 76, highest 93, lowest 60.

**Augusta, Georgia.**—There has been rain on one day during the week, to the extent of eighteen hundredths of an inch. The thermometer has averaged 75, the highest being 93 and the lowest 52.

**Charleston, South Carolina.**—There has been rain on four days during the week, to the extent of ten hundredths of an inch. The thermometer has averaged 75, ranging from 62 to 87.

**Stateburg, South Carolina.**—It has rained on one day during the past week, the rainfall being twenty-four hundredths of an inch, and it is raining now. There are indications of an abundant supply of needed moisture. The thermometer has ranged from 53 to 93, averaging 76. May rainfall one inch and fifteen hundredths.

**Greeneood, South Carolina.**—Rain has fallen on one day of the week, to the extent of fifty-three hundredths of an inch. Average thermometer 78, highest 98 and lowest 65. May rainfall one inch and eighty-four hundredths.

**Wilson, North Carolina.**—We have had rain on one day during the week, to the extent of forty-five hundredths of an inch. The thermometer has averaged 76, the highest being 88 and the lowest 52.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock June 1, 1899, and June 2, 1898.

	June 1, '99.	June 2, '98.
	Feet.	Feet.
New Orleans.....	Above zero of gauge.	13.5
Memphis.....	Above zero of gauge.	22.4
Nashville.....	Above zero of gauge.	4.1
Shreveport.....	Above zero of gauge.	9.7
Vicksburg.....	Above zero of gauge.	37.7

**JUTE BUTTS, BAGGING, &C.**—Jute bagging has been absolutely without activity during the past week. Prices are nominally 5½¢@5¾¢. for 1¼ lbs. and 6¼¢@6½¢. for 2 lbs, standard grades. Jute butts also continue dull at 1.05c. for paper quality and 1½c. for mixing to arrive. From Messrs. Ira A. Kip & Co.'s circular we ascertain that the deliveries of jute butts and rejections at New York and Boston during May were 33,881 bales, against 63,140 bales for the same month last year, and since January 1 the deliveries have been 159,033 bales, against 241,693 bales last year. Importers and speculators at New York and Boston held no stock on May 31 in either year; amount afloat for the United States reaches 70,106 bales, against 123,327 bales last year.

**NEW ENGLAND MILLS SITUATION.**—Weavers in the Warwick (R. I.) cotton mills to the number of one hundred and thirty struck on June 1 in support of a demand for a ten per cent increase in wages.

**OUR COTTON ACREAGE REPORT.**—Our cotton acreage report will probably be ready about the 8th of June. Parties desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible, to ensure early delivery.

**INDIA COTTON MOVEMENT FROM ALL PORTS.**—The receipts of cotton at Bombay and the shipments from all India ports for the week ending June 1, and for the season from Sept. 1 to June 1 for three years have been as follows:

Receipts at—	1898-99.		1897-98.		1896-97.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Bombay.....	39,000	1,845,000	65,000	1,562,000	44,000	1,427,000

1897-98..	.....	3,000	3,000	11,000	71,000	82,000
1896-97..	.....	4,000	4,000	23,000	78,000	101,000
Total all—						
1898-99..	.....	9,000	9,000	25,000	583,000	588,000
1897-98..	1,000	21,000	22,000	26,000	419,000	445,000
1896-97..	1,000	14,000	15,000	62,000	634,000	700,000

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 26,000 bales. Exports from all India ports record a loss of 13,000 bales during the week and since September 1 show an excess of 143,000 bales.

**ALEXANDRIA RECEIPTS AND SHIPMENTS OF COTTON.**—Through arrangements we made with Messrs. Davis, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, May 31.	1898-99.		1897-98.		1896-97.	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
Receipts (cantars)*...						
This week.....	5,000		5,000		8,000	
Since Sept. 1.....	5,553,000		6,506,000		5,786,000	
Exports (bales)—						
To Liverpool.....	4,000	300,000	1,000	319,000	.....	313,000
To Continent.....	6,000	320,000	5,000	392,000	2,000	340,000
Total Europe.....	10,000	620,000	6,000	711,000	2,000	653,000

\* A cantar is 93 pounds.  
† Of which to America in 1898-99, 44,983 bales; in 1897-98, 48,508 bales; in 1896-97, 47,435 bales.

This statement shows that the receipts for the week ending May 31 were 5,000 cantars and the shipments to all Europe 10,000 bales.

**MANCHESTER MARKET.**—Our report received by cable to-night from Manchester states that the market is firm for both yarns and shirtings. Manufacturers are working at fair profits. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison.

A considerable portion of the Sea Island cotton shipped to foreign ports goes via New York, and some small amounts via Boston and Baltimore. Instead of including this cotton for the week in which it leaves the Southern outports, we follow the same plan as in our regular table of including it when actually exported from New York, &c. The details of the shipments of Sea Island cotton for the week will be found under the head "Shipping News," on a subsequent page.

Quotations June 2 at Savannah, for Floridas, common, 9c.; medium fine, 10c.; choice, 18c., all nominal.

Charleston, Carolinas, medium fine, 18c.; fine, 20c.; full-fine, 24 to 25c.; extra fine 40 to 50c.

OVERLAND MOVEMENT &C., TO JUNE 1.—In our editorial columns to-day will be found our regular statements of overland movement, receipts, exports, spinners' takings, &c., brought down to June 1.

NEW YORK COTTON EXCHANGE—TWENTY-NINTH ANNUAL MEETING.—The twenty-ninth annual meeting of the New York Cotton Exchange was held on Wednesday, May 31. In their joint report President Robinson and Secretary Bullard remark:

The satisfactory termination of the war with Spain brought about a general revival of business throughout this country, which has been shared in by the cotton trade, and the abundance of American capital, the immense prosperity of American industry, and the bright outlook for incorporated American enterprise, is very encouraging for the future of our Exchange.

An event which cannot be too strongly emphasized, because of its great importance to the whole country, but particularly to the State and city of New York, and thereby to our Exchange, is the action of Congress at its last session, by appropriating an amount of money sufficient to improve the harbor of New York so that from its docks to the open ocean there will be a depth of water great enough at any condition of the tide, and at any hour of the twenty-four, for the passage of the largest vessels afloat.

We deem it not improper to say that the Internal Revenue law, commonly known as the "War Tax," which bearing more heavily upon this than many other industries, has been cheerfully paid by the members of the Exchange, and we have made no attempt to have the proportion to the tax adjusted, because of the great need which still exists for money by the Government. But while business men are willing to stand much, when necessary as a war measure, an effort should be made at the next session of Congress, by the interests discriminated against, to affect an adjustment of the taxes, because the Stamp Tax is likely to continue for a considerable time, and may become a permanent feature of internal revenue.

We are confronted by a condition of affairs with regard to State taxation unparalleled in the history of the city, because the law is rought with inequalities even greater than have previously existed. The increase in both the tax valuation and the tax rate will, we believe, prove more burdensome to the real estate interests in this section of the city than to any other, and the members of this Exchange will doubtless have to meet a large increase in taxes on their property the coming year. A combined effort by this and other organizations interested should, we believe, be made before the assembling of the Legislature again, by memorial to His Excellency Governor Roosevelt, to interest himself in the removal of this inequality.

The by-laws and rules have been so amended as to make allowance for extra staple in the classification of cotton; the same to go into effect the first of January next.

The report of the Warehouse and Delivery Committee is very satisfactory. It will be seen that there has been an increase of cotton for inspection and certification. There were inspected and certificates issued for 114,465 bales from May 1, 1898, to April 30, 1899, inclusive; during the same period certificates for 65,184 bales were canceled, leaving certificates outstanding on April 30, 1899, for 102,479 bales of cotton. The reclamations on the Bureau have amounted for the year to \$51.52, and the balance on hand, in the guaranty fund, is \$51,776.18, against \$40,493.14 last year.

The small amount of claims for errors in grade is the strongest evidence that the classing of cotton by the classification committee has been done in a most careful manner. It is a satisfaction, too, to know that the guaranty fund has substantially increased, the maintenance of which fund is a conspicuous feature of the trading on our Exchange, guaranteeing, as it does, the grade of all cotton inspected under the auspices of the Exchange, thereby insuring the receivers of cotton against any loss by errors in classification.

During the past year 22 memberships have been transferred and 15 new members admitted. There have been purchased and canceled by the Exchange, under authority of the by-laws, four memberships, leaving the total number of memberships outstanding 450.

The trustees of the guaranty fund report assets \$117,455.71 and liabilities \$33,375.00, leaving a balance to the credit of the fund of \$84,080.71.

The treasurer's report, which is appended hereto, shows that the combined profits from the building and the Exchange have exceeded the estimates made by the Executive Committee at the beginning of the year by \$3,560.89.

The Executive Committee reports that, with only one exception, all the offices in the building are rented, yielding an estimated rental of \$51,500, against the actual rental of \$55,323.66 last year, which is a very gratifying result in view of the increased competition. It will be seen that the committee estimates there will be a surplus for the coming year from the building of \$2,500, and from the Exchange \$4,475, based upon annual dues of \$30; total estimated profit, \$6,975.

In consideration of the favorable condition of the finances of the Exchange—the Treasurer's statement showing a surplus of \$18,006.60—the Board recommends that the dues for the coming year be fixed at \$50, and that the sum of \$20 be credited to each membership from the earnings of the building and of the Exchange.

FALL RIVER MILL DIVIDENDS.—Twenty-nine of the thirty-seven cotton-manufacturing corporations in Fall River have declared dividends during the second quarter of the year, and the total amount paid out is very much greater than the total for the corresponding period of last year. The aggregate of the amount distributed has been \$265,525, or an average of 1.22 per cent on the capital. In 1898, however, only fourteen mills declared dividends in the second quarter, the average rate of distribution being but  $\frac{1}{2}$  of one per cent. In 1897 the average dividend for the second quarter was 0.91 per cent, in 1896 it was 1.57 per cent, in 1895 it was 1.58 per cent, in 1894 was 1.52 per cent and in 1893 reached 2.36 per cent.

Westamco Mills.....	550,000	1	5,500	No	dividend.	+5,500
<b>Totals.....</b>	<b>\$21,908,500</b>	<b>1.22</b>	<b>\$265,525</b>	<b>0.50</b>	<b>\$110,125</b>	<b>+155,400</b>

Combining the foregoing results with those of the first quarter (published in the CHRONICLE March 4, page 425), we have the following exhibit for the half-year. It is seen that on a capitalization of \$21,908,500 the mills have paid out in dividends \$445,525 in the first half of the present year, or an average of 2.03 per cent, against \$170,625, or 0.77 per cent in the like period of 1898. In 1897 the average dividend was 1.68 per cent, in 1896 it was 3.53 per cent and in 1895 reached 3.09 per cent.

PRODUCE EXCHANGE ANNUAL MEETING.—The annual meeting of the New York Produce Exchange was held on Wednesday, May 31st. President Brainard in his annual address referred to the satisfactory condition of the finances of the Exchange, and pointed out that the cash value of the commodities dealt in on the floor of the Exchange amounted to \$422,797,217, being an increase of \$1,099,360 over the year previous. The report of the Treasurer showed the gross income for the year ending April 30th, 1899, to have been \$313,480.21; gross expenditures, \$251,679.50; leaving net surplus of \$58,491.18.

## BREADSTUFFS.

FRIDAY, June 2, 1899.

A fair volume of business has been transacted in the market for wheat flour and higher prices have been paid. The continued upward course to values for the grain has given buyers increased confidence in the situation, with the result that jobbers have shown more of a disposition to meet sellers at the higher prices ruling, and there has been limited buying in anticipation of future requirements. The export business has been light, as shippers' limits have been too low to admit of trading. Rye flour has had only a small sale, but prices have been unchanged and steady. Corn meal has been in moderately active demand and steady.

Speculation in wheat for future delivery has been fairly active and the tendency of prices has continued towards a higher basis. The buying for investment account has been fairly spirited and there has also been a good demand from shorts to cover contracts. Crop accounts from the winter-wheat belt have continued of an unfavorable character and latest estimates reduce the acreage for winter wheat, stating that 2,000,000 acres had been ploughed up during May. During the latter part of the week decidedly stronger European advices, based on unfavorable crop prospects in Russia due to prolonged drouth, also had a strengthening influence. The Southwest has been the leader in the buying, numerous orders being received from St. Louis. Early in the week a free movement of the crop in the Northwest and heavy world's shipments to Europe prompted fairly free offerings. Subsequently, however, the unfavorable crop accounts brought these sellers into the market as free buyers to cover contracts. Thursday there was an easier market under free sellings by longs to realize profits, and a continued free movement of the crop in the Northwest induced some selling from that quarter. Business in the spot market has been only moderately active, as exporters have not been free buyers; prices have advanced with futures. To-day the market was firm early in the day on crop news and stronger foreign advices. Subsequently a continued heavy movement of the crop in the Northwest prompted realizing sales and most of the improvement was lost. The spot market was firm but quiet. The sales for export were 24,000 bushels at New York and 16,000 bushels at outports.

Indian corn futures have been only moderately active and no decided changes have occurred in values. Early in the week a free movement of the crop and reports of a large acreage had their influence against values. Bear operators, however, were not aggressive, and on a continued active export demand and sympathy with the advance in wheat, values show a fractional advance. Business on the spot market has been active as exporters have been good buyers and prices have advanced slightly. To-day the market was firmer on a demand from shorts to cover contracts. The spot market was moderately active and steady. Sales for export here and at outports were 240,000 bushels.

Oats for future delivery at the Western market have been quiet. At the opening of the week under review large receipts in the interior and favorable crop prospects prompted moderate offerings, under which prices weakened slightly. Subsequently, however, the loss was more than recovered, in sympathy with the advance in wheat and on a demand from shorts to cover contracts. The local spot market has been moderately active, but at slightly lower prices. Exporters have been buying. To-day there was a steadier market. The spot market was moderately active. The sales for export were 80,000 bushels.

GOVERNMENT WEEKLY GRAIN REPORT.—Mr. James Berry, Chief of the Climate and Crop Bureau of the Agricultural Department, made public on Tuesday the telegraphic reports on the grain crops in the various States for the week ending May 29 as follows:

WEATHER.—The week ending May 29, 1899, has been much too cool in the Middle and South Atlantic States, but elsewhere east of the Rocky Mountains the temperature conditions have been very favorable. The previously reported drouthy conditions in the Gulf States have been largely relieved by rains, which have been very heavy in localities, while in some sections drouth continues, especially in Southern and Eastern Texas, and Southern Louisiana. Rains would prove of much benefit in the Ohio Valley and Middle Atlantic States, while portions of Wisconsin, Illinois, Iowa, Missouri and Arkansas have suffered from excessive rains. The weather continues seasonably cool on the North Pacific coast, where excessive moisture still retards farming operations. In Washington, however, the week has been the most favorable of the season.

CORN.—From the lower Missouri and Central Mississippi valleys eastward to the Middle Atlantic coast the week has not been favorable to corn, which is generally reported as backward and making slow growth. Excessive rains in portions of Nebraska, Iowa and Missouri will render much replanting necessary in those States. In Kansas the crop is in fine condition and it is decidedly improved in the East Gulf States, while in portions of the Central Gulf States and Southern Texas it is suffering for rain. The early-planted is maturing in Texas.

WINTER WHEAT.—The general condition of winter wheat in the States of the Ohio, Central Mississippi and Lower Missouri valleys is probably less favorable than in the previous week, considerable damage by rust and insects being reported. In Nebraska, Iowa, portions of Oklahoma and Arkansas, and in Pennsylvania and New York, some improvement is reported. In California early wheat promises a heavy crop, except in the southern portion of the State. In Oregon and Washington the crop has made good growth, a decided improvement being reported from the last named State. Harvesting is in progress in some of the Southern States, with better yield in Texas, in some localities, than was expected.

SPRING WHEAT.—The week has been highly favorable for spring wheat in the Dakotas and Minnesota, and the crop is doing well in Nebraska and Iowa. Seeding on low land in Oregon has been delayed in consequence of excessive moisture.

OATS.—Oats harvest is in progress in the Southern States, with generally light yields. The crop is making slow growth in the Middle Atlantic States and the Upper Ohio Valley, and has suffered from too much rain in Missouri. In South Dakota, Nebraska, Minnesota and Iowa oats are doing well.

For other tables usually given see page 1060.

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., June 2, 1899.

The volume of business transacted during the week does not compare favorably with the average of recent weeks, a result towards which the break occasioned by the holiday has contributed. Apart from that, however, the demand has shown a falling off in some lines of staple cottons, buyers finding their actions hampered by short supplies or following recent advances in prices conservatively. There is no greater disposition than before on the part of sellers to force business, and the tone continues very firm for all leading makes of both staple and fancy cottons. In the woolen goods there is a visible improvement in the general tone, together with more business passing and occasional advances of 5 per cent reported. Advances from various out-of-town points are encouraging. Warm weather has stimulated the consumptive demand for seasonal merchandise into activity, and retailers' and jobbers' stocks are being rapidly worked off. A case of yellow fever at New Orleans caused some anxiety in the early part of the week, but as it has not been followed by others, uneasiness has worn off. Southern markets are doing well. Collections continue satisfactory.

WOOLEN GOODS.—Advances of 5 per cent have been made in several lines of men's-wear worsteds in plain goods, such as serges, and in fancies, and the general tendency of the worsted goods division is towards a higher level of values. Stocks have been well depleted in many directions, and with continued improvement in the re-order demand, agents are getting well sold ahead. Woolen goods have been in better request than of late, but supplies are at least fair, and no change in prices noted. The advance in raw material, however, gives sellers more confidence in the future of prices, and stocks are not pressed upon the market. Kerseys are tending against buyers and overcoatings generally are firm. Business in cloakings is moderate at previous prices. Woolen and worsted dress goods are in moderate request and steady

in price. The demand for flannels and blankets has been indifferent, but prices are maintained.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending May 29 were 1,984 packages, valued at \$116,513, their destination being to the points specified in the tables below:

NEW YORK TO MAY 29.	1899.		1898.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.

Total.....	1,984	189,144	1,750	137,729

\* From New England mill points direct.

The value of the New York exports for the year to date has been \$6,434,959 in 1899, against \$4,707,618 in 1898.

Ready supplies of heavy brown sheetings and drills do not increase, in spite of unusually large production, and considerable business is passed by on that account for both home trade and export. Prices are decidedly firm but not any higher on the week. Light weight brown and grey goods are also very firm, with small stocks on hand. Coarse, colored cottons, such as denims, ticks, plaids, etc., are in moderate request only, but as stocks are in good shape, prices are well maintained. The demand for bleached cottons has fallen off to some extent since the last advance in price but sellers are firm thereat; wide sheetings also firm. A moderate business has been done in ducks and osenaburgs at unchanged prices. A good demand is reported for new dark fancy calicoes. The opening prices of leading makes have yet to be named and the bulk of the orders is being placed at value. Agents are expected to name 5½c. per yard for the best makes. Light fancies are scarce. Staple lines such as indigo blues, Turkey reds, mournings, etc., are in steady request and firm. Ginghams are still in short supply and very firm for both staples and dress styles.

FOREIGN DRY GOODS.—Woolen and worsted dress goods in moderate request and firm in price. Silks are quiet with some irregularity. Ribbons also irregular. Linens quiet but prices firm. Men's-wear woollens and worsteds firm, but only small business reported.

## IMPORTATIONS AND WAREHOUSE WITHDRAWALS OF DRY GOODS

The importations and warehouse withdrawals of dry goods at this port for the week ending June 1, 1899, and since January 1, 1899, and for the corresponding periods of last year are as follows:

## MUNICIPAL BOND SALES IN MAY.

A review of the municipal bond market during the month of May presents no new conditions. The high prices that these securities have commanded for months past still prevail, and as the market continues comparatively bare of desirable securities, no immediate change in this respect appears likely.

Two States have this month placed bonds on the market—namely, New York and North Carolina. New York's \$500,000 3½ per cent bonds sold on May 25 at a price netting the investor 2·826 per cent, as against 2·874 per cent the interest basis of a sale last November. North Carolina on May 22 sold \$110,000 4 per cent bonds on a basis of 2·924 per cent, a much better rate than was quoted for that State's bonds on the Street. Other places have secured equally satisfactory prices for their bonds. Wayne County, Mich., on May 6 sold \$700,000 3½ per cent 15-year bonds at 105·0152, a basis of 3·08 per cent. Marion County, Ind., sold \$300,000 3½ per cent 1-30-year (serial) funding bonds on May 12 at 104·602, netting 3·123 per cent. Minneapolis, Minn., on May 11 sold \$200,000 3½ per cent 30-year school bonds at 107·40, a price which nets the investor 3·119 per cent, and Chester's (Pa.) \$180,000 3½ per cent 30-year bonds sold on May 25 for 108·14, at which rate the interest nets 3·083 per cent.

Probably the most interesting event of the month was the handing down by the State Supreme Court of Pennsylvania of the long-looked-for decision involving the validity of the proposed \$11,200,000 loan of Philadelphia. The decision given on May 15 declares this loan valid. While it is not proposed to float the entire issue at one time, we may look forward in the near future to an issue of possibly several millions, as many of the contemplated improvements are immediate necessities.

Our usual monthly record shows that the total amount of municipal securities marketed during May was \$7,869,442, not including \$1,423,500 of temporary loans reported. This aggregate may be compared with \$7,477,406 for April 1899 and \$7,036,926 for May 1898.

The number of municipalities issuing bonds was 164 (emitting 184 separate issues), as against 150 and 186 for April 1899, and 142 and 163 for May 1898.

In the following table we give the prices which were paid for May loans to the amount of \$6,782,674, issued by 139 municipalities. The aggregate of sales for which no price has been reported is \$1,086,768, and

the total bond sales for the month \$7,869,442. In the case of each loan reference is made to the page of the CHRONICLE where a full account of the sale is given.

Total (139 municipalities, covering 150 separate issues)..... \$6,782,574  
 Aggregate of sales for which no price has been reported (25 municipalities, covering 25 separate issues)..... 1,086,768

Total bond sales for May 1899.....; \$7,869,442

\* Average of dates of maturity. † Subject to call in and after the earlier year and mature in the later year. ‡ Not including \$1,423,500 of temporary loans reported and which do not belong in the list. § And other considerations. ¶ Less a commission.

In the CHRONICLE of May 6 1899, page 887, a list of April bond sales amounting to \$7,447,906, will be found. Since the publication of that statement we have received the following additional reports.

Page.	Location.	Rate.	Maturity.	Amount.	Price.
939.	Elk Point, S. Dak.	4 1/2	1904-1914	12,000	100 613
940.	Madrid (Ia.) Sch. Dist.	4	1904-1909	6,000	100
940.	Maquoketa, Iowa (2 issues)	4	1900-1909	11,500	100 29

Total additional sales for April..... \$29,500

These additional loans will make the total sales (not including temporary loans) as reported for April 1899 amount to \$7,477,406.

**Dallas County, Mo.—Bond Agreement.**—We take the following item relative to the bond difficulties of Dallas County from the St. Louis "Republic":

The railroad bond troubles in Dallas County, Mo., promise to be settled soon to the satisfaction of all concerned. The settlement includes the construction of a line of road from Lebanon across Dallas County 20 miles to Bolivar. A year ago the Des Moines Land & Improvement Company was organized. This company acquired, either directly or by option, the \$225,000 of outstanding railroad bonds which Dallas County has declined to pay. With interest the amount due exceeded \$1,000,000. The company also secured the right of way and grade of a projected railroad from Lebanon to Bolivar. Today it was announced the company had reached a settlement with the Commissioners of Dallas County. By this terms the company agrees to build the railroad and to abandon all claim to interest, and the county is to issue new bonds for \$225,000. The proposition to issue bonds must, however, be submitted to a vote of the people. A special election will be ordered at once.

**Minnesota.—Supreme Court Ruling in Franchise Tax Cases.**—A special dispatch from St. Paul to the Duluth "Herald," dated April 26, 1899, contains the following with reference to a decision by Justice Mitchell in the Supreme Court on the question of the taxation of franchises of light and water, street-railway companies and other corporations rendering service to municipalities:

It is the decision apparently covers the whole question so far as it is set forth by the provisions of the tax law of 1894. One provision of Section 1530 of that law is held to be unconstitutional. It provides for a deduction of the debts of a corporation from the value of its stock. The Court holds this to be unequal taxation, but says that the remainder of the section is not affected by the unconstitutionality of this provision.

The decision is rendered in the case of the State Against the Duluth Gas & Water Company, the Hartman General Electric Company, Duluth Water & Light Company, West Duluth Electric Company and the Duluth Street Railway Company for taxes.

Another important feature in the decision is a ruling that the Duluth Street Railway Company is not a "railroad company" within the meaning of the gross earnings law, so it cannot be taxed upon its gross earnings.

It is held that the method provided for the reporting for taxation of the intangible property of corporations is by listing and assessing the entire capital stock at its market or actual value, less certain specified deductions. The provision for listing franchises as a distinct and separate class of personal property applies only to private parties or others not falling within the provisions of the section which provides for the taxation of corporate property as a whole. The decision of the District Court for St. Louis County was modified in accordance with the above rulings.

**Missouri.—Legislature Adjourns.**—The State Legislature concluded its session on May 23, 1899.

**Rhode Island.—Legislature Adjourns.**—The State Legislature adjourned on May 26, 1899.

**St. Augustine, Fla.—Sunt Indefinitely Postponed.**—The suit recently brought by W. C. Middleton and others to restrain the city from issuing the \$20,000 electric-light plant bonds voted last March has been indefinitely postponed, as the State Legislature had passed in the meantime an Act legalizing the issuance of the bonds.

**Texas.—Legislature Adjourns.**—The State Legislature adjourned on May 27, 1899.

## Bond Calls and Redemptions.

**Arizona.—Bond Call.**—Territorial Treasurer Thos. W. Pemberton has called for payment the following bonds:

Wagon road and bridge bonds, dated Nov. 1, 1885, and numbered 1 to 28; also Gila bridge bonds Nos. 1 to 12, inclusive, and dated May 15, 1898. Interest ceased May 15, 1898.

Transit system bonds Nos. 11, 15 and 21 to 20, inclusive, having been presented and paid without being called; also funding bonds Nos. 1 to 10, inclusive, dated Jan. 10, 1898. Interest will cease June 15, 1899.

**Atchison County, Kan.—Bond Call.**—This county has called for, payment July 1, 1899, at the State's fiscal agency in New York City \$231,000 6% bonds, dated July 1, 1884, and numbered from 1 to 231, inclusive.

**Charleston, W. Va.—Bond Call.**—E. A. Reid, City Treasurer, has called for payment June 18, 1899, at the Kanawha National Bank, Charleston, bonds Nos. 31 to 80, each for \$500, and dated June 18, 1899.

**Denver, Col.—Bond and Warrant Call.**—City Treasurer Paul J. Sours called for payment May 15, 1899, at which time all interest will cease, the following bonds and warrants:

### BONDS.

Capital Hill Sanitary Sewer Dist. No. 1, bonds Nos. 269 to 283, both inclusive.  
 South Side Sanitary Sewer Dist. No. 1, bonds Nos. 219 to 222, both inclusive.  
 North Side Sanitary Sewer Dist. No. 2, bonds Nos. 15 and 19.  
 North Denver Sanitary Sewer Dist. No. 2, bonds Nos. 187 to 221, both inclusive.  
 Downing Avenue Sanitary Sewer Dist. No. 4, bond No. 18.  
 Fifteenth Paving Dist. No. 1, bonds Nos. 14 and 15.  
 Broadway Paving Dist. No. 2, bonds Nos. 9 to 11, both inclusive.  
 Broadway Storm Sewer Dist. No. 1, bonds Nos. 3 and 4.  
 Larimer Street Paving Dist. No. 1, bonds Nos. 128 to 132, both inclusive.  
 Larimer Street Paving Dist. No. 2, bonds Nos. 171 to 177, both inclusive.

### WARRANTS.

Thirteenth Street Sanitary Sewer refunding warrants Nos. 112 to 127, both inclusive.

The City Treasurer also called for payment June 1, 1899, the following bonds:

Capital Hill Sanitary Sewer Dist. No. 1, bonds Nos. 254 to 256, both inclusive.  
 South Side Sanitary Sewer Dist. No. 1, bonds Nos. 223 to 226, both inclusive.  
 North Denver Sanitary Sewer District No. 2, bonds Nos. 222 to 226, both inclusive.

Nineteenth Street Paving Dist. No. 2, bonds Nos. 113 to 115, both inclusive.  
 Broadway Storm Sewer Dist. No. 1, bond No. 8.  
 Railway Improvement Dist. of the Colfax Avenue Paving Dist. No. 1, bonds Nos. 1 to 33, both inclusive.  
 Railway Improvement Dist. of the 15th Street Paving Dist. No. 1, bonds Nos. 1 to 4, both inclusive.  
 Railway Improvement Dist. of the Broadway Paving Dist. No. 2, bonds Nos. 1 to 4, both inclusive.

Upon request from the holders of any of the above bonds and warrants ten days before the expiration of these calls, the City Treasurer will arrange for their payment at the Mercantile Trust Co., New York City, but not otherwise.

**Des Moines, Iowa.—Bond Calls and Redemptions.**—This city has redeemed \$20,000 bonds of 1888 and will redeem a like amount of the same issue about Oct. 10, 1899. There was also called for payment May 20, 1899, \$1,000 University Place bonds.

**Douglas County, Neb.—Warrant Call.**—The County Treasurer has called for payment general fund warrants amounting to \$45,000. These warrants include registered number 1874.

**Hillsborough County, Fla.—Bond Call.**—This county has called for redemption on July 1, 1899, at the First National Bank of Tampa, Fla., bonds Nos. 4, 7, 37, 64, 65, 92 and 136; also Nos. 6, 9, 11, 47, 108, 129 and 187, issue of 1897. These bonds were drawn by lot at the regular meeting of the Board of County Commissioners held April 4, 1899. H. L. Mitchell is Clerk of the Board.

**Kenosha, Wis.—Bond Call.**—This city has called for payment July 1, 1899, at the First National Bank, Milwaukee, \$170,000 5% re-adjustment bonds, dated October 15, 1884.

**Montgomery County, Ind.—Bonds Redeemed.**—On May 11, 1899, this county redeemed \$20,000 6% bonds and is now clear of all indebtedness.

**Multnomah County, Ore.—Warrant Call.**—Ralph W. Hoyt, County Treasurer, has called for payment county warrants, Class "B," drawn upon the road fund that were presented and indorsed "Not paid for want of funds" from May 1, 1898, to May 31, 1898, both dates inclusive. Interest on these warrants ceased on May 25, 1899.

**Oregon.—Warrant Call.**—State Treasurer Charles S. Moore has called for payment at his office all outstanding State warrants indorsed "Presented and not paid for want of funds" prior to May 10, 1899, with the exception of those drawn on the swamp land fund, the State bounty fund and those drawn on the general fund for conveying insane to the asylum since February 26, 1899.

**Pierce County (Wash.) School Districts.—Warrant Call.**—Stephen Judson, County Treasurer, called for payment

at his office May 27, 1899, the following school district warrants:

Dist.	Numbers.	Issued.	Dist.	Numbers.	Issued.
1.	237 to 263.	1897	35.	9.	1899
2.	306 to 310.	08-99	37.	37 to 44.	97-99

**Pike County (Mo.), Buffalo, Calumet, Culvre and Peno Townships.—Bond Call.**—Interest has ceased on the following bonds:

\$2,000 Buffalo Township 5% bonds, dated Jan. 1, 1899. Bonds are numbered from 64 to 69, inclusive.  
6,000 6% Calumet Township bonds, dated Jan. 1, 1899, and numbered 26 to 31, 33, 36, and 38 to 41, all inclusive.  
5,000 Culvre Township bonds, dated Oct. 1, 1887, and numbered 50 to 64, inc.  
3,000 5% Peno Township bonds, dated Nov. 1, 1887, and numbered 20 to 23, inc.

**Washington.—Warrant Call.**—State Treasurer Young called for payment May 19, 1899, the following warrants: General fund warrants Nos. 33,616 to 34,315, inclusive, amounting to \$56,842.

The State Treasurer has also called for payment June 8, 1899, warrants Nos. 34,316 to 36,310, inclusive, amounting to \$51,111 47, and State bond No. 16 for \$5,000.

## Bond Proposals and Negotiations this week have been as follows:

**Akron, Ohio.—Bond Offering.**—Chas. H. Isbell, City Clerk, will sell at public auction on June 10, 1899, at 10 A. M., \$13,000 4% refunding bonds. Securities are in denomination of \$1,000, dated June 10, 1899. Interest will be payable semi-annually at the National Park Bank, New York City, and the principal will mature June 10, 1907.

**Alliance, Ohio.—Bond Sale.**—J. H. McConnell writes us that the city sold on May 29, 1899, \$40,000 of the 4% street-improvement bonds to Seasongood & Mayer, Cincinnati, at 101-525. Other bidders were Rudolph Kleybolte & Co., Feder, Holzman & Co. and Briggs, Todd & Co., of Cincinnati; Denison, Prior & Co., The Lamprecht Bros. Co. and W. J. Hayes & Sons, of Cleveland; The New First National Bank of Columbus and The First National Bank of Circleville. For description of bonds see CHRONICLE May 20, 1899, p. 987.

**Anderson County (P. O. Garnett), Kan.—Bond Sale.**—This county has sold at par \$50,000 4½% refunding bonds. Securities are in denomination of \$1,000 and mature \$10,000 in 15 years, \$20,000 in 20 years and \$20,000 in 30 years.

**Arthur (Ill.) School District.—Bonds Voted.**—At an election held recently this district authorized the issuance of \$10,000 school-house bonds by a vote of 114 to 25.

**Ashland, Ohio.—Bond Offering.**—Proposals will be received until 12 M. June 19, 1899, by E. B. Westover, Village Clerk, for \$2,000 6% fire department bonds. Securities are in denomination of \$250, dated June 15, 1899. Principal will mature \$250 yearly from June 15, 1903, to June 15, 1910. Bonds are issued under sections 2835 and 2836, Revised Statutes of Ohio.

Proposals will also be received until 10 A. M. on the same day for \$5,000 6% street-improvement bonds. Securities are authorized by Section 2705, Revised Statutes of Ohio. They are in denomination of \$500, dated June 15, 1899. Interest will be payable annually, and the principal will mature one bond each six months from June 15, 1900, to Dec. 15, 1904, inclusive. A certified check for 5 per cent of the amount of bonds bid for must accompany each bid.

**Atlantic City, N. J.—Bond Sale.**—This city has sold to local investors \$10,000 4½% 15-year improvement bonds at 110-228.

**Auburn, Ala.—Bids Rejected.—Bond Offering.**—All bids received May 16, 1899, for the \$6,000 5% 20-year school-house bonds were rejected. We are advised by R. W. Burton, Clerk of the Council, that proposals will again be received for these bonds, this time until noon June 15, 1899.

**Battle Creek, Mich.—Bond Sale.**—The following bids were received on May 15, 1899, for the \$10,000 sewer bonds:

For 3½% Bonds.	For 4% Bonds.
Farson, Leach & Co., Chicago..... 101-77	Denison, Prior & Co., Cleve..... 108-87
W. J. Hayes & Sons, Cleve..... 101-47	S. J. Titus, Battle Creek..... 105-01
Denison, Prior & Co., Cleve..... 101-357	Briggs, Todd & Co., Cincln..... 104-05
Lamprecht Bros. Co., Cleve..... 101-29	S. A. Kean, Chicago..... 101-05
S. J. Titus, Battle Creek..... 101-001	For 4½% Bonds.
C. F. Kimball & Co., Chicago..... 101-90	S. J. Titus, Battle Creek..... 101-11
Seasongood & Mayer, Cincln..... 100-869	For 5% Bonds.
Mason, Lewis & Co., Chicago..... 100-65	First Nat. Bank, Chicago..... 104-125
Merchants' L'n & Tr. Co., Chic. 100-44	S. J. Titus, Battle Creek..... 101-108
N. W. Harris & Co., Chicago..... 100-05	

On May 22, 1899, the Council awarded the bonds to Farson, Leach & Co., Chicago, at their bid.

**Bellefontaine, Ohio.—Bond Offering.**—Proposals will be received until 12 M. June 13, 1899, by M. J. Nichols, City Clerk, for \$5,000 5% fire-department bonds. Securities are issued pursuant to sections 2835, 2836 and 2837 Revised Statutes of Ohio. They are in denomination of \$500, dated July 15, 1899. Interest will be payable annually on July 15 at the office of the City Clerk. Principal will mature \$500 yearly on July 15 from 1905 to 1914, inclusive.

Proposals will also be received at the same time and place for \$1,154 6% 1-10 year bonds. Securities are issued under authority of Section 2705 Revised Statutes of Ohio. They are in denomination of \$115 40, dated July 1, 1899. Interest will be payable annually. A certified check for \$100 must accompany each proposal.

**Birmingham, Ala.—Bond Offering.**—Proposals will be received until 12 M. June 7, 1899, by F. V. Evans, City Clerk, for \$20,000 6% 10-year public improvement bonds. Securities are issued under authority of an Act of the State Legislature approved Feb. 23, 1899. A certified check for \$500 must accompany proposals.

**Boston, Mass.—Temporary Loan.**—The "Boston News Bureau" reports that the city of Boston has borrowed \$1,500,000, in anticipation of the collection of taxes, until Nov. 1, at 2-85%.

**Boulder (Col.) School District No. 3.—Bond Sale.**—On May 15, 1899, the \$14,000 5% 5-15 year school bonds were awarded to the Boulder National Bank at 104. There were thirteen bids in all received, ranging from par to the amount at which the bonds were awarded. For description of securities see CHRONICLE May 6, 1899, p. 888.

**Bridgeport, Conn.—Bonds Authorized by Legislature.**—The Legislature has authorized the issuance of \$50,000 bridge bonds.

**Brockton, Mass.—Bids.**—Following are the bids received on May 25, 1899, for the \$50,000 3½% 1-20-year street-improvement, the \$33,000 3½% 1-20-year school-house, the \$10,000 3½% 1-20-year sewerage and the \$5,000 3½% 1-5-year surface drainage loans:

For entire \$98,000.	For entire \$98,000.
R. Kleybolte & Co., N. Y..... 103-10	E. H. Rollins & Sons, Boston..... 102-08
Rines & Cummings, Boston..... 102-29	Jose, Parker & Co. (for \$93,000), 102-77
E. H. Gay & Co., Boston..... 102-14	Blodgett, Merritt & Co. (for \$93,000), 102-188

R. L. Day & Co., Boston, bid 102-329, 102-79, 102-329 and 100-329 for the bonds in the order named above. As stated last week bonds were awarded to Rudolph Kleybolte & Co., New York.

**Brookline, Mass.—Temporary Loan.**—The town on May 12, 1899, negotiated a loan of \$300,000 at 2½% per annum. Loan matures November 12, 1899.

**Buffalo, N. Y.—Bond Issue.**—The Comptroller has been authorized to issue a judgment bond of \$701-17, which will be taken by the Park Bond Redemption Sinking Fund. Bond bears 3% interest, dated June 1, 1899, and matures July 1, 1900.

**Burrillville, R. I.—Bond Bill Passes Legislature.**—The State Legislature has authorized this town to issue \$100,000 bonds.

**Cambridge, Ohio.—Bond Offering.**—Proposals will be received until 12 M. June 19, 1899, by T. R. Daselm, City Clerk, for \$17,000 4% sewer bonds and \$8,000 4% paving bonds. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable semi-annually at the office of the City Treasurer. Principal will mature 20 years from date of issue. Bonds are issued pursuant to sections 2835 and 2837, Revised Statutes of Ohio.

**Carmi, Ill.—Bonds Defeated.**—At an election held May 16, 1899, a proposition to issue \$5,000 expense bonds was defeated by 314 majority.

**Carthage (Ohio) School District.—Bond Sale.**—On May 26, 1899, the \$700 6% 1-7 year (serial) bonds were awarded to Briggs, Todd & Co., Cincinnati, at 107-357. Following are the bids:

Briggs, Todd & Co., Cincln.....	\$751 50	1st National Bank, Barnesville.....	\$741 00
J. R. Saylor, Cincinnati.....	741 00	Edw. S. Huobell, Ayondale.....	728 00

**Charleroi, Pa.—Bond Election.**—An election will be held July 11, 1899, to vote on the question of issuing \$96,250 bonds for sewerage, paving and fire-alarm purposes.

**Chattfield, Minn.—Bond Sale.**—On May 9, 1899, the \$25,000 4% refunding bonds were awarded to the Merchants' Loan & Trust Co., Chicago, at 101-141. For description of bonds see CHRONICLE May 9, 1899, p. 889.

**Chicago, Ill.—Bond Offering.**—Proposals will be received until 12 M. June 20, 1899, by William D. Kerfoot, City Comptroller, for \$618,000 3½% gold refunding bonds. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable semi-annually at the American Exchange National Bank, New York City. Principal will mature July 1, 1919. A certified check for 5% of the amount applied for must accompany proposals.

**Cleveland, Ohio.—Description of Bonds.**—The \$155,000 sewer district bonds recently authorized by the City Council will be in denomination of \$1,000, dated April 1, 1899. Interest will be payable semi-annually at the City Treasurer's office. Principal will mature April 1, 1909.

**Clifton Heights, Pa.—Bond Election.**—An election will be held in this borough on July 18, 1899, to vote on the question of issuing about \$29,500 street-improvement bonds.

**Clinton (Tenn.) School District.—Bond Election.**—An election will be held June 23, 1899, to vote on the question of issuing \$10,000 school-building bonds.

**Columbus, Ohio.—Bond Sale.**—The street-improvement bonds recently authorized (see CHRONICLE May 20 and 27) will be taken by the sinking fund when issued.

**Loan proposed.**—A resolution is being considered in the City Council providing for a short-time loan of \$60,000 for street cleaning and sprinkling funds.

**Columbus, Wis.—Bond Sale.**—On May 15, 1899, \$10,000 electric-light plant bonds were awarded to the First National Bank, Columbus, at par at 3½ per cents.

**Covina (Los Angeles County, Cal.) School District.—Bond Sale.**—On May 17, 1899, \$6,000 7% school bonds were awarded at 112-71.

**Crow Wing County, Minn.—Bond Sale.**—On May 29, 1899, the \$55,000 4% 20-year funding bonds were awarded, it is stated, to Stoddard, Nye & Co. and Denison, Prior & Co., Cleveland, at 101-86. For description of bonds see CHRONICLE last week, p. 1038.

**Davidson, N. C.—Description of Bonds.**—This town will shortly issue \$6,000 6% street and sidewalk bonds. Securities will be in denomination of \$500, dated July 1, 1899. Interest will be payable semi-annually at the Seaboard National Bank, New York City. Principal will mature \$2,000 in ten, twenty and thirty years.

**Deaenon (Iowa) School District.—Bond Offering.**—Proposals will be received until 2 P. M. June 16, 1899, by C. M. Staley, Secretary, for \$22,500 3½% 5-10-year (optional) school-building bonds. Securities are in denominations of \$500 and \$1,000.

**Detroit, Mich.—No Loan to Be Negotiated.**—It has been stated in some of the papers that the Park Commissioners are about to negotiate a loan of \$3,000 or \$10,000. In reply to our inquiries Mr. Phil. H. A. Balsley, President, writes us that he is "not aware of it."

**Du Bois (Pa.) School District.—Bond Sale.**—On May 12, 1899, \$16,000 4% bonds were awarded to the Lamprecht Bros. Co., Cleveland, at 100-72.

**Duluth, Minn.—Description of Bonds.**—The \$500,000 4½% 15-year gold funding bonds, proposals for which, as stated last week, will be received until 7:30 P. M., June 19, 1899, will be dated May 1, 1899, and will mature May 1, 1914. Interest will be payable May 1 and November 1 at the American Exchange National Bank, New York City. Bonds are issued under Chapter 50, Laws of 1899, and Section 9, Chapter 9, of charter of the city of Duluth, being a part of Section 35, Chapter 55, Minnesota Special Laws, 1891. For further details see last week's CHRONICLE, p. 1139.

**Eddy County, N. Dak.—Bonds Voted.**—On May 23, 1899, the proposition to issue \$15,000 court house and jail bonds received over 300 majority.

**Elliott (Pa.) School District.—Bond Offering.**—Proposals are asked for until 7 P. M., June 6, 1899, by John W. Lowry, Secretary, for \$21,500 4½% 15-30-year (optional) school bonds. Securities are in denomination of \$500; interest will be payable semi-annually in Pittsburgh. The bonded indebtedness of the district, including this issue, is \$24,800; the floating debt is \$2,492 81. The assessed valuation is \$1,100,000 and the real value about \$1,500,000. The population is 3,500.

**Eureka Township (P. O. Gypsum) Kan.—Bond Sale.**—This township has sold to Spitzer & Co., Toledo, \$16,000 5½% refunding bonds. Securities are dated May 15, 1899, and mature May 15, 1918.

**Floyd County, Va.—Bonds Defeated.**—At the election held May 23, 1899, the proposition to issue \$150,000 bonds as a subscription to the capital stock of the Atlantic & Western Railroad was defeated.

**Geneva, N. Y.—Bond Sale.**—On May 29, 1899, \$50,000 3½% and \$31,000 3½% improvement bonds were awarded to N. W. Harris & Co., New York, at 102-15 and 100-76 respectively. Following are the bids:

	\$50,000 (issue)	\$31,000 (issue)
N. W. Harris & Co., New York	102-15	100-76
Lamprecht Bros. Co., Cleveland	102-14	100-77
G. M. Hahn, New York	102-13	100-78
Bertron & Horra, New York	102-11	100-80
I. W. Sherrill, Poughkeepsie	102-00	100-77

**Gloucester, Mass.—Temporary Loan.**—This city has negotiated a loan of \$100,000 with the Cape Ann National Bank, Gloucester, at 3% and 4% premium. Loan matures one-half in eight months and one-half in nine months.

**Gonzales County, Texas.—Bonds Approved.**—On May 23, 1899, the Attorney General approved the issuance of \$50,000 refunding court house bonds.

**Howanda (N.Y.) School District.—Bond Sale.**—On May 31, 1899, \$10,000 4½% 5-14 year (serial) bonds, were awarded to W. J. Hayes & Sons, Cleveland, at 105-91.

**Grand Rapids, Mich.—Bond Sale.**—On May 27, 1899, the \$200,000 4½% coupon street-improvement bonds were awarded to the Michigan Trust Co., Grand Rapids, at 102-10. Following are the bids:

Michigan Trust Co., Grand Rapids	\$204,200 00	Budget, Merrill & Co., Boston	\$203,548 00
Kent Co. Savings Bank, Grand Rapids	\$203,900 00	Mason, Lewis & Co., Cal.	\$203,548 00
Old Nat. Bank, Grand Rapids	\$203,727 00	Denison, Prior & Co., Cleve.	\$203,510 00
W. J. Hayes & Sons, Cleve.	\$203,740 75	People's Sav. Bk., Grand Rapids	\$203,440 25
D. H. Waters & Sons	\$203,720 00	Briggs, Todd & Co., Cin.	\$203,507 50
Adams & Co., Boston	\$203,720 00	R. Kierpolt & Co., Cin.	\$202,517 00
Lamprecht Bros. Co., Cleve.	\$203,548 00		

Bonds mature \$40,000 yearly on May 1 from 1900 to 1904, inclusive. For full description of bonds see CHRONICLE last week, p. 1089.

**Hamilton County, Ohio.—Bond Sale.**—On May 6, 1899, the \$14,000 5% bridge bonds were awarded to Feder, Holzman & Co., Cincinnati, at 101-86. Bonds mature May 6, 1900. For further description see CHRONICLE, April 1, 1899, p. 685.

**Hamilton (Ohio) School District.—Bond Offering.**—Proposals will be received until 12 M. June 10, 1899, by W. N. Andrews, clerk Board of Education, for \$10,000 4% school bonds. Securities are issued pursuant to section 3,994 Revised Statutes of Ohio. They are in denomination of \$500. Interest will be payable semi-annually at the First National Bank of Hamilton. Principal will mature \$5,000 in 1919 and \$5,000 in 1924. A certified national bank check for 5% of the amount of bonds bid for must accompany proposals.

**Hartford (Conn.) Washington School District.—Bond Offering.**—Proposals will be received until 1 P. M. June 10, 1899, by Walter L. Wakefield, Treasurer, 720 Main Street, Hartford, for \$25,000 3½% 25-year bonds. A deposit of 5% of the amount awarded must be made by successful bidders.

**Hartford, Wis.—Bonds Voted.**—At a special election held May 27, 1899, the issuance of \$12,000 4% water-works bonds was authorized by a vote of 184 to 163. Bonds will mature \$1,000 yearly, beginning in 1902. Full details of the issue have not yet been determined.

**Hastings, Minn.—Bond Sale.**—This city has sold \$10,200 4% insane-asylum bonds to the First National Bank of Hastings at par. Securities are dated May 1, 1899. Interest will be payable semi-annually at the City Treasurer's office and the principal will mature May 1, 1919, subject to call after May 1, 1909.

**Helena, Mont.—Bond Award.**—As stated last week, the \$130,000 refunding bonds were awarded to the Lamprecht Bros. Co., Cleveland, at 101-35 for 4% bonds. The bonds advertised for sale were 5 per cent bonds and the bidding was made on 5 per cents with the tacit understanding that the bids would all be rejected, in order to comply with the law, and the highest bidder at the regular sale was to take 4% bonds at an equivalent rate. The highest bidder for the 5s was the Lamprecht Bros. Co., who bid a premium of \$19,540, which bid was equivalent to a premium of \$1,756 for 4 per cents.

**Herkimer, N. Y.—Bond Sale.**—On May 29, 1899, the \$13,000 incandescent electric-light plant bonds were sold at public auction to Walter Stanton & Co., New York City, at 102-05 for a 3½% bond.

**Houghton, Mich.—Bond Bill Passes Legislature.**—The State Legislature has passed and the Governor has signed the bill authorizing the issuance of \$60,000 water-works and street-improvement bonds.

**Houston, Minn.—Bond Offering.**—Proposals will be received until 1 P. M. June 3, 1899, by the Town Board of Supervisors at the office of J. A. Redding, Township Clerk, for \$2,000 1-4-year bonds. Interest will be at a rate not exceeding 7%.

**Houston, Texas.—Bond Election Proposed.**—An election will probably be held to vote on the question of issuing \$300,000 sewer bonds. A resolution to that effect is now before the City Council.

**Jackson Township (P. O. Crestline) Ohio.—Bond Offering.**—This township will sell on June 17, 1899, \$3,000 bonds. S. E. Foust is the Township Clerk.

**Jellico, Campbell County, Tenn.—Bonds Defeated.**—At the election held recently, the proposition to issue \$8,000 street improvement bonds was defeated.

**Jennings, Ia.—Bond Election.**—An election will be held about July 1, 1899, to vote on the question of issuing from \$20,000 to \$30,000 electric light and water-works bonds.

**Joplin (Mo.) School District.—Bids.**—Following are the bids received May 22, 1899, for the \$30,000 4½% 5-20-year school bonds:

L. L. Doubleday, Columbus	\$20,367 60	Trowbridge, MacDonald & Sifer Co., Chicago	\$20,231 00
Seaton, Goddard & Mayer, Cin.	\$20,316 00	N. W. Harris & Co., Chicago	\$20,218 00
Feder, Holzman & Co., Cin.	\$20,313 00	W. J. Hayes & Sons, Cleve.	\$20,211 00
John Naveen & Co., Chicago	\$20,275 00	Lamprecht Bros. Co., Cleve.	\$20,160 00
Denison, Prior & Co., Cleve.	\$20,214 00	Mason, Lewis & Co., Chicago	\$20,277 00
Miners' Bank of Joplin	\$20,226 00	Joplin National Bank	\$20,023 60

There were other bids received, but without forfeit, and were therefore not considered. As stated last week, bonds were awarded to L. L. Doubleday at 101-837.

**Kahoka, Mo.—Bonds Defeated.**—At an election held recently the proposition to issue \$17,000 bonds was defeated.

**Kansas City (Mo.) School District.—Bond Election.**—An election will be held June 22, 1899, to vote on the question of issuing \$400,000 school building bonds.

**Kenosha, Wis.—Bond Offering.**—Notice has been given by this city that for 30 days after May 25, 1899, \$170,000 3½% refunding bonds will be offered for sale in the city of Kenosha, and will be issued to the person or persons bidding the highest sum, not less than par therefor, and offering to accept the lowest rate of interest for said refunding bonds, or any part of said refunding bonds, which rate of interest shall not exceed three and one half (3½) per cent per annum.

This notice is given under provision of sections 959-4 of the Revised Statutes of the State of Wisconsin, and by order and resolution of the Common Council of the City of Kenosha. The new bonds will be dated July 1, 1899, and will mature within 20 years from date of issue. (Cons. Jacob is the City Clerk.)

**Kirkville (Mo.) School District.—Bond Election.**—An election will be held June 8, 1899, to vote on the question of issuing \$35,000 4% bonds in lieu of the 5 per cents authorized at the April election. These bonds were awarded on April 20, 1899, at 100-60 for 5 per cents, whereas 5 per cent bonds were authorized at the earlier election. As the act of the School Board in awarding 4% bonds has been questioned, the above election has been called to correct the technical difference.

**Lacqui Parle County (P. O. Madison), Minn.—Bond Offering.**—Proposals will be received until 12 M. June 20, 1899, by John B. Oadaon, County Auditor, for \$30,000 court-house bonds. Securities are issued under Chapter 299, Laws of 1895. They are in denomination of \$3,000, dated July 10, 1899. Interest (at 4% or lower) will be payable annually in Madison. Principal will mature \$3,000 yearly on July 10. The total debt of the county is \$34,000. The assessed valuation is \$4,315,407 and the real valuation about \$14,385,000. The population in 1895 was 12,687.

**Lake County, Ohio.—Bond Sale.**—On May 30, 1899, the \$35,000 4% bridge bonds were awarded to Seasongood & Mayer, Cincinnati, at 106-26. Bonds mature part yearly on June 1 as follows: \$1,500 from 1900 to 1909, inclusive, and \$2,000 from 1910 to 1919, inclusive. For further description of bonds see CHRONICLE May 13, 1899, p. 910.

**Lakeland, Minn.—Bonds Voted.**—At a special election held May 29, 1899, this place voted for the issuance of bonds for electric lights and water works.

**Lakeview, Lake County, Ore.—Bonds Defeated.**—At the election held May 13, 1899, the proposition to issue 25,000 water-works bonds was defeated by five votes. Mr. William T. Boyd, Recorder, writes us that they "will try again soon."

**Laurensburg, N. Y.—Bond Sale.**—On May 31, 1899, the \$63,000 street-improvement bonds were awarded to Joseph E. Gavin, Buffalo, at 101-25 for a 3½% bond. Following bids were received:

For a 3½% Bond.	Bertron & Storrs, New York.....101-05
Joa. E. Gavin, Buffalo.....101-25	R. H. Smith & Co., New York.....100-91
For a 3½% Bond.	W. J. Hayes & Sons, Cleveland.....100-81
Allen, Sand & Co., New York.....101-27	C. H. White & Co., New York.....100-52
N. W. Harris & Co., New York.....101-07	

Bonds mature June 1, 1904. For further description of them see CHRONICLE May 27, 1899, p. 1040.

**Laurel, Del.—Bond Offering.**—Proposals will be received until 12 m. June 15, 1899, by the Town Commissioners, for \$30,000 4% water-works and sewer bonds. Securities are issued under authority of an Act of the General Assembly approved Feb. 23, 1899. Interest will be payable January 1 and July 1, free of State, county or municipal taxation, at the Sussex Trust, Title & Safe Deposit Co. of Laurel. Bonds will run 30 years, "redeemable at the option of the said Town Commissioners." The town has no indebtedness and the assessed valuation is \$334,000.

**Laurel, Miss.—Bond Sale.**—On May 27, 1899, \$4,000 5% 20-year (optional) school bonds, were awarded to the Noel Young Bond & Stock Co., St. Louis, at 101. Securities are in denomination of \$500; interest will be payable annually on January 1.

**Louisburg (Town) N. C.—Bond Election.**—An election will be held on June 14, 1899, to vote on the question of issuing \$30,000 water-works, sewerage and electric-light plant bonds. George S. Baker is Town Clerk.

**McConelsville, Ohio.—Bond Sale.**—On May 31, 1899, the \$10,000 4% street-improvement bonds were awarded to Seasongood & Mayer, Cincinnati, at 105-567. Following are the bids:

Seasongood & Mayer, Cin. .... \$10,556 75	Denison, Prior & Co., Cleve. .... \$10,201 00
Kleybolte & Co., Cin. .... 10,492 80	E. M. Stanbery, McConelsv. .... 10,201 00
Lamprecht Bros. Co., Cleve. .... 10,437 00	W. J. Hayes & Sons, Cleve. .... 10,135 00
Feder, Holzman & Co., Cin. .... 10,405 00	

Bonds mature \$500 every six months from Feb. 1, 1913, to Aug. 1, 1922, inclusive. For full description of bonds see CHRONICLE May 6, 1899, p. 890.

**Mahoning County, Ohio.—Bond Sale.**—On June 1, 1899, \$25,000 4½% Children's Home bonds, were awarded to the Dollar Savings & Trust Co. of Youngstown at 109-33. Securities are in denomination of \$500 dated June 1, 1899. Interest will be payable March 1 and September 1, and the principal will mature yearly on September 1, \$1,000 in 1900 and \$1,500 from 1901 to 1916, inclusive.

**Maine.—Temporary Loan.**—This State has placed a twenty-one months' loan of \$100,000 with the Augusta Savings Bank at 3% per annum.

**Mankato, Minn.—Bond Offering.**—Proposals will be received until 10 a. m. June 16, 1899, for \$15,000 3½% 20-year refunding water-works bonds and \$8,000 3½% 20-year refunding bridge bonds. Securities are in denomination of \$1,000, the water bonds being dated August 1, 1899, and the bridge bonds October 1, 1899. Interest will be payable semi-annually. A certified check for \$500 must accompany bids for the water bonds and one for \$250 for the bridge bonds.

**Matawan (N. J.) School District—Bonds Defeated.**—At a recent election in this district the proposition to issue \$12,000 bonds was defeated by a majority of 49 votes.

**Mattoon, Ill.—Bond Election Favorable.**—The election which was held May 27, 1899, to correct a technical error in the description of the bonds sold May 1, 1899, resulted in favor of the correction, and the original sale stands.

**Milan, Ohio.—Bond Offering.**—Proposals will be received until 3 p. m. June 12, 1899, by Darwin Fay, Village Clerk, for \$6,000 5% 1-20 year (serial) electric-light plant bonds. Securities are in denomination of \$3 00; interest will be payable March 1 and September 1 at the office of the Village Treasurer. All bids must be unconditional, and bidders will be required to deposit an amount in money or a certified check on some bank either in Milan, Sandusky or Norwalk, in the sum of \$400.

**Minnetota, Minn.—Bonds Defeated.**—The proposition to issue \$5,000 water-works and sewerage bonds was defeated at a recent election.

**Minnesota.—Loans Negotiated.**—The School Fund Trustees have loaned the following counties and school districts the amounts set opposite their names:

Pine County.....\$30,000	Blue Earth Co. Sch. Dist. No. 42.....\$500
Kanabec County.....12,500	Kanabec Co. Sch. Dist. No. 21.....x50
Blue Earth Sch. Dist.....8,000	Ramsey Co. Sch. Dist. No. 10.....300
Ely Sch. Dist.....7,000	

**Montgomery Township (P. O. Ashland, Ohio.) School District.—Bond Sale.**—The highest bid received on May 27, 1899, for the \$1,800 6% bonds was that of Feder, Holzman & Co., Cincinnati, at 102-597. Following are the bids:

Feder, Holzman & Co., Cin. .... \$1,845 75	Myer & Kiser, Indianapolis.....\$1,826 75
First Nat. Bank, Ashland.....1,845 10	John McConell, Ashland.....1,820 00
First Nat. Bank, Barnesville.....1,833 00	Lamprecht Bros. Co., Cleve. ....1,811 00
Coshocton Nat. Bank.....1,822 75	

Bonds mature \$600 on March 1, 1900, \$600 Sept. 1, 1900, and \$600 March 1, 1901. For further description of bonds see CHRONICLE May 20, 1899, p. 989.

**Nemaha County, Neb.—Bonds Voted.**—At the election held May 24, 1899, the issuance of \$40,000 4½% court-house bonds was authorized. A description of these bonds was given in the CHRONICLE April 15, 1899, p. 737.

**New London (Ohio) School District—Bond Sale.**—On May 29, 1899, \$1,500 6% bonds were awarded to the First National Bank, Circleville, at 114. Securities are in denomination of \$500. Interest will be payable semi annually, and the principal will mature \$500 yearly on September 1 from 1903 to 1911 inclusive.

**Newport News, Va.—Bonds Voted.**—At the election held May 25, 1899, the issuance of \$90,000 bonds was authorized.

**New Rochelle, N. Y.—Description of Bonds Offered for Sale.**—In the CHRONICLE, May 13, 1899, we stated that proposals would be received until June 6, 1899, for \$150,000 street improvement and \$13,000 city prison bonds. We are now advised that proposals will be received until 8 p. m. on that day by Andrew J. Selz, City Clerk. The street improvement bonds are in denomination of \$1,000, dated June 6, 1899. Interest will be payable in June and December. Principal will mature \$5,000 yearly on June 6 from 1904 to 1933, inclusive. The prison bonds will also be in denomination of \$1,000, dated June 6, 1899. Interest will be payable in June and December, and the principal will mature \$1,000 yearly on June 6, from 1904 to 1916, inclusive.

The bonds will be sold to the person or corporation who will take them at the lowest rate of interest, and they will be certified to as to genuineness by the United States Mortgage & Trust Co., New York City.

**Nora Springs, Floyd County, Iowa.—Bond Sale.**—On May 25, 1899, the \$6,540 water-works bonds were awarded to the Minnesota Loan & Trust Co., Minneapolis, at 102-14 for 4% bonds. Bonds mature June 1, 1919. For further description of securities see CHRONICLE May 13, 1899, p. 941.

**Norfolk (Conn.) Sewer District.—Bond Sale.**—On May 29, 1899, the \$18,000 4% gold sewer bonds were awarded to E. H. Rollins & Sons, Boston, at 109-017. Following are the bids:

E. H. Rollins & Sons, Boston.....109-017	Jose, Parker & Co., Boston.....107-175
E. H. Gay & Co., Boston.....108-64	N. W. Harris & Co., Boston.....101-81
Kimberly, Root & Day, New Hav. ....107-78	Holmes & Gay.....101-00

Bonds mature \$6,000 June 1, 1909, and \$12,000 June 1, 1919. For full description of securities see CHRONICLE May 20, 1899, p. 990.

**North Dakota.—Bond Sale.**—On May 3, 1899, the \$50,000 20-year State hospital bonds were awarded to the Board of University and School Funds at par for a 4% bond. For description of securities see CHRONICLE April 22, 1899, p. 788.

**Norwalk, Conn.—Bids.**—Following are the bids received May 29, 1899, for the \$250,000 3½% gold 20-30 year (optional) refunding bonds, the highest of which was that of E. H. Gay & Co., Boston, at 104-89.

E. H. Gay & Co., Boston.....104-89	Denison, Prior & Co., Cleve.....103-72
E. H. Gay & Co., Boston.....104-35	Roberts & Co., New York.....103-63
E. H. Rollins & Sons, Boston.....104-833	N. W. Harris & Co., New York.....103-575
Adams & Co., Boston.....104-167	Edw. C. Jones & Co., New York.....102-11
Mason, Lewis & Co., Boston.....103-729	

For description of bonds see CHRONICLE May 13, 1899, p. 941.

**Oberlin, Ohio.—Bond Offering.**—Proposals will be received until 2 p. m. June 5, 1899, for \$800 6% Northwest Sewer District bonds and \$1,200 6% Spring Street sewer bonds. Securities are issued under authority of sections 2704, 2705 and 2708, Revised Statutes of Ohio. They are dated June 5, 1899. Interest will be payable semi-annually at the Citizens' National Bank of Oberlin. The \$800 issue will be in denomination of \$100 and will mature one bond on June 5 of the years 1900, 1901, 1903 and 1904, and two bonds in the years 1902 and 1905. The \$1,200 issue will be in denomination of \$200 and will mature one bond yearly.

**Omaha, Neb.—Bonds Authorized.**—The Council has passed ordinances authorizing the issuance of one-half the \$50,000 paving and \$50,000 sewer bonds voted at the last election.

**Ottawa County, Ohio.—Bond Sale.**—On May 29, 1899, the \$12,000 5% bonds were awarded to Feder, Holzman & Co., Cincinnati, at 117-583. Following are the bids:

Feder, Holzman & Co., Cin. .... \$14,110 00	First Nat. Nat. Bank, Colum. ....\$13,565 00
Seasongood & Mayer, Cin. .... 14,085 00	C. F. Kimball & Co., Chicago. ....13,513 20
W. J. Hayes & Sons, Cleve. .... 14,077 00	Lamprecht Bros. Co., Cleve. ....13,389 00
Denison, Prior & Co., Cleve. .... 14,052 50	R. Kleybolte & Co., Cin. ....13,390 00
Croghan Bank of Fremont.....13,990 00	First Nat. Bank, Barnesville. ....13,250 00

Bonds mature \$1,000 yearly on June 8, from 1907 to 1918, inclusive. For full description of bonds see CHRONICLE May 20, 1899, p. 991.

**Owatonna, Minn.—Bond Sale.**—On May 30, 1899, \$15,000 5% 10-year library bonds were awarded to Kane & Co., Minneapolis, at 113-166. Following are the bids:

Kane & Co., Minn. .... \$16,975 00	Seasongood & Mayer, Cin. ....\$16,382 10
Minn. Loan & Tr. Co. .... 16,518 50	N. W. Harris & Co., Chicago. ....16,292 50
Lamprecht Bros. Co., Cleve. .... 16,411 50	Farson, Lesch & Co., Chic. ....16,125 00
Denison, Prior & Co., Cleve. .... 16,365 00	Nat. Farm's B'k, Owatonna.....16,000 00
Stoddard, Nye & Co., Cleve. .... 16,331 50	First Nat. Bank, Owatonna.....16,000 00
W. J. Hayes & Sons, Cleve. .... 16,330 00	

**Perry County, Ill.—Bonds Re Awarded Subject to Election.**—The agreement made by this county with T. B. Potter, Chicago (see CHRONICLE May 6, 1899), for the sale of \$200,000 refunding bonds has fallen through, and the bonds have been re-awarded to the First National Bank, C. S. Smith & Co. and the Bank of Murphy, Wall & Co., all local institutions. The bonds are in denomination of \$1,000 and bear 4½% interest, payable in New York City. Principal will mature 20 years from date of issue, subject to call after 10 years. The question of issuing these bonds must first be voted upon, and we are advised that an election will probably be held for this purpose the latter part of June.

**Philadelphia, Pa.—Loan Authorized.**—The Select Council has authorized a temporary loan of \$759,200 for various purposes. The Common Council authorized this loan two weeks ago.

**Plattsburgh, Neb.—Bond Sale.**—This city has sold to Spitzer & Co., Toledo, \$103,000 5% refunding bonds at par.

Securities are in denomination of \$1,000, dated June 1, 1899. Principal will mature \$2,000 yearly on June 1 from 1901 to 1918, inclusive, and \$67,000 in 1919.

**Price (Utah) School District.—No Bonds Voted.**—In the CHRONICLE May 13, 1899, we stated that, according to local reports, bonds were recently voted in this district. Mr. H. G. Mathes, Clerk of the School Board, now writes us that there have been no bonds voted at this place and that there is no likelihood of there being any.

**Princeton, Minn.—Bond Sale.**—On May 13, 1899, the \$16,000 5% 10-year gold water works and electric-light plant bonds were awarded to the Minnesota Loan & Trust Co., Minneapolis, at 100-66.

**Providence, R. I.—Bond Bill Passed by Legislature.**—The issuance of \$150,000 bonds for the construction of a retaining wall has passed the Legislature.

**Putnam County, Ind.—Bids.**—Following are the bids received May 16, 1899, for the \$30,530 4% 20-year gravel-road bonds of Warren and Jefferson townships:

Premium.	Premium.
Zeller & Biddle, Brazil, .....	1317 50
Briggs, Todd & Co., Cin. ....	305 20
W. J. Hayes & Sons, Cleve. ....	201 00
First Nat. Bank, Greencastle, ..	200 00
Seasongood & Mayer, Cin. ....	175 00
Central Nat. Bank, Greencastle, ..	115 00
R. Kleybolte & Co., Cincinnati, ..	110 00
Feder, Holzman & Co., Cin. ....	100 07
Campbell, Wild & Co., Ind. ....	35 00
New 1st Nat. B'k, Columbus, ..	5 75

As stated in the CHRONICLE May 20, 1899, bonds were awarded to Zeller & Biddle at 101-04.

**Putnam County, Mo.—Bond Election.**—An election will be held, according to reports, to vote on the question of issuing \$30,000 court-house bonds.

**Barine, Wis.—Bond Offering.**—Proposals will be received until 2 P. M. June 15, 1899, by Michael Colbert, City Treasurer, for \$17,000 3% school bonds. Securities are in denomination of \$1,000, dated July 1, 1899. Interest will be payable annually at the City Treasurer's office. Principal will mature July 1, 1919. The successful bidder will be required to deposit a certified check or bond for \$2,000 within 24 hours after award.

**Rockledge, Montgomery County, Pa.—Bond Offering.**—Proposals will be received until 7:30 P. M. June 17, 1899, by Isaac Tull, Chairman Finance Committee, for \$20,000 4% municipal improvement bonds. Securities are in denominations of from \$50 to \$1,000, as desired, dated May 1, 1899. Interest will be payable May 1 and November 1, and is clear

of State tax. Principal will mature May 1, 1929, subject to call after May 1, 1904. A certified check for 2% of the amount of the bid, payable to Adam Nahm, Borough Treasurer, must accompany proposals. The borough has no other indebtedness, and the assessed valuation is \$303,000.

**Rockport (Ohio) Special School District.—Bond Sale.**—On May 20, 1899, the \$12,000 5% bonds were awarded to Denison, Prior & Co., Cleveland, at 106-166. Following are the bids:

Denison, Prior & Co., Cleve., \$12,740 00	Lamprecht Bros. Co., Cleve. \$12,500 00
C. F. Kimball & Co., Chicago, 12,720 00	W. J. Hayes & Sons, Cleve., 12,400 00
Rodgers & Sons, Chas. F. L., 12,720 00	Briggs, Todd & Co., Cin., 12,485 00
R. Kleybolte & Co., Cin., 12,611 75	People's Sav'g & Loan Assn., 12,405 00
Seasongood & Mayer, Cin., 12,600 00	Meyer & Kelsner, Ind'apolis, 12,071 81

A bid of 109-804 was received from Feder, Holzman & Co., Cincinnati, too late to be considered. Bonds mature \$1,000 yearly on October 1, from 1900 to 1911, inclusive. For further description see CHRONICLE April 29, 1899, p. 841.

**Rushville, Ind.—Bond Issue Not Probable.**—In the CHRONICLE last week we stated that the School Board desired the City Council to issue \$50,000 school-house bonds. We are now advised that the issuance of these bonds this year is not probable, as the City Council and School Board do not agree.

**Starbuck, Minn.—Bond Offering.**—Proposals will be received until 10 A. M. June 23, 1899, by the Village Council, for \$4,500 5% 20-year water-works and electric-light plant bonds. Securities are in denomination of \$500. Interest will be payable annually at the office of the Village Treasurer. Successful bidder will be required to furnish blank bond. A certified check for \$200, payable to O. Tharaldson, President of the Village Council, must accompany proposals. All bidders are required to satisfy themselves as to the legality of the bonds before bids are opened. B. H. Holte is the Village Recorder.

**Starr County, Texas.—Bonds Approved.**—The issuance of \$10,500 refunding court-house and jail bonds has been approved.

**Tecumseh, Neb.—Bond Sale.**—On May 23, 1899, the \$21,000 4% refunding water bonds were awarded to The Lamprecht Bros. Co., Cleveland, at 100-245. Chas. S. Kidder & Co., Chicago, and W. J. Hayes & Sons, Cleveland, each bid for the bonds at par less a commission of \$290. Securities

## NEW LOANS. BOND CALL.

### CITY OF TAMPA, FLA.

To all holders of the Bonds of the City of Tampa, issued under Ordinance No. 38, of said City.

You will TAKE NOTICE: That the City of Tampa will exercise its option given in Section One of said Ordinance No. 38, and will, on the 1st day of June, A. D. 1899, take up, pay off and cancel all Bonds issued under said Ordinance No. 38, with all interest due thereon on said date.

The money amounting to \$100,000 the amount of the outstanding Bonds issued under Ordinance No. 38, and a sufficient amount to pay all accrued interest, will be placed with the American Exchange National Bank of the City of New York, State of New York, on or before the 1st day of June, A. D. 1899, with instructions that said Bonds are to be taken up when presented and payment made therefor. This notice is given as required by Ordinance No. 38 of the City of Tampa, to the said American Exchange National Bank of New York, where said bonds are made payable.

After the 1st day of June, A. D. 1899, all interest on said bonds shall cease and the City of Tampa will not be liable for same.

Signed  
F. C. BOWYER,  
Mayor of the City of Tampa.  
FRANK BRUEN,  
President of the City Council.

Attested:  
JNO. M. HENDERSON,  
City Clerk.

Approved,  
JNO. A. WELLER,  
City Auditor.

Dated at Tampa, Florida, 15th May, 1899.

\$55,000

### City of Montgomery, Ala. 4% Bonds.

Bids will be received by City of Montgomery, Ala., until 12 M. June 12th, prox., for 30-year 4% Bonds, \$35,000 for building School Houses.

\$20,000 for constructing Sanitary Sewers. The bids must be unconditional, investigation as to their legality to be made before proposals, and every bid accompanied by certified check of five hundred dollars.

The City reserves the right to reject any and all bids.

R. H. SOMMERVILLE, Treas.

## NEW LOANS.

### CALL FOR REDEMPTION.

### Franklin County, Ky., Bonds.

FRANKFORT, KY., April 26, 1899.

Notice is hereby given to all concerned that Franklin County will avail herself of the option in the bonds to pay off the Kentucky Midland Railway bonds issued to the Kentucky Midland Railway Company as of date of July 1, 1899, ten years expiring July 1, 1909. On said date all outstanding bonds of said issue are called for redemption, and they will be paid in full, both principal and interest, by presentation at Bank of America, New York City, New York. The County will not pay interest on said bonds after July 1, 1899.

This call is made by order of the Fiscal Court of Franklin County, State of Kentucky, this April 26, 1899.

J. D. MOORE, Judge,  
Franklin County Fiscal Court.

## BOND CALL.

### ANDERSON CO., KAN.

Notice is hereby given that the following described Bonds of Anderson County, Kansas, are called for payment and cancellation.

Forty five Bonds of \$1,000 each, bearing date of April 22d, 1891, and numbered from fourteen to fifty-eight, both numbers inclusive, and known as Series A; also Seventeen Bonds of \$500 each, bearing date of April 22d, 1891, numbered from 59 to 75, both numbers inclusive, and known as Series B; all the above Bonds bear 6% interest payable semi-annually.

The above-described Bonds are called for payment principal and accrued interest, at the National Bank of the Republic, Fiscal Agent of the State of Kansas at the City of New York, on July 1st, 1899, according to the terms of said issue, and that the interest on said Bonds will cease on said day.

J. W. SHIELDS,  
Treasurer of Anderson County, Kansas,  
Garnett, Kansas, May 15th, 1899.

mature May 1, 1919, subject to call after May 1, 1909. For further description of bonds see CHRONICLE May 13, 1899, p. 943.

**Thompson (Town), Iowa.—Bond Offering.**—Proposals will be received until 8 p. m. June 5, 1899, by the "Incorporated Town of Thompson" for \$2,000 4½% 15-year water-works bonds. Securities will bear date July 1, 1899. Interest will be payable semi-annually in New York or Chicago, at the option of the purchaser. The above represents the first issue of bonds ever made by this town.

**Titusville, Pa.—Refunding Bond Issue.**—Jules A. C. DuBar, City Comptroller, writes us that only a "few thousand of the old 4s have been exchanged to date. After June 6 the new 3s will be advertised and bids requested." As stated in the CHRONICLE April 1, 1899, this city is attempting to refund its entire debt of \$116,000 with 3% 10-20-year (optional) bonds. Under the law holders of the old bonds have 60 days in which to exchange the old bonds for the refunding issue, after which time the bonds not exchanged may be sold to the highest bidder.

**Toledo, Ohio.—Bids.**—Following are the bids received May 24, 1899, for the \$150,000 4% park improvement bonds:

Northern Nat. Bk., Toledo. \$167,916 00	Secor & Bell, Toledo. .... \$184,955 00

\* Conditioned upon immediate delivery of bonds.

As stated last week, bonds were awarded to the Northern National Bank, the price being 111-963 and not 111-333 as first reported.

**Utica, N. Y.—Bond Sale.**—On June 1, 1899, the \$40,000 4% 1-20 (serial) year academy building bonds, the \$20,000 4% 1-20 (serial) year school building bonds and the \$8,533 57 4% 1-6 (serial) year street improvement bonds were sold at public auction to Joseph E. Gavin, Buffalo, at 108-27, 107-75 and 101-80, respectively. Other bidders represented were: Bertron & Storrs, New York; the Lamprecht Bros. Co., Cleveland; Price, McCormick & Co., New York; E. D. Shepard & Co., New York; N. W. Harris & Co., New York; Isaac W. Sherrill, Poughkeepsie; W. J. Hayes & Sons, Cleveland;

John G. Gibson, Utica, Charles B. Rogers, Utica; L. W. Morrison, New York, and S. A. Kean, Chicago. For description of bonds see CHRONICLE last week, p. 1043.

**Utica (Town), N. Y.—Bond Offering.**—At 12 m. June 8, 1899, the Board of Town Auditors will sell at public auction at the City Clerk's office, \$5,000 5% 1-year bonds. W. H. Clohers, Jr. is the Chairman of the Board.

**Valdosta, Ga.—Bonds Voted.**—At the election held May 20, 1899, only two votes were cast against the issuance of the \$35,000 sewer bonds. For description of bonds see CHRONICLE, May 6, 1899.

**Wallace, Idaho.—Bond Sale.**—On May 22, 1899, the \$18,000 10-20-year (optional) sewer bonds were awarded to C. F. Kimball & Co., Chicago, at 102 50 for 6% bonds. For description of securities see CHRONICLE April 22, 1899, p. 790.

**Watertown, Mass.—Loan Negotiated.**—On May 29, 1899, the \$50,000 temporary loan was awarded at 3% discount and a small premium. Loan matures Oct. 1, 1899.

**Wayne County (P. O. Wooster), Ohio.—Bond Offering.**—Proposals will be received until 10 a. m. June 10, 1899, by A. B. Peckenpugh, County Auditor, for \$15,000 4% jail improvement bonds. Securities are in denomination of \$500, dated June 1, 1899. Interest will be payable June 1 and December 1. Principal will mature \$3,000 yearly on June 1 from 1900 to 1904, inclusive. Bonds are issued pursuant to Section 871, Revised Statutes of Ohio. A certified check for 5% of the amount of bonds bids for must accompany proposals.

**Westbrook, Maine.—Bond Sale.**—In correction of current newspaper reports we printed a statement in the CHRONICLE of May 13 denying that this town had recently sold an issue of bonds. Our authority for this statement was the Treasurer, Mr. C. S. Eastman. The "Bond Buyer," a publication which we hold in much esteem, now reports Mr. Eastman as saying that \$2,000 bonds were sold on February 1 last to the Westbrook Trust Co. As the authority is the same in each case, the explanation of these apparently contradictory statements no doubt is that Mr. Eastman in saying that no bonds had recently been sold did not mean to include a sale as far back as last February.

**Bond Offering.**—Proposals will be received until 11 a. m. June 10, 1899, by C. S. Eastman, City Treasurer, for \$15,000

4% bonds. Securities are issued to fund \$13,000 outstanding city notes (due and past due) and to refund \$3,000 bonds maturing June 21, 1899. The bonds will be dated June 20, 1899, and will mature June 20, 1911. Interest will be payable June 20 and December 20 in Boston.

**West Newton, Pa.—Bond Offering.**—Proposals will be received until 7 P. M. June 3, 1899, by John C. Adair, Borough Clerk, for \$16,413 18 4% bonds. Interest will be payable semi-annually. Principal will mature one bond yearly as follows: \$413 18 in 1904 and \$1,000 from 1905 to 1920 inclusive.

**Wharton (Texas) School District.—Bond Award.**—The \$8,000 6% 20-year bonds reported as sold last week were awarded to Denison, Prior & Co., Cleveland, at 104.75.

**White Cloud, Mich.—Bond Offering.**—Proposals will be received until 12 P. M. June 3, 1899, by L. A. Bracy, Village Clerk, for \$1,500 5% electric-light bonds. Securities are in denomination of \$500, dated July 1, 1899. Interest will be payable semi-annually at the Fourth National Bank, Grand Rapids, Mich. Principal will mature \$500 yearly on August 1 from 1900 to 1908, inclusive. The successful bidder will be required to furnish blank bonds.

**White Plains (Village), N. Y.—Bond Offering.**—Proposals will be received until 8 P. M. June 5, 1899, by the Board of Trustees, for \$15,000 4% paving bonds. Securities are issued pursuant with Chapter 747, Laws of 1895. They are in denomination of \$1,000. Interest will be payable semi-annually, and the principal will mature \$5,000 yearly on June 1 from 1926 to 1928, inclusive. A certified check for 10% of the face value of bonds must accompany proposals.

**Bond Sale.**—On May 31, 1899, the \$25,000 4% water bonds were awarded to Allen, Sand & Co., New York, at 115.53. Following are the bids:

Allen, Sand & Co., New York.....115.53; E. C. Jones & Co., New York.....114.07  
E. H. Gay & Co., New York.....114.14; Walter Stanton & Co., New York.....114.00  
N. W. Harris & Co., New York.....115.13; W. J. Hayes & Sons, Cleveland.....113.90  
Bertron & Storra, New York.....114.44; George M. Hahn, New York.....113.29

Bonds mature \$4,000 June 1, 1926, and \$7,000 on June 1 from 1927 to 1929. For further description of bonds see CHRONICLE May 20, 1899, p. 993.

**Wykoff, Minn.—Bond Sale.**—On May 24, 1899, \$7,000 5% water-works bonds were awarded to Kane & Co., Minneapolis, at 103.928. Securities are in denomination of \$500; in-

terest will be payable annually at the office of the County Treasurer. Principal will mature one bond yearly.

**Yonkers, N. Y.—Bond Offering.**—Proposals will be received until 3 P. M. June 7, 1899, by Leslie Sutherland, Mayor, for \$200,000 4% tax-relief bonds. Securities are issued under provisions of Section 2, Title 4, of the Charter of Yonkers. They will be dated June 15, 1899, and will mature May 1, 1901.

## STATE AND CITY DEBT CHANGES.

**Arizona Territory.**—Thos. W. Pemberton, Treasurer.

In 1891 arrangements were perfected through an act of Congress to fund all the Territorial, county and municipal indebtedness of this Territory at five per cent, and as fast as any portion of the debt matures it will be replaced by a five per cent loan.

Insurance.ANNOUNCEMENT.

AGENCY DEPARTMENT

# New York Life Insurance Company,

JOHN A. McCALL, - - - - PRESIDENT.

At the close of business to-day the amount of insurance in force on our books is

\$1,000,168,803.00.

This includes only policies on which premiums have been collected, and does not include any business in process of completion.

The New York Life Insurance Company is the first company in the world to reach

## ONE THOUSAND MILLIONS

Insurance in force, and is, therefore, to-day the largest life insurance company in the world.

This announcement is made for the information of policy-holders and the insuring public, as evidence of the Company's prosperity and success.

GEO. W. PERKINS,

2d Vice-President.

New York, May 23d, 1899.

\* Not included in totals.

*THE FINANCIAL SITUATION.*

Our Stock Exchange market has continued very irregular this week. Railroad earnings have shown substantial increases over the returns of a year ago, and every indication has afforded uninterrupted evidence of industrial expansion in progress in nearly all branches of trade. A mark of growth in the railroad department has been the declaration of an increase of  $\frac{1}{2}$  of 1 per cent in the dividend on the Atchison preferred, making the semi-annual dividend  $1\frac{1}{2}$  per cent. This event is in accord with the anticipations encouraged by the larger earnings of many companies during the buoyancy of late months. Now a more conservative feeling prevails. Instead of purchasers discounting dividends hoped for but unearned, the public not only awaits their declaration, but requires evidence of their permanency. Growing crops are consequently made the prominent feature at present. Opinion having settled upon a yield of winter wheat materially short of a year ago, attention has become mainly fixed upon the spring-wheat outlook. Weather the current week appears to have been in all respects favorable. Hence not only spring wheat but corn even has made satisfactory progress. A further incident affecting Wall Street matters has been the announcement of the usual quarterly dividend of 3 per cent by the American Sugar Refining Company, and the rise of one-eighth of a cent a pound in the price of all grades of refined sugars. This rise was construed as evidence of more amicable relations between the refining companies. But as the rise in the refined only followed a rise in raw sugar, the inference seemed hardly to be sustained.

The National City Bank has this week shipped to Europe \$2,500,000—one million on Tuesday, five hundred thousand on Wednesday, and one million withdrawn for shipment to-day—in addition to the \$1,000,000 which we announced a week ago was shipped last Saturday; Lazard Freres also withdrew \$2,000,000 yesterday for shipment to-day. Altogether, therefore, the amount thus far taken for Europe reaches \$5,500,000. The outflow began, as we are informed, in consequence of a sale last week, on Wednesday, by the City Bank of a block of £500,000 sterling to parties who, it is said, were under the necessity of remitting, and that the sterling was sold at a price which justified the shipment of the gold. Why credits were not used but gold was sent we do not know, but assume that the Bank's correspondents had special reasons why they preferred the metal at this particular time. Such a conclusion seems probable from the peculiar condition of the London and Continental markets with reference to gold and from the firm tone of the Berlin discount market. As the export is no longer confined to the City Bank, but has now become general, this view is thereby further confirmed; indeed it is now announced that the gold the City Bank has sent was for Russia. How much more gold will be shipped in the near future it is difficult to state, but the probabilities are that the shipments will aggregate a considerable amount. Many writers have been worrying themselves and their readers over the usual question which attends every start in an outflow of that metal, that is over the question whether or not the shipments now made were justified by the state of the exchange market, and concluding because they could

not work out a profit that none existed, and that the movement would consequently be small. No harm could ensue from a discussion of the question of profitableness were it not for this relation which that feature is assumed to have with a continuance of the outflow. The claim of such a relation is unauthorized. This is obvious from the fact that in every gold outflow of recent years the initial shipments have been held on similar grounds to be without profit, and yet each movement thus begun has proved large.

There are many ways in which a profit might be secured in the shipment of gold when foreign exchange rates do not justify it but are very near or hovering around the point at which general shipments of gold would become a necessity—ways, too, which might give the metal more value to one banker than to another. For illustration, suppose a foreign loan was to be floated in London, Berlin or Paris and it happened to be a needed condition of success that the London money market be kept easy. In that event the promoters and those affiliated with them might find profit while carrying through such an undertaking in having the European monetary situation re-insured, as it were, by a concurrent movement of gold from America. No device could be more effectual in securing that end than such a movement from New York would prove. We do not claim that these were the reasons for the start in the outflow; it is safe to assume that the gold was in special demand for some special purpose, and that our exchange market made this country the cheapest source to draw it from. Those facts certainly raise questions and suggest inferences that leave the financial problem in a very different shape from that public estimation has heretofore held it to be in.

We have all along assumed that a gold outflow this year was a very improbable event. Our phenomenal trade balance, continuing to be favorable down to this date, seemed to have raised so great a barrier that no possible transfer of our securities could serve to over-ride it. Now, on the contrary, the conclusion seems almost inevitable from the long-continued high level of our exchange market, followed by the movement of gold, that this balance has been substantially settled. If it has, that circumstance reveals a liquidation of our obligations heretofore held in Europe far beyond any previous movement within any corresponding time. As to the immediate cause of this inflow of our obligations, which is the matter of chief interest, there can be no doubt. The extremely high prices of our best securities have acted as the stimulus. These have been so high as to tempt holders everywhere. The fact is, an equally safe  $3\frac{1}{2}$  per cent investment has for a considerable time been about as easily obtainable in Europe as in America. Such conditions have given so strong a homeward tendency to our securities that they have flowed this way as never before and resulted in a large body of them being returned to us. There is also some reason to suppose that the same conditions have led to investments, though in a comparatively small way, of American capital in Europe. It is clear that the conditions have favored such a movement; they have likewise led to larger sales by home investors (many old safe deposit boxes having been emptied) and the proceeds deposited in trust companies awaiting the course of events. In the meantime savings banks and insurance com-

panies are to a large extent becoming the holders of these over-valued securities. The chief interest, then, the gold outflow has to-day is to be found in the assurance it affords of the immense volume of this security movement, so large that it has not only settled our phenomenal foreign trade balance, but has left us in debt to Europe. This situation is a matter for serious consideration. It is not only a matter that has relation to the past but to the future; for the return of securities to us that has been in progress is likely to continue so long as our market conditions permit of their absorption. Hence, if this phenomenal balance has all been used, what can happen except the export of gold when we have no such balance to pay with?

The death of Frank Thomson, the President of the Pennsylvania Railroad, removes another man of note in the railroad world and also one who has had a prominent part in the development and management of this great and wonderful railroad system. Mr. Thomson acted as the executive head of the enterprise for only a little over two years, President Geo. B. Roberts whom he succeeded having died early in 1897; but he was identified in one capacity or another with the system for the whole of his business life. He never knew any other employer than the Pennsylvania Railroad. To it he gave all the strength, the energy and the wisdom of which he was possessed. He had no outside business interests. He was the associate and co-worker of J. Edgar Thomson, Thomas A. Scott and of George B. Roberts. The first two were geniuses of such commanding qualities that while they lived their personality necessarily dominated everything else, and hence the work done by such efficient and faithful workers as Roberts, Frank Thomson and John P. Green did not attract the attention it otherwise would. But the Pennsylvania owes much to each and all of them. Frank Thomson, like George B. Roberts, showed when in due course invested with executive control that he had all the qualities needed to fill the position. It should be remembered that the task of these early workers was a peculiarly difficult one. Not only was the Pennsylvania Railroad in its beginnings, but the whole United States system of roads was in its infancy. There was neither experience nor precedent to guide these pioneers. They had to hew their own way. And the fact that they have created and maintained a system which in all its departments is the admiration of the whole world is the best tribute that could be offered to their skill, their judgment and their devotion. There has been some discussion as to who shall succeed Mr. Thomson. There should be none. One man is clearly marked out for the position. Vice-President John P. Green is not only directly in line of promotion but he is pre-eminently qualified for the office, and moreover he is one of the very few remaining of that early and trusted band who, by their ability, their faithfulness, their breadth of mind and character, and the careful way in which they conserved and promoted the interests entrusted to their care, have left the Pennsylvania Railroad forever indebted to them.

Returns of railroad gross earnings are eminently satisfactory at the present time, reflecting in this the activity of trade. We have compiled this week the figures for the month of May, and they record very

substantial improvement, the gain amounting to, roughly, three million dollars on the roads reporting. An analysis we make of the results in our usual monthly article will be instructive as to the conditions under which this gain was established. May is the period when some reaction from the previous high totals could not have been deemed strange, for in that month of last year—aided by the extraordinary grain movement induced by the Leiter wheat corner, and also by the transportation of troops for the United States Government in the prosecution of the war against Spain—the earnings of United States railroads were extremely large, the increase over the previous year being fully 14 per cent. In the receipts of wheat and corn alone there was at the Western markets a contraction the present year in amount of over 24 million bushels. Yet earnings are running in a great majority of cases in excess of those for last year.

The upward tendency of revenues, while particularly noteworthy (for the reason given) in the case of the grain-carrying roads, is in reality not confined to any one section of the country or any one group of roads. Some of the smaller lines, as pointed out on previous occasions, are being especially favored. The Mobile & Ohio, for instance, has added \$110,000 to its earnings for May last year, being an improvement of over 30 per cent. The New York Ontario & Western has an extra advantage in the recent acquisition of additional coal lands in its interest. It reports for May \$112,822 increase, or over 40 per cent. The accounts regarding the anthracite coal trade are very encouraging just now, and we note that President Fowler, of the Ontario & Western, is quoted as saying that the outlook for the anthracite trade is good and that his road will handle more coal than ever before in its history. It will gain, he states, fully 500,000 tons in tonnage as a result of the \$1,000,000, or thereabouts, invested in the Scranton region. The company, while active in its operations, is not infringing, he asserts, upon the legitimate territory of its competitors.

We have referred above to the declaration of a dividend on Atchison Topeka & Santa Fe preferred stock. The event is an important one, as the company is a large one and has over 114 millions of preferred stock outstanding. The present is the second dividend made by the company. The first was paid last January and was for 1 per cent. Now 1½ per cent is to be paid in July, and the resolution passed by the board of directors of the company in effect announces that there will be another dividend for the same amount next January. Both dividends will come out of the earnings for the fiscal year ending the present month, so that they are based on past results not on probable future earnings. Just at the moment there is a little uncertainty on the latter point, owing to the fact that the crop of winter wheat in Kansas is likely to be much smaller the present year than last year. But we show in our review of the Rock Island report that that is not the only element entering into the calculation—that continued revival of trade might furnish sufficient additional tonnage in merchandise and general freight to offset any loss in the grain tonnage. No exact figures, of course, are yet available as to the Atchison's income for the year ending June 30 1899; the resolution passed, however, de-

clares that the income is sufficient to cover the 2½ per cent to be paid on the preferred shares after "setting apart a reasonable sum as a reserve." The company's current returns of earnings obviously bear out this statement. For 1897-8 the annual report showed a surplus of \$1,836,000 over the income interest. For the ten months of the current fiscal year to April 30, net earnings have been \$1,204,000 better than for the corresponding ten months of 1897-8. The 2½ per cent on the preferred stock calls for \$2,855,000.

The announcement of gold exports to Europe and the belief that the movement of gold will probably continue in the near future until considerably large amounts have been sent, seem to have had no influence whatever upon the market for call money this week, and only a very slight effect upon time contracts, causing a little firmer tone for the latter without any advance in rates. Money on call, representing bankers' balances, has loaned on the Stock Exchange during the week at 2½ per cent and at 2 per cent, averaging about 2½ per cent. On Monday and on Tuesday the range was from 2½ per cent to 2 per cent, with the bulk of the business at 2½ per cent. On Wednesday and Thursday the range was the same as the previous day, while the majority of the transactions were at 2½ per cent. On Friday loans were made at 2½ per cent and at 2 per cent, with the bulk of the business at 2½ per cent. Banks and trust companies generally quote 2½ per cent as the minimum, some few, however, loaning at 2 per cent. Time contracts, as noted above, are slightly firmer in tone. The offerings are liberal and the demand, especially for long dates, is good. Quotations are 3 per cent for sixty days to four months and 3 @ 3½ per cent for five to six months on good mixed Stock Exchange collateral, with a very moderate admixture of the best industrial stocks. Where the proportion of the latter is larger, rates are about ½ of 1 per cent higher. The demand for commercial paper continues urgent from nearly every quarter, city as well as country, while the supply is only slightly increased. Rates are 3@3½ per cent for sixty to ninety day endorsed bills receivable, 3½@3¾ per cent for prime, and 4@5 per cent for good four to six months' single names.

The political disturbances at Paris, growing out of the Royalist attack upon President Loubet on Sunday, and the failure of the conference between the British Commissioners and President Kruger of the Transvaal Republic, have had some influence upon the stock markets at Paris and London this week. It is reported that the negotiation of the Japanese 4 per cent £10,000,000 loan has failed in London. The Bank of England minimum rate of discount remains unchanged at 3 per cent. The cable reports discounts of sixty to ninety-day bank bills in London 2 3-16@2½ per cent. The open market rate at Paris is 2½@2¾ per cent, and at Berlin and Frankfort it is 3½ per cent. According to our special cable from London the Bank of England gained £218,986 bullion during the week, and held £30,359,842 at the close of the week. Our correspondent further advises us that the gain was due to the export of £5,000 to Brazil, to £163,000 net received from the interior of Great Britain and to imports of £61,000, of which £56,000 were bought and £5,000 were from Australia.

The National City Bank this week shipped to Europe \$1,000,000 gold on Tuesday, \$500,000 on Wednesday, and on Thursday announced it would ship \$1,000,000 gold to Europe by the steamer sailing today (Saturday). Lazard Freres announced that they would ship \$2,000,000 by the same steamer, making a total of \$5,500,000 since the first shipment by the National City Bank on Saturday of last week. It was stated that the greater part of the gold forwarded by the National City Bank was sent for the account of the Deutsche Bank of Berlin, which had sold the metal to Russia; and it was authoritatively announced that the shipment by Lazard Freres was to Paris and that it would be received by the Bank of France. What disposition that institution would make of the gold was unknown. These shipments by the National City Bank and by Lazard Freres, and the disclosure of the actual destination of the metal, gave color to the reports that the shipments of gold were likely to continue, unless rates should materially decline, until at least \$25,000,000 would be sent before this special demand would be satisfied.

The foreign exchange market has been quiet this week, and aside from the exports of gold above noted there has been no special feature. The tone was steady until Thursday, when there were some fractional, though not quotable, declines in short sterling, due to offerings of bankers' bills supposed to be drawn against the intended gold exports, but at the same time there was a firm tone for long sterling, which advanced under the influence of a good demand and a small supply of bills. The drawing of long sterling in anticipation of covering with cotton bills later in the season has been comparatively light this week, and it is not expected that it will grow important until towards the end of this month. Receipts of gold at the Custom House this week were \$808,002, of which \$773,562 came from Europe. The "Mariposa" left Sydney, N. S. W., on Wednesday with \$750,000 gold for San Francisco. The "Alameda" arrived at San Francisco May 30 with \$750,000 gold from Sydney, N. S. W. The range for nominal rates for exchange has been from 4 86½ to 4 87 for sixty-day and from 4 88½ to 4 89 for sight during the week. Rates for actual business opened unchanged on Monday, compared with those at the close on Friday of last week, at 4 85½@4 85¾ for long, 4 87¼@4 88 for short and 4 88½@4 88¾ for cables. The tone was dull and steady, and it so continued until Thursday, when it grew irregular, with rates for actual business in long sterling firm at an advance of one-quarter of a cent, to 4 85¾@4 86, while short sterling and cables were easy, though at unchanged quotations. The market was steady on Friday. The following shows daily posted rates for exchange by some leading drawers.

	FRI. June 2	MON. June 5	TUES. June 6	WED. June 7	THUR. June 8	FRI. June 9

\* The division between gold and silver given in our table of coin and bullion in the Bank of Germany and the Bank of Belgium is made from the best estimate we are able to obtain; in neither case is it claimed to be accurate, as these banks make no distinction in their weekly returns, merely reporting the total gold and silver, but we believe the division we make is a close approximation.

NOTE.—We receive the foregoing results weekly by cable, and while not all of the data given at the head of the columns, they are the returns issued to that date—that is the latest reported figures.

### THE SPEAKERSHIP.

The announcement by Mr. Thomas B. Reed, a month or two ago, of his decision to retire from the Speakership of the House of Representatives and from public life, was quite universally accepted as an incident of the highest political importance. It is within the bounds to say that Mr. Reed's influence and personality has been stamped on pretty nearly all the legislation of the past four years; not less, moreover, in what he has modified or prevented outright than in what has been actually carried into law. His conception of the authority of the Speaker, consistently and very firmly applied—though possibly modified in some measure from the extreme positions taken by him in 1890—has undoubtedly marked an important chapter in the development of American legislative institutions.

In proportion as Mr. Reed's retirement was an event of real public consequence, the choice of his successor was a matter of special interest. This choice has now virtually been made through the action of New York State's Republican Congressmen in withdrawing their own candidate and indorsing the candidacy of Mr. David B. Henderson of Iowa. The canvass of the party's legislative majority is decisive; indeed, one of the interesting features of this incident lies in the fact that the selection of the

Speaker of the American House of Representatives is made in almost exactly the same way as that of the English Premier. Each of these officers represents directly the majority of his party's legislators; the Speaker, therefore, cannot be alienated from the Congressional majority as the President may be, and often is. It is largely, we presume, to this fact that the country owes the great and growing influence of the Speakership in legislation. Such influence is not by any means an essential attribute of the office; the Speaker of the House of Commons, for instance, though an officer of great dignity, possessing hardly any larger control over actual legislation than is enjoyed by the American Vice-President; yet, like a good many other elements in our political system, no powers whatever are conferred on the Speaker by the Federal Constitution. Originally, indeed, the Speaker did not even possess the power of appointing committees. The continuous increase in his power and authority, especially since the need of a strong disciplinary hand became evident to control the factions within a party, is an instinctive recognition of a need which was not specifically filled by any provision of the Constitution.

This week's virtual selection of a new Speaker for the House of Representatives hardly attracts the public notice which it deserves. The vote of a caucus of representatives at the Fifth Avenue Hotel, representing only the delegation of one political party from a single State, is not at all spectacular in character. Though it determines the leadership, the committees, and hence largely the character of legislation, in the Fifty-sixth Congress and possibly in the Congress which is to follow it, the discussion of Presidential aspirations and prospects takes no note of it. Yet it is quite conceivable that this year's election of a new incumbent to the Speakership might have results almost as important in their way as an actual change of administration. The early part of Mr. Hayes's administration showed to what extent the Presidential power and patronage may be crippled by a politically hostile House of Representatives. Still more strikingly, the second administration of Mr. Cleveland illustrated what may happen, even with House and Speaker of the President's own party, if the Speaker and the Administration differ in their views of policy.

The truth is, it is sometimes hard to say which public officer has the greater power over legislation at a critical juncture—the President or the Speaker. The President executes the laws, and within certain limits prescribes the manner of their execution. His power is, therefore, very great in giving a fair opportunity to good legislation or in averting the worst effects of mischievous laws. But over the enactment of such laws he has no power beyond what arises from his use of official patronage or from his appeal to Congress in his Executive messages.

The Speaker's power over legislation, on the contrary, is direct and very great. It has been said that government in the United States, so far as concerns the legislative branch, is government by committees. In large measure this is true, and these committees are in their origin altogether the creatures of the Speaker. It is he who names without check or responsibility, except to the people outside of Congress, not only the members of a committee but the

committee's chairman. Let us suppose, for instance, a President with a leaning towards depreciated currency, but at the same time a Speaker whose views are sound and intelligent. Clearly, it will be within the Speaker's power to name a Coinage Committee, a Banking and Currency Committee, or a Ways and Means Committee, which will obstruct and bury whatever dangerous measure comes before it, even with Executive approval. Nor does this power of the Speaker end with questions of general policy. He is doubtless, as a politician, apt to promise away some conspicuous committee positions in return for important services to himself as a candidate. But an obligation remains on the other side, and the Speaker's influence continues, even after the House committees are enrolled. The public will not have forgotten to what extent Mr. Reed's influence was felt a few months ago in the Nicaragua matter, even when the pending bill was claimed to have the approval of the Executive. It was a committee chairman who destroyed whatever chance of success the crude and premature bill may originally have enjoyed.

Possessing such power, it is in the highest degree essential that the Speaker should be a man of sound and conservative views, great force of character, quick judgment and strict integrity. On previous occasions we have had speakers of uncertain opinions, under whose management no one knew what to expect in legislation; of wavering attitude, which gave the chance for resolute Congressmen to force legislation on to the statute-book; of a tendency to political intrigue, which usually led to a session full of scandals. It has been the good fortune of Congress to enjoy for long periods the service of men like Mr. Reed and Mr. Carlisle; but Congress has had enough of weaker or less trustworthy Speakers, in the last two or three generations, to show the unfortunate possibilities of an unwise selection.

Judged by his record as a Congressman, Gen. Henderson is an excellent selection. His sixteen years of service in the House have gained him both the experience and the authority which are requisite. Curiously enough, he will have reached with the Speakership the highest office open to him. Being of foreign birth, he is not eligible to the Presidency, a fact which under some circumstances might be decidedly in favor of official independence. In instinct he is conservative. On the money question he is pledged to sound policy, and although coming from the formerly doubtful State of Iowa, his own voice and vote have hitherto been on the side of proper legislation. During the more recent debates on the policy of colonial expansion and increase in the military armament, he was an advocate of cautious progress and conservative dealing with the new problems. Gen. Henderson's declaration, since he entered the lists for the Speakership, is of the same character. He stated that "we are in a period of transition" during which "we should not attempt to forestall the future action which the light of developments may show to be advantageous." We do not see how a prudent statesman could at the moment commit himself any further; and that this declaration of purpose is not the speech of a mere opportunist, Mr. Henderson's previous record proves. There will be far greater need of firmness to restrain the legislation of the next Congress in these directions than of urgency to encourage it.

### THE ROCK ISLAND REPORT.

The report of the Chicago Rock Island & Pacific Railway Company for the fiscal year ending March 31 1899 is an interesting and instructive document, indicative of progress in a great many different directions. In periods of prosperity such as our roads have experienced the last two years, when traffic and revenues alike are expanding, the investor is very apt to neglect close study of the details of a report; the financial results being so satisfactory, he does not give himself much concern as to anything else. But it is at just such times that the statements and accounts furnish the best test of the efficiency and character of a management. Is the property being administered to the greatest advantage from an operating standpoint—that is, is the transportation work being done at the lowest unit of cost to the road; is provision being made in the present period of plenty against the time when there will be a smaller supply of earnings available for betterments and improvements; are the financial methods conservative and sound? These are a few of the questions that come to mind, besides which it is important to know what are the elements of the existing prosperity; does it simply rest on a large crop tonnage, or does it have a broader basis with general trade activity to sustain it.

On such points the extensive statistics in this report taken in conjunction with those for previous years throw a great deal of light. The traffic statistics and the traffic results are particularly instructive as indicating the trend of things. The company's gross earnings further increased \$1,119,331 in the late fiscal year on top of an increase of \$2,401,931 the previous fiscal year, the total of the gross having risen first from \$17,146,653 to \$19,548,584, and now to \$20,667,915. No doubt it will be a surprise to most persons to hear that this further increase has followed not at all from any addition to the agricultural tonnage, speaking of this as a whole, but has been derived entirely from other sources. So much stress is always laid upon the part played by good or bad crops in adding to or diminishing the tonnage in this class of freight that it is of decided consequence to know that important though that factor is in the situation, growth may occur in traffic and revenues irrespective of any rise in the grain and agricultural tonnage.

In the territory tributary to the Rock Island the 1898 crops were on the whole not quite equal to those for 1897. Kansas, in which about one-third the mileage of the system lies, had, it is true, a "bumper" wheat crop, the State's yield of that cereal in 1898 having been 64,939,412 bushels, against 47,998,152 bushels in 1897 and 30,794,452 bushels in 1896; as a result, too, the Rock Island got an increased tonnage in that cereal, as we shall presently see. On the other hand the corn crop in the same State came near being a failure, it amounting in 1898 to only 132 million bushels, against 162 million in 1897 and 247 million and 204 million respectively in 1896 and 1895. The yield of oats likewise showed some shrinkage.

But while the agricultural outturn was not so good as in the year preceding, trade revival made further decided progress all over the United States. As a consequence the falling off in the agricultural tonnage became a matter of comparatively little consequence, for the revival led to renewed expansion in the volume of merchandise and general freight. The

Rock Island in the late year moved altogether 8,193,409 tons of freight, against 7,755,715 tons in the previous year. The increase is not large, only 437,694 tons, or about 5½ per cent, after an addition of 1,263,547 tons, or 19.46 per cent, in the previous year. But the whole of the increase was made in the way outlined, that is, resulted from the activity and prosperity of general trade. The agricultural tonnage actually fell off somewhat; of corn the road moved only 785,631 tons (28,058,265 bushels) against 944,694 tons (33,739,070 bushels); of oats, 306,107 tons against 363,342 tons, and of cattle, 364,669 tons against 398,394 tons. The wheat tonnage, owing to the exceptional wheat crop raised in Kansas in 1898, shows a heavy increase, the amount being 484,265 tons for 1899 against 360,679 tons for 1898, and the traffic movement in hogs was also somewhat heavier. But these gains did not suffice to offset the losses in the other three items, and for the whole five items together the total was only 2,172,526 tons against 2,274,016 tons. Take now the items of freight that are mainly controlled by the course and condition of general trade; of coal and coke the road transported 1,925,319 tons against but 1,682,270 tons; of merchandise 683,482 tons against 641,539 tons; of lumber, lath and shingles 557,926 tons against 505,943; of stone 209,878 tons against 186,486; of brick 178,754 tons against 166,179 tons; of iron 346,882 tons against 287,689. Adding "sand and gravel" the aggregate for these seven enumerated items is 4,138,377 tons, or 427,577 tons better than for the previous year. In the following we show the changes in the two classes of traffic for the last six years. The grain and live stock items we bring together under the designation "Group I," while the other items form a separate cluster termed "Group II."

TONNAGE OF LEADING ITEMS OF FREIGHT ON ROCK ISLAND.

	1899-9.	1897-8.	1896-7.	1895-6.	1894-5.	1893-4.

Lumber, lath, etc.....	557,926	505,943	373,779	438,693	440,729	541,010
Stone.....	209,878	186,486	196,923	233,266	248,340	221,294
Brick.....	178,754	166,179	151,850	180,109	164,687	182,006
Iron.....	346,882	287,689	225,305	257,964	229,825	189,999
Sand and gravel.....	226,136	240,694	229,772	206,021	148,454	140,979
	4,138,377	3,710,900	3,116,225	3,383,071	3,322,429	3,643,144

The foregoing affords instructive comparisons. Group I, comprising the agricultural tonnage, after dropping in 1894-5 from 1,741,618 tons to 1,179,186 tons, has since then been steadily expanding, meeting its first set-back in the late year. From 1,179,186 tons it rose to 1,307,514 tons in 1895-6, to 1,708,783 tons in 1896-7 and to 2,274,016 tons in 1897-8; 1898-9 finds it down slightly to 2,172,526 tons, but even this is almost a million tons above the aggregate of the same items for 1894-5. Group II, comprises the classes of freight that reflect the state of general trade, and which rise or fall according as trade is active or the reverse. The group has followed an independent and a totally different course from the other. Its aggregate kept declining even while the agricultural tonnage was rising, trade remaining dull and stagnant despite the large crops. From 3,643,144 tons the amount dropped to 3,322,429 in 1894-5 and 3,333,071 in 1895-6, and to 3,116,225 tons in 1896-7. In the last two years, however, over a million tons has been added, bringing the total up to 4,138,377 tons. In 1897-8 the in-

crease was coincident with a further expansion in the agricultural tonnage, in 1898-9 it came at a time, as we have seen, when the agricultural tonnage showed some shrinkage.

The inference is hardly permissible that the tonnage in Group II. has yet reached its maximum, supposing the present business revival to be maintained. The coal and coke tonnage, we believe, was for 1898-9 the largest it has ever been, but most of the other items in that group have in some of the earlier years been heavier. Merchandise tonnage now is 683,482 tons, in 1892-3 it was 730,510; lumber, lath and shingles is 557,926 tons, in 1892-3 it was 646,521 tons; stone is 209,878 tons, in 1892-3 it was 322,777 tons; brick is 178,754 tons, in 1892-3 it was 308,450 tons. Should the agricultural tonnage in the new fiscal year further decline as the result of the decided shrinkage in the Kansas wheat crop for 1899, which seems now in prospect, it appears not unlikely that the experience of the late year will be repeated, and the loss here be offset by an increase in the other classes of freight.

But trade revival acts in still another way in increasing traffic and revenues. It adds to the business of the passenger department. In fact, as far as the late year's gain in earnings is concerned, a much larger addition was secured in that way than from the freight department. The freight receipts increased \$515,661, but the passenger receipts increased \$736,764, or over 17 per cent. Passenger business is much slower in responding to industrial revival than the freight business, but when the revival has made sufficient headway and becomes widespread and general, decided accretions from that source can be confidently counted on. The gain of \$736,764 in the late year is the first substantial improvement recorded by the Rock Island in its passenger earnings, the increase in the previous year having been only \$244,690. The fact that the passenger revenues are now so decidedly expanding is the best evidence of the extent of the activity and revival of trade, and its all-pervading character. Here, too, there is a probability of further improvement under the continuance of the revival. Notwithstanding the late year's increase the passenger revenues of the Rock Island were but \$5,053,581; in 1893-4 the total was \$6,538,568; this included the travel to the Chicago Exposition, but even in 1892-3 the amount was \$5,843,146 and in 1891-2 \$5,216,761.

Passing now to a consideration of the operating results, we find that there has been an augmentation in expenses almost as large as the addition to the gross receipts, thus leaving the net earnings practically unchanged from the previous year. But this simply reflects the continuance, on a greatly enlarged scale, of the company's liberal policy of making improvements and betterments to the property and paying for the same out of earnings. The increase in gross earnings we have seen was \$1,119,331; the addition to expenses was \$1,080,145. Of course, as the company did a greatly enlarged amount of work both in the passenger and the freight departments, there was a considerable increase in expenses on that account. But at least one-half of the one million dollar augmentation in expenses, we should say, represented outlays for betterments in excess of the amount of similar outlays in the preceding year. In the item of steel rails alone there was an increase close on to \$160,000, the com-

pany having spent \$317,043 for that purpose in 1898-9, against \$158,660 in 1897-8, the gross tons used being 17,641 tons, against 8,827 tons; for new ties \$463,724 was spent, against \$426,921; the company also rebuilt 799 freight cars, the corresponding item for 1897-8 being 511.

In reviewing the report for the previous year, we presented a detailed statement to show that the operation of the road was being conducted with increasing economy, as far as the cost to it of the transportation work was concerned, and that the increase in the expense accounts was owing chiefly to the enlarged outlays for repairs and betterments. We found that these expenditures for repairs had amounted to \$4,679,595 in 1897-8, against \$4,134,405 in 1896-7, \$3,962,731 in 1895-6 and \$3,766,430 in 1894-5. This time the expenses are stated in a somewhat different way, so that we cannot make exact comparisons, but altogether the outlays for repairs in 1898-9 would appear to have been about 5½ million dollars, as against the \$4,679,595 for 1897-8.

The best evidence of the efficiency and economy with which the road is being operated is furnished when the train mileage statistics are studied. The company moved 1,452 million tons of freight one mile in 1899 against only 1,421 million tons in 1898; yet this additional work was done without any increase in freight train mileage, the mileage for 1899 being 8,365,560 against 8,387,650 miles. In other words, the management further added to the road's train-load, making the average load 174 tons against only 118 tons five years before, in 1894. The advantages of such methods are too familiar to our readers to need dilating upon here. Hence we merely present the following interesting record showing the progress made in this direction in recent years:

Year ending March 31—	Freight train mileage.	Tons one mile.	Av. train load.
1899.....	8,365,560	1,452,286,497	174
1898.....	8,387,650	1,421,433,866	169
1897.....	7,437,841	1,175,517,765	158
1896.....	7,510,857	1,078,846,776	143
1895.....	8,866,103	1,071,763,263	121
1894.....	10,898,552	1,288,576,685	118

As far as the finances and financial results are concerned, they reveal eminent conservatism. The company is now paying dividends of 5 per cent per annum (1¼ per cent quarterly), and the actual payments for the late year were 4½ per cent. But only 4 per cent was charged against the year's earnings. Deducting the call for this 4 per cent and also all the charges for the year, there remained a surplus balance on the operations of the twelve months in the sum of \$1,812,728. This last sum was carried to the credit of profit and loss account. At the same time profit and loss account was debited with the entire cost of the company's refunding operations, and also the premium paid on the bonds funded, amounting to \$2,743,316.

The remainder of the dividends (we mean in excess of one per cent quarterly) has been charged to Addition and Improvement Account, and this fund also stands pledged to pay one-quarter of one per cent quarterly for each and every quarter up to 1903. In other words, as we understand it, the shareholders are assured of this one-quarter per cent quarterly up to that time, whatever the earnings of the company from operations may be. The 10 per cent stock dividend which the company paid last July also came from this Addition and Improvement Account. The report explains the operation by saying that from 1880 to 1885 there was spent for construction out of the net

earnings of the company \$8,213,000. This amount was credited to the account mentioned and bonds issued and deposited with the Treasurer to the extent of \$7,750,000, the company pledging itself thereby to pay said sum to the stockholders either in the company's stock or in cash. By the resolutions adopted in June 1898 the payment of \$7,000,000 of the bonds mentioned has been provided for, the means of payment being the 10 per cent stock dividend and the further agreement to pay to the trustee of the bonds on July 1 1898 and on the first days of October, January, April and July thereafter, up to and including January 1 1903, \$125,000 each quarter, to be distributed to stockholders as a special dividend on the regular dividend day next following such payment.

#### COTTON STAND AND ACREAGE IN 1899.

Investigations respecting this spring's planting of cotton do not disclose the radical tendency to decrease acreage which the early information indicated. In almost all States some variation is apparent, and with one exception the changes made have taken land away from cotton, but as a rule the reductions have been very moderate. The low prices obtained for the 1898 yield were relied upon to materially curtail planting by those who predicted what the acreage would be before the seed was in the ground. But, as we pointed out last June, the lower price is a very uncertain basis from which to draw conclusions. It is of course true that there is a certain proportion of planters in the South who, because of their loose farming methods, must be governed by price in sowing their land. There are others, who while talking decrease, plant their full acreage, taking the chance that, through reductions elsewhere or unfavorable seasons, the yield will be appreciably shortened and they will reap the benefit.

But the real explanation of the small decrease in acreage this season is quite evident. From information we have at hand the truth appears to be that there is profit in five-cent cotton. Of late years, even on the poorer lands, through more general and more intelligent fertilization and cultivation, the productiveness of the soil and the yield per acre has been considerably added to; this has entailed no increased expense aside from cost of additional fertilizers used and more labor in the picking season. One of our most valued correspondents in South Carolina remarks that "cotton planting is a better business now at five cents than it was some years ago at ten cents." This result he ascribes to the development and cheapening of fertilizers. He further remarks that "a neighbor recently sold his last year's crop for \$12,000, and it was all clear profit, his cotton seed and other crops paying his expenses and keep." This, most likely, is a very exceptional case, but it indicates how the thrifty farmer succeeds where the less careful man fails.

There were other facts we dwelt upon in our last year's report which during late years have been increasing as influences in reducing the average cost of cultivating cotton, making it profitable at prices which would have proved ruinous a short time since. We need mention only two or three of them now, very briefly, too, as we discussed them at length so recently. The chief circumstance we brought out a year ago was that much of the later annual additions to acreage had been in the richer lands where, entirely without

fertilization, a large product per acre is secured. Those lands are consequently now a much more important part of the whole area in cotton than they were a few years ago. In other words, they have come to be the factor in production that rules price. This has proved so because the very character of the development acted (1) to enlarge the yield of the staple on the acreage planted, (2) to consequently cheapen the average cost of production, and (3) to thereby compel the planter cultivating the poorer lands either to go out of the business or to devise means for making the cost of his crop less. Necessity always leads to newer methods. We have noted above, in part, how the Atlantic States and the owners of poorer lands in other States have been led to meet this necessity by fertilization and by economies in production. One well-known direction in which these economies have unfolded we have often referred to; we mean the diversification of crops so as to make cotton more and more a surplus crop. In these ways and in other ways it has come to pass, as we have related above of our correspondent in South Carolina, that a large profit can be made now out of cotton at five cents a pound, not only in the Mississippi Valley but even in the less productive lands.

It is gratifying to note further progress among planters in keeping their cotton acreage within limits that enable them to make and handle the product without borrowing money. A related fact is that the number of planters is increasing and the average size of holdings is decreasing. The old custom—almost as old as cotton raising—of mortgaging crops before the seed was in the ground has largely fallen into disuse. The class of money lenders who furnished the supplies and funds in such cases found as the price of cotton declined that the risk was too great and the chance of profit too small for them to continue to make such ventures. On the other hand it has grown to be a fact, obvious even to the planter himself, that cotton raising cannot progress on money borrowed at the high rate of interest the old advances called for. Out of the surroundings have sprung the more conservative conditions we have referred to. We do not mean that there are not a good many still who burden themselves by raising money in whatever way they can to enlarge their cotton product. As a rule, those who do so to an imprudent extent, or injudiciously, keep themselves poor and can find no profit in five-cent cotton. The great truth the entire industrial world has got to grasp and accommodate its methods to, is that steam and electricity have cut down profits to a very narrow margin. No department is outside of this influence and decline; and yet no class is better situated with reference to it than Southern planters. In most cases they can raise out of their land everything they need except groceries, and make cotton a surplus crop. This cannot be done, though, without care and strict economy in life and methods, the limitations under which modern conditions have placed every industry.

A question is worth recalling which has a bearing upon the current year's productiveness of those portions of these richer lands which are river bottoms. We have said they needed no fertilization. This is a condition that is due largely to the fact that inundations are the fertilizer. The overflow of the Nile is the source of the crops Egypt produces. Just as certainly, though not so largely, the overflow of the Mississippi and its tributaries is a factor bearing upon the

productiveness of the valleys of those rivers and of the districts surrounding their adjacent bayous. If the reader wishes to know one important source of the large cotton crops this country has produced the last two years, let him turn to our acreage report, published June 12 1897, page 1119, and study the map and facts. We then gave of an inundation of those rivers, much more extensive than any ever before recorded. Can close observers of the situation believe that such an inundation as that has been without influence on the crops since then? There have been substantially no overflows for two years now. Is that fact to have no bearing upon the productiveness of those lands the current season? We make no attempt to-day to measure these influences. They are features in the season's agricultural surroundings to be dealt with, and should be recalled.

The foregoing suggestions are of interest because of their bearing on this year's changes in acreage and on the outcome of this year's planting.

#### CONCLUSIONS.

From the facts contained in the detailed reports received from all sections of the South, a summary of which is given by States on subsequent pages, we sum up in brief the conclusions they lead us to, as to acreage, &c., as follows:

FIRST.—As already indicated, the tendency to reduce cotton acreage this season is apparent, but the aggregate deduction from the area is not heavy. The Indian Territory stands alone in recording a large increase, but that result is due to exceptional causes. It is ascribed to the unsettled condition of Indian affairs, on account of which farmers refrained from going to the trouble of diversifying their crops, fearing they cannot hold possession of their lands. The greatest decrease seems to have been in Missouri and Oklahoma follows. In the Atlantic States the falling off ranges from 3 per cent in Virginia to 6 per cent in South Carolina, and along the Gulf the declines are 1 per cent in Mississippi and 2 per cent in Alabama. Texas records a loss of 2 per cent, Arkansas 8 per cent and Tennessee  $5\frac{1}{2}$  per cent. Florida and Louisiana, according to our information, have made no appreciable departure from previous areas. The changes this year, as we have made them up for each State, are as follows:

STATES	Acreage, 1898.	Estimated for 1899		Acreage, 1899.
		Increase.	Decrease.	
Virginia.....	45,000	.....	3 per cent.	43,650
North Carolina.....	908,000	.....	5 per cent.	862,000
South Carolina.....	2,038,000	.....	6 per cent.	1,972,120
Georgia.....	3,645,000	.....	5 per cent.	3,462,750
Florida.....	285,000	.....	.....	285,000
Alabama.....	3,019,000	.....	2 per cent.	2,958,620
Mississippi.....	2,946,000	.....	1 per cent.	2,916,540
Louisiana.....	1,203,000	.....	.....	1,203,000
Texas.....	6,314,000	.....	2 per cent.	6,187,720
Arkansas.....	1,551,000	.....	8 per cent.	1,426,920
Tennessee.....	647,000	.....	$5\frac{1}{2}$ per cent.	611,415
Indian Territory.....	275,000	6 per cent.	.....	291,500
Oklahoma.....	174,000	.....	11 per cent.	154,860
Missouri.....	65,000	.....	13 per cent.	56,550
Total.....	23,175,000	.....	3.20 p. ct.	22,433,245

This shows a net decrease compared with 1898 of 3.20 per cent, making the total 22,433,245 acres in 1899, against 23,175,000 acres in 1898. We add the totals of acreage for previous years for comparison, giving also the total crop for each year, with the percentage of increase or decrease in acreage or production, compared with the preceding year, and the product per acre:

COTTON ACREAGE, &amp;c., FOR THE YEARS NAMED—(000s omitted).

	1898-99	1897-98	1896-97	1895-96	1894-95	1893-94
Total acreage.....	23,175	23,029	21,719	19,187	20,687	20,173
Total production....		11,181	8,714	7,162	9,892	7,314
Increase in acreage..	0.63%	6.03%	13.31%	7.35%	4.17%	1.98%
Increase in production..		28.31%	21.67%	27.62%	31.43%	5.48%
Product per acre, lbs.	239	237	194	180	234	169

\* Decrease.

Within the past few months we have made extensive investigations into the subject of acreage, which seem to disclose that the cotton area of Texas, Louisiana, Oklahoma and Indian Territory are all probably somewhat larger than our current figures have allowed for them. We have consequently substituted our new results for those States and Territories in the foregoing compilation. For the remaining States, as we have obtained no facts which discredit the acreage as heretofore published by us, the figures are left unchanged. Altogether, as a result of our investigations, a net addition of 1,218,000 acres has been made to last year's area. The divergence from a correct total began with and appears to have been almost wholly caused through our acreage statement for 1895. Oklahoma and the Indian Territory about that date assumed greater importance as producers of the staple, and the information obtainable was meagre. But, in addition to that there was in 1895 a feature which made the changes in area from 1894 peculiarly liable to error. It was a season when every cotton State claimed an unusually large decrease in the area planted; hence, observers everywhere were in danger of over-estimating the loss. Texas reports, under the influence of this strong trend in opinion, very likely gave too high a percentage of decrease in the older developed districts of the State, or did not make sufficient allowance for new land brought under cultivation in the later developed sections, or perhaps erred in both particulars. At all events it now seems that the Texas acreage would have been better represented that season by showing no change in its total—that is, by repeating for 1895 the acreage for 1894, which was 4,974,000 acres. Accepting that view as correct and applying to the total named the percentages as we gave them in the two succeeding years, and increasing slightly the 1898 percentage—13 per cent increase in 1896 and 8 per cent increase in 1897, with 4 per cent increase in 1898—the total for Texas would be as follows for each of those years:

Texas acreage in 1895..... 4,974,000 acres  
13 per cent increase in 1896..... 647,000 "

Total Texas acreage in 1896..... 5,621,000 "  
8 per cent increase in 1897..... 450,000 "

Total Texas acreage in 1897..... 6,071,000 "  
4 per cent increase in 1898..... 243,000 "

Total Texas acreage in 1898..... 6,314,000 "

The foregoing, as will be seen, gives Texas a total acreage in the spring of 1898 of 6,314,000 acres instead of 5,401,000 acres, as it appeared in our statement a year ago. In other words, of the total additions (1,218,000 acres, which, as stated above, our investigations have required us to make to last year's acreage figures) 913,000 acres are allotted to Texas, leaving 305,000 acres which have been added—60,000 acres to Oklahoma, 107,000 acres to the Indian Territory and 138,000 acres to Louisiana.

SECOND.—With regard to the maturity, cultivation and condition of the plant, the conclusions we reach are as follows:

(1.) As to *maturity* the crop is without doubt a backward one. The spring opened late, delaying planting, and over a pretty wide area deficiency of moisture interfered with rapid germination of the later-planted seed. At the same time temperature has all along been more satisfactory than has been the case in most recent years, so that when needed rains came, very satisfactory growth resulted. In Southern Texas the crop is much more advanced than elsewhere, seed having been planted earlier and the weather conditions as a rule favoring satisfactory development. In fact it may be said that first plantings in that State are on the whole more forward than was the case a year ago.

(2.) *Cultivation* has been well attended to and the fields as a rule are in good shape. The only exceptions are where recent rains have allowed grass a chance to grow. As already noted, there has been a considerable decrease in the use of artificial fertilizers. In the Atlantic States and in Alabama, where the commercial sorts have been largely availed of in late years, the takings have this year fallen off materially.

(3.) *Condition* of the plant generally is at this writing somewhat later but otherwise about up to last year. In the Atlantic States and Texas the present promise is best, but nowhere is the outlook discouraging. There has at no time in recent years been so much complaint of defective seed as in 1899. In the Gulf States, as well as in Arkansas and Tennessee, most of the replanting required is ascribed to that cause. Some of these replantings are only now attaining visible growth. Towards the close of May damage by the Mexican boll weevil was reported from portions of Texas, and cutworms were claimed to be doing harm in parts of Arkansas and Tennessee. Thus far, however, no considerable injury has resulted from either.

Our summaries by States are as follows:

VIRGINIA.—Farmers were hindered in preparing land for the crop not only by low temperature in the early spring, but because of the excess of moisture, which interfered with plowing. The planting season consequently was later than in an average year. After the seed had been put in the ground, meteorological conditions turned more favorable and germination was rapid. We hear of only a limited amount of replanting. *Stands* secured were, as a rule, good, and the plant is now doing nicely. *Acreage*, never large in this State, has been slightly reduced this year, the returns at hand pointing to a net loss in area of about 3 per cent. *Fertilizers* of the commercial sorts have been taken less freely than a year ago, but about the normal amount of home-made manures has been used.

NORTH CAROLINA.—A cold spring delayed farm work, so that planting operations were not as a rule actively begun until near the close of April, or from ten days to three weeks later than last season. After that date better progress was made, and the work was finally completed by May 27. The seed came up well—some say better than usual—and little or no replanting had to be done. The conditions since growth began have in general been favorable, although in some sections dry weather for a time checked germination. *Stands* are reported good to very good, with the fields clean and well cultivated. Our latest information with reference to weather conditions is that they are favorable to the best development of the plant, and the present outlook is better than at this time in 1898. *Acreage*.—In a few districts we note a tendency to add to the land under cotton; in others no change has been made, while on the other hand quite a number of our correspondents report moderate reductions. For the whole State our analysis of the returns seems to indicate a decrease of about 5 per cent. *Fertilizers* of all sorts have been less widely used than heretofore.

SOUTH CAROLINA.—The same circumstance which delayed planting in North Carolina operated in this State. Work was not commenced generally until the middle of

April, and although after that carried on with no particular set-back, the finish was later than in 1898. In Sea Island sections the season was almost a month behind last season. As to germination, some of our correspondents state that the seed came up "poorly," and others, "indifferently;" but the majority report satisfactory progress, although it is evident that earlier plantings did best, dry weather in May causing late-planted seed to lie dormant for a time. Some replanting has been necessary, but it is to be ascribed mainly to defective seed, and has been much less considerable than a year ago. Since growth began the weather has in most cases been favorable, although during part of May lack of moisture was complained of; temperature, however, as a rule, was all that could be desired, stimulating development. Latterly beneficial rains have fallen in many localities and the prospect is very good. *Stands* range from fair to fine, averaging good, but in some sections, owing to droughty conditions, they are backward. Fields are free of grass and weeds. *Acreage*—A disposition to reduce acreage is manifest in our returns, but in most localities the decrease has been moderate. In fact, for the entire State we do not feel warranted in placing the loss at more than 6 per cent. *Fertilizers*—While in a few districts commercial manures have been used to a greater extent than ever before, the takings for the State have decreased fully 10 per cent. On the other hand, home-made manures have received a little more attention.

**GEORGIA.**—The planting season in Georgia averaged two weeks later than a year ago. In the Southern sections of the State, where seed was put into the ground shortly after the middle of March, the start is reported to have been poor, cold and wet weather having interfered with satisfactory development. Elsewhere generally the meteorological conditions were favorable and the seed germinated well. In fact, the weather since growth began has been in most sections about all that could be desired. Even much of the area from which complaints of dry weather came has recently had beneficial rains. Defective seed has been the cause of about all the replanting necessary this season. *Stands* are good, but in districts where the seed was planted late they have only recently been secured, absence of moisture having retarded growth. In a number of instances, however, the stand is said to be as good as ever obtained, and in a few cases the best. Cultivation has been thoroughly attended to and the fields are in good condition. *Acreage*—From our returns it is evident that the prevailing inclination has been to decrease the area under cotton, but from the best information we can get there is a tendency in some quarters to overstate the decline. That acreage has been reduced there is no reason to doubt, but the loss, we think, has not been over 5 per cent. The takings of commercial *Fertilizers* show a material falling off, running as high as 25 and 30 per cent in a number of districts. Home made composts have received about the usual amount of attention.

**FLORIDA.**—Planting began a few days later than in an average year, but, meeting with no special hindrance, was completed at about the same time as last season. Seed put in the ground early germinated very well as a rule, but the development of the later plantings was retarded by absence of moisture. This is equally true of both Sea Island and upland districts. Temperature has been quite satisfactory all along, but during the latter part of April and until after the close of May rainfall was deficient. Under these circumstances the plant, although in healthy condition, was small at latest dates. Insects, as well as dry weather, have contributed to render necessary more than the usual amount of replanting, though less than in 1898. *Stands* ranged from only fair to good at the close of May, the best results obtained up to that time having been from early plantings. Where rain has fallen lately the plant is now growing finely, but over much of the State moisture is needed. The fields have been well attended to. *Acreage*—In sections where Sea Island cotton is raised the tendency has been almost uniformly in the direction of increase; hence, land devoted to that variety has been increased nearly 20 per cent. Upland territory, on the other hand, has been diminished, leaving the cotton area of the State about as it was last year. *Fertilizers* receive no particular attention in Florida.

**ALABAMA.**—The planting season in Alabama, as in the States heretofore reviewed, averaged later than last year.

In fact while in an ordinary year the work of putting in seed is under way about the middle of March, this year nothing was done until after April 1st. Furthermore, climatic conditions (dry weather rendering soil hard to work) caused delay, so that the finish was not until near June 1, or from two to three weeks behind a year ago. Where there was sufficient moisture seed came up well; otherwise germination has been slow and irregular. In other words, early plantings have done very nicely, but late plantings are in many sections only just now coming up. Temperature has, in the main, been quite satisfactory ever since growth began, but lack of rain from the closing days of April to near the end of May in many districts materially retarded development. For the replanting which has been done various causes are assigned, chief among them being dry weather, defective seed and insects. Still it has not been necessary to replant so largely as last year. The stand secured averages fairly good, varying according to locality or time of planting. From early-sown seed the stands are almost invariably good, but late-planted seed, comprising from 10 to 15 per cent of the crop, is, as stated above, only just now coming up. The dry weather has enabled farmers to keep well up with cultivation. Needed rains since May 24 have materially improved the prospect, but more moisture would be beneficial. *Acreage*—Changes in amount of land put under cotton this year have occurred in various sections, but they so nearly counterbalance each other that the net result for the whole area is a loss of, say, 2 per cent. *Fertilizers*—We have to note a considerable decrease in the use of fertilizers this season. Takings of commercial sorts exhibit a decrease of about 20 per cent.

**MISSISSIPPI.**—As in 1898, there has been freedom from any overflow this year, the planting season being affected only, as elsewhere, by a cold and backward spring. The delay occasioned was not as great as along the Atlantic, work having been completed generally not more than a week later than a year ago. Conditions which had no material effect on the planting did, however, interfere with satisfactory germination in a number of districts. We refer to the deficiency of moisture in April and until near the close of May. The earliest plantings got the best start, but later, since the rains came, development has been in general very encouraging. So far as temperature is concerned, there has been really no occasion for complaint since the seed was in. The chief reason here for an amount of replanting in excess of an average year is bad seed. *Stands*—Since the recent rains the plant has improved materially and stands are now, as a rule, good. Where they are not so it is in most cases due to defective seed. Late plantings would be benefited by rain. Fields have received excellent attention. *Acreage* has undergone but little change. A careful analysis of the returns leads us to put the decrease at not more than 1 per cent. *Fertilizers* are but little used, this year less than formerly.

**LOUISIANA.**—A break occurred in the levee at Bayou Lafourche on April 24, but the territory overflowed consisted of land principally devoted to cane and corn. The cotton sections of Louisiana have consequently been free from inundation this season. Last year, it will be remembered, about a quarter of a million acres of cotton land was submerged by the crevasses and from a portion of this the water had not receded sufficiently by June 1 to permit of putting in seed. This year, therefore, planting was completed earlier than last year, but compared with an average season was nearly two weeks behind. Our replies as to germination indicate that while the temperature has at no time since seed was put in been unsatisfactory, there has been lack of moisture until lately, especially over the southern portion of the State, with the result that seed came up rather poorly. In Louisiana, as elsewhere, a greater amount of replanting than usual has been required. According to the reports, defective seed have mainly been responsible for it. Since the 10th of May there have been beneficial rains over northern districts, but it is only very lately that partial relief from droughty conditions has been experienced in other sections. *Stands* have improved since rain came, but at this writing do not average better than fairly good. Weeds and grass have had little chance to grow. *Acreage*—In some districts there seems to have been a slight decrease in area put to cotton this year, but this is overcome by additions in others, leaving acreage approximately the same as last year. *Fertilizers*, although little

used, have received even less attention than formerly, especially the commercial sorts.

**ARKANSAS.**—The conditions which prevailed during the planting season in Arkansas did not differ materially from those in other parts of the Mississippi Valley. Although the time of putting in seed was later by fully two weeks than in an average year, the freedom from overflow removed one of the chief obstacles to the rapid prosecution of farm work in the bottoms. Various causes are assigned for rather poor germination. In some instances it is ascribed to cold weather at night during April; others give absence of rain as the cause; others report bad seed to be largely responsible, not only for an indifferent start, but for much replanting. Best reports come from Southern and Western Arkansas, where seed is stated to have come up well. Meteorological conditions during May have in the main been satisfactory. *Stands* vary widely according to locality and the quality of the seed planted. We have more complaints of defective seed from Arkansas than from any other State in the South; replanting, it is reported, has thereby in some districts become necessary to a large extent. Naturally, in those sections a good stand has not yet been secured. Cutworms are also stated to have injured cotton. In fact, the stand now is satisfactory in South and West Arkansas and only fair elsewhere. Fields are somewhat in grass but are being rapidly cultivated. *Acreage*.—Our information on this point indicates a more radical change than in most other States. A moderate amount of new land has been brought under cotton, but for one reason or another the general tendency has been towards a decrease. One correspondent states as explanation for a considerable falling off in his district that many small planters and much negro help have abandoned the farms to work by the day in saw-mills, etc. Altogether we should judge that the decrease in area for the State has been 8 per cent. *Fertilizers* have been used to only a very limited extent.

**TENNESSEE.**—In common with other sections of the cotton belt, planting began and was finished later than in 1898. Except where defective seed was used, germination was satisfactory; in other words, seed came up well to very well. While there have been isolated complaints of unfavorable weather, the conditions, both as regards temperature and rainfall, have in general been favorable ever since growth began. Defective seed at first and latterly cutworms made a considerable amount of replanting necessary. *Stands*. Subject to the limitations mentioned, stands range from good to very good and the plant looks healthy and is making excellent growth. Rains late in May made the fields somewhat grassy, but work of cultivation is being vigorously prosecuted. *Acreage* has been decreased in most sections but the reduction is as a rule moderate and averages for the State about  $5\frac{1}{2}$  per cent. *Fertilizers* are little used; this year much less than last year.

**TEXAS.**—The same complaint comes from Texas as from elsewhere—a cold and backward spring. In addition drought prevailed over a considerable portion of the State during January and February, so that ground was in no condition to be plowed. As a result farmers were late in preparing land, and consequently the putting in of seed was delayed fully two weeks. Our reports on germination are more satisfactory than for some few years past, the returns in most cases indicating that seed came up very well. Moreover the weather since growth began and up to the middle of May appears to have been nearly everywhere about all that could be desired. From that time there have been complaints of lack of moisture in some districts, but within the past two weeks beneficial rains have fallen at many points. Moisture, however, is desired in Central and Southern portions of the State. Only a moderate amount of replanting has been required. *Stands* are reported good to very good, and fields well cultivated, except where put in grass by recent rains. *Acreage*.—New land brought under cotton for the first time this year has not, we think, been quite sufficient to fully offset reductions in other sections, but has so far kept the decrease down that the loss of acreage in the whole State is not more than 2 per cent. *Fertilizers* play an unimportant part in Texas.

**INDIAN TERRITORY.**—The planting season in the Indian Territory was more prolonged than in 1898. Work was not begun as early, and being interrupted by wet weather was not completed until about the close of May. Of course the

latest-planted seed is not all up yet, but where the plant has appeared above ground germination is stated to have been in the main satisfactory. Prior to the middle of April there were times when the temperature was lower than desirable, but since then there has been no complaint on that ground. Moisture has also as a rule favored the plant, but between the 1st and the 15th of May the rainfall in many places was excessive. Since the 1st of June, however, the conditions have favored rapid and healthy development. Replanting has been confined to a few localities and bears no important relation to the whole area. *Stands* are good generally, but sufficient time for cultivation not having elapsed since the rains, fields are somewhat foul. *Acreage*.—It is in only rare instances that we find any evidence of a disposition to reduce the cotton area. Most of our correspondents report no change or gains, and one of them states that "the increase in acreage is due to the unsettled condition of Indian affairs. The farmers are afraid to diversify their crops, as they fear they cannot hold possession of the land." Under the circumstances we feel safe in placing the increase at 6 per cent. Practically no *fertilizers* are used.

**OKLAHOMA.**—Not only did farmers begin planting later than last year, but, as in that year, work was delayed by excessive rain and has but recently been completed. In the northeastern portions of the Territory, according to our advices, seed came up well, but elsewhere germination seems to have been below the average. Cold weather at first acted as a deterrent to satisfactory development, and when this adverse factor had been removed excessive rainfall was complained of. Altogether the season has been unfavorable until within the past three weeks. Replanting has been carried on with some difficulty, owing to the scarcity of good seed. *Stands* are good in northeastern sections and irregular in other parts of the territory. Since the rain ceased cultivation has been actively carried on, and with better weather the plant is improving perceptibly. *Acreage* has been decreased to the extent of about 11 per cent. *Fertilizers* are not required and therefore receive no attention.

**MISSOURI.**—Owing to the backward spring the planting of cotton in Missouri was not commenced until two weeks later than last year, but was finished about the usual time. Seed came up rather poorly as a rule, but with fairly favorable weather conditions during May the plant has shown much improvement. *Stands* now are reasonably good, and the fields are being well looked after. *Acreage*.—Cotton culture is confined to a few counties in the southeastern portion of the State, and this area has been appreciably reduced in the interest of other crops. We make the average decrease 13 per cent. *Fertilizers* are little used.

#### RAILROAD GROSS EARNINGS FOR MAY.

Returns of railroad gross earnings are again becoming increasingly favorable. Our statement for May is the best of any month this year. On the 116 roads reporting the increase amounts to about three million dollars (\$3,059,323, or 6.96 per cent), and only 22 out of the 116 roads have failed to share in the increase. What is particularly significant in the improvement is that it follows a strikingly heavy increase in the same month last year, our statement then showing no less than \$5,744,201 gain, or 14.08 per cent. Furthermore, this increase in turn had followed \$1,942,782 gain (or 5.14 per cent) the year preceding. The following table, covering the last six years, brings out very clearly the progressive nature of the improvement.

	Mileage.		Earnings.		Increase or Decrease.
	Year Given.	Year Preceding.	Year Given.	Year Preceding.	
May.					
1895 (132 roads).....	100,273	100,178	\$9,391,432	\$7,030,625	Inc. 2,361,407

The railroads the present year had the advantage of an extra business day, May 1899 having contained only four Sundays against five last year, but this was more than offset in the comparison by the absence of several special favoring circumstances which last year contributed so powerfully to swell the traffic and earnings of the roads. It should not be forgotten that May 1898 was the time when the Leiter wheat corner exercised such a potential influence upon the grain movement, raising it to enormous proportions. The high prices drew grain out of every nook and corner, and the railroads, particularly those in the West, got the benefit in the heaviest traffic they had known for years. As compared with this exceptional grain movement in May 1899, the movement the present year has been quite small. Of wheat the receipts at the Western primary markets in the five weeks ending June 3 last year were 23,470,497 bushels; in the same five weeks the present year they were only 14,723,243 bushels; of corn the receipts then were 28,940,254 bushels, now they are only 13,594,273 bushels. Here, then, there is a loss in these two cereals of over 24 million bushels, equal to 700,000 tons of freight. That the roads generally should have maintained their earnings so well and even further increased them, notwithstanding this great shrinkage in the grain tonnage, attests the wonderful activity of general trade. It deserves to be noted that one Western wheat-receiving point records greatly enlarged deliveries of wheat. We refer to Minneapolis, where 7,050,960 bushels of wheat were brought in in the five weeks of 1899 against only 5,589,940 bushels in 1898. The increase here reflects the phenomenal spring-wheat crop raised last year in the district surrounding and tributary to Minneapolis. At the same time the Buffalo grain shovellers' strike diverted traffic from the Lake route at Duluth and Superior to the rail route at Minneapolis.

Chicago, as usual, suffered most from the contraction in the grain shipments. Taking the figures at this point for the even month, we find that the grain deliveries in May 1899 aggregated only 17,228,630 bushels, against 30,186,069 bushels in 1898. At Chicago, likewise, there was some falling off in the provisions movement, while of live hogs the receipts were only 787,216 head against 808,133 head a year ago. It is proper to say, though, that the live-stock movement as a whole was a little heavier than in 1898, being reported 25,039 car-loads against 23,986 car-loads.

Another favoring circumstance of considerable magnitude was present last year but absent this year. We refer to the large movement of troops over various roads in different parts of the country in connection with the Spanish-American war. Southern roads benefited most in this way at that time, but there were also many in other sections, such as the Long Island R.R. (which was then carrying State troops to Hempstead), the Baltimore & Ohio Southwestern, etc. It is noteworthy that only a few of the Southern roads show any losses, notwithstanding the absence of this favoring circumstance of a year ago, while many record large and important gains. The cotton movement was somewhat heavier than in 1898, the receipts at the Southern ports being 201,973 bales, against 142,499 bales, while the shipments overland were 91,294 bales against 80,970 bales.

What, perhaps, has helped the Southern roads more than anything else is the activity and buoyancy of the iron trade. The Southern Railway has \$218,670 increase, the Louisville & Nashville \$203,541, the Norfolk & Western \$197,464, and even the Mobile & Ohio \$110,450, the latter an improvement of over 30 per cent, and all following larger or smaller gains a year ago.

The roads running to the North Pacific coast, like the Great Northern and the Northern Pacific, also suffered the loss of some favoring circumstances which in 1898 contributed in an important degree to swell traffic and revenues. We have in mind the fact that last year the grain movement in the Pacific Northwest, as elsewhere, was exceptionally large, and that at the same time there was a heavy traffic in connec-

tion with the rush to the Klondyke gold regions. We may point in illustration to the Oregon Railroad & Navigation Company. This company reports only \$22,307 decrease in gross earnings, but the local grain earnings fell away as much as \$50,000, while the earnings from the Alaskan business record a shrinkage of \$5,567.

In the following we furnish our usual list of roads distinguished for large gains or for large losses. It comprises all gains and losses exceeding \$30,000. Of the losses there are only two, namely the Baltimore & Ohio Southwestern and the Cincinnati New Orleans & Texas Pacific, and in both cases the falling off may be attributed to the fact that the military operations of the Government formed an important element in their revenues last year.

#### PRINCIPAL CHANGES IN GROSS EARNINGS IN MAY.

Among the gains in the foregoing we find representatives of roads from all parts of the country, though on the whole Southern and Northwestern roads are present in largest numbers, and these two groups may be said to have done better than any others, as may be seen by the following, in which we have arranged some of the leading roads in groups, and furnish comparisons for six years.

The information submitted in reply to my inquiry by the officials of the Boston & Maine, the Maine Central, the Chicago Burlington & Quincy, the Chicago & North Western, the Michigan Central, the Penn.sylvania, the Illinois Central, the Delaware & Hudson, the Delaware Lackawanna & Western and the Fonda Johnstown & Gloversville railroad companies is stated under oath, and from it I conclude that the bonds herewith specified satisfy all of the conditions prescribed in the Krum bill, constituting Chapter 386 of the Laws of 1889 of the State of New York.

## FONDA JOHNSTOWN &amp; GLOVERSVILLE RAILROAD CO.

	Rate.	Issued.	Payable.	Amount outstanding.
First mortgage.....	7	1870	1900	\$300,000 00
First general con. ref. mortgage.....	4½	1897	1947	\$700,000 00

\* These bonds are to retire all prior mortgage indebtedness of the company.

## MAINE CENTRAL RAILROAD CO.

	Rate.	Issued.	Payable.	Amount outstanding.
Consolidated bonds.....	4½	1872	1912	\$3,924,000 00 269,000 00 1,525,000 00 2,824,000 00
Extension bonds.....	6	1870	1900	441,500 00
Maine Shore Line RR. bonds.....	6	1883	1922	81,000 00
				\$9,064,500 00

## MICHIGAN CENTRAL RAILROAD CO.

	Rate.	Payable.	Amount outstanding.
First mortgage bonds.....	7	1902	\$8,000,000 00
First mortgage bonds.....	5	1902	2,000,000 00
			\$10,000,000 00

## PENNSYLVANIA RAILROAD CO.

	Rate.	Issued.	Payable.	Amount outstanding.
General mortgage.....	6	1867	1910	\$19,997,820 00
Navy Yard mortgage.....	5	1876	1901	1,000,000 00
Real Estate purchase money.....	4	1893	1923	2,000,000 00
Delaware Avenue market.....	4½	1889	1909	300,000 00
Delaware Av., Bloodgood prop'ty.....	4½	1892	1912	200,000 00
				\$23,497,820 00

## THE DELAWARE &amp; HUDSON CO.

	Rate.	Issued.	Payable.	Amount outstanding.
First mort. Penn. Div. reg. coupon.....	7	1877	1917	\$2,925,000 00 2,075,000 00
				\$5,000,000 00

## DELAWARE LACKAWANNA &amp; WESTERN RAILROAD CO.

	Rate.	Issued.	Payable.	Amount outstanding.
First con. mortgage.....	7	1877	1907	\$3,067,000 00

## CHICAGO BURLINGTON &amp; QUINCY RAILROAD CO.

	Rate.	Issued.	Payable.	Amount outstanding.
Consol. mortgage bonds and scrip.....	7	1873	1903	\$28,944,000 00
Iowa Div. mortgage S. F. bonds.....	5	1879	1919	2,818,000 00
Nebraska ext. mort. S. F. bonds.....	4	1887	1927	9,050,000 00
B. & M. R. RR. in Nebraska con. mortgage S. F. bonds.....	6	1878	1918	26,110,000 00

Upon information derived from the New York Railroad Commissioners the Lake Shore & Michigan Southern Railroad Company bonds, in which the savings banks of New York may invest, are seen to be:

	Rate.	Issued.	Payable.	Amount outstanding.
Con. first mortgage.....	7	1870	1900	\$9,529,000 00
Gold bond mortgage.....	3½	1897	1997	27,412,000 00
Kalamazoo & White Pigeon.....	5	1890	1940	400,000 00
Detroit Monroe & Toledo.....	7	1876	1906	924,000 00
				\$38,265,000 00

\* These bonds are to retire all prior mortgage indebtedness of the company.

Reply to my inquiry addressed to the President of the New York New Haven & Hartford Railroad Company has not yet come to hand. When received, and when additional other information is gathered which has been requested from some of the other companies named, a supplemental circular will be issued to include such of the securities as may be herein omitted which the Krum Law sanctions as savings bank investments. Meanwhile the securities of the New York New Haven & Hartford Railroad Company which are indicated by information supplied me by the New York Railroad Commissioners to be a legal investment for the New York savings banks are listed as follows:

	Rate.	Issued.	Payable.	Amount outstanding.
First mortgage.....	4	1883	1903	\$2,000,000 00
N. Y. P. & B. Railroad.....	4	1881	1901	300,000 00
Shore Line Railway Company.....	4½	1880	1910	200,000 00
Housatonic Railway Company.....	4	1885	1910	100,000 00
				\$2,600,000 00

Last year I issued a circular letter stating that under Chapter 238 of the Laws of 1898 the bonds of certain railroads named therein were a legal investment for the savings banks of New York, according to information supplied me by the State Board of Railroad Commissioners. I know of nothing which has since occurred to change that list, which is as follows:

Name of corporation.	Rate of interest.	Amount of first mortgage bonds outstanding.
Buffalo Creek RR. Co.....	6	\$ 50,000
Cairo RR. Co.....	6	25,000
Greene RR. Co.....	7	500,000
Montgomery & Erie RR. Co.....	5	130,000
New York Cent. & Hudson River RR. Co.....	6	30,000,000
New York & Harlem RR. Co.....	4½	9,733,333
Oswego & Syracuse RR. Co.....	7	100,000,000
Rensselaer & Saratoga RR. Co.....	7	12,000,000
Rome Watertown & Ogdensburg RR. Co.....	5	428,000
Saratoga RR. Co.....	6	2,000,000
Staten Island RR. Co.....	4½	9,076,000
Syracuse Binghamton & New York RR. Co.....	7	10,000
Syracuse Geneva & Corning Ry. Co.....	7	500,000
Troy & Bennington RR. Co.....	6	1,986,000
Utica & Black River RR. Co.....	4	625,500
Valley Railroad Co.....	5	20,000
		1,800,000
		400,000

\* These bonds are to retire all prior mortgage indebtedness of the company.

Yours very truly, F. D. KILBURN, Superintendent.

## ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S

—A notable feature of the bank sales this week is that the total has reached 976 shares, although there are only six banks in the list. This unusual condition arises from the fact that the list includes 716 shares of the Phenix Bank sold and 214 shares of the Butchers' & Drovers' National Bank. All of the week's sales were at auction except 50 shares of the Phenix, which were at the Stock Exchange. The transactions in Banks and Trust Companies are subjoined.

Shares.	BANKS—New York.	Price.	Last previous sale.
4	America, Bank of.....	422½	May '99—420
214	Butchers' & Drovers' Nat. Bank.....	75½	May '99—79½
17	Commerce, Nat. Bank of.....	250	May '99—235
10	Corn Exchange Bank.....	365	May '99—370
1716	Phenix National Bank.....	113-114	June '99—114
15	State of N. Y., Bank of.....	125	Mar. '99—123½
TRUST COMPANIES—New York.			
35	City Trust Co.....	402-402½	May '99—406
53	Farmers' Loan & Trust Co.....	1436½	May '99—1450

† Of this, 50 shares were sold at Stock Exchange at 114.

—The annual meeting of the shareholders of the Bank of Montreal is an event of the week. This is the largest financial institution in Canada, its branches being established in every part of the Dominion. The assets of the bank amount to the large total of \$71,593,567; its deposits are over 46 million dollars and its notes in circulation on April 30 about 5½ millions, making a total of deposits and notes of \$51,888,592. The report of the proceedings at the meeting, given on other pages, evidence a very prosperous condition of affairs in Canadian commercial and financial circles. Mr. E. S. Clouston, the General Manager, says: "There is a feeling of buoyancy and elation that appears to be thoroughly justified by actual facts. There is hardly a branch of trade that is not prospering. The farmers are receiving good prices for their products, the Government show increased revenues, the railways increased traffic, stocks of all sorts have appreciated in value, while the future wealth which our mining and for-

est industries are expected to realize for this country is beyond computation."

—The Flatbush Trust Company, the organization of which was announced in this column last week, has a capital of \$300,000 and a surplus of \$100,000, instead of a capital of \$100,000 and a surplus of \$50,000 as we were last week incorrectly informed. The General Statutes of this State limit the capital of trust companies to a minimum of \$500,000 in large cities. But in the case of the Flatbush Trust Company a special charter was passed in 1896 (Chapter 737, Laws of 1896). The charter was consequently obtained prior to the Greater New York consolidation, but subsequent to Flatbush becoming part of the City of Brooklyn, which occurred in 1894; before 1894 it was one of the county towns of Kings County. This special charter permitted the organization of the company with a capital of \$300,000, at the same time requiring that the business office of the company should be located at least two miles from the Brooklyn City Hall. The Act provides, however, that if the company shall at any time locate within two miles of the Brooklyn City Hall it shall not thereafter transact any business until it shall increase its paid up capital to not less than \$500,000. No definite action was taken under this charter until recently. Then prominent citizens of Flatbush interested themselves to procure subscriptions to the company's capital and surplus, and these were soon over-subscribed by about one thousand shares. Among the subscribers are leading bankers in Brooklyn and New York and property owners in Flatbush. The required 25 per cent of subscriptions has been paid in, application has been made to the State Banking Department for authority to begin business, and the location selected is on Flatbush Avenue, between Church and Caton avenues. It is expected that the office will be opened early in July.

—The business of clearing money orders, postal notes and drafts drawn upon the New York Postmaster and deposited in the local banks has been transferred from the Chase National Bank, where it has been done for the past ten years, to the Seventh National Bank, of which Mr. Perry S. Heath, the First Assistant Postmaster General, is a stockholder. The Seventh National, as the depository bank, will clear the daily business of the New York Post-Office and each day will be required to transfer to the Assistant Treasurer the balance over and above about \$200,000, for which sum the bank is bonded. It will be seen from this statement that the benefits from the business which the bank will get from the Post-Office are really not so large as many have supposed. An advantage which the bank will enjoy, however, is the steady balance of about \$200,000 and also the publicity attending the fact that the bank transacts the Post-Office business.

—Mr. Lawrence O. Murray, Deputy Comptroller of the Currency, has accepted the position of Trust Officer of the recently incorporated Trust Company of America, of which Mr. Ashbel P. Fitch is President. Mr. Murray entered the Treasury Department six years ago as Private Secretary to Assistant Secretary Curtis. Two years ago his knowledge of banking law led to his selection as head of the Division of Organization in the office of the Comptroller of the Currency, and about a year ago he was made Deputy Comptroller. Mr. Dawes promoting him because, as he stated at the time, "of his pre eminent fitness for the discharge of the responsible duties of the position." Though only thirty-five years of age, Mr. Murray is a doctor of civil law and a lecturer on law at the Catholic University. The position of Trust Officer of a trust company is of comparatively recent origin, and few of the older trust companies have such an official. Generally speaking, a Trust Officer has charge of the trust business of the institution. For example, the company acts as trustee for corporations who issue mortgages. The Trust Officer sees that these mortgages are properly executed and recorded, that the bonds under the mortgage are regularly issued, and that other requirements are complied with. The position requires more or less knowledge of law, and it is one of much responsibility.

—At the meeting this week of stockholders of the New York Produce Exchange Bank, a State institution located in the New York Produce Exchange Building, the following were elected directors: Alexander E. Orr, S. Jacoby, A. Munn, E. S. Whitman, R. H. Laimbeer, H. W. O. Edye, F. H. Parker, W. H. Wallace, A. L. Roe, C. R. Flint, James

McMahon and J. A. Mapee. The last named is a new director, his associates being re-elected. Mr. Forrest H. Parker and Mr. Richard H. Laimbeer were unanimously re-elected President and Vice-President of the bank, and Mr. William A. Sherman was reappointed Cashier. The statement of the bank, made March 30, shows a capital of \$1,000,000, surplus fund, \$250,000, and undivided profits, \$6,382. Loans were \$3,367,381; amount due depositors, \$3,336,435; due trust companies, banks, bankers, brokers and savings banks, \$624,677.

—The fourth annual convention of the National Association of Credit Men has been in session at Buffalo this week. This association is composed of representatives from the various credit associations throughout the country, and the central organization seeks to secure uniformity in credit methods by correspondence with the State organizations. Through recommendations and otherwise it has during the few years of its existence been very successful. Mr. James G. Cannon, President of the Fourth National Bank of this city, who has been President of the Association for the past two years, delivered his annual address on Tuesday. He noted the healthy and satisfactory growth of the Association, which now, he says, wields a powerful influence for the betterment of commercial customs and usages among bankers and merchants. He referred to the efforts of the Association to secure uniformity of action on the part of banking interests and the mercantile community in procuring statements from borrowers who applied for loans from banks, and also statements from merchants who were applicants for credit for goods which they desired to buy. He said that he had addressed communications to seventeen different trade associations throughout the country, and to all the bankers' associations in every State in the Union, asking them to consider at their next annual convention the question of the adoption of the uniform statement blanks of the National Association of Credit Men, and such other forms as would be useful in their business. The object and aims of the Association have been presented by Mr. Cannon to the Executive Council of the American Bankers' Association, which will meet at Cleveland in September. Its attention has been directed to the fact that the National Association of Credit Men have adopted certain uniform blanks, and suggesting that the question of the adoption of these blanks be introduced for discussion at the next convention. The result will probably be that the whole subject will be thoroughly canvassed at the meeting of the American Bankers' Association.

## Monetary! Commercial English News

(From our own correspondent.)

LONDON, Saturday, May 27, 1899.

While trade throughout the country continues marvelously prosperous, and appears likely to improve further, business upon the Stock Exchange has been very quiet all through the week. The Stock Exchange was closed on account of the Whitsuntide holidays from Friday evening to Tuesday morning, and many persons have not returned to the city yet. Besides, there is a curious superstition in the Stock Exchange that nineteen-day accounts are unfavorable to business and nearly always causes losses to operators. And this is a nineteen-day account. The last settlement of the month begins for mining securities to-day, and for all other securities on Monday, and will end on Wednesday evening.

But the main cause of the general disinclination to deal is undoubtedly the liquidation that has been recently going on in New York and a somewhat similar liquidation which is now going on in Paris; while, owing to the fear of foreign war and to the distracted internal state of the country, business of all kinds in Paris has been exceedingly slack for some years past. There has been a good deal of speculation in Spanish bonds since the close of the war. Paris has financed Spain for very many years, and the losses of the Paris Bourse at the outbreak of the war were very heavy. After the close of the war operators recovered a good deal of their losses, undoubtedly because of the rapid rise in Spanish bonds. But Spanish securities have fallen heavily this week as an announcement has been made that congress, not having provided funds for the repayment of the July interest on the debt, the Treasury will not make the payment; and furthermore the Treasury has stopped the drawing of bonds of the redeemable debt. The general impression both in Paris and in Madrid is that the Government is putting pressure upon congress and that the coupons will be provided for all the same. But

however that may be, there is a very uncomfortable feeling, for obviously Spain cannot pay the full interest upon the whole of her own debt and the debts of Cuba and the Philippines which she has guaranteed and taken over. Some time or other there must be a repudiation or a cutting-down of some part of the debt, and the only question is how long the present attempt to do the impossible is to be continued.

The fall in Spanish bonds has told all the more heavily upon the Paris Bourse, because, as already said, it was weakened by the losses at the outbreak of the war, by the losses occasioned by the long continuance of insecurity and alarm, and by the laws which were passed a year or two ago and which have greatly weakened the *coulisse*, or outside Bourse. In consequence the Paris operators have been selling in London almost all securities for which there is a market here upon a very large scale, especially they have been selling gold shares. The monthly settlement in Paris begins next week, and if it passes over easily there may probably be a recovery immediately afterwards. But the operators in Paris have been weakened by the long succession of losses, and there are heavy differences to pay. Rates, therefore, for loans to the Bourse are pretty stiff. And throughout the money market generally money is not in plentiful supply. Partly this is due to the immense amount of French money that is being employed in Germany, Belgium, Holland, Switzerland and other parts of the Continent. But undoubtedly it is partly due also to a general feeling of insecurity. Next week different Chambers of the Court of Cassation are to meet. On Saturday it is hoped that the verdict of the Dreyfus case will be given. The general impression is that Dreyfus will be brought back to France, and that he will either be liberated or that a new trial will be ordered. Still, there is a certain amount of nervousness. There is also some anxiety lest Major Marchand, who is about to return, should be set up as another Boulanger.

The Peace Conference is attracting very little attention. The general impression is that nothing serious will be done in the way of limiting armaments, but that something will be done to lessen the horrors of war.

In the mining department prices are fairly steady; but there is extremely little doing, partly in consequence of the selling from Paris and partly owing to the uncertainty as to what may be the outcome of the meeting next Wednesday between Sir Alfred Milner, the High Commissioner for South Africa, and President Kruger. It is known that the meeting has been brought about through the mediation of President Steyn, of the Orange Free State, and that all the influence possible is being brought to bear by President Steyn and by the Dutch leaders in Cape Colony upon President Kruger to induce him to make concessions. But whether he will do so is very much doubted. Money still continues abundant, and short loans are made at very low rates. But the bill brokers and the discount houses are holding out for higher rates for bills, the general impression being that money will rise in value very considerably before long. The main reason for the opinion is the new Japanese loan referred to last week. The terms of the loan are not yet completely settled. But it is expected that everything will be arranged to-day and that the issue will be made some time next week. Of course, the Japanese Government has to pay large amounts in Europe and America for ships and munitions of war, and probably, therefore, much the larger part of the 10 millions sterling will remain in London. But even if it does, a portion may have to be remitted either to America or to the Continent, and a small portion may have to be sent out to Japan. In any case, the market fears that such a loan will considerably reduce the supply in the open market, for at the best the money will be transferred from the other banks to the Bank of England. Moreover, although the Argentine loan is not yet settled it is still under negotiation, and that adds to the fear that the supply of money in the market may be considerably reduced. And, lastly, the Russian Government is actually negotiating here this week for a small railway loan of 3 millions sterling, bearing 4 per cent interest and to be issued at the price of 90. It is doubtful whether the negotiations will come to anything. But the fact that they are going on makes bankers and discount houses apprehensive that the value of money may rise very considerably.

In Paris, money, as already said, is dear considering the long period of depression the country has passed through and the little activity either in speculation or in trade. In Germany money is much more abundant than it was and probably will continue so for a month or two yet. But nobody doubts that there will be a return of stringency in August, and that probably the market will be very tight in September and October. It is not deemed likely now that India will borrow much this year, although she will probably borrow a considerable amount early next year. But it is thought too late now to undertake any great operation this year with a view to producing a gold standard.

In the meantime the dull season in India is approaching, and the value of money is consequently declining, and probably will continue fairly low until November. As a consequence, the India Council has not sold its drafts so well this week. It offered for tender on Wednesday 40 lacs and the applications amounted to nearly 114 lacs. The whole amount offered was sold at prices ranging from 1s. 3 15-16d. per rupee to 1s. 3 31-32d. per rupee. On account of the falling off in the applications and the prices, tendered the Council has decided to reduce its drawings next week to 30 lacs.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

	1899. May 24.	1898. May 25.	1897. May 27.	1896. May 28.

Messrs. Pixley & Abell write as follows under date of May 25:

Gold.—Demands for the Continent are absorbing all the open market supplies, and the Bank has accordingly only received £11,000 from Australia. Arrivals: Bombay, £60,000; Singapore, £3,000; Australia, £207,000; Cape Town, £192,000; West Indies, £41,000. Total, £503,000. Shipments May 18: Bombay, £60,000.

Silver.—After declining to 28d. India came in as a buyer and the market at once rose to 28 1/2d., with considerable business also at 28 3/4d. In consequence of the intervening Indian holidays, and a slightly freer supply, the price closes at 28 1/2d. sellers. Indian price Rs. 72 1/2. Arrivals: New York, £174,000; West Indies, £11,000. Total, £185,000. Shipments, May 18: Bombay, £75,000; Hong Kong, £36,332; Shanghai, £11,600. Total, £122,932.

Mexican Dollars.—These coin are quite nominal.

The quotations for bullion are reported as follows:

IMPORTS AND EXPORTS FOR THE WEEK.—The following are the imports at New York for the week ending for dry goods June 1 and for the week ending for general merchandise June 2; also totals since the beginning of the first week in January.

# Banking and Financial.

## BANK OF MONTREAL.

### PROCEEDINGS AT THE EIGHTY-FIRST ANNUAL MEETING AT MONTREAL, JUNE 6, 1899.

(From the Montreal Gazette of June 6th, 1899.)

The eighty-first annual meeting of the shareholders of the Bank of Montreal was held in the Board Room at one o'clock yesterday.

There were present Hon. George A. Drummond, Vice President; Sir W. C. Macdonald, Hon. James O'Brien, Messrs. R. B. Angus, Hector Mackenzie, F. S. Lyman, Donald Macmaster, Q. C.; G. F. C. Smith, J. W. Howard, John Crawford, A. W. Hooper, M. Bu ke, John Morrison, M. C. Foley, James Wilson, H. Mason, B. A. Boas, W. J. Buchanan, A. T. Paterson, R. Simms, A. T. Taylor, D. Morrice, Capt. W. H. Benyon, W. W. Ogilvie, Huntley Drummond, W. J. Learmont, R. Campbell Nelles, Richard White, James Croft, G. C. Dunlop and F. S. Lyman, Q. C.

On the motion of Mr. John Crawford, Hon. George A. Drummond, Vice-President, was unanimously voted to the chair, in the absence of the President, The Right Hon. Lord Strathcona and Mount Royal.

On the motion of Mr. Hector Mackenzie, seconded by Mr. A. W. Hooper, it was agreed: "That the following gentlemen be appointed to act as scrutineers:—Messrs. F. S. Lyman, Q. C., and Mr. W. J. Buchanan, and that Mr. James Aird be the Secretary of this meeting."

#### THE REPORT.

The report of the Directors to the Shareholders at their eighty first annual general meeting was read by Mr. E. S. Clouston, General Manager, as follows:

The directors have pleasure in presenting the eighty-first annual report, showing the result of the Bank's business of the year ended 30th April, 1899.

Balance of profit and loss account, 30th April, 1898... \$352,210 07  
Profits for the year ended 30th April, 1899, after deducting charges of management, and making full provision for all bad and doubtful debts..... 1,350,582 65

Dividend 5 per cent, paid 1st December, 1898... \$600,000  
Dividend 5 per cent, payable 1st June, 1899... 600,000  
1,200,000 00

Balance of profit and loss carried forward.....\$1,102,792 72

Since the last annual meeting of the Shareholders branches of the Bank have been opened at Greenwood, B. C., and Fredericton, N. B.

All the offices of the Bank, including the head office, have been inspected during the past year.

STRATHCONA AND MOUNT ROYAL,  
President.

BANK OF MONTREAL, Head Office, 5th June, 1899.

E. S. CLOUSTON, General Manager.

BANK OF MONTREAL,  
Montreal, 30th April, 1899.

#### THE GENERAL MANAGER.

Mr Clouston said:

Following my usual custom, I will now proceed to furnish explanations of the important changes in our general statement, as compared with that of the same date last year. I may say that the Directors gave their careful consideration to the request made by one of our shareholders at our last Annual Meeting, that the Statement should be issued in parallel columns; but they came to the conclusion that it would serve no useful purpose unless accompanied by the explanations which I now propose to give. They have accordingly instructed me to prepare it in the form with which you have been so long familiar, and which is in accordance with the requirements of the Banking Act and our own by-laws.

The only important change in our Liabilities is the large increase in deposits, amounting to about \$5,800,000, which arises from no special deposits, but appears to be a general increase in all classes. The increase in deposits in all the banks for the same period amounts to \$32,000,000, so we appear to have received our fair share of them. The disposition of this addition to our adventitious capital is shown in the increase to our regular business advances in Canada of \$3,500,000, and in the increase in assets readily available held in other countries of \$2,300,000. The Loans and Discounts of all the Banks have increased during the year \$34,000,000, but of this amount \$9,000,000 is represented by an increase in call loans in Canada, a class of loan not made by this Bank. We have, as you will notice, during the last year taken advantage of the high prices ruling for Bonds in the United States and realized about half our holdings, the proceeds being at present employed in short loans in London, New York and foreign markets. It is hardly necessary to point out that the Statement is a strong one, as we hold assets readily available of over 50 per cent, against our Liabilities to the public, and we can draw from foreign sources to meet any large demand without in any way restricting or curtailing our advances in Canada. This reserve carried at low rates, together with the excessive competition in Banking, will explain why our profits do not show a greater increase for the year, notwithstanding the employment of so much more capital. I think, however, that even in that respect the shareholders must be satisfied with the results, which have been arrived at by very conservative estimate.

When business is good and the country prosperous very little need be said, and I believe that with respect to the present condition of affairs in Canada there can scarcely be two opinions. There is a feeling of buoyancy and elation regarding it that appears to be thoroughly justified by actual facts. There is hardly a branch of trade that is not prospering. The farmers are receiving good prices for their products, the Government show increased revenues, the railways increased traffics, stocks of all sorts have appreciated in value, while the future wealth which our mining and forest industries are expected to realize for this country is beyond computation.

The only very unfavorable feature in sight is the excessive increase in call loans of \$9,600,000, most of which I am afraid is occasioned largely by speculative operations, some of them of dubious value. This condition will probably correct itself, and may occasion individual losses to speculators, but should not affect the general prosperity.

We are not singular in our present fortunate position, as there appears to be a universal wave of prosperity sweeping over most of the countries of the world and in England. In the United States and on the Continent manufactures are taxed to the utmost capacity to meet the demands of commerce.

The condition of the United States, from its geographical position must always have a certain influence upon our own, and I am pleased to note that they are enjoying a state of prosperity to which they have been strangers for many years. The balance of trade in favor of the United States, which last year was thought to have been exceptional, and not likely to be repeated, has still further increased. I doubt if the bank clearings and the Clearing House bank deposits have ever before attained such figures. The sales of stocks and bonds on the New York Stock Exchange have been without precedent, and the iron production, which is considered by many as the barometer of trade, is on an unheard of scale. To this favorable condition may be added the freedom from financial disturbances, though I regret to say that their financial and currency system still leaves much to be desired.

There is only one other point to which I desire to refer, and it is to correct what appears to be a popular error. In the discussions which have taken place with reference to the establishment of a mint in Canada it seems to be accepted as a fact by many people that the opposition of the Bankers' Association arose from the supposition that it would interfere with their circulation. The Bankers have no fear on that score, as they know that a safe paper currency such as they issue will not be affected in the slightest degree by the coining of a Canadian gold currency. All that it might affect would be the large notes issued by the Government and at present held by the Banks, amounting to about \$14,000,000, which, if the Government had to provide funds to retire would cost them about \$400,000 a year. You have only to look at our neighbors across the line, who have their own gold currency, to see how much of it is in actual circulation and how little the Banks need fear a mint. The question of the undesirability of a mint has been so thoroughly threshed out that I need say no more from the material point of view. But I have seen statements of a sentimental nature that the minting of Canadian gold coins would assist in adding to the importance of Canada, and it should be considered humiliating to be without a gold coinage of our own. I must say I fail to see why. If there is any humiliation at all it appears to me that it would be much more humiliating to mint a coin which would not circulate in our own country, and which directly it crossed our boundary had to be unminted to give it value in foreign markets. I have no hesitation in saying that I consider the best, most elastic

and most economical currency for the Dominion is one on a gold basis, but without a gold coinage, such as we have now.

If there are any further explanations required by shareholders, I shall be pleased to give them.

#### THE VICE PRESIDENT.

Hon. George A. Drummond said:

GENTLEMEN: The statements laid before you and the explanations now given by the General Manager place you in possession of the information necessary to enable you to grasp the general conduct of your business and estimate the value of your investment.

You will, I am confident, agree with the Directors in thinking the results eminently satisfactory, and creditable to the management, more especially as they have been achieved in times of great competition among the banks and in face of a steady decline in the value of money.

At the last annual meeting the evidences then available of the advent of better times were noted with satisfaction, and hopes were expressed that they had come to stay, and so far this expectation has been justified. From all sides and with few exceptions, a much improved condition is reported in commercial and financial circles.

The great lumber industry is thriving, the output of deals and lumber for the season having been closely sold up at an average advance in price of 10 to 15 per cent. A comparatively new industry, the manufacture of paper pulp, has opened an apparently unlimited market for a class of timber formerly in little demand. Great mills for the manufacture of this product, and of printing paper from wood have been established and are developing districts formerly little known.

The trade of the port during the past year showed a moderate increase over 1897—417 voyages being made, as against 440 in the previous year.

The quantity of grain exported was 40,000,000 bushels, or 9 per cent of the whole exports from all ports on the Atlantic side.

Butter, cheese, meats, eggs and poultry have all benefited by the extension of the refrigerator arrangements, and the trade is of growing importance. Much has been done by the intelligent supervision and instructions afforded by officials of the Departments of Agriculture, both Provincial and Dominion.

The passenger trade was not so good as in 1897, and freight rates from Europe have thus been low.

Metals have advanced in prices everywhere, and experts assure us that the time is not distant when Canada will supply her own wants in most metals and enlarge her output of all. The importance of the iron industry and coal production could well be exaggerated.

The development of our mining interests goes on with unexampled rapidity; the opening of the Yukon Territory, and the continued activity in British Columbia have attracted the attention of the world.

The trade of the port is active, and the Customs report a very large increase during the past year in the delivery of goods entered for consumption as compared with the year before, the figures being, in value, \$11,267,471 for the year ending May 1, 1898, and \$14,280,603 for 1899.

Many lines of home-made cotton goods are reported as now controlling the market against the imported article, and marked activity prevails in many other home industries, though the competition of the United States in some industries is very keenly felt, and has even been extended to the United Kingdom.

Enormous advances in values have been recorded on the Stock Exchange, and all classes of securities now stand on a very high range of prices.

At the last annual meeting reference was made to the American-Spanish War, and the opinion was expressed that it was not likely to affect prejudicially either commercial or financial interests in this country, and happily this anticipation has been verified.

No question outside of our own work is so closely identified with our interests as the maintenance of the peace of the world, and a word may be pardoned on the political unrest which is the serious underlying factor of the present political situation.

Arising from the thirst for territorial expansion, which has seized all civilized peoples, we have had the Fashoda incident, in which an inequitable act, almost a rash word, from the French or English side, might have involved this country in war.

In China we have England and Russia in debate, and endless possibilities opened up in the process of partition of that country, in which nearly every European power is engaged. What with ill-defined territories, and the modern contrivance of spheres of influence added, enormously increasing the difficulty of control, it cannot be said that political affairs generally are in a settled condition.

I am no alarmist, but simply present obvious facts as a reason for a prudent and conservative course, even in the midst of widely spread prosperity.

The cordial relations now happily existing between our Mother Country and the United States are matter of sincere congratulation, and nowhere is this friendly political feeling more heartily welcomed and reciprocated than in this country.

Meanwhile it is matter of satisfaction that the position of the Bank is believed to be thoroughly sound and its resources well in hand.

I will move: "That the report of the directors now read be adopted and printed for distribution among the Shareholders."

The motion was seconded by Mr. A. T. Paterson.

#### THE DISCUSSION.

After some remarks by Mr. John Morrison,

Mr. John Crawford took exception to the statement made in the General Manager's remarks that the farmers were prosperous, and contended that the prices of hay and oats, two of the largest crops that farmers produced, were deplorably low. He congratulated the Directors on the satisfactory statement they had submitted to the shareholders; it was an improvement on several previous ones. Now that the rest had reached \$6,000,000, or 50 per cent of the capital, he wanted to know whether the Directors intended that the shareholders should participate in any profits over the regular 10 per cent dividend, or whether it was the intention of the Board to add any such profits to the Profit and Loss Account.

The Chairman—Mr. Crawford knows very well that the Board goes out of existence to day, and it would be quite impossible to pledge their successors in regard to any particular policy. In addition to that I may say the subject has not been considered, and you can obtain nothing but an individual opinion, which will be of no value. If I were to give my own personal opinion, I would say, looking back over the number of years which you have attended the Bank meetings and given the benefit of your opinion to the Board, I would say it is based on a conservative policy. You yourself in 1873 advocated the policy of the Reserve being beyond 50 per cent.

Mr. Crawford—Excuse me, sir, a misprint.

The Chairman—I thought it would surprise you to hear that. I quite understand that the two are bound up together, and that you spoke at the beginning with reference to 50 per cent as a reserve, and the equal promise which you involved that when it reached beyond the 50 per cent was that we should divide the surplus. Mr. John Crawford, in 1873, said: "I can concur in all that Mr. Murray has said, with the exception of that portion of his speech in which he refers to the dividends. I hope the policy of the Bank will be to restrict the dividends to what they are at present, until the rest amounts to at least 50 per cent. Indeed, I hope it will exceed 50 per cent before any attempt is made to increase the dividends." I take that to mean, in the exercise of what I congratulate you upon, you would like to see the reserve over 50 per cent. Now, carefully noting that I express my own opinion,

and nothing more—in no way pledging any member of the late Board or the future Board—my opinion is it would be a wise policy to increase the rest something beyond 50 per cent, if able to do so without decreasing the dividend.

Mr. John Crawford did not repudiate the statement that had just been read, but he was very sorry to hear the Chairman's individual opinion upon the matter to which he had referred. There were many of the Shareholders of the Bank who were only in medium circumstances, and in the interests of these he asked the Directors to look the matter boldly in the face and see whether they believed that the existence of the security of the institution consisted in having a rest of \$12,000,000, instead of \$6,000,000. Many of the best banks in London were perfectly satisfied with \$6,000,000. He spoke of the large increase in deposits, some \$7,000,000 more than in the previous year, and suggested that if by paying 3 per cent the Bank encouraged more deposits than it could legitimately employ, it was worth while for the Directors to consider the question of reducing the interest. It seemed to him a very serious matter. He had, he remarked, on many occasions asked that the amount of reserved interest be specifically stated in the report, because it really was a very indefinite expression to say, "Amount reserved"; it might be that a portion of it was reserved; it did not necessarily imply that the whole amount was.

The General Manager—The full amount is reserved in every case.

Mr. Crawford then went on to speak in favor of comparative statements, and followed this up by asking whether the Directors had discussed any amendments to the Banking Act, which was to be revised next winter, or were they prepared to accept it as it stood at present.

The Chairman replied that the matter had not yet been discussed by the Directors, but he had no doubt that the forthcoming Board would be pleased to receive any suggestions that the Shareholders might desire to offer.

The Chairman then put the motion for the adoption of the report, and it was carried unanimously.

#### VOTES OF THANKS.

Senator O'Brien moved:

"That the thanks of the meeting be presented to the President, Vice-President and Directors for their attention to the interests of the Bank."

This was seconded by Mr. G. F. C. Smith, and adopted, and was briefly acknowledged by the Chairman.

Mr. R. B. Angus moved:

"That the thanks of the meeting be given to the General Manager, the Inspector, the Managers and other officers of the Bank for their services during the past year."

In making the motion Mr. Angus said they were all sensible that in the conduct of the large and varied business of the Bank of Montreal, a very high order of ability was required on the part of its officers. In Mr. Clouston they fortunately had a General Manager who was well versed in his profession and who possessed distinguished ability. The Directors had already expressed their appreciation of his services and of the great zeal and industry of the Inspector, the Managers and other officers, and he now asked the meeting to join with them in giving voice to sentiment by passing the resolution that he had just moved.

Mr. John Crawford remarked upon the important position of an Inspector, and Mr. W. W. Ogilvie, who seconded the motion, expressed the opinion that the Bank of Montreal was singularly fortunate in having Mr. Macnider as Chief Inspector. There was no man in Canada, from Victoria to Halifax, who knew so much of the character of the merchants and people doing business in this country as Mr. Macnider. He had a number of inspectors under him, he made very wise selections, and he (Mr. Ogilvie) had never yet heard a complaint. The relationship that existed between the General Manager, the Manager, the other officers of the Bank and the 536 employees was very close and encouraging.

The motion having been unanimously concurred in, the General Manager remarked that he had to thank Mr. Angus for the particularly kind way in which he had spoken of himself (Mr. Clouston) and his services. This was appreciated all the more coming from a man who had occupied the same position and knew the difficulties and trials that a General Manager had to encounter. But his efforts would be useless unless backed up by an efficient staff; and he might say that no General Manager ever had a staff who worked more cordially with him to assist the interests of the Bank than had the General Manager of the Bank of Montreal.

Mr. A. Macnider thanked Mr. Ogilvie and the meeting for the very kind way in which they had spoken of himself and the rest of the staff.

Mr. Donald Macmaster, Q. C., moved:

"That the ballot now open for the election of Directors be kept open until three o'clock, unless fifteen minutes elapse without a vote being cast, when it shall be closed, and until that time and for that purpose only this meeting be continued."

This was seconded by Mr. H. A. Ross and unanimously agreed to.

On the motion of Mr. John Morrison, seconded by Mr. John Crawford, a hearty vote of thanks was accorded the Chairman, who acknowledged the same.

#### THE DIRECTORS.

The ballot resulted in the election of the following gentlemen:

R. B. ANGUS, Esq.,	HUGH McLENNAN, Esq.,
HON. GEORGE A. DRUMMOND,	W. W. OGILVIE, Esq.,
A. F. GAULT, Esq.,	A. T. PATTERSON, Esq.,
E. B. GRANKSHIELDS, Esq.,	RIGHT HON. LORD STRATHCONA

## WALL STREET, FRIDAY, JUNE 9, 1899.—3 P. M.

**The Money Market and Financial Situation.**—The records of the Stock Exchange as well as those of the Weather Bureau are evidence that the conditions characteristic of mid-summer prevail in Wall Street. The volume of business during the first three days of the week was smaller than for any corresponding period this year, averaging only a little over \$2,000,000 par value in bonds and 350,000 shares in stocks. Thursday and to-day, however, the markets were active and buoyant, stimulated by an increase in the dividend rate of Atchison preferred, by favorable railway earnings, by reports of good crop prospects in the West and Northwest, and by the easy money market.

Gold exports, which were noted as pending at the close last week, have continued, the total for the week, including \$3,000,000 to be shipped to-morrow, amounting to \$4,500,000. This movement seems not to be generally understood, and to have had little or no effect upon the security markets thus far, but if continued for any considerable length of time it naturally would affect both the security and money markets, and therefore the matter is regarded with interest. Reports from the spring-wheat belt are to the effect that although, because of the backward season, seeding was late, the crop now looks unusually well, the acreage is larger than last year, and an abundant harvest is predicted. The money market, as noted above, continues easy, and rates are at the low quotation noted last week.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 2 to 2½ per cent. To-day's rates on call were 2 to 2½ per cent. Prime commercial paper quoted 3 to 3½ per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £218,986, and the percentage of reserve to liabilities was 40·35, against 38·78 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows an increase of 5,900,000 francs in gold and 2,875,000 francs in silver.

The New York City Clearing-House banks in their statement of June 3 showed a decrease in the reserve held of \$1,134,000, and a surplus over the required reserve of \$42,710,600, against \$43,933,725 the previous week.

**Foreign Exchange.**—The market for foreign exchange was firm during the early part of the week, but is easier at the close. Little business is doing and quotations have been steady.

To-day's actual rates of exchange were as follows: Bankers' sixty days' sterling, 4 85½ @ 4 85½; demand, 4 87½ @ 4 88; cables, 4 88½ @ 4 88½; prime commercial, sixty days, 4 85½ @ 4 85½; documentary commercial, sixty days, 4 85½ @ 4 85½; grain for payment, 4 85½ @ 4 85½; cotton for payment, 4 84½ @ 4 84½; cotton for acceptance, 4 85½ @ 4 85½.

Posted rates of leading bankers follow:

	June 9	Sixty days.	Demand.
Prime bankers' sterling bills on London.	4 86½ @ 4 87	4 88½ @ 4 89	
Prime commercial.	4 85 @ 4 85½		
Documentary commercial.	4 84½ @ 4 85½		
Paris bankers' (francs).	5 18½ @ 18½	5 16½ @ 16½	
Amsterdam (guilder) bankers.	40½ @ 40½	40½ @ 40½	
Frankfort (reichsmarks) bankers.	94½ @ 94½	95½ @ 95½	

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling 75c. per \$1,000 premium; Charleston buying par, selling ½ premium; New Orleans, bank, \$1 00 premium; commercial, par; Chicago, 15c. per \$1,000 discount; St. Louis, par.

**United States Bonds.**—Sales of Government bonds at the Board include \$4,000 4s, comp., 125, at 130½; \$30,000 4s, reg., 1907, at 12½ to 112½; \$77,000 3s, comp., at 109½ to 109½; \$5,300 ditto (small bonds), at 109 to 109½, and \$12,000 3s, reg., at 109½ to 109½. The following are the daily closing quotations: for yearly range see seventh page following.

\*This is the price bid at the morning board; no sale was made.

**State and Railroad Bonds.**—Sales of State bonds at the Board are limited to \$2,000 Alabama class A at 112½ and \$2,000 Virginia fund. debt 2-3s of 1991 at 85½.

The railway bond market has been firm on limited transactions, in which high-grade bonds were very rarely mentioned. Several issues fractionally advanced, but a gain of a point in the active list was rare, and there were a few declines. The sensational feature of the week was an advance of 9 points in Tol. St. L. & Kan. C. trust receipts, on a report that bondholders have lately been bid 1 per cent for the privilege of calling their bonds at 130 at any time before Oct 15.

**Stock and Bond Sales.**—The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since January 1.

Total... 190,163	99,852	498,890	84,418	146,662	914,875

**Railroad and Miscellaneous Stocks.**—The stock market was weak on Monday, in sympathy with a decline of 7 points in American Sugar Refining. The bear element was in control, with very little opposition. On Tuesday the transactions were more limited than for many months, being less than 300,000 shares, and during the early hours the market was hesitating and irregular. Before the close on that day a strong undertone developed, which has continued, and the volume of business has materially increased, being nearly 630,000 shares on Thursday and 660,000 shares to-day. There was evidence of investment buying at the low prices. On Wednesday North West. showed an advance of 5 points from last week's closing quotations, and other granger and some of the trunk-line shares show substantial gains. The local traction stocks continue irregular, but all close higher than last week. Metropolitan Street Railway covered a range of nearly 12 points, Brooklyn Rapid Transit 7½ points, Manhattan Elevated 7 points and Third Avenue nearly 7 points. To-day's market was buoyant, and in nearly all cases the best prices of the week were recorded.

Professional operators are chiefly interested in the miscellaneous issues, with widely differing results, which is no doubt perfectly natural in view of the recent enormous increase in that class of stocks. To-day American Sugar Refining sold 18¾ points above Monday's low quotations, stimulated by an announcement of the regular dividend, of which there had been conflicting rumors. On the other hand, American Steel & Wire declined and Anaconda Copper showed a loss of over 5 points during the same period. Both stocks recovered to-day, however.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every **STEAM** railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

ROADS.		Latest Gross Earnings.		Jan. 1 to Latest Date.

**Latest Gross Earnings by Weeks.**—The latest weekly earnings in the foregoing are separately summed up as follows:

For the fourth week of May our preliminary statement covers 75 roads and shows 14.63 per cent increase in the aggregate over the same week last year. There were two Sundays in the week last year but only one the present year, thus giving an extra business day in 1899.

**Net Earnings Monthly to Latest Dates.**—The table following shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of May 20, 1899. The next will appear in the issue of June 24, 1899.

Roads.	Gross Earnings.		Net Earnings.

## STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all street railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

## ANNUAL REPORTS.

### Chicago Rock Island & Pacific Railway.

(Report for the year ending March 31, 1899.)

The annual report in pamphlet form has been issued this week, and the remarks of President W. G. Parry will be found on pages 1131 and 1136.

The comparative statistics for four years, made up in the usual complete form for the CHRONICLE, are given below:

OPERATIONS.	1897-98.	1898-99.	1899-00.	1900-01.
	1897-98.	1898-99.	1899-00.	1900-01.
Miles operated.....	3,619	3,569	3,571	3,571
Passengers carried.....	5,678,621	4,925,034	4,723,717	5,131,406
Passenger mileage.....	240,326,469	196,377,343	175,084,817	201,047,426
Rate per pass. p. m.	2.034 cts.	2.102 cts.	2.187 cts.	2.089 cts.
Freight (tons) carried.....	8,193,409	7,753,715	6,497,168	6,394,522
Freight (tons) 1 m.	11,452,386	11,421,433	11,175,517	11,078,846
Av. rate p. ton p. m.	0.99 cts.	0.97 cts.	0.96 cts.	1.03 cts.

\* Company's freight not included. † Three ciphers omitted.

### Dominion Coal Company, Limited.

(Report for the year ending Feb. 28, 1899.)

President Henry M. Whitney in the report says: "The increasing business of the company made it advisable to build an additional pier at Sydney, which has been done and charged to surplus for the year. It was also deemed advisable to provide increased facilities for banking coal during the winter, which has also been done. With the exception of some additional equipment for the railway, ordered but not yet delivered, all the expenditures necessary for mining and shipping the largely increased output have been made and paid for out of the surplus earnings within the last two years, without any increase in the capital account. Since the close of the fiscal year, Feb. 28, 1899, \$58,500 of the bonds of the company have been retired through the sinking fund, leaving the bonded indebtedness \$2,876,500. In addition to the increase in business expected from shipment to the United States during the coming year, the Canadian business promises to be much larger than ever before." The "Boston Transcript" reports that at the annual meeting last week President Whitney, referring to the plant of the New England Gas & Coke Co., said in substance:

The coke works were started at Everett on May 31, and by June 5 it was expected to have a number of ovens in operation. Of the 400 ovens 180 will be started at a time. Each 100 ovens takes 600 tons of coal per day, so that the ovens now built will take between 700,000

and 800,000 tons per annum. All the ovens are expected to be in blast by Sept. 1, according to the market for coke. It is believed that Montreal will take 800,000 tons this year against 690,000 tons last year. The Grand Trunk and Canadian Pacific take between 150,000 and 200,000 tons per year. The Boston & Maine would be glad to use it were it not for the smoke, but the coke will do away with the smoke. The mining of such a great amount of coal means a large reduction in the cost. There are hopes of a common stock dividend in the not far distant future.

Certain matters were not in shape to lay before the meeting and an adjournment was taken until June 15.

**Earnings and Balance Sheet.**—Earnings, etc., have been:

	1899.	1898.	1897.

**American Beet Sugar Co.—First Dividend.**—This company, whose office is at 33 Nassau Street, New York, has declared a dividend at the rate of 6 per cent per annum from April 18, 1899, to July 1, 1899, payable on the preferred stock at the aforesaid office on and after July 1. S. D. Schenck is Treasurer.—V. 68, p. 616.

**American Cereal Co.—Plan Abandoned.**—The plan to increase the capital stock to \$10,000,000 preferred and \$12,000,000 common, it is understood, has been abandoned.—V. 68, p. 821, 1073.

**American Chicle Co.—Incorporated.**—This company was incorporated at Trenton, N. J., on June 3, with a capital stock of \$9,000,000, of which one-third is to be 6 per cent cumulative preferred stock, to carry out the chewing gum consolidation already outlined in this column. The incorporators are Samuel B. Lawrence, John B. Summerfield, Henry C. Everdell and Armitage Mathews, all of New York, and James C. Young, of Jersey City.—V. 68, p. 1021.

**American Grass Twine Co.—Incorporated.**—The Secretary of State at Dover, Del., on June 8, issued a certificate of incorporation to this company for the manufacture and sale of twine of all kinds. The authorized capital stock is \$15,000,000.

**American Malting Co.—Elevators Purchased.**—The company has purchased for \$200,000 the elevators of the H. J. O'Neil Grain Co., thirty-four in number, situated on the Chicago Milwaukee & St. Paul, Chicago & North Western and Winona & Western railways.—V. 68, p. 522.

**American Pastry & Manufacturing Co.—Incorporated.**—This company on Wednesday filed articles of incorporation in the offices of the Clerk of Hudson County and the Secretary of State of New Jersey. The authorized capital stock is \$3,000,000, divided into \$1,000,000 of 7 per cent cumulative preferred and \$2,000,000 of common stock. The control of the company is vested exclusively in the holders of the common stock so long as dividends are paid in full on the preferred stock. The incorporators are Benjamin B. Van der Veer, George B. Hurst, Henry T. Quast, Charles Kling, Adolph Bopp, Isaac C. Bates, Raleigh B. Ijams, Henry C. Miner, Jr., Philip McK. Garrison and Wm. T. Hencken. Options, it is stated, have been secured on the American Pie Baking Co., the New England Pie Baking Co., the Manhattan Pie Baking Co., etc.

**American Pneumatic Service Co.—Lamson Consolidated Store Service Co.—Consolidation.**—The directors of the Lamson Consolidated Store Service Co. have arranged to purchase the Massachusetts Pneumatic Tube Co. and the International Pneumatic Service Co., and have adopted a plan for the consolidation of the three properties under the title of the American Pneumatic Service Co., with \$5,000,000 of 6 per cent preferred stock and \$10,000,000 of common stock, all in \$50 shares. The new company will control the franchise for the city of Boston and the mail service now in operation in that city. It will also control patents for England, France and Germany. Of its \$5,000,000 of preferred stock, \$1,000,000 is to be sold at par for cash to provide for the extension of the business, and the remainder is to be issued in connection with the purchase of its several properties. The present earnings of the different companies to be united are stated to be more than sufficient to pay 6 per cent dividends on the preferred stock to be issued by the new company. The directors of the latter are to include:

John Shepard, Benjamin W. Currier, George W. Armstrong, Henry M. Whitney, Oakes Ames, Arthur S. Temple, Samuel S. Sias, U. K. Pettigill and W. E. L. Dillaway.

In the consolidation the shareholders of the Lamson Consolidated Store Service Co. are to exchange each of their old shares (par \$25, total issue, \$1,641,925) for one \$50 share of new 6 per cent preferred stock and a bonus of \$25 in new common; in other words, for 200 per cent in new preferred and 100 per cent in new common. The Lamson stockholders are also given the privilege of subscribing to the 20,000 shares of new preferred stock referred to above at par, receiving one-half share of common as a bonus. The subscriber for this preferred stock will be required to pay on his subscription \$12.50 per share, the balance to be paid in three installments of \$12.50; calls for payment are not to be made oftener than once in sixty days. Holders of Pneumatic company common stock are recommended to pool their holdings for two years with the Boston Safe Deposit & Trust Co., voting power to be vested in Mr. Oakes Ames. Lamson certificates should be sent immediately to Treasurer Temple, who will issue receipts therefor. The American Pneumatic Co., it is expected, will begin the payment of 1 1/2 per cent quarterly dividends on the preferred stock in July, upon the completion of the proposed exchange. The \$1,000,000 new preferred stock offered at par has been underwritten. The last annual report of the Lamson Company was published in the CHRONICLE last week on page 1073.

[The above is given on the authority of Boston newspapers; we have been unable to get the data substantiated as expected.—Ed.]—V. 68, p. 1073.

**American Steel & Wire Co.—Dividend.**—Henry Seligman, of J. & W. Seligman, and a director of the company, stated yesterday that during the first four months of the present year the company has earned the full dividend for the entire year on the preferred stock and a large surplus for the common stock. Personally he is in favor of declaring a quarterly dividend of not less than 1 1/2 per cent on the common stock; also of having all the shares put upon the regular list of the New York Stock Exchange as soon after July 1 as it is practicable to complete the necessary inventories.—V. 68, p. 668.

**American Writing Paper Co.—Pending Consolidation.**—Regarding the fine-writing-paper consolidation which Dean & Shibley of Providence are promoting, the "Springfield Republican" says: "It is proposed to call the combination the American Writing Paper Co. It is to have a capital stock of \$12,500,000 7 per cent cumulative preferred and \$12,500,000 common stock, with \$17,000,000 first mortgage gold 5 per cent bonds. Of these securities, after the owners of the mills have taken what was called for in the payment for their properties, there will be offered for subscription \$12,000,000 first mortgage 5 per cent bonds, \$3,000,000 preferred stock and \$1,500,000 common stock. The option given upon the Whiting Paper Co.'s plant has not been closed, and expired June 1. The promoters, however, can still obtain 80 per cent of the fine-writing-paper mills with the Whiting interests and other mills not yet included, on the outside. The general declaration has been that 80 per cent of the mills was to be included on or before Nov. 1.

"The list of the mills to be included appears to be withheld from would-be investors. It can probably be accepted as a fact, however, that the following is an accurate list of

the mills (with their daily productive capacity in tons) to be considered in the original combination, now that the Whiting Paper Co. is outside:

Holyoke—Albion, 20; Beebe & Holbrook, 14; Connecticut River, 6; Crocker, 20; George R. Dickinson Co., 25; Geo. C. Gill Co., 20; Holyoke, 8; Linden, 15; Massasoit, 6; Norman, 13; Parsons No. 1, 10; Riverside, 20; Valley, 6; Waukegan, 8.

Other Massachusetts mills—Agawam Paper Co., 12, and Mittineague Paper Co., 4, at Mittineague; Benton Bros., Lee, 4; Hubert Co., South Lee, 4; Chapin & Gould, 5, and Chester Paper Co., 3, at Huntington; Keith Paper Co., Turners Falls, 9; Springdale Paper Co., Westfield, 3; Woronoco Paper Co., Fairfield, 6.

Connecticut mills—Oakland Paper Co., Manchester, 4; Plattner & Porter Co., Unionville, 3; Seymour Paper Co., Windsor Locks, 10.

Other mills—Bardeen Paper Co., Otsego, Mich., 20; D. M. Bare & Co., Roaring Springs, Pa., 18; Bryant Paper Co., Kalamazoo, Mich., 30; Columbian Paper Co., Buena Vista, Va., 6; Fox River Paper Co., Appleton, Wis., 12; George H. Friend Paper Co., West Carrollton, O. (Eagle and Carrollton mills), 12; Gilbert Paper Co., Menasha, Wis., 22; W. C. Hamilton & Sons, William Penn., Pa., 25; Harding Paper Co., Franklin, O., 13; Jackson Paper Co., Jackson, Mich., 3; Morrison & Cass Paper Co., Tyrone, Pa., 25; Plover Paper Co., Menasha, Wis., 20; Shattuck & Babcock Paper Co., De Pere, Wis., 16; Syma & Dudley Paper Co., Watervliet, Mich., 12.

"It will also be seen that the Crane mills of Dalton, the Hampshire and Carew companies of South Hadley Falls, the Southworth Company and the Worthy Paper Co. of Mittineague are not included."

**Atchison Topeka & Santa Fe Ry. Co.—Dividend Increased.**—The directors on Wednesday declared a semi-annual dividend of  $1\frac{1}{4}$  per cent on the \$114,199,500 preferred shares, being an increase of  $\frac{1}{4}$  of one per cent over the first dividend, paid in January. The directors issued the following:

"Whereas, it appears from returns and careful estimates that the surplus net earnings of the company for the fiscal year ending January 30, 1899, after deducting all charges and the full interest on the adjustment bonds, and after setting apart a reasonable sum as a reserve, are sufficient to pay a semi-annual dividend of  $1\frac{1}{4}$  per cent on the preferred stock in July, and another dividend of  $1\frac{1}{4}$  per cent in January next, making  $2\frac{1}{2}$  per cent out of the surplus net earnings of the fiscal year ending June 30, 1899; therefore, be it

"Resolved, That a semi-annual dividend of \$1.25 per share on the preferred stock of the company be and is hereby declared out of the surplus net earnings, payable on July 20, 1899, to the holders of the preferred stock as registered at the close of the transfer books of the preferred stock on June 30, 1899; and that the transfer books for the preferred stock of the company be closed from the close of business on June 30, 1899, until ten o'clock A. M. on July 21, 1899."

The  $2\frac{1}{2}$  per cent for the year will require about \$2,855,000. —V. 68, p. 1023.

**Brooklyn Rapid Transit Co.—Taxes.**—Comptroller Coler last week gave formal notice of his intention to bring suit to recover the amount claimed by him to be due from various companies included in the Brooklyn Rapid Transit System as percentages of their gross earnings, viz.:

Brooklyn Heights RR. Co. from commencement of operations to Sept. 30, 1898.

Brooklyn City RR. extensions, Sept. 30, 1892, to Sept. 30, 1898.

Bushwick Avenue RR. extensions, Sept. 3, 1892, to Sept. 30, 1898.

Greenpoint & Lorimer Street Ry., Sept. 30, 1892, to Sept. 30, 1898.

Calvary Cemetery Greenpoint & Brooklyn RR. Co., from Sept. 30, 1892, to and including Sept. 30, 1898.

Brooklyn Queens County & Manhattan RR. Co., an extension granted to Broadway RR. Co., from the commencement of operations on said extensions to and including Sept. 30, 1898.

This demand is based on the provisions of chapter 252 laws of 1894, chapter 642 laws of 1896, Article IV, chapter 565 laws of 1890, and in addition, as regards the extensions of the Brooklyn City RR. and the Brooklyn RR., on the stipulation that "whenever the gross receipts of the said extensions amount to \$20,000 or less per mile, 1 per cent; over \$20,000 and less than \$40,000 per mile, 2 per cent, and over \$40,000 per mile, 3 per cent," shall be paid to the city. Secretary T. S. Williams, of the Brooklyn Rapid Transit Co., states that the company has been advised by counsel that it owes no money to the city. "We pay," he says, "about \$10,000 per year to the State in percentages on gross earnings and in other taxes between three and four thousand dollars a year. We have no disposition to shirk our share of the public burden, but we are not going to pay any more than we are legally compelled to pay. Thus far we have never resisted a tax assessment case in the courts without winning it."—V. 68, p. 975.

**Buffalo Rochester & Pittsburg Ry.—Equipment Bonds.**—The company has made an agreement in favor of the Guaranty Trust Co., as trustee, to secure an issue of \$500,000 twenty-year equipment gold bonds. The bonds, none of which have yet been issued, will be  $4\frac{1}{2}$  per cent gold bonds of \$1,000 each, known as "Series A." They are not subject to call, but a sinking fund of 5 per cent annually is to be applied to their purchase, when possible, at or below par; otherwise to the purchase of additional equipment to be subject to their lien. Bonds so purchased shall be canceled. The series has no lien upon the road.—V. 68, p. 870.

**Canadian Pacific Railway.—New Securities.**—The London Stock Exchange has admitted to quotation £467,191 additional 4 per cent perpetual consolidated debenture stock and £2,225,000 additional 4 per cent preference stock. The amounts of these issues recently reported on the London list was £9,463,535 and £3,020,000 respectively; adding the securities now listed makes a total of £20,951,000 preference stock (the same as shown in the last annual report) and £48,329,533 consolidated debenture stock, an increase since Jan. 1, 1899, of about \$267,000.—V. 68, p. 977.

**Central RR. of New Jersey.—New Officers.**—George F. Baker, the President of the First National Bank, has been elected Chairman of the Executive Committee, and Charles H. Warren, First Vice-President.—V. 68, p. 1022.

**Chicago City Ry.—New Stock.**—The transfer books will be closed from June 16 to June 20, inclusive, in connection with the issue of \$1,000,000 new stock, part of the \$2,000,000 authorized at the last annual meeting. The new stock will be issued July 1 to holders of stock at the close of business June 15, and it must be paid for at par on or before July 1.—V. 68, p. 725.

**Chicago & Eastern Illinois RR.—Annual Meeting—Dividend.**—At the annual meeting on Thursday a dividend of 2 per cent was declared on the common stock, payable July 1. This makes, with the  $1\frac{1}{2}$  per cent paid in January last,  $3\frac{1}{2}$  per cent for the fiscal year. The first dividend on the common stock was  $2\frac{1}{2}$  per cent paid July 1, 1898. For the latest statement of earnings, see earnings department.—V. 68, p. 771.

**Chicago Great Western Ry.—Called Bonds.**—The Chicago St. Paul & Kansas City Ry. 5 per cent prior lien bonds of 1889, aggregating \$2,823,150, have been formally called for payment at 105, on Jan. 1, 1900, at the office of the Merchants' Trust, Limited, 63 Cornhill, London, E. C. See V. 68, p. 669.—V. 68, p. 976.

**Chicago Union Traction Co.—West Chicago Street RR.—North Chicago Street RR.—Leases.**—The leases authorized last week provide for the payment by the Chicago Union Traction Co. of a rental equal to 12 per cent yearly on the \$7,920,000 stock of the North Chicago Street RR. and 6 per cent yearly on the \$13,189,000 stock of the West Chicago Street RR. The leases are dated June 1. In the case of the North Chicago the rental named calls for a quarterly payment of \$237,600 (\$950,400 per annum), to be made on the 15th of July, October, January and April in each year, beginning July 15, 1899; also the cost of maintaining the corporate existence of the grantor, not to exceed \$3,000 a year. In the case of the West Chicago the quarterly payment is \$197,835 (equal to \$791,340 per annum), to be paid the 20th day of each August, November, February and May, beginning Aug. 20, 1899. President Yerkes spoke as follows at the meeting of North Chicago stockholders:

The Chicago Union Traction Co. has made a proposition to the North Chicago Street RR. Co. to lease its property for a long term of years and to pay the North Chicago stockholders a dividend of 12 per cent a year. The lease provides that there shall be placed in trust as security for this lease, and for that from the West Chicago Street RR. Co., securities of those companies of the value of \$10,000,000. The Traction Company will also have \$2,000,000 in cash, which will be used for improvements and extensions of the systems and whatever other matters are necessary for extending the street railroad properties. So there will be really \$12,000,000 behind the leases. The Traction Company will have a capital of \$12,000,000 preferred and \$20,000,000 common stock, and the preferred stock will be paid for at par, the proceeds being this \$12,000,000 spoken of. It is provided that the \$10,000,000 of securities shall remain in trust for all time as security for these leases. The trust agreement provides that if there be default in the guaranteed dividend at any time, so much of this deposited stock as necessary may be sold to make up the deficit. The leases to be authorized to-day will not be turned over to the Traction Company until they deposit the \$10,000,000 of securities, raise the \$2,000,000 of cash and in all respects comply with their bargain.

The Traction Company covenants to keep all property in good repair and condition and to deliver the same at the end of the lease in as good condition as when it was taken over, ordinary wear and tear excepted. The Traction Company may sell real estate belonging to the lessor companies, the proceeds to be put in trust and to be expended for other real estate or to be applied to payment of the indebtedness of the corporation whose real estate is sold.

The Chicago Union Traction Co. was incorporated in Illinois on June 3 with authorized capital of \$32,000,000, of which \$12,000,000 is preferred and \$20,000,000 common stock.—V. 68, p. 1075.

**Cleveland Akron & Columbus RR.—New President.**—James McCrea, of Pittsburgh, has been elected President of this road, now controlled by the Pennsylvania Railroad.—V. 68, p. 1075.

**Colorado Midland Ry.—Buck Tunnel Ry.—Settlement.**—An agreement has finally been reached between the Colorado Midland and the Buck Tunnel bondholders. The Tunnel bonds, aggregating \$1,250,000, are to be exchanged for the Colorado Midland 2-3-4s, bond for bond. The Tunnel bondholders are also to receive in cash 4 per cent interest, less legal expenses, for the period of the receivership, estimated at \$140 to \$150 per bond. This latter payment is in settlement of the judgment for \$176,000 obtained by the Tunnel Co. against the Midland for rental. The money has been held by the Trust Co. pending negotiations, and under the settlement just reached about \$91,000, representing 4 per cent interest, goes to the Tunnel bondholders and the remaining \$85,000 will be returned to the Midland treasury. The Colorado Midland bonds will be ready for the exchange, it is expected, about the 16th inst. Bonds numbered from 7301 to 8350 and stamped interest reduced to conform to the present 2-3-4s, will be used for the purpose of exchange. The original proposition of the reorganization plan was to give the Tunnel bonds the 4 per cents and 50 per cent in preferred stock.—V. 67, p. 1159, 1169.

**Consolidated Lake Superior Co.—Listed in Philadelphia.**—The Philadelphia Stock Exchange has listed the company's \$14,000,000 common stock, par value \$50, full paid; and also \$4,500,000 Provident Life & Trust Company receipts, \$5 paid, issued against a like amount of preferred stock. The prospectus was cited last week.—V. 68, p. 1075.

**Consolidated Water Supply Co. of Scranton, Pa.—\$1,000,000 Bonds.**—The Scranton "Tribune" says: The Consolidated Water Supply Co., Joseph J. Jermyn, President, George B. Jermyn, Secretary, decided at a meeting held March 21 last to issue bonds to the amount of \$1,000,000. The trustee will be the County Savings Bank & Trust Co. of this city. The bonds will be of the denomination of \$1,000, bearing 5 per cent interest, maturing May 1, 1929, and payable in gold coin of the present standard. The bonds are secured by the charter, franchise, rights and property of the company.

**Connecticut Lighting & Power Co.—Acquired.**—Mr. A. M. Young, of Waterbury, Conn., is quoted as saying:

The Central Railway & Electric Co., of New Britain; the Waterbury Traction Co., of Waterbury; Naugatuck Electric Light Co., of Naugatuck; Norwalk Gas Light Co., Norwalk & South Norwalk Electric Co., the Greenwich and the Housatonic Power Co., have been purchased by R. A. C. Smith and his associates, who represent a strong syndicate of New York capitalists. It is their purpose to turn these properties over to the Connecticut Lighting & Power Co. The purchase, together with the improvements and extensions contemplated, will represent an expenditure of about \$8,000,000. The development of the Housatonic Power Co., on the Housatonic River, will contemplate the delivery of about 30,000 horse power in electric power through these various companies, which will be absorbed in the one company. This power is so centrally located that it can be readily and economically delivered to all the cities in the southern and western portions of the State of Connecticut.

The new combination has already issued bonds covering certain unmortgaged interests and equities above mortgages.—V. 68, p. 1075.

**Cumberland Telephone & Telegraph.—Control of Ohio Valley Telephone Co.**—James E. Caldwell and associates of Nashville, who control the Cumberland Telep. & Tel. Co., have purchased a majority of the stock of the Ohio Valley Telephone Co. of Louisville. The capital stock of the Ohio Valley Company is \$550,000, represented by 5,500 shares. The majority interest, it is stated, cost the purchasers \$200 per share. Mr. Caldwell, who has been elected President of the Ohio Valley Company, says that hereafter the connections between the two companies will be more complete.—V. 68, p. 473.

**Dallas (Tex.) Rapid Transit Ry.—New Bonds.**—The stockholders have authorized an issue of \$100,000 bonds, payable in thirty years from May 1, 1899, to pay for the property acquired from W. F. Thayer and associates and for other purposes. The bonds, it is said, will bear interest at the rate of 8 per cent per annum. The Massachusetts Loan & Trust Co. of Boston is to be trustee for the bondholders.—V. 67, p. 1003.

**Detroit & Toledo Shore Line RR.—New Mortgage.**—The company has filed a mortgage for \$3,547,500. The Detroit & Toledo Shore Line was incorporated in Michigan April 14, 1899, with \$1,500,000 capital stock, to construct the projected Pleasant Bay Ry., and to extend to Detroit on the north, and to purchase the Toledo & Ottawa Beach Ry. on the south, forming a complete line from Detroit, Mich., to Toledo, O. The consolidation of the Toledo & Ottawa Beach and the Detroit & Toledo Shore Line railroads was recently effected. C. N. Haskell is the principal promoter of the enterprise.

The purposes for which the \$3,547,500 of bonds may be leased, it is said, are stated as follows:

Thirteen miles from Detroit to Trenton, \$364,000; 40 miles from Trenton to Toledo, \$720,000; equipment, \$560,500; purchase of Ottawa Beach Ry., \$100,000; additional spurs, \$100,000; 6-mile spur, \$78,000; terminals at Toledo, \$300,000; double track, \$954,000; equipment and working capital, \$371,000; total, \$3,547,500.

Mention is made also of a mortgage for \$100,000 in favor of the Illinois Trust & Savings Bank of Chicago, as trustee, to secure an issue of 5 per cent bonds running 50 years. This instrument presumably applies to the Toledo & Ottawa Beach division, but whether to secure divisional bonds or, as seems more probable, to extend the lien of the other mortgage, does not certainly appear.

**Detroit Grand Rapids & Western RR.—Refunding.**—The \$770,000 of Iowa & Lansing first 5s due July 1 will be paid at that date and replaced by Detroit Grand Rapids & Western 4s of 1897 due April 1, 1946. The latter loan will then be a direct first mortgage on the entire property. The total total authorized issue is \$6,000,000, of which \$5,379,000 will be outstanding after July 1. The remainder of the authorized issue is reserved for additions.—V. 68, p. 1024.

**Detroit Street Railways.—Municipal Railway.—Franchise.**—On June 6 the Street Railway Commissioners of Detroit, individually as incorporators of the prospective Detroit Municipal Railway, made formal application to the City Council for a franchise. The ordinance submitted provides for a thirty-year franchise to be utilized as security for a bond issue to cover the purchase price of the roads, say from \$16,000,000 to \$17,500,000. An extension of eighteen years is authorized if the bonds should not be paid during the thirty years. The Commissioners agree to convey the properties and franchises to the city whenever its right to hold the same has been established, subject only to the lien of the aforesaid bond issue. Quarterly reports of receipts and expenditures are to be made to the Common Council. It is believed the ordinance will pass. A decision of the Supreme Court upon the validity of the law under which the Commissioners were appointed is expected shortly.—V. 68, p. 1023.

**Easton Consolidated Electric Co.—Bonds Offered.**—Properties Acquired.—Edward B. Smith & Co., of Philadelphia, have sold \$300,000 of the company's issue of \$880,000 of col-

lateral trust 5 per cent, fifty-year gold bonds and offer the unsold balance at 102½ and accrued interest from May 1. The authorized issue is limited to \$1,300,000, but the remaining \$420,000 bonds can be issued only in exchange for, or upon the retirement of, bonds now outstanding of the Easton Transit Co., the Pennsylvania Motor Co., and the Easton & Bethlehem Transit Co., aggregating an equal amount. The firm says:

The company owns control of the Easton Transit Co. and of the Edison Illuminating Co. of Easton, Pa., and has since acquired by purchase the Easton Palmer & Bethlehem Street Railway Co., connecting it with Bethlehem, and giving it control of the entire street railway systems of Easton and Phillipsburg, including the entrance to Easton from both the East and West. The issue of collateral trust bonds has been made to defray part of the cost of acquiring the stocks of these constituent companies, and is secured by a deposit of those stocks with the Girard Trust Company of Philadelphia. The annual interest charge on the issue is \$4,000, and the net earnings of the Transit Co. and the Edison Company for 1898, separately operated, were in excess of \$64,000, as certified by our expert accountants. The business is now largely in excess of that of last year, and it is estimated that the earnings applicable to the interest on these bonds for the current year will certainly exceed \$80,000. There will have been \$300,000 paid in on this stock of the Consolidated Company by the 15th instant, and this stock commands a premium in the market.

The Girard Trust Co., as trustee for the bondholders, holds as security for the new loan:

Edison Illuminating Co., \$287,500 of the \$300,000 capital stock; Easton Transit Co., \$287,500 of the \$300,000 capital stock; Pennsylvania Motor Co., \$95,000 of the \$120,000 capital stock; Easton & Bethlehem Transit Co., \$107,000 of the \$125,000 capital stock.

The second installment of \$5 per share, making the 30,000 shares (of \$50 each) \$10 paid, is called for payment June 15. We are informed that the newspaper reports of pending negotiations for the acquisition of the Allentown & Lehigh Valley Traction Co. were incorrect.—V. 68, p. 976.

**Edison Electric Illuminating Co. of New York.—New York Gas & Electric Light Heat & Power Co.—New Securities Ready.**—The New York Gas & Electric Light Heat & Power Co. is now ready to deliver through the Central Trust Co. purchase money mortgage bonds in exchange for the certificates of deposit representing the stock of the Edison Electric Illuminating Co. of New York.—V. 68, p. 525.

**Electrical Lead Reduction Co.—Incorporated.**—This company has been incorporated under the Laws of Delaware, with \$12,000,000 authorized capital stock, consisting of preferred, \$2,000,000; common, \$10,000,000. The shares are of \$50 par value. Reduction works at Niagara Falls; office, Drexel Building, Philadelphia. President, Pedro G. Salom; Vice President, Henry G. Morris; Secretary and Treasurer, F. H. Deacon. The directors are:

Pedro G. Salom, Henry G. Morris; Samuel R. Shipley, President Provident Life & Trust Co., Philadelphia; W. W. Gibbs, President Marsden Co., & Co.; E. J. Mathews, J. W. Cox, Vice President Anti-Kamla Co.; James L. Walcott, Delaware director.

Wm. Bracken, of 71 Broadway, New York, is interested.

**Electric Storage Battery.—Annual Meeting.—Retirement of Bonds.**—At the annual meeting on Thursday President Isaac S. L. Rice stated that the company had taken a 5 12ths interest in the \$5,000,000 capital stock of the Columbia Electric Vehicle Co., recently organized (V. 68, p. 926) to consolidate the vehicle manufacturing business of the Pope Manufacturing Co., the Electric Vehicle Co. and the Electric Storage Battery Co. This action was approved by the stockholders, as was also an arrangement to pay off the \$450,000 bonds of the Electric Storage Co., which are redeemable at 90. It is claimed the company holds in its treasury securities appraised at \$8,750,000, including treasury stock and stocks of the Electric Vehicle and Columbia & Electric Vehicle companies. For the year ending May 31, 1899, it is stated the gross results were \$2,387,050, and the net profits, \$260,000 after paying all charges, including depreciation. For the first five months of 1899 gross earnings it is said, were \$1,360,560, as against \$314,498 for the same period of 1898. For the year ended Dec. 31, 1897, gross were \$959,033, net \$257,744.—V. 68, p. 976.

**Essex Union Water & Light Co.—Mortgage for \$500,000.**—This company, recently incorporated in New Jersey with \$500,000 capital stock, by Carroll P. Bassett of Summit, Fred. R. Drake of Easton, Pa., and Frederick Green of Summit, has made a mortgage to the Farmers' Loan & Trust Co. of New York, as trustee, to secure \$500,000 of 5 per cent twenty-five-year bonds. The new bonds, it is stated, will be used to make part payment for the following properties, possession of which has been acquired: Commonwealth Water Co., South Orange Heights Water Co., Mountain Electric Co., Mountain Water Co., West Orange Water Co., and all but two shares of the Clinton Water Co. Frederick R. Drake is President of the new concern.

**Gas Self-Lighting Company of America.—United Gas Improvement Co.—New Enterprise.**—The Gas Self-Lighting Co. was incorporated under the laws of New Jersey in April last with a capital stock of \$1,500,000, the promoters being the United Gas Improvement Co. The directors include Col. Barrows (President of the Welsbach Light Co.), Randall Morgan, Thomas Dolan, Samuel T. Bodine, John J. MacIntire, and John M. Devlin, all of whom are directors of the United Gas Improvement Co. and the Welsbach Commercial Co. The new company is formed with the object of working the patents throughout the United States of the Matchless Gas Lighting Syndicate, Limited, of 91, 93, 95 Queen Victoria Street, London, E. C.—V. 68, p. 924.

**Great Northern Ry.—Listing.**—The New York Stock Exchange has been asked to list \$15,000,000 additional preferred stock, making total amount on list \$59,369,000.—V. 68, p. 976.

**Hanover Street Railway.—New Consolidation Proposed in Massachusetts.**—The Hanover Street Railway Co. is planning to absorb various other companies operating in Plymouth County, Mass., including the following: Hingham Street Railway, Rockland & Abington Street Railway, Bridgewater Whitman & Rockland Street Railway and Braintree & Weymouth Street Railway Co. The Massachusetts Railroad Commissioners on June 6 considered the proposition of the companies to consolidate with a capitalization of \$1,319,000 equally divided into stock and bonds; this capital being the same as the present outstanding capital of the various companies. The board held that the roads can only be amalgamated when there shall have been a purchase of the franchises and property of the various constituent companies; otherwise a direct consolidation is illegal, as the statutes do not permit consolidation of street railways except there is a physical connection of one road with another.

**Hudson River Telephone Co.—New Stock.**—A circular to stockholders makes in substance the following announcement: The company's stock, now held for it in trust, will be offered at par to stockholders of record on June 1 in the proportion of one share for each 14 shares now held.

**Indiana Illinois & Iowa RR.—Increase of Stock.**—The stockholders will meet on June 20 to vote on a proposition to increase the capital stock from \$4,000,000 to \$6,000,000. There is some opposition to the proposed issue.—V. 67, p. 949.

**Lake Shore & Michigan Southern Ry.—Listing.**—The New York Stock Exchange has been asked to list \$2,376,000 additional 3½ per cent bonds of 1997, making the total amount on the list \$30,542,000.—V. 68, p. 977.

**Lowell Lawrence & Haverhill Street Ry.—Called Bonds.**—The following first mortgage bonds have been drawn for payment, viz.: Nos. 68, 97, 315, 448, 493, 527, 630, 793, 842, 916, 1027, and will be paid at 105 and accrued interest upon presentation at the American Loan & Trust Co., 53 State Street, Boston, on and after July 31, 1899.—V. 68, p. 672.

**Metropolitan Street RR. of Washington, D. C.—Second Mortgage.**—The stockholders were to vote on Saturday last to place a second mortgage on the property to secure certificates of indebtedness to the amount of \$500,000 issued in 1896 and 1897. When the recent change in the control of the property took place, it was agreed these certificates should be thus secured.—V. 68, p. 824.

**Metropolitan West Side Elevated Railway of Chicago.—New Directors.**—The new board of directors elected June 2 is as follows:

Dickinson MacAllister, W. W. Gurley, Byron L. Smith, George B. Harris, John P. Wilson, George Higginson Jr., of Chicago; C. F. Dietrich, R. B. Hays, James J. Higginson, of New York.

The daily average passenger traffic for the first five months of 1899 was about 76,000, against 65,849 for the same period of 1898, a gain of 14 per cent.—V. 68, p. 773.

**Mexican Central Ry.—Listing.**—The New York Stock Exchange has been asked to list \$500,000 additional consolidated mortgage 4 per cent bonds, making total amount listed to date \$59,511,000.—V. 68, p. 868, 874.

**Michigan-Peninsular Car Co.—Notice to Bondholders.**—F. J. Lisman & Co. ask the bondholders to co-operate with them in resisting the calling in of the bonds under the default clause of the mortgage. See advertisement on another page, and item in V. 68, p. 928.

**Nashville Railway.—Transfer of Citizens' Company.**—Capt. T. M. Steger, President of the Citizens' Rapid Transit Company, on June 1 issued an order formally transferring this property to E. G. Connette, General Manager of the Nashville Ry., which recently purchased this property, the Nashville Street Ry. and the Nashville & Suburban Ry. Hambleton & Co. now own all of the street railway properties in the city and the Cumberland Electric Light & Power Co.—V. 68, p. 977.

**National Steel Co.—First Dividend.**—The company has declared its first dividend of 1¼ per cent on the preferred stock, payable June 30 to stockholders of June 16.—V. 68, p. 928.

**New England Gas & Coke Co.—To Begin Operations.**—In connection with the report of the Dominion Coal Co., on a preceding page, are some interesting remarks by President Whitney touching this company's plant.—V. 68, p. 85.

**New Orleans Brewing Association.—Foreclosure Sale July 14.**—The foreclosure sale has been set for July 14. The syndicate headed by Alexander Konta of St. Louis, which recently consolidated the seven independent breweries of New Orleans, expects to appear as a bidder at the sale.—V. 68, p. 1025.

**Newport News Abattoir Co.—Directors.**—Directors are: Dr. L. S. Filbert, John Schmidt, C. E. Gelker, Jr., Arthur R. Huey, E. S. Palmer, C. W. Harvey, C. P. Reese, all except Mr. Harvey residing in Philadelphia.

E. S. Palmer is President and C. W. Harvey, Secretary and Treasurer.—V. 68, p. 1077.

**New York Electric Brake & Coupler Co.—New Enterprise.**—This company, whose New York office is at 30 Broad Street, was incorporated under the laws of New Jersey April 24 with capital stock of \$1,000,000, divided into 10,000 shares of \$100 each, all "full paid and non-assessable." The

Registrar of Stock is the New Jersey Registration & Trust Co. The company makes the following statement: Owns brakes, couplers and other appliances for railroad and traction cars, value \$225,000; contracts pending with Canadian and American steam and electric lines for the adoption of the company's appliances as soon as same can be manufactured in sufficient quantities. Representatives of company now arranging for the installation of machinery in factory at Winfield, Conn., for which purpose ample subscriptions to the Treasury stock have been received. Sufficient business immediately obtainable to justify expectation of handsome dividends on the stock of the company from the first year's operations. The officials are as follows:

President, Frank T. Morrill, of Geo. H. Morrill & Co., New York; Vice President, Alex. F. W. Leslie, New York; Secretary and Treasurer, George M. Palmer, formerly Superintendent of Agents, New England Branch for the N. Y. Life Insurance Co., Boston, Mass.

**Niagara Falls Power Co.—Annual Election.**—At the annual meeting of the Niagara Falls Power Co., on the 6th inst., the Cataract Construction Co. turned over the operation of the plant to the Niagara Falls Power Co. The directors elected are:

Edward D. Adams, John Jacob Astor, George Bowdoin, Charles F. Clark, Charles Lanier, Joseph Laroque, D. O. Mills, William B. Rankine, Francis Lynde Stetson, F. W. Whitridge and Edward A. Wickes.—V. 64, p. 234.
